CHAIRMAN'S STATEMENT

Dear Shareholders,

In the first half of 2017, world economy continued to show signs of recovery, and China's economy sought progress while maintaining stability. International oil prices remained volatile and the factors of uncertainties increased. Against such adversities, CNOOC Limited continued to forge ahead, stepped up its efforts in reform and innovation, strived to seek opportunities for future development, and achieved satisfactory performance in the first half of the year.

Focusing on quality and efficiency enhancement with an emphasis on value-driven exploration, the Company made 13 new commercial discoveries and drilled 12 successful appraisal wells in offshore China during the first half of the year. Over the past two years, the Company has successfully added a considerable amount of reserves through prioritizing exploration in mature areas and implementing rolling exploration in existing oil fields. In addition, remarkable results were achieved from exploration in new areas. During the period, the Company made breakthroughs in shallow oil and gas exploration in Bozhong 36-1 and achieved significant progress in exploration in Wushi Sag, identifying a new growth driver for reserves replacement.

The Company continued to expand its overseas exploration to further strengthen its global strategic presence. Oil and gas resources were discovered in all four exploration wells in Stabroek Block. For the Libra project, successful results were achieved in all appraisal wells in the northwest area, including the NW7 well. These high-quality and large-scale projects laid a strong foundation for the Company's future reserve and production. In addition, the Company has stepped up its efforts in the acquisition of overseas exploration blocks to support its global development strategies.

Increasing profitability-oriented production has been a key focus point of the shareholders as well as the Company. At the beginning of the year, the Company set its full-year target as 450-460 million barrels of oil equivalent. During the first half, the Company ensured efficient oil and gas operation, and successfully accomplished its production target, achieving a net production of 237.9 million barrels of oil equivalent. To date, four out of the five new projects planned for 2017 have already commenced production.

In view of the pressure brought about by persistently low oil prices, the Company continued to be well prepared and strengthened its refined management and achieved effective cost control. For the first half of the year, all-in cost dropped to US\$31.74 per BOE, representing a decrease of 9.0% year-on-year. The operating expenses dropped to US\$7.16 per BOE, down by 3.5% year-on-year. The fact that costs decreased for four consecutive years again demonstrated the Company's ability to reshape its cost competitiveness and to maintain such competitive position.

The Company has achieved satisfying profitability and a sound financial position during the first half of the year. Oil and gas sales reached RMB74.94 billion, representing a year-on-year increase of 36.1%. Net profits reached RMB16.25 billion and earnings per share amounted to RMB0.36. The Board of Directors has declared an interim dividend of HK\$0.20 per share (tax inclusive) for the first half of 2017 by taking into account the Company's financial position and in accordance with the dividend policy of the Company.

Consistent with its policy of reform and innovation, the Company has continued to refine its management system, enhance its governance, establish a healthy employment mechanism, and improve the competitive advantages of talent. This year, the Company held a scientific and technological innovation contest for the first time, stepping up its efforts in scientific and technological innovation and accelerating the pace of turning technological progress into results.

The Company has always attached great importance to health, safety and environmental protection. In the first half of the year, the Company strengthened its offshore operations management and investigations of potential problems. Precaution for adverse weather such as typhoons were effectively implemented in order to ensure the safe and steady progress of its key projects.

Looking forward to the second half of the year, the global oil market is expected to face short-run adjustments and long-run transition. International oil prices may continue to hover at low level for an extended period. In view of this, the Company will continue to improve quality and enhance efficiency, optimize its asset portfolio, and strengthen its cost control. It will push forward with boosting production and increasing reserves of oil and gas so as to ensure that its full-year production and operational targets are achieved.

The Company will continue to strengthen its risk management efforts to prevent major accidents and risks. It will minimize any negative impacts on oil and gas operation, strengthen the execution of its safety policies, and promote the safety culture.

Dear shareholders, while sustained low oil prices is a challenge, the situation also presents an opportunity for the Company. The Company has continued to hone its risk-resistant capabilities while maintaining a high level of governance and profitability. As a Chinese saying goes, “A pine tree can stand firmly on a mountain because its roots have been deeply planted in the cracks of the rocks”. Forging ahead, the Company will continue to move steadily ahead towards its set goals and create greater value for the shareholders.

NOTES

30 JUNE 2017

(All amounts expressed in millions of Renminbi, unless otherwise stated)

1. BASIS OF PREPARATION AND ACCOUNTING POLICIES

Basis of preparation

The interim condensed consolidated financial statements for the six months ended 30 June 2017 have been prepared in accordance with International Accounting Standard 34 *Interim Financial Reporting* and Hong Kong Accounting Standard 34 *Interim Financial Reporting*.

The interim condensed consolidated financial statements do not include all the information and disclosures required in the annual financial statements, and should be read in conjunction with the Group's annual financial statements for the year ended 31 December 2016.

The financial information relating to the year ended 31 December 2016 that is included in this interim report as comparative information does not constitute the Company's statutory annual consolidated financial statements for that year but is derived from those consolidated financial statements. Further information relating to these statutory financial statements required to be disclosed in accordance with section 436 of the Hong Kong Companies Ordinance is as follows:

The Company has delivered the consolidated financial statements for the year ended 31 December 2016 to the Registrar of Companies as required by section 662(3) of, and Part 3 of Schedule 6 to, the Hong Kong Companies Ordinance.

The Company's auditor has reported on those consolidated financial statements. The auditor's report was unqualified; did not include a reference to any matters to which the auditor drew attention by way of emphasis without qualifying its reports; and did not contain a statement under sections 406(2), 407(2) or (3) of the Hong Kong Companies Ordinance.

Significant accounting policies

The accounting policies adopted in the preparation of the interim condensed consolidated financial statements are consistent with those followed in the preparation of the Group's annual financial statements for the year ended 31 December 2016. The adoption of amendments to International Financial Reporting Standards/Hong Kong Financial Reporting Standards for the current interim period commenced from 1 January 2017 does not have any material impact on the accounting policy adopted, interim financial position or performance of the Group.

2. OIL AND GAS SALES AND MARKETING REVENUES

Oil and gas sales represent the invoiced value of sales of oil and gas attributable to the interests of the Group, net of royalties, obligations to governments and other mineral interest owners. Revenue from the sale of oil and gas is recognised when the significant risks and rewards of ownership have been transferred, which is when title passes to the customer. Revenue from the production of oil and gas in which the Group has a joint interest with other producers is recognised based on the Group's working interest and the terms of the relevant production sharing contracts. Differences between production sold and the Group's share of production are not significant.

Marketing revenues principally represent the sales of oil and gas purchased from the foreign partners under the production sharing contracts and revenues from the trading of oil and gas through the Company's subsidiaries. The cost of the oil and gas sold is included in "Crude oil and product purchases" in the interim condensed consolidated statement of profit or loss and other comprehensive income.

3. SEGMENT INFORMATION

The Group is engaged worldwide in the upstream operating activities of the conventional oil and gas, shale oil and gas, oil sands and other unconventional oil and gas business. The Group reports the business through three operating segments: exploration and production ("E&P"), trading business and corporate. These segments are determined primarily because the Group's chief operating decision maker makes key operating decisions and assesses performance of the segment separately. The Group evaluates the performance of each segment based on segment profit or loss.

The following table presents revenue, profit or loss, assets and liabilities information for the Group's operating segments:

Save as disclosed in this announcement, there was no purchase, sale or redemption by the Company, or any of its subsidiaries, of its listed securities during the six months ended 30 June 2017.

CORPORATE GOVERNANCE CODE AND CORPORATE GOVERNANCE REPORT

For the six months ended 30 June 2017, the Company has complied with relevant code provisions set out in Appendix 14 to the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited (the “Listing Rules”), except for the deviation from the code provisions (“Code Provisions”) A.2.1 and A.4.1 of the Corporate Governance Code and Corporate Governance Report (“Corporate Governance Code”). The following summarises the requirement under the above-mentioned Code Provisions and the reasons for such deviations.

Code Provision A.2.1

Under Code Provision A.2.1, the roles of the Chairman and the Chief Executive should be separate and not be performed by the same individual.

Within the reporting period, prior to 18 April 2017, Mr. Yang Hua had assumed both the roles of the Chairman and the Chief Executive Officer of the Company as he is familiar with the culture and operations of the Company and has extensive experience in the oil and gas industry. The Directors considered that vesting two roles in the same individual would enable the Company to make and implement decisions promptly and efficiently and would not impair the balance of power and authority between the Board and the management of Company. The Company has established board committees (namely, Audit Committee, Remuneration Committee and Nomination Committee), whose

members comprise independent non-executive Directors and are responsible for important corporate governance functions. In particular, the Audit Committee of the Company is responsible for overseeing and monitoring the risk management and internal control systems of the Company, to support the Board in discharging its responsibilities and to make sure the adequacy and effectiveness of the Company's corporate accounting and financial controls, risk management and internal control systems. The four Independent Non-executive Directors who possess balance of skills and experience appropriate of the business of the Company also contribute valuable independent views to the Board. The Directors considered that although Mr. Yang Hua served as both the Chairman and Chief Executive Officer, there were sufficient checks and balances at the board level.

With effect from 18 April 2017, Mr. Yang Hua resigned as the Chief Executive Officer of the Company and he remains as the Chairman. At the same time, Mr. Yuan Guangyu, an existing Executive Director, has been appointed as the Chief Executive Officer. As such, the roles of the Chairman and the Chief Executive are separate and are not performed by the same individual and there has been no deviation from Code Provision A.2.1 since 18 April 2017.

Code Provision A.4.1

Under Code Provision A.4.1, non-executive directors should be appointed for a specific term and be subject to re-election.

None of the existing independent non-executive directors of the Company is appointed for a specific term. This constitutes a deviation from Code Provision A.4.1. However, all the Directors are subject to the retirement provisions under article 97 of the Articles of Association of the Company (“Article 97”). According to Article 97, one-third of the Directors for the time being must retire from the office by rotation at each annual general meeting. The Company has observed the need for good corporate governance practices. All the incumbent independent non-executive directors of the Company have retired from the office by rotation and have been re-elected in the past three years. Therefore, the Company considers that sufficient measures have been taken to ensure that the Company’s corporate governance practices are no less exacting than those in the Corporate Governance Code.

STATEMENT OF SIGNIFICANT DIFFERENCES IN CORPORATE GOVERNANCE PRACTICES FOR PURPOSES OF SECTION 303A.11 OF THE NEW YORK STOCK EXCHANGE LISTED COMPANY MANUAL

The Company is incorporated under the laws of Hong Kong and the principal trading market for the ordinary shares of the Company is The Stock Exchange of Hong Kong Limited. However, many of the corporate governance rules in the NYSE Listed Company Manual (the "NYSE Standards") do not apply to the Company as a "foreign private issuer" and the Company is permitted to follow its home country corporate governance practices in lieu of most corporate governance standards contained in the NYSE Standards. Section 303A.11 of the NYSE Listed Company Manual requires NYSE listed foreign private issuers to describe the significant differences between their corporate governance practices and the corporate governance standards applicable to U.S. domestic companies listed on the NYSE. The Company has posted a brief summary of such significant differences on its website, which may be accessed through the following web page:
