GARTNER, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

Note 1 Basis of Presentation

The fiscal year of Gartner, Inc. (the Company) represents the period from January 1 through December 31. When used in these notes, the terms Company, we, us, or our refer to Gartner, Inc. and its consolidated subsidiaries. These interim condensed consolidated financial statements have been prepared in accordance with generally accepted accounting principles (GAAP) in the United States of America, as defined in the Financial Accounting Standards Board (FASB) Accounting Standards Codification Topic 270 for interim financial information and with the instructions to Rule 10-01 of Regulation S-X on Form 10-Q and should be read in conjunction with the consolidated financial statements and related notes of Gartner, Inc. filed in its Annual Report on Form 10-K for the year ended December 31, 2009.

In the opinion of management, all normal recurring accruals considered necessary for a fair presentation of financial position, results of operations and cash flows at the dates and for the periods presented herein have been included. The results of operations for the three and nine months ended September 30, 2010 may not be indicative of the results of operations for the remainder of 2010.

Principles of consolidation. The accompanying interim condensed consolidated financial statements include the accounts of the Company and its majority-owned subsidiaries. All significant intercompany transactions and balances have been eliminated.

Use of estimates. The preparation of the accompanying interim condensed consolidated financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions about future events. These estimates and the underlying assumptions affect the amounts of assets and liabilities reported, disclosures about contingent assets and liabilities, and reported amounts of revenues and expenses. Such estimates include the valuation of accounts receivable, goodwill, intangible assets, other long-lived assets, assets and liabilities acquired in business acquisitions, tax accruals and other liabilities. In addition, estimates are used in revenue recognition, income tax expense, performance-based compensation charges, depreciation and amortization, and the allowance for losses. Management believes its use of estimates in the interim condensed consolidated financial statements to be reasonable.

Management evaluates its estimates on an ongoing basis using historical experience and other factors, including the general economic environment and actions it may take in the future. We adjust such estimates when facts and circumstances dictate. However, these estimates may involve significant uncertainties and judgments and cannot be determined with precision. In addition, these estimates are based on our best judgment at a point in time and as such these estimates may ultimately differ from actual results. Changes in estimates resulting from weakness in the economic environment or other factors beyond our control could be material and would be reflected in the Company's financial statements in future periods.

Note 2 Acquisitions

In December 2009 the Company acquired all of the outstanding shares of AMR Research, Inc. (AMR Research) and Burton Group, Inc. (Burton Group) for a total of \$117.7 million in cash. The Company's consolidated results include the operating results of these businesses beginning on their respective acquisition dates. During the three months ended September 30, 2010, the Company finalized the allocation of the purchase price related to these acquisitions, resulting in immaterial adjustments to recorded goodwill. The Company recorded \$1.2 million and \$7.1 million of acquisition and integration expenses related to these acquisitions in the three and nine months ended September 30, 2010, respectively.

The Company received contractual indemnifications from the selling shareholders of AMR Research and Burton Group for certain pre-acquisition liabilities, which the Company estimated at \$6.1 million. In accordance with FASB ASC Topic 805, the Company recorded a \$6.1 million indemnification receivable in Prepaid expenses and other current assets and a \$6.1 million liability in Accrued liabilities, which were included in the purchase price allocation. Separately, a portion of the sale proceeds were placed in an escrow account pending resolution of the pre-acquisition liabilities. During the nine months ended September 30, 2010, the Company paid \$3.9 million related to the settlement of a portion of these pre-acquisition liabilities and received reimbursement from the escrow for the same amount. As a

result, the settlement of these liabilities had no impact on the Company's results of operations, cash flows, or

goodwill. The Company believes the remaining \$2.2 million recorded in Accrued liabilities is a reasonable estimate of the amount necessary to satisfy the outstanding exposures, which is fully reimbursable from the escrow account.

Note 3 Comprehensive Income

The components of Comprehensive income include net income, foreign currency translation adjustments, realized and unrealized gains or losses on interest rate swaps, and deferred gains and losses on defined benefit pension plans.

Amounts recorded in Comprehensive income are as follows:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2010	2009	2010	2009
Net income:	\$ 20,075	\$ 20,067	\$ 59,591	\$ 57,248
Other comprehensive income, net of tax effect:				
Foreign currency translation adjustments	7,415	3,722	1,086	9,682
Unrealized gains on interest rate swaps	673	851	2,296	2,772
Amortization of realized gain on terminated interest rate swap		(51)	(39)	(188)
Amortization of pension unrealized gain	(56)	(48)	(169)	(138)
Other comprehensive income	8,032	4,474	3,174	12,128
Comprehensive income	\$ 28,107	\$ 24,541	\$ 62,765	\$ 69,376

Note 4 Computation of Earnings Per Share

The following table sets forth the reconciliation of basic and diluted earnings per share (in thousands, except per share data):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2010	2009	2010	2009
Numerator:				
Net income used for calculating basic and diluted earnings per share	\$ 20,075	\$ 20,067	\$ 59,591	\$ 57,248
Denominator:				
Weighted average number of common shares used in the calculation of basic earnings per share	95,473	94,872	95,698	94,380
Common stock equivalents associated with stock-based compensation plans (1), (2)	3,324	2,785	3,886	2,505
Shares used in the calculation of diluted earnings per share	98,797	97,657	99,584	96,885
Basic earnings per share	\$ 0.21	\$ 0.21	\$ 0.62	\$ 0.61
Diluted earnings per share	\$ 0.20	\$ 0.21	\$ 0.60	\$ 0.59

(1) For the three months ended

September 30, 2010 and 2009, 1.0 million and 1.2 million of common stock equivalents, respectively, were not included in the computation of diluted earnings per share because the effect would have been anti-dilutive.

- (2) For the nine months ended September 30, 2010 and 2009, 0.5 million and 3.0 million of common stock equivalents, respectively, were not included in the computation of diluted earnings per share because the effect would have been anti-dilutive.

Note 5 Stock-Based Compensation

The Company grants stock-based compensation awards as an incentive for employees and directors to contribute to the Company's long-term success. The Company currently awards stock-settled stock appreciation rights, service- and performance-based restricted stock units, and common stock equivalents. At September 30, 2010, the Company had approximately 6.7 million shares of its common stock, par value \$.0005 per share (the "Common Stock") available for awards of stock-based compensation under its 2003 Long-Term Incentive Plan.

The Company accounts for stock-based compensation in accordance with FASB ASC Topics 505 and 718, as interpreted by SEC Staff Accounting Bulletins No. 107 ("SAB No. 107") and No. 110 ("SAB No. 110"). Stock-based compensation expense is based on the fair value of the award on the date of grant, which is recognized over the related service period, net of estimated forfeitures.

The service period is the period over which the related service is performed, which is generally the same as the vesting period. At the present time, the Company issues treasury shares upon the exercise, release or settlement of stock-based compensation awards.

Determining the appropriate fair value model and calculating the fair value of stock compensation awards requires the input of certain highly complex and subjective assumptions, including the expected life of the stock compensation awards and the Common Stock price volatility. In addition, determining the appropriate amount of associated periodic expense requires management to estimate the amount of employee forfeitures and the likelihood of the achievement of certain performance targets. The assumptions used in calculating the fair value of stock compensation awards and the associated periodic expense represent management's best estimates, but these estimates involve inherent uncertainties and the application of judgment. As a result, if factors change and the Company deems it necessary in the future to modify the assumptions it made or to use different assumptions, or if the quantity and nature of the Company's stock-based compensation awards changes, then the amount of expense may need to be adjusted and future stock compensation expense could be materially different from what has been recorded in the current period.

Stock-Based Compensation Expense

The Company recognized the following amounts of stock-based compensation expense by award type in the periods indicated (in millions):

Award type:	Three Months Ended September 30,		Nine Months Ended September 30,	
	2010	2009	2010	2009
Stock appreciation rights (SARs)	\$ 0.9	\$ 1.0	\$ 3.7	\$ 3.4
Common stock equivalents (CSEs)	0.2	0.1	0.4	0.3
Restricted stock units (RSUs)	6.2	5.3	19.2	15.8
Total	\$ 7.3	\$ 6.4	\$ 23.3	\$ 19.5

Stock-based compensation was recognized in the Consolidated Statements of Operations as follows (in millions):

Amount recorded in:	Three Months Ended September 30,		Nine Months Ended September 30,	
	2010	2009	2010	2009
Cost of services and product development	\$ 3.1	\$ 3.0	\$ 10.9	\$ 9.5
Selling, general and administrative	4.2	3.4	12.4	10.0
Total stock-based compensation expense	\$ 7.3	\$ 6.4	\$ 23.3	\$ 19.5

As of September 30, 2010, the Company had \$47.1 million of total unrecognized stock-based compensation cost, which is expected to be recognized as stock-based compensation expense over the remaining weighted-average service period of approximately 2.1 years.

Stock-Based Compensation Awards

The following disclosures provide information regarding the Company's stock-based compensation awards, all of which are classified as equity awards in accordance with FASB ASC Topic 505:

Stock Appreciation Rights

Stock-settled stock appreciation rights (SARs) are settled in common shares and are similar to stock options as they permit the holder to participate in the appreciation of the Common Stock. SARs may be settled in shares of Common Stock by the employee once the applicable vesting criteria have been met. SARs vest ratably over a four-year service period and expire seven years from the grant date. The fair value of SARs awards is recognized as compensation expense on a straight-line basis over four years. SARs are awarded only to the Company's executive officers.

When SARs are exercised, the number of shares of Common Stock issued is calculated as follows: (1) the total proceeds from the SARs exercise (calculated as the closing price of the Common Stock on the date of exercise less the exercise price of the SARs, multiplied by the number of SARs exercised) is divided by (2) the closing price of the Common Stock on the exercise date. The Company withholds a portion of the shares of Common Stock issued upon exercise to satisfy minimum statutory tax withholding requirements. SARs recipients do not have any of the rights of a Gartner stockholder, including voting rights and the right to receive

dividends and distributions, until after actual shares of Common Stock are issued in respect of the award, which is subject to the prior satisfaction of the vesting and other criteria relating to such grants.

A summary of the changes in SARs outstanding for the nine months ended September 30, 2010, follows:

	SARs in	Per Share Weighted-	Per Share Weighted-	Weighted Average Remaining
	millions	Average Exercise Price	Grant Date Fair Value	Contractual Term
Outstanding at December 31, 2009	2.9	\$ 15.43	\$ 6.09	4.67 years
Granted	0.6	22.06	8.27	6.37 years
Forfeited				na
Exercised	(0.6)	14.51	5.99	na
Outstanding at September 30, 2010 (1)	2.9	\$ 16.97	\$ 4.90	4.68 years
Vested and exercisable at September 30, 2010 (1)	1.2	\$ 17.03	\$ 6.53	3.67 years

na=not applicable

(1) At September 30, 2010, SARs outstanding had an intrinsic value of \$35.3 million. SARs vested and exercisable had an intrinsic value of \$14.6 million.

The fair value of the SARs grants was determined on the date of the grant using the Black-Scholes-Merton valuation model with the following weighted-average assumptions:

	Nine Months Ended September 30, (1)	
	2010	2009
Expected dividend yield (2)	0%	0%
Expected stock price volatility (3)	40%	50%
Risk-free interest rate (4)	2.4%	2.3%
Expected life in years (5)	4.8	4.8

(1) The Company did not make

any SARs
grants during
the three months
ended
September 30,
2010 or 2009.

(2) The dividend
yield
assumption is
based on the
history and
expectation of
the Company's
dividend
payouts.
Historically,
Gartner has not
paid cash
dividends on its
Common Stock.

(3) The
determination of
expected stock
price volatility
was based on
both historical
Common Stock
prices and
implied
volatility from
publicly traded
options in
Common Stock.

(4) The risk-free
interest rate is
based on the
yield of a U.S.
Treasury
security with a
maturity similar
to the expected
life of the
award.

(5) The expected
life in years is
based on the
simplified

calculation
provided for in
SEC SAB
No. 107. The
simplified
method
determines the
expected life in
years based on
the vesting
period and
contractual
terms as set
forth when the
award is made.
The Company
continues to use
the simplified
method for
SARs awards,
as permitted by
SEC SAB
No. 110, since it
does not have
the necessary
historical
exercise and
forfeiture data
to determine an
expected life.

Restricted Stock, Restricted Stock Units, and Common Stock Equivalents

Restricted stock awards give the awardee the right to vote and to receive dividends and distributions on these shares; however, the awardee may not sell the restricted shares until all restrictions on the release of the shares have lapsed and the shares are released.

Restricted stock units (RSUs) give the awardee the right to receive shares of Common Stock when the vesting conditions are met and the restrictions lapse, and each RSU that vests entitles the awardee to one common share. RSU awardees do not have any of the rights of a Gartner stockholder, including voting rights and the right to receive dividends and distributions, until after the common shares are released.

Common stock equivalents (CSEs) are convertible into Common Stock, and each CSE entitles the holder to one common share. Members of our Board of Directors receive directors' fees payable in CSEs unless they opt to receive up to 50% of the fees in cash. Generally, the CSEs are converted when service as a director terminates unless the director has elected an accelerated release.

The fair value of restricted stock, RSUs, and CSEs is determined on the date of grant based on the closing price of the Common Stock as reported by the New York Stock Exchange on that date. The fair value of these awards is recognized as compensation expense as follows: (i) restricted stock awards vest based on the achievement of a market condition and are expensed on a straight-line basis over approximately three years; (ii) service-based RSUs vest ratably over four years and are expensed on a straight-line basis over four years; (iii) performance-based RSUs are subject to both performance and service conditions, vest ratably over four years, and are expensed on an accelerated basis; and (iv) CSEs vest immediately and are recorded as expense on the date of grant.

A summary of the changes in restricted stock, RSUs and CSEs during the nine months ended September 30, 2010, follows:

	Restricted Stock	Weighted- Average Grant Date Fair Value (1)	Restricted Stock Units (RSUs)	Weighted- Average Grant Date Fair Value (1)	Common Stock Equivalents (CSEs)	Weighted- Average Grant Date Fair Value (1)
Outstanding at December 31, 2009	200,000	\$ 7.30	3,763,805	\$ 14.57	135,224	na
Granted (2), (3)			1,117,721	22.17	14,627	\$ 24.93
Vested or released			(1,432,709)	15.20	(34,859)	na
Forfeited			(56,856)	16.59		na
Outstanding at September 30, 2010 (4), (5)	200,000	\$ 7.30	3,391,961	\$ 16.52	114,992	na

na=not available

(1) Per share.

(2) The 1.1 million RSUs granted in 2010 consisted of 0.5 million performance-based RSUs awarded to executives and 0.6 million service-based RSUs awarded to non-executive employees and certain board members. The 0.5 million performance-based RSUs represents

the target amount of the award. The actual number of RSUs that will ultimately be granted will be between 0% and 200% of the target amount, depending on the level of achievement of the performance metric. For 2010, the performance metric is the dollar level of the Company's ending subscription-based contract value. If the specified minimum level of achievement is not met, the performance-based RSUs will be forfeited in their entirety, and any compensation expense already recorded will be reversed.

- (3) CSEs represent fees paid to directors. The CSEs vest when granted and are convertible into common shares when the director leaves the Board of Directors or earlier if the director elects to accelerate the release.
- (4) Vesting on the 200,000 shares of restricted stock held by our CEO is subject to a market condition as

follows: (i) 100,000 shares will vest when the Common Stock trades at an average price of \$25 or more each trading day for sixty consecutive trading days; and (ii) 100,000 shares will vest when the Common Stock trades at an average price of \$30 or more each trading day for sixty consecutive trading days. There is no remaining unamortized cost on this grant. On October 25, 2010, subsequent to quarter-end, 100,000 of these restricted shares vested after the average price exceeded \$25 per share for sixty consecutive trading days.

- (5) The weighted-average remaining contractual term of the RSUs is 1.36 years. The restricted stock awards and the CSEs have no defined contractual term.

Stock Options

Historically, the Company granted stock options to employees that allowed them to purchase shares of the Common Stock at a certain price. The Company has not made any stock option grants since 2006. All outstanding options are fully vested and there is no remaining unamortized cost. The Company received approximately \$17.2 million and \$9.0 million in cash from option exercises in the nine months ended September 30, 2010 and 2009, respectively.

A summary of the changes in stock options outstanding in the nine months ended September 30, 2010, follows:

	Options in millions	Per Share Weighted- Average Exercise Price	Weighted Average Remaining Contractual Term	Aggregate Intrinsic Value (in millions)
Vested and outstanding at December 31, 2009	4.7	\$ 10.65	3.07 years	\$ 34.8
Expired			na	na
Exercised (1)	(1.7)	10.14	na	na
Vested and outstanding at September 30, 2010	3.0	\$ 10.94	2.68 years	\$ 55.6

na=not applicable

- (1) Options exercised during the nine months ended September 30, 2010, had an intrinsic value of \$26.5 million.

Employee Stock Purchase Plan

The Company has an employee stock purchase plan (the ESPP Plan) under which eligible employees are permitted to purchase Common Stock through payroll deductions, which may not exceed 10% of an employee's compensation (or \$23,750 in any calendar year), at a price equal to 95% of the closing price of the Common Stock as reported by the New York Stock Exchange at the end of each offering period.

At September 30, 2010, the Company had approximately 1.5 million shares available for purchase under the ESPP Plan. The ESPP Plan is considered non-compensatory under FASB ASC Topic 718, and as a result the Company does not record compensation expense related to employee share purchases. The Company received approximately \$2.2 million and \$2.0 million in cash from share purchases under the ESPP Plan in the nine months ended September 30, 2010 and 2009, respectively.

Note 6 Segment Information

The Company manages its business in three reportable segments: Research, Consulting and Events. Research consists primarily of subscription-based research products, access to research inquiry, as well as peer networking services and membership programs. Consulting consists primarily of consulting, measurement engagements, and strategic advisory services. Events consists of various symposia, conferences, and exhibitions.

The Company evaluates reportable segment performance and allocates resources based on gross contribution margin. Gross contribution, as presented in the table below, is defined as operating income excluding certain Cost of services and product development and Selling, general and administrative (SG&A) expenses, depreciation, acquisition and integration charges, amortization of intangibles, and Other charges. Certain bonus and fringe benefit costs included in consolidated Cost of services and product development are not allocated to segment expense. The accounting policies used by the reportable segments are the same as those used by the Company.

The Company does not identify or allocate assets, including capital expenditures, by reportable segment. Accordingly, assets are not reported by segment because the information is not available and is not reviewed in the evaluation of

segment performance or in making decisions in the allocation of resources. There are no inter-segment revenues.

The following tables present information about the Company's reportable segments (in thousands):

	Research	Consulting	Events	Consolidated
Three Months Ended September 30, 2010:				
Revenues	\$ 214,680	\$ 65,397	\$ 16,045	\$ 296,122
Gross contribution	140,605	23,981	5,974	170,560
Corporate and other expenses				(137,797)
Operating income				\$ 32,763

	Research	Consulting	Events	Consolidated
Three Months Ended September 30, 2009:				
Revenues	\$ 185,718	\$ 65,708	\$ 16,043	\$ 267,469
Gross contribution	122,611	23,658	5,934	152,203
Corporate and other expenses				(124,682)
Operating income				\$ 27,521

	Research	Consulting	Events	Consolidated
Nine Months Ended September 30, 2010:				
Revenues	\$ 634,448	\$ 212,796	\$ 58,906	\$ 906,150
Gross contribution	415,311	84,222	22,688	522,221
Corporate and other expenses				(426,030)
Operating income				\$ 96,191

	Research	Consulting	Events	Consolidated
Nine Months Ended September 30, 2009:				
Revenues	\$ 557,325	\$ 205,341	\$ 48,307	\$ 810,973
Gross contribution	366,807	78,314	16,300	461,421
Corporate and other expenses				(368,688)
Operating income				\$ 92,733

Note 7 Goodwill and Intangible Assets

Goodwill

Goodwill represents the excess of the purchase price of acquired businesses over the estimated fair value of the tangible and identifiable intangible net assets acquired. The evaluation of goodwill is performed in accordance with FASB ASC Topic 350, which requires an annual assessment of potential goodwill impairment at the reporting unit level. A reporting unit can be an operating segment or a business if discrete financial information is prepared and reviewed by management. Under the impairment test, if a reporting unit's carrying amount exceeds its estimated fair value, goodwill impairment is recognized to the extent that the reporting unit's carrying amount of goodwill exceeds the implied fair value of the goodwill. The fair value of reporting units is estimated using discounted cash flows, market multiples, and other valuation techniques.

The following table presents changes to the carrying amount of goodwill by reporting segment during the nine months ended September 30, 2010 (in thousands):

	Research	Consulting	Events	Total
Balance, December 31, 2009	\$ 370,630	\$ 100,744	\$ 42,238	\$ 513,612
Foreign currency translation adjustments and other (1)	(2,836)	(802)	(322)	(3,960)
Balance, September 30, 2010 (2)	\$ 367,794	\$ 99,942	\$ 41,916	\$ 509,652

(1) Includes the impact of foreign currency translation and certain immaterial adjustments related to the acquisitions of AMR Research and Burton Group. The Company finalized the allocation of the purchase price related to the acquisitions of AMR Research and Burton Group in September 2010.

(2) The Company did not record any goodwill impairment losses during the nine months ended September 30, 2010 or the fiscal year ended December 31, 2009. In addition, the Company does not have any accumulated goodwill impairment losses.

Other Intangible Assets

			Customer	Noncompetitive	
	Content	Trade Name	Relationships	Agreements	Total
September 30, 2010					
Gross cost	\$ 10,634	\$ 5,758	\$ 7,210	\$ 210	\$ 23,812
Accumulated amortization	(5,317)	(864)	(1,351)	(164)	(7,696)
Net	\$ 5,317	\$ 4,894	\$ 5,859	\$ 46	\$ 16,116

			Customer	Noncompetitive	
	Content	Trade Name	Relationships	Agreements	Total
December 31, 2009					
Gross cost	\$ 10,634	\$ 5,758	\$ 14,910	\$ 416	\$ 31,718
Accumulated amortization			(7,315)	(290)	(7,605)
Net	\$ 10,634	\$ 5,758	\$ 7,595	\$ 126	\$ 24,113

All of the Company's other intangible assets are being amortized against earnings over the following periods:

		Customer	Noncompetitive
	Content	Trade Name	Agreements
Useful Life (Years)	1.5	5	4

Aggregate amortization expense related to intangible assets was \$2.5 million and \$0.4 million for the three months ended September 30, 2010 and 2009, respectively, and \$8.0 million and \$1.2 million for the nine months ended September 30, 2010 and 2009, respectively. The additional amortization was due to acquired intangibles from the AMR Research and Burton Group acquisitions.

The estimated future amortization expense by year from purchased intangibles is as follows (in thousands):

2010 (remaining three months)	\$ 2,541
2011	6,525
2012	2,955
2013	2,955
2014	1,140
	\$ 16,116

Note 8 Debt

Credit Facility

The Company has a Credit Agreement dated as of January 31, 2007, that provides for a \$300.0 million revolving credit facility and a five-year, \$180.0 million term loan (the "original term loan"). On April 9, 2008, the Company entered into a First Amendment with the lenders to the Credit Agreement, which provided for a new \$150.0 million term loan (the "2008 term loan"). The revolving credit facility may be increased up to an additional \$100.0 million at the discretion of the Company's lenders (the "expansion feature"), for a total revolving credit facility of \$400.0 million. However, the \$100.0 million expansion feature may or may not be available to the Company depending upon prevailing credit market conditions. To date, the Company has not sought to borrow under the expansion feature. The following table provides information regarding amounts outstanding under the Company's Credit Agreement:

	Amount Outstanding December 31, 2009	Amount Outstanding September 30, 2010	Annualized Interest Rates September 30, 2010
Description:	(In thousands)	(In thousands)	(3)
Original term loan (1)	\$ 126,000	\$ 90,000	1.17%
2008 term loan (1)	75,000	55,000	1.54%
Revolver (2)	128,000	155,000	1.20%
 Total	 \$ 329,000	 \$ 300,000	

- (1) During the nine months ended September 30, 2010, the Company repaid \$56.0 million of the term loans.
- (2) The Company had \$142.0 million of available borrowing capacity on the revolver (not including the expansion feature) as of September 30, 2010.
- (3) The annualized interest rates on the original term loan and the 2008 term loan consisted of a three-month LIBOR base rate plus margins of 0.88% and 1.25%, respectively. The revolver borrowings were all three months or less, and the annualized rate consisted of a weighted-average of the LIBOR rates plus a margin of 0.88%.

Borrowings under the Credit Agreement carry interest rates that are either prime-based or Libor-based. Interest rates under these borrowings include a base rate plus a margin between 0.00% and 0.75% on Prime-based borrowings and between 0.625% and 1.75% on Libor-based borrowings. Generally, the Company's borrowings are Libor-based. The revolving loans may be borrowed, repaid and reborrowed until January 31, 2012, at which time all amounts borrowed must be repaid. The revolver borrowing capacity is reduced for both amounts outstanding under the revolver and for letters of credit.

The original term loan will be repaid in 18 consecutive quarterly installments which commenced on September 30, 2007, with the final payment due on January 31, 2012, and may be prepaid at any time without penalty or premium at the option of the Company. The 2008 term loan is co-terminus with the original 2007 term loan under the Credit Agreement and will be repaid in 16 consecutive quarterly installments plus a final payment due on January 31, 2012, and may be prepaid at any time without penalty or premium at the option of Gartner.

The Credit Agreement contains certain customary restrictive loan covenants, including, among others, financial covenants requiring a maximum leverage ratio, a minimum fixed charge coverage ratio, and a minimum annualized contract value ratio and covenants limiting Gartner's ability to incur indebtedness, grant liens, make acquisitions, be acquired, dispose of assets, pay dividends, repurchase stock, make capital expenditures, and make investments. A failure to comply with these covenants in the future could result in acceleration of all amounts outstanding under the Credit Agreement, which would materially impact our financial condition unless accommodations could be negotiated with our lenders. The Company was in full compliance with its financial covenants as of September 30, 2010 and December 31, 2009.

The Company's Credit Agreement expires in January 2012. The Company is currently exploring refinancing options, which may result in the accelerated payment of the amounts outstanding as of September 30, 2010.

Letters of Credit

The Company provides letters of credit and similar guarantees in the ordinary course of business to facilitate transactions with customers and others. At September 30, 2010, the Company had outstanding letters of credit and related guarantees of approximately \$5.3 million.

Note 9 Equity and Stock Programs

Share Repurchases

On August 5, 2010, the Company's Board of Directors approved a new \$500.0 million share repurchase program to be utilized to acquire additional shares of Common Stock. Repurchases may be made from time-to-time through open market purchases, private transactions, tender offers or other transactions. The amount and timing of repurchases will be subject to the availability of stock, prevailing market conditions, the trading price of the stock, the Company's financial performance and other conditions. Repurchases may also be made from time-to-time in connection with the settlement of the Company's shared-based compensation awards. Repurchases will be funded from cash flow from operations and borrowings under the Company's Credit Agreement.

The Company's share repurchase activity was as follows:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2010	2009	2010	2009
Number of shares repurchased	48,904	4,531	3,188,945	305,482
Cost of repurchased shares (in thousands) (1), (2):	\$ 1,372	\$ 75	\$ 76,475	\$ 3,734

(1) These share repurchases were made under the Company's previously authorised share repurchase program.

(2) As of September 30, 2010, the Company had \$500.0 million available for share repurchases under its new repurchase program.

Note 10 Income Taxes

The provision for income taxes was \$9.3 million for the three months ended September 30, 2010 compared to \$2.4 million in the prior year quarter. The effective tax rate was 31.7% for the three months ended September 30, 2010 and 10.7% for the same period in 2009. The increase in the effective tax rate was primarily due to the impact of certain discrete items as well as a change in the estimated annual mix of pre-tax income by jurisdiction. Discrete items in the three months ended September 30, 2009 included the release of approximately \$3.4 million of reserves and \$0.5 million of related interest reserves due to the expiration of the relevant statutes of limitation.

The provision for income taxes was \$27.8 million for the nine months ended September 30, 2010 compared to \$19.9 million in the same period in 2009. The effective tax rate was 31.8% for the nine months ended September 30, 2010 and 25.8% for the same period in 2009. The increase in the effective tax rate was primarily due to the impact of certain discrete items as well as a change in the estimated annual mix of pre-tax income by jurisdiction. Discrete items in the nine months ended September 30, 2009 included the release of approximately \$3.4 million of reserves and \$0.5 million of related interest reserves due to the expiration of the relevant statutes of limitation.

As of September 30, 2010 and December 31, 2009, the Company had gross unrecognized tax benefits of \$14.5 and \$13.8 million, respectively. It is reasonably possible that the gross unrecognized tax benefits will be decreased by \$0.7 million within the next 12 months, primarily due to settlements of outstanding audits and the expiration of the relevant statutes of limitation. As of September 30, 2010 and December 31, 2009, the Company had Other liabilities of \$13.8 million and \$13.5 million, respectively, related to long term uncertain tax positions.

The Internal Revenue Service has completed its examination of the Federal income tax return of the Company for the tax year ended December 31, 2007. The Company has not yet received a report of the findings. The Company believes that it has recorded reserves sufficient to cover exposures related to such review. However, the resolution of such matters involves uncertainties and there are no assurances that the ultimate resolution will not exceed the amounts we have recorded. Additionally, the results of an audit could have a material effect on our financial position, results of operations, and cash flows in the period or periods for which that determination is made.

Note 11 Derivatives and Hedging

The Company typically enters into a limited number of derivative contracts to offset the potentially negative effects of interest rate and foreign exchange movements. The Company accounts for its outstanding derivative contracts in accordance with FASB ASC Topic 815, which requires all derivatives, whether designated as hedges or not, to be recorded on the balance sheet at fair value.

The following tables provide information regarding the Company's outstanding derivatives contracts (in thousands, except for number of outstanding contracts):

September 30, 2010

Derivative Contract Type	Number of Outstanding Contracts	Contract Notional Amount	Fair Value (Liability) Asset (4)	Balance Sheet Line Item	(Loss) Gain Recorded in OCI (5)
Interest Rate Swap (1)	1	\$ 90,000	\$ (3,695)	Other liabilities	\$ (2,750)
Interest Rate Swap (2)	1	82,500	(1,871)	Other liabilities	(534)
Foreign Currency Forwards (3)	20	82,460	(426)	Accrued liabilities	
Total	22	\$ 254,960	\$ (5,992)		\$ (3,284)

December 31, 2009

Derivative Contract Type	Number of Outstanding Contracts	Contract Notional Amount	Fair Value (Liability) Asset (4)	Balance Sheet Line Item	(Loss) Gain Recorded in OCI (5)
Interest Rate Swap (1)	1	\$ 126,000	\$ (6,594)	Other liabilities	\$ (3,956)
Interest Rate Swap (2)	1	112,500	(2,769)	Other liabilities	(1,090)
Foreign Currency Forwards (3)	19	117,300	740	Other current assets	
Total	21	\$ 355,800	\$ (8,623)		\$ (5,046)

(1) On September 30, 2010, the Company discontinued hedge accounting on this interest rate swap. The Company previously designated this interest rate swap as a cash flow hedge of the forecasted interest payments on the Original term loan, and as a result the changes in fair value were recorded in OCI, net of tax effect. The remaining deferred loss in OCI will be amortized against earnings through the

maturity of the loan since the Company cannot conclude at this time that the forecasted interest payments are not probable of occurring. Future changes in fair value of this swap will be recognized in earnings.

- (2) On September 30, 2009, the Company discontinued hedge accounting on this interest rate swap. The Company previously designated this interest rate swap as a cash flow hedge of the forecasted interest payments on the 2008 term loan, and as a result the changes in fair value were recorded in OCI, net of tax effect. The remaining deferred loss in OCI will be amortized against earnings through the maturity of the loan since the Company cannot conclude

at this time that the forecasted interest payments are not probable of occurring. Changes in fair value of the swap are currently recognized in earnings.

- (3) The Company has foreign exchange transaction risk since it typically enters into transactions in the normal course of business that are denominated in foreign currencies that differ from the local functional currencies in which the Company and its subsidiaries operate. The Company may enter into foreign currency forward exchange contracts to offset the effects of this foreign currency transaction risk. These contracts are normally short term in duration. Both realized and unrealized gains and losses are recognized in

earnings since the Company does not designate these contracts as hedges for accounting purposes.

(4) See Note 12 Fair Value Disclosures for the determination of the fair value of these instruments.

(5) Represents the amount recorded in OCI, net of tax effect.

At September 30, 2010, the Company's derivative counterparties were all large investment grade financial institutions. The Company did not have any collateral arrangements with its derivative counterparties, and none of the derivative contracts contained credit-risk related contingent features.

The following table provides information regarding derivative gains and losses that have been recognized in the Condensed Consolidated Statements of Operations (in thousands):

Amount recorded in:	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2010	2009	2010	2009
Interest expense, net (1)	\$ 1,799	\$ 3,435	\$ 6,117	\$ 7,291
Other expense (income), net (2)	1,497	783	(1,413)	(1,160)
Total expense, net	\$ 3,296	\$ 4,218	\$ 4,704	\$ 6,131

(1) Includes interest expense recorded on the two interest rate swap contracts.

(2) Includes realized and unrealized gains and losses on foreign currency forward contracts.

Note 12 Fair Value Disclosures

The Company's financial instruments include cash and cash equivalents, fees receivable from customers, accounts payable, and accruals which are normally short-term in nature. The Company believes the carrying amounts of these financial instruments reasonably approximates their fair value.

At September 30, 2010, the Company had \$300.0 million of outstanding floating rate debt, which is carried at amortized cost. The Company believes the carrying amount of the debt reasonably approximates its fair value as the rate of interest on the term loans and revolver are floating rate which reflect current market rates of interest for similar instruments with comparable maturities.

FASB ASC Topic 820 provides a framework for measuring fair value and a valuation hierarchy based upon the transparency of inputs used in the valuation of an asset or liability. Classification within the hierarchy is based upon the lowest level of input that is significant to the resulting fair value measurement. The valuation hierarchy contains three levels:

- Level 1 Valuation inputs are unadjusted quoted market prices for identical assets or liabilities in active markets.
- Level 2 Valuation inputs are quoted prices for identical assets or liabilities in markets that are not active, quoted market prices for similar assets and liabilities in active markets and other observable inputs directly or indirectly related to the asset or liability being measured.
- Level 3 Valuation inputs are unobservable and significant to the fair value measurement.

The following table presents Company assets and liabilities measured at fair value on a recurring basis (in thousands):

	Fair Value September 30, 2010	Fair Value December 31, 2009
Description:		
Assets:		
Deferred compensation assets (1)	\$ 22,238	\$ 20,214
Foreign currency forward contracts, net (2)		740
	\$ 22,238	\$ 20,954
Liabilities:		
Interest rate swap contracts (3)	\$ 5,566	\$ 9,363
Foreign currency forward contracts, net (2)	387	
	\$ 5,953	\$ 9,363

- (1) The Company has two supplemental deferred compensation arrangements for the benefit of certain highly compensated officers, managers and other key employees. The

assets consist of investments in money market and mutual funds, and company-owned life insurance.

The money market and mutual funds consist of cash equivalents or securities traded in active markets, which the Company considers the fair value of these assets to be based on a Level 1 input. The value of the Company-owned life insurance is based on indirectly observable prices, which the Company considers to be a Level 2 input.

- (2) The Company enters into foreign currency forward exchange contracts to hedge the effects of adverse fluctuations in foreign currency exchange rates (see Note 11 Derivatives and Hedging). Valuation of the foreign currency forward contracts is based on foreign currency exchange rates in

active markets;
thus the
Company
measures the fair
value of these
contracts under a
Level 2 input.

- (3) The Company
has two interest
rate swap
contracts (see
Note
11 Derivatives
and Hedging). To
determine the fair
value of the
swaps, the
Company relies
on
mark-to-market
valuations
prepared by
third-party
brokers based on
observable
interest rate yield
curves.
Accordingly, the
fair value of the
swaps is
determined under
a Level 2 input.

Note 13 Employee Benefits

Defined Benefit Pension Plans

The Company has defined-benefit pension plans in several of its international locations. Benefits paid under these plans are based on years of service and level of employee compensation. The Company accounts for material defined benefit plans in accordance with FASB ASC Topics 715 and 960. None of these plans have plan assets as defined under FASB ASC Topic 960. Net periodic pension expense was \$0.5 million for both the three months ended September 30, 2010 and 2009, and \$1.3 million for both the nine months ended September 30, 2010 and 2009.

Note 14 Commitments and Contingencies

Stamford Headquarters Lease Renewal

Our corporate headquarters is located in approximately 213,000 square feet of leased office space in three buildings located in Stamford, Connecticut. Our Stamford facility accommodates research and analysis, marketing, sales, client support, production, corporate services, executive offices, and administration.

On April 16, 2010, the Company entered into an amended and restated lease agreement (the 2010 Lease) for the Stamford headquarters facility. Under the terms of the 2010 Lease, the landlord will provide up to \$25.0 million to be used to renovate the three buildings and the parking areas comprising the facility. The 2010 Lease provides for a term of fifteen years, which commences after the earlier of the completion of all of the renovations or June 1, 2012. The 2010 Lease also grants the Company three options to renew at fair market value for five years each, and an option to purchase at fair market value.

In accordance with FASB ASC Topic 840, the Company will account for the 2010 Lease as an operating lease. The total minimum payments the Company will be obligated to pay under the 2010 Lease, including contractual escalation clauses and reduced rents during the renovation period, will be expensed on a straight-line basis over the lease term. The total minimum lease payments under this non-cancelable lease agreement are approximately \$59.0 million. The tenant improvement allowance was recorded as deferred rent (liability) and will be amortized as a reduction to rent expense on a straight-line basis over the term of the lease. Leasehold improvements for which Gartner is determined to be the owner for accounting purposes will be capitalized as fixed assets and amortized to depreciation expense. The State of Connecticut has made certain tax and financial incentives available to the Company that may be used in connection with the renovation of the Stamford facility. These incentives include a \$1.0 million sales tax exemption for construction materials, furniture, fixtures and equipment purchased for the facility, a \$5.0 million ten year loan and up to \$20.0 million in state income tax credits. The loan, which has not been drawn down by the Company, may be forgiven in part subject to achievement of certain employment growth. The tax credits will be available beginning in 2012 through 2018 and are contingent upon the achievement of certain employment growth and capital investment thresholds.

Contingencies

We are involved in legal proceedings and litigation arising in the ordinary course of business. We believe that the potential liability, if any, in excess of amounts already accrued from all proceedings, claims and litigation will not have a material effect on our financial position or results of operations when resolved in a future period.

The Company has various agreements that may obligate us to indemnify the other party with respect to certain matters. Generally, these indemnification clauses are included in contracts arising in the normal course of business under which we customarily agree to hold the other party harmless against losses arising from a breach of representations related to such matters as title to assets sold and licensed or certain intellectual property rights. It is not possible to predict the maximum potential amount of future payments under these indemnification agreements due to the conditional nature of the Company's obligations and the unique facts of each particular agreement. Historically, payments made by us under these agreements have not been material. As of September 30, 2010, the Company did not have any indemnification agreements that would require material payments.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The purpose of the following Management's Discussion and Analysis (MD&A) is to help facilitate the understanding of significant factors influencing the quarterly operating results, financial condition and cash flows of Gartner, Inc. Additionally, the MD&A also conveys our expectations of the potential impact of known trends, events or uncertainties that may impact future results. You should read this discussion in conjunction with our condensed consolidated financial statements and related notes included in this report and in our Annual Report on Form 10-K for the year ended December 31, 2009. Historical results and percentage relationships are not necessarily indicative of operating results for future periods. References to the Company, we, our, and us in this MD&A are to Gartner, Inc. and its subsidiaries.

As previously disclosed in our Annual Report on Form 10-K for the year ended December 31, 2009, in December 2009 we acquired AMR Research, Inc. (AMR Research), and Burton Group, Inc. (Burton Group). As a result, the MD&A disclosures herein include the operating results and business measurements of these acquired businesses for the three and nine months ended September 30, 2010, but excludes them for the comparable periods of 2009.

Forward-Looking Statements

In addition to historical information, this Quarterly Report contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. Forward-looking statements are any statements other than statements of historical fact, including statements regarding our expectations, beliefs, hopes, intentions or strategies regarding the future. In some cases, forward-looking statements can be identified by the use of words such as may, will, expects, should, believes, plans, anticipates, estimates, predicts, potential, continue, or other words of similar meaning. Forward-looking statements are subject to risks and uncertainties that could cause actual results to differ materially from those discussed in, or implied by, the forward-looking statements. Factors that might cause such a difference include, but are not limited to, those discussed in Factors That May Affect Future Performance and elsewhere in this report and in our Annual Report on Form 10-K for the year ended December 31, 2009. Readers should not place undue reliance on these forward-looking statements, which reflect management's opinion only as of the date on which they were made. Except as required by law, we disclaim any obligation to review or update these forward-looking statements to reflect events or circumstances as they occur. Readers also should review carefully any risk factors described in other reports filed by us with the Securities and Exchange Commission.

BUSINESS OVERVIEW

Gartner, Inc. is the world's leading information technology research and advisory company that helps executives use technology to build, guide and grow their enterprises. We offer independent and objective research and analysis on the information technology, computer hardware, software, communications and related technology industries. We provide comprehensive coverage of the IT industry to 11,000 client organizations, including approximately 400 of the Fortune 500 companies, across 85 countries. Our client base consists primarily of CIOs and other senior IT and executives from a wide variety of business enterprises, government agencies and the investment community.

We have three business segments: Research, Consulting and Events.

Research provides insight for CIOs, other IT executives and professionals, business leaders, technology companies and the investment community through research reports and briefings, access to our analysts, as well as peer networking services and membership programs.

Consulting consists primarily of client engagements that utilize our research insight, benchmarking data, problem-solving methodologies and hands on experience to improve the return on an organization's IT investment through assessments of cost, performance, efficiency and quality.

Events consists of various symposia, summits, and conferences focused on the IT industry as a whole, as well as IT applicable to particular industries and particular roles within an organization.

BUSINESS MEASUREMENTS

We believe the following business measurements are important performance indicators for our business segments:

BUSINESS SEGMENT

Research

BUSINESS MEASUREMENTS

Contract value represents the value attributable to all of our subscription-related research products that recognize revenue on a ratable basis. Contract value is calculated as the annualized value of all subscription research contracts in effect at a specific point in time, without regard to the duration of the contract.

Client retention rate represents a measure of client satisfaction and renewed business relationships at a specific point in time. Client retention is calculated on a percentage basis by dividing our current clients, who were also clients a year ago, by all clients from a year ago.

Wallet retention rate represents a measure of the amount of contract value we have retained with clients over a twelve-month period. Wallet retention is calculated on a percentage basis by dividing the contract value of clients, who were clients one year earlier, by the total contract value from a year earlier, excluding the impact of foreign currency exchange. When wallet retention exceeds client retention, it is an indication of retention of higher-spending clients, or increased spending by retained clients, or both.

Number of executive program members represents the number of paid participants in executive programs.

Consulting

Consulting backlog represents future revenue to be derived from in-process consulting, measurement and strategic advisory services engagements.

Utilization rates represent a measure of productivity of our consultants. Utilization rates are calculated for billable headcount on a percentage basis by dividing total hours billed by total hours available to bill.

Billing Rate represents earned billable revenue divided by total billable hours.

Average annualized revenue per billable headcount represents a measure of the revenue generating ability of an average billable consultant and is calculated periodically by multiplying the average billing rate per hour times the utilization percentage times the billable hours available for one year.

Events

Number of events represents the total number of hosted events completed during the period.

Number of attendees represents the number of people who attend events.

EXECUTIVE SUMMARY OF OPERATIONS AND FINANCIAL POSITION

The cornerstones of our growth strategy are to focus on producing extraordinary research content, deliver innovative and highly differentiated product offerings, enhance our sales capability, provide world class client service, and improve our operational effectiveness.

We had total revenues of \$296.1 million in the third quarter of 2010, an increase of 11% compared to the prior year quarter. Adjusted for the unfavorable effect of foreign currency translation, total revenues were up 12% quarter-over-quarter. Revenues increased 16% in our Research segment, while both Consulting and Events were essentially flat; however, adjusted for foreign currency translation, segment revenues were up 17%, 2%, and 3%, respectively. We had net income of \$20.1 million in the third quarter of both 2010 and 2009, but diluted earnings per share declined \$0.01 quarter-over-quarter due to higher diluted shares.

For the nine month periods, 2010 revenues increased 12% over 2009, while diluted earnings per share increased by \$.01 per share, to \$0.60.

Research revenues rose 16% quarter-over-quarter, to \$214.7 million in the third quarter of 2010 from \$185.7 million in the prior year quarter, while the contribution margin declined by 1 point, to 65%. For the nine month periods, Research revenues rose 14%. At September 30, 2010, Research contract value was over \$905.0 million, an increase of 22% over September 30, 2009. Client retention was 82% and wallet retention was 95% at September 30, 2010.

Consulting revenues were essentially flat in the three months ended September 30, 2010 compared to the same quarter in 2009, while the segment contribution margin improved by 1 point. Consultant utilization was 65% for the three months ended September 30, 2010, a 1 point increase over the prior year quarter, and we had 453 billable consultants at September 30, 2010. For the nine month periods, 2010 revenue increased 4% over 2009, while the gross contribution margin improved by 2 points.

Events revenues were flat quarter-over-quarter, with 14 events held in the third quarter of 2010 compared to 15 in the prior year quarter. The segment contribution margin was 37% for both quarters. We held 44 events in the nine months ended September 30, 2010, with a 22% increase in revenues and a 5 point increase in the gross contribution margin. The number of attendees increased 10% quarter-over-quarter and 32% when comparing the nine month periods. For a more detailed discussion of our segment results, see Segment Results below.

We had over \$148.0 million of cash and cash equivalents as of September 30, 2010, and we had \$142.0 million of available borrowing capacity under our revolving credit facility. We believe we have a strong cash position and adequate borrowing capacity.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

The preparation of financial statements requires the application of appropriate accounting policies and the use of estimates. The policies discussed below are considered by management to be critical to an understanding of Gartner's financial statements because their application requires complex and subjective management judgments and estimates. Risks related to these critical accounting policies are described below.

Revenue recognition We recognize revenue in accordance with SEC Staff Accounting Bulletin No. 101, Revenue Recognition in Financial Statements (SAB 101), and SEC Staff Accounting Bulletin No. 104, Revenue Recognition (SAB 104). Once all required criteria for revenue recognition have been met, revenue by significant source is accounted for as follows:

Research revenues are derived from subscription contracts for research products and are deferred and recognized ratably over the applicable contract term. Fees from research reprints are recognized when the reprint is shipped.

Consulting revenues are principally generated from fixed fee and time and material engagements. Revenues from fixed fee contracts are recognized on a percentage of completion basis. Revenues from time and materials engagements are recognized as work is delivered and/or services are provided. Revenues related to contract optimization contracts are contingent in nature and are only recognized upon satisfaction of all conditions related to their payment.

Events revenues are deferred and recognized upon the completion of the related symposium, conference or exhibition.

The majority of research contracts are billable upon signing, absent special terms granted on a limited basis from time to time. Research contracts are non-cancelable and non-refundable, except for government contracts that may have cancellation or fiscal funding clauses, which have not produced material cancellations to date. It is our policy to record the entire amount of the contract that is billable as a fee receivable at the time the contract is signed with a corresponding amount as deferred revenue, since the contract represents a legally enforceable claim.

For those government contracts that permit cancellation, historically we only recorded fees receivables to the extent amounts were earned and deferred revenue to the extent cash was received. As of September 30, 2010, based on an analysis of historic contract cancellations, we determined that the likelihood of such cancellations was remote.

Accordingly, as of that date we record the entire billable contract amount as fees receivable at the time the contract is signed with a corresponding amount to deferred revenue, consistent with other contracts. This change in estimate had an immaterial impact on the Company's Condensed Consolidated Balance Sheet as of September 30, 2010 and no impact on the Condensed Consolidated Statements of Operations or Cash Flows. As of December 31, 2009, we had not recorded uncollected receivables or deferred revenues relating to government contracts that permit cancellation of \$8.3 million

Uncollectible fees receivable The allowance for losses is composed of a bad debt and a sales reserve. Provisions are charged against earnings, either as a reduction in revenues or an increase to expense. The measurement of likely and probable losses and the allowance for losses is based on historical loss experience, aging of outstanding receivables,

an assessment of current economic

conditions and the financial health of specific clients. This evaluation is inherently judgmental and requires material estimates. These valuation reserves are periodically re-evaluated and adjusted as more information about the ultimate collectibility of fees receivable becomes available. Circumstances that could cause our valuation reserves to increase include changes in our clients' liquidity and credit quality, other factors negatively impacting our clients' ability to pay their obligations as they come due, and the effectiveness of our collection efforts.

The following table provides our total fees receivable, along with the related allowance for losses (in thousands):

	September 30, 2010	December 31, 2009
Total fees receivable	\$ 307,687	\$ 325,698
Allowance for losses	(7,700)	(8,100)
Fees receivable, net	\$ 299,987	\$ 317,598

Impairment of goodwill and other intangible assets The evaluation of goodwill is performed in accordance with Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) Topic 350, which requires goodwill to be assessed for impairment at least annually and whenever events or changes in circumstances indicate that the carrying value may not be recoverable. In addition, an impairment evaluation of our amortizable intangible assets is also performed on a periodic basis.

Our annual goodwill assessment requires us to estimate the fair values of our reporting units based on estimates of future business operations and market and economic conditions in developing long-term forecasts. If we determine that the fair value of any reporting unit is less than its carrying amount, we must recognize an impairment charge for a portion of the associated goodwill of that reporting unit against earnings in our financial statements.

Factors we consider important that could trigger a review for impairment include the following:

- Significant under-performance relative to historical or projected future operating results;
- Significant changes in the manner of our use of acquired assets or the strategy for our overall business;
- Significant negative industry or economic trends;
- Significant decline in our stock price for a sustained period; and
- Our market capitalization relative to net book value.

Due to the numerous variables associated with our judgments and assumptions relating to the valuation of the reporting units and the effects of changes in circumstances affecting these valuations, both the precision and reliability of the resulting estimates are subject to uncertainty, and as additional information becomes known, we may change our estimates.

We completed our required annual goodwill impairment testing in the quarter ended September 30, 2010 and concluded that the fair values of each of the Company's three reporting units substantially exceeded their respective carrying values.

Accounting for income taxes As we prepare our consolidated financial statements, we estimate our income taxes in each of the jurisdictions where we operate. This process involves estimating our current tax expense together with assessing temporary differences resulting from differing treatment of items for tax and accounting purposes. These differences result in deferred tax assets and liabilities, which are included within our consolidated balance sheets. We record a valuation allowance to reduce our deferred tax assets when future realization is in question. We consider the availability of loss carryforwards, existing deferred tax liabilities, future taxable income and ongoing prudent and feasible tax planning strategies in assessing the need for the valuation allowance. In the event we determine that we are able to realize our deferred tax assets in the future in excess of our net recorded amount, an adjustment is made to reduce the valuation allowance and increase income in the period such determination is made. Likewise, if we determine that we will not be able to realize all or part of our net deferred tax asset in the future, an adjustment to the valuation allowance is charged against income in the period such determination is made.

Accounting for stock-based compensation The Company accounts for stock-based compensation in accordance with FASB ASC Topics 505 and 718, as interpreted by SEC Staff Accounting Bulletins No. 107 (SAB No. 107) and No. 110 (SAB No. 110). The Company recognizes stock-based compensation expense, which is based on the fair value of the award on the date of grant, over the related service period, net of estimated forfeitures (see Note 5 Stock-Based Compensation in the Notes to the Condensed Consolidated Financial Statements).

Determining the appropriate fair value model and calculating the fair value of stock compensation awards requires the input of certain highly complex and subjective assumptions, including the expected life of the stock compensation awards and the Company's Common Stock price volatility. In addition, determining the appropriate amount of associated periodic expense requires management to estimate the rate of employee forfeitures and the likelihood of achievement of certain performance targets. The assumptions used in calculating the fair value of stock compensation awards and the associated periodic expense represent management's best estimates, but these estimates involve inherent uncertainties and the application of judgment. As a result, if factors change and the Company deems it necessary in the future to modify the assumptions it made or to use different assumptions, or if the quantity and nature of the Company's stock-based compensation awards changes, then the amount of expense may need to be adjusted and future stock compensation expense could be materially different from what has been recorded in the current period.

Restructuring and other accruals We may record accruals for severance costs, costs associated with excess facilities that we have leased, contract terminations, asset impairments, and other items as a result of on-going actions we undertake to streamline our organization, reposition certain businesses and reduce ongoing costs. Estimates of costs to be incurred to complete these actions, such as future lease payments, sublease income, the fair value of assets, and severance and related benefits, are based on assumptions at the time the actions are initiated. These accruals may need to be adjusted to the extent actual costs differ from such estimates. In addition, these actions may be revised due to changes in business conditions that we did not foresee at the time such plans were approved.

We also record accruals during the year for our various employee cash incentive programs. Amounts accrued at the end of each reporting period are based on our estimates and may require adjustment as the ultimate amount paid for these incentives are sometimes not known with certainty until after year end.

RESULTS OF OPERATIONS**Overall Results**

The following tables summarize the changes in selected line items in our interim Condensed Consolidated Statements of Operation for the periods indicated (dollars in thousands):

For the three months ended September 30, 2010 and 2009:

	Three Months Ended September 30, 2010 (1)	Three Months Ended September 30, 2009	Income Increase (Decrease) \$	Income Increase (Decrease) %
Total revenues	\$ 296,122	\$ 267,469	\$ 28,653	11%
Costs and expenses:				
Cost of services & product development	125,897	118,120	(7,777)	(7)%
Selling, general and administrative	127,488	115,049	(12,439)	(11)%
Depreciation	6,194	6,363	169	3%
Amortization of intangibles	2,531	416	(2,115)	>(100)%
Acquisition & integration charges	1,249		(1,249)	(100)%
Operating income	32,763	27,521	5,242	19%
Interest expense, net	(3,005)	(4,914)	1,909	39%
Other expense, net	(373)	(127)	(246)	>(100)%
Provision for income taxes	9,310	2,413	(6,897)	>(100)%
Net income	\$ 20,075	\$ 20,067	\$ 8	%

(1) Includes the operating results of AMR Research and Burton Group.

For the nine months ended September 30, 2010 and 2009:

	Nine Months Ended September 30, 2010 (1)	Nine Months Ended September 30, 2009	Income Increase (Decrease) \$	Income Increase (Decrease) %
Total revenues	\$ 906,150	\$ 810,973	\$ 95,177	12%
Costs and expenses:				
Cost of services & product development	387,279	351,864	(35,415)	(10)%
Selling, general and administrative	388,378	345,980	(42,398)	(12)%
Depreciation	19,218	19,176	(42)	%
Amortization of intangibles	7,994	1,220	(6,774)	>(100)%
Acquisition & integration charges	7,090		(7,090)	(100)%

Operating income	96,191	92,733	3,458	4%
Interest expense, net	(9,569)	(13,105)	3,536	27%
Other income (expense), net	736	(2,505)	3,241	>100%
Provision for income taxes	27,767	19,875	(7,892)	(40)%
Net income	\$ 59,591	\$ 57,248	\$ 2,343	4%

(1) Includes the operating results of AMR Research and Burton Group.

Total revenues for the three months ended September 30, 2010, increased \$28.7 million, or 11%, compared to the same period in 2009. Revenues increased in our Research segment but were essentially flat in Consulting and Events. Excluding the unfavorable impact of foreign currency translation, total quarterly revenues would have increased about 12%. Approximately \$14.0 million of the quarterly revenue increase was attributable to the AMR Research and Burton Group businesses.

For the nine month periods, revenues increased 12% in 2010, or about \$95.2 million, with higher revenues in all three of our business segments. Excluding the favorable impact of foreign currency translation, revenues increased 11%. Approximately \$40.0 million of the revenue increase was attributable to the AMR Research and Burton Group businesses.

Please refer to the section of this MD&A below entitled **Segment Results** for a further discussion of revenues and results by segment.

Cost of services and product development was 7% higher quarter-over-quarter, or \$7.8 million. The increase was primarily due to higher payroll and related benefits costs, which includes additional headcount charges attributable to the AMR Research and Burton Group businesses. Cost of services and product development as a percentage of sales decreased by 1 point, to 43% from 44%.

For the nine month periods, Cost of services and product development increased 10%, or \$35.4 million, in 2010. We recognized \$24.5 million in higher payroll and related benefits costs in 2010, primarily due to the impact of the increased headcount from the AMR Research and Burton Group businesses, and we had \$7.8 million in higher conference and travel costs, due to additional events and increased attendees, as well as a general pickup in travel activity from a depressed level in 2009, when the Company had strict travel restrictions in place due to the economic downturn. We also had \$3.1 million in other charges, including the unfavorable impact of foreign currency translation. Cost of services and product development as a percentage of sales was 43% for both the nine months ended September 30, 2010 and 2009.

Selling, general and administrative (SG&A) was \$12.4 million higher quarter-over-quarter, or 11%. The increase was primarily due to higher sales commissions, payroll and benefits, and other personnel charges, which includes the additional headcount costs attributable to the AMR Research and Burton Group businesses.

SG&A expense increased 12%, or \$42.4 million, in the nine months ended September 30, 2010 compared to the same period in the prior year. We had \$34.3 million of higher sales commissions, payroll and benefits, and other personnel charges, which included the additional headcount costs attributable to the AMR Research and Burton Group businesses, as well as higher stock-based compensation expense due to a higher projected level of achievement on performance-based restricted stock units. We also had higher travel charges of \$4.5 million, primarily due to additional sales headcount, and the unfavorable impact of foreign currency translation added \$3.6 million of additional expense.

Depreciation expense declined 3% quarter-over-quarter but was flat when comparing the nine-month periods. Capital spending increased to \$12.2 million in the nine months ended September 30, 2010 compared to \$11.1 million in the same period in 2009.

Amortization of intangibles increased in both the three and nine month periods of 2010 by \$2.1 million and \$6.8 million, respectively, due to the amortization of the intangibles acquired from AMR Research and Burton Group in December 2009.

Acquisition and Integration Charges were \$1.2 million and \$7.1 million in the three and nine months ended September 30, 2010, respectively. These charges relate to the acquisitions of AMR Research and Burton Group, and include legal, consulting, severance, and other costs.

Operating Income increased \$5.2 million, or 19% quarter-over-quarter, to \$32.7 million in the three months ended September 30, 2010 compared to \$27.5 million in 2009, with operating income as a percentage of revenues of 11% in 2010 and 10% in 2009. For the nine month periods, operating income increased 4% in 2010, to \$96.2 million, while operating income as a percentage of revenues was 11% for both the nine months ended September 30, 2010 and 2009. Please refer to the section of this MD&A entitled **Segment Results** below for a further discussion of revenues and results by segment.

Interest Expense, Net declined 39% in the three months ended September 30, 2010 compared to the same period in 2009, primarily due to a \$1.1 million charge recorded in the 2009 period related to the dedesignation of hedge accounting on an interest rate swap contract. Also, in the three months ended September 30, 2010, we had lower interest expense on our two interest rate swap contracts due to declining notional amounts and to a lesser extent, lower amortization charges on capitalized deferred financing costs and higher interest income.

Interest expense, net declined 27% in the nine months ended September 30, 2010 compared to the same period in 2009, due to a reduction in the weighted-average interest rate we paid on our debt in 2010 and the \$1.1 million swap dedesignation charge recorded in the 2009 period discussed above. Similar to the quarter, we also had lower amortization charges on capitalized deferred financing costs and higher interest income in the 2010 period.

The Company's existing Credit Agreement expires in January 2012. The Company is currently exploring refinancing options which may result in the accelerated payment of the amounts outstanding as of September 30, 2010. In addition, as of September 30, 2010 the Company had \$2.8 million of deferred losses, net of tax, recorded in OCI related to our two dedesignated interest rate swaps. This amount is being amortized against earnings through the remaining maturity of the loans outstanding under the existing Credit

Agreement. In the event of a refinancing, some or all of this amount, in addition to approximately \$0.8 million in unamortized deferred financing costs, may need to be recognized as expense in the period of the refinancing. Other (Expense) Income, Net for the three and nine months ended September 30, 2010 and 2009 consisted of net foreign currency exchange gains and losses. In addition, the first nine months of 2010 included a \$2.4 million gain due to an insurance recovery related to a prior period loss.

Provision For Income Taxes was \$9.3 million for the three months ended September 30, 2010 compared to \$2.4 million in the prior year quarter. The effective tax rate was 31.7% for the three months ended September 30, 2010 and 10.7% for the same period in 2009. The increase in the effective tax rate was primarily due to the impact of certain discrete items as well as a change in the estimated annual mix of pre-tax income by jurisdiction. Discrete items in the three months ended September 30, 2009 included the release of approximately \$3.4 million of reserves and \$0.5 million of related interest reserves due to the expiration of the relevant statutes of limitation.

The provision for income taxes was \$27.8 million for the nine months ended September 30, 2010 compared to \$19.9 million in the same period in 2009. The effective tax rate was 31.8% for the nine months ended September 30, 2010 and 25.8% for the same period in 2009. The increase in the effective tax rate was primarily due to the impact of certain discrete items as well as a change in the estimated annual mix of pre-tax income by jurisdiction. Discrete items in the nine months ended September 30, 2009 included the release of approximately \$3.4 million of reserves and \$0.5 million of related interest reserves due to the expiration of the relevant statutes of limitation.

Net Income was \$20.1 million for both the three months ended September 30, 2010 and 2009, while basic earnings per share was \$0.21 per share for both periods. Diluted earnings per share declined by \$.01 per share, due to an increase in the number of diluted shares outstanding. For the nine month periods, both basic and diluted earnings per share increased by \$.01 per share in 2010 due to higher net income.

SEGMENT RESULTS

We evaluate reportable segment performance and allocate resources based on gross contribution margin. Gross contribution is defined as operating income excluding certain Cost of services and product development charges, SG&A expenses, Depreciation, Amortization of intangibles, Acquisition and integration charges, and Other charges. Gross contribution margin is defined as gross contribution as a percentage of revenues.

The following sections present the results of our three segments:

Research

	As Of And For The Three Months Ended September 30, 2010 (1)	As Of And For The Three Months Ended September 30, 2009		Percentage Increase (Decrease)	As Of And For The Nine Months Ended September 30, 2010 (1)	As Of And For The Nine Months Ended September 30, 2009		Percentage Increase (Decrease)
Financial Measurements:								
Revenues (2)	\$ 214,680	\$ 185,718	\$ 28,962	16%	\$ 634,448	\$ 557,325	\$ 77,123	14%
Gross contribution (2)	\$ 140,605	\$ 122,611	\$ 17,994	15%	\$ 415,311	\$ 366,807	\$ 48,504	13%

Wallet retention	95%	85%	10 points	
Exec. program members	3,969	3,469	500	14%

(1) Includes AMR Research and Burton Group.

(2) Dollars in thousands.

Research revenues increased 16% on a quarter-over-quarter basis, but excluding the unfavorable effect of foreign currency translation, revenues increased 17%. Approximately 38% of the almost \$29.0 million revenue increase was attributable to the AMR Research and Burton Group businesses. The segment gross contribution margin declined by 1 point quarter-over-quarter, to 65%, primarily due to additional headcount costs from the AMR Research and Burton Group businesses.

When comparing the nine month periods, revenues increased 14% in 2010, with the AMR Research and Burton Group businesses contributing about 42% of the increase. Adjusted for the favorable impact of foreign currency translation, revenues increased 13%. The segment gross contribution margin declined 1 point, again primarily due to additional headcount expenses from the AMR Research and Burton Group businesses.

Research contract value increased 22% compared to September 30, 2009. Excluding the favorable impact of foreign currency translation, research contract value increased 18%. Approximately 35% of the \$162.6 million increase in contract value was attributable to the AMR Research and Burton Group businesses. Client retention and wallet retention improved 5 points and 10 points, respectively.

Research and
Burton Group.

(2) Dollars in
thousands.

Consulting revenues were essentially flat quarter-over-quarter, but excluding the unfavorable impact of foreign currency translation, revenues increased about 2%. Consulting revenues related to the AMR Research and Burton Group businesses contributed approximately \$1.3 million of revenues in the three months ended September 30, 2010. Consulting billable headcount was 453 at September 30, 2010 compared to 449 at September 30, 2009. The gross contribution margin improved by 1 point, due to additional revenues in our strategic advisory (SAS) business, which has a higher margin than core consulting.

For the nine month periods, Consulting revenues increased 4% in 2010, but excluding the favorable impact of foreign currency translation, revenues increased 3%. The AMR Research and Burton Group businesses added approximately half of the \$7.5 million revenue increase. The gross contribution margin improved by 2 points due to additional revenues in our contract optimization and SAS businesses, both of which have higher margins than core consulting. Backlog at September 30, 2010 was up 11%, or \$9.2 million, over September 30, 2009, reflecting increases across all of our geographic regions. The AMR Research and Burton Group businesses added approximately \$0.4 million of the increase.

Research and
Burton Group.

(2) Dollars in
thousands.

Events revenues were flat quarter-over-quarter, but were up 3% when excluding the unfavorable impact of foreign currency translation. We held 14 events in the third quarter of 2010, consisting of 8 ongoing events, 4 events moved in to the quarter on a net basis, and 2 new event launches.

While the number of attendees increased 10% in the third quarter of 2010 and the average revenue per attendee increased 20%, the number of exhibitors declined due to timing. Although we realized additional revenues from attendees, this increase was offset by the move of a large exhibitor revenue event from the third quarter in 2009 to the second quarter in 2010. When the 12 continuing events held in the third quarter of 2010 are compared to the same 12 events held in 2009 regardless of when the event was held in 2009, revenues from these same 12 events increased 17%, while the number of attendees increased 14% and exhibitors increased 7%. The quarterly gross contribution margin was 37% for both quarters.

For the nine month periods, Events revenues increased 22% in 2010, or \$10.6 million, with little impact from foreign currency translation. We held 3 additional events in the first nine months of 2010, for a total of 44 events, which consisted of 35 ongoing events, 2 events moved into the period due to timing, and 7 new events. We had a 32% increase in attendees and a 14% increase in exhibitors, while average revenue increased 16% for attendees but was flat for exhibitors. Revenues increased \$6.0 million and \$5.0 million from the ongoing and the new events, respectively, while the net impact of events timing reduced revenues by about \$0.4 million. The gross contribution margin increased 5 points, primarily due to higher contribution from our ongoing events, reflecting the strength in attendee volume and average revenue per attendee as well as higher exhibitor volume.

LIQUIDITY AND CAPITAL RESOURCES

We finance our operations primarily through cash generated from our on-going operating activities. As of September 30, 2010, we had over \$148.0 million of cash and cash equivalents and \$142.0 million of available borrowing capacity under our revolving credit facility. Our cash and cash equivalents are held in numerous locations throughout the world, with 90% held outside the United States as of September 30, 2010.

The Company is currently exploring refinancing options, which may result in the accelerated payment of the amounts outstanding as of September 30, 2010 and the borrowing of new funds. We believe that the cash we expect to earn from our on-going operating activities, our existing cash balances, and the borrowing capacity we have under our current revolving credit facility, as well as any replacement facility, will be sufficient for our expected short-term and foreseeable long-term operating needs.

The following table summarizes the changes in the Company's cash and cash equivalents (in thousands):

	Nine Months Ended September 30, 2010	Nine Months Ended September 30, 2009	Dollar Increase (Decrease)
Cash provided by operating activities	\$ 126,375	\$ 117,640	\$ 8,735
Cash used by investing activities	(24,362)	(11,125)	(13,237)
Cash used in financing activities	(73,521)	(142,287)	68,766
Net increase (decrease)	28,492	(35,772)	64,264
Effects of exchange rates	3,346	7,621	(4,275)
Beginning cash and cash equivalents	116,574	140,929	(24,355)
Ending cash and cash equivalents	\$ 148,412	\$ 112,778	\$ 35,634

Operating

Our operating cash flow increased by \$8.7 million, or about 7%, primarily due to the \$2.3 million increase in net income, a \$6.5 million decrease in cash payments for severance, interest, and excess facilities, and \$2.4 million in cash we received from an insurance recovery. We also had a \$10.7 million net increase from other receipts and disbursements. Partially offsetting these improvements were \$6.8 million in acquisition and integration payments related to the acquisitions of AMR Research and Burton Group and \$6.4 million more in bonus and tax payments in 2010.

Investing

We used an additional \$13.2 million of cash in 2010 due to acquisitions and higher capital expenditures. We paid \$12.2 million in additional cash related to the acquisition of Burton Group. We also used \$12.2 million of cash for capital expenditures in the 2010 period compared to \$11.1 million in the 2009 period, a \$1.1 million, or 10% increase.

Financing

We used \$73.5 million of cash in our financing activities in the 2010 period compared to \$142.3 million used in the 2009 period, a decrease of \$68.8 million, primarily due to higher debt payments in 2009.

On a net basis, we repaid \$29.0 million of debt in the nine months ended September 30, 2010, compared to payments of \$151.3 million in the prior year period, a decline in cash used of about \$122.2 million. We also had \$19.3 million in higher option exercises and excess tax benefits in the 2010 period as a higher average stock price in 2010 resulted in a significantly increased number of option exercises. Partially offsetting these improvements was an additional \$72.7 million in cash used for share repurchases in 2010, with \$76.5 million used in 2010 compared to \$3.7 million in 2009.

OBLIGATIONS AND COMMITMENTS***Credit Agreement***

At September 30, 2010, we had \$300.0 million outstanding under our Credit Agreement, which included two amortizing term loans and a \$300.0 million revolving credit facility. The revolving credit facility may be increased up to an additional \$100.0 million at our lenders' discretion (the "expansion feature"), for a total revolving credit facility of \$400.0 million. However, the \$100.0 million expansion feature may or may not be available to us depending upon prevailing credit market conditions.

The term loans are being repaid in consecutive quarterly installments plus a final payment due on January 31, 2012, and may be prepaid at any time without penalty or premium at our option. The revolving loans may be borrowed, repaid and reborrowed until January 31, 2012, at which time all amounts borrowed must be repaid. The Company is currently exploring refinancing options, which may result in the accelerated payment of the amounts outstanding as of September 30, 2010, and the recognition of other related charges.

See Note 8 Debt in the accompanying Notes to the interim condensed consolidated financial statements for additional information regarding the Company's Credit Agreement.

Off-Balance Sheet Arrangements

Through September 30, 2010, we have not entered into any off-balance sheet arrangements or transactions with unconsolidated entities or other persons.

BUSINESS AND TRENDS

Our quarterly and annual revenue, operating income, and cash flow fluctuate as a result of many factors, including: the timing of our Symposium/ITxpo series that normally occurs during the fourth calendar quarter, and other events; the amount of new business generated; the mix of domestic and international business; changes in market demand for our products and services; changes in foreign currency rates; the timing of the development, introduction and marketing of new products and services; competition in the industry; and other factors. The potential fluctuations in our operating income could cause period-to-period comparisons of operating results not to be meaningful and could provide an unreliable indication of future operating results.

FACTORS THAT MAY AFFECT FUTURE PERFORMANCE

We operate in a very competitive and rapidly changing environment that involves numerous risks and uncertainties, some of which are beyond our control. A description of the risk factors associated with our business is included under Risk Factors contained in Item 1A. of our 2009 Annual Report on Form 10-K which is incorporated herein by reference.

RECENTLY ISSUED ACCOUNTING STANDARDS

In July 2010, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2010-20, *Disclosures about the Credit Quality of Financing Receivables and the Allowance for Credit Losses*. ASU 2010-20 requires additional disclosures about the credit quality of financing receivables and the allowance for credit losses. The purpose of the additional disclosures is to enable users of financial statements to better understand the nature of credit risk inherent in an entity's portfolio of financing receivables and how that risk is analyzed. The new disclosures are required to be made in interim and annual periods ending on or after December 15, 2010. We are currently evaluating the impact of this rule but do not believe it will have an impact on our consolidated financial results since the rule requires additional disclosure only.

In January 2010, the FASB issued ASU 2010-06, *Fair Value Measurements and Disclosures*. ASU 2010-06 requires fair value hierarchy disclosures to be further disaggregated by class of assets and liabilities. A class is often a subset of assets or liabilities within a line item in the balance sheet. In addition, significant transfers between Levels 1 and 2 of the fair value hierarchy are required to be disclosed. These additional disclosure requirements became effective January 1, 2010. In general, Gartner does not anticipate transfers between the different levels of the fair value hierarchy, and for the three and six months ended June 30, 2010, there were none. Our required fair value disclosures are presented in Note 12 *Fair Value Disclosures*, herein in the Notes to the Condensed Consolidated Financial Statements. Beginning January 1, 2011, the FASB will also require additional disclosures regarding changes in Level 3 instruments. Gartner currently does not have any Level 3 instruments.

In September 2009, the FASB issued ASU 2009-14, *Certain Revenue Arrangements That Include Software Elements*. Under ASU 2009-14, all tangible products containing both software and non-software components, that function together to deliver the product's essential functionality, will no longer be within the scope of rules governing Software revenue recognition (formerly known as SOP 97-2). This means that entities that sell joint hardware and software products that meet the scope exception (i.e., essential functionality) will be required to follow the guidance in ASU 2009-13 below. The Update provides a list of items to consider when determining whether the software and non-software components function together to deliver a product's essential functionality. ASU 2009-14 will be effective for Gartner beginning in the first quarter of fiscal year 2011, but early adoption is permitted. We are currently evaluating the impact of this rule but do not believe it will have a material impact on the Company's consolidated financial statements.

In September 2009, the FASB issued ASU 2009-13, *Revenue Arrangements with Multiple Deliverables*. ASU 2009-13 requires companies to allocate revenue in arrangements involving multiple deliverables based on the estimated selling price of each deliverable, even though such deliverables are not sold separately either by the company itself or other vendors. ASU 2009-13 eliminates the requirement that all undelivered elements must have objective and reliable evidence of fair value before a company can recognize the portion of the overall arrangement

fee that is attributable to items that already have been delivered. As a result, the new guidance is expected to allow some companies to recognize revenue on transactions that involve multiple deliverables earlier than

under current requirements. ASU 2009-13 will be effective for Gartner beginning in the first quarter of fiscal year 2012, but early adoption is permitted. We are currently evaluating the impact of this rule but do not believe it will have a material impact on the Company's consolidated financial statements.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Interest Rate Risk

We had exposure to changes in interest rates arising from the \$145.0 million outstanding on our two term loans and \$155.0 million outstanding on our revolver as of September 30, 2010. All of these borrowings are floating rate, which may be either prime-based or LIBOR-based. Interest rates under these borrowings include a base rate plus a margin currently between 0.00% and 0.75% on prime borrowings and between .625% and 1.75% on LIBOR-based borrowings.

As of September 30, 2010, the annualized interest rates on the Original term loan, the 2008 term loan, and the revolver were 1.17%, 1.54%, and 1.20%, respectively. The rates on the term loans consisted of a three-month LIBOR base rate plus margins of 0.875% and 1.25%, respectively. The rate on the revolver consisted of a weighted-average LIBOR base rate plus a margin of 0.875%.

We are exposed to interest rate risk on our debt. A 25 basis point increase or decrease in interest rates would change pre-tax annual interest expense on the entire \$300.0 million revolver facility and the \$145.0 million outstanding on the term loans at September 30, 2010 by approximately \$1.1 million.

Foreign Currency Exchange Risk

We have clients in 85 countries and as a result we conduct business in numerous currencies other than the U.S. dollar. Among the major foreign currencies in which we conduct business are the Euro, the British Pound, the Japanese Yen, the Australian dollar, and the Canadian dollar. Our foreign currency exposure results in both translation risk and transaction risk:

Translation Risk

We are exposed to foreign currency translation risk since the functional currencies of our foreign operations are generally denominated in the local currency. Translation risk arises since the assets and liabilities that we report for our foreign subsidiaries are translated into U.S. dollars at the exchange rates in effect at the balance sheet dates, and these exchange rates fluctuate over time. These foreign currency translation adjustments are deferred and are recorded as a component of stockholders' equity and do not impact our operating results.

A measure of the potential impact of foreign currency translation on our Condensed Consolidated Balance Sheets can be determined through a sensitivity analysis of our cash and cash equivalents. As of September 30, 2010, we had \$148.4 million of cash and cash equivalents, a substantial portion of which was denominated in foreign currencies. If the foreign exchange rates of the major currencies in which we operate changed in comparison to the U.S. dollar by 10%, the amount of cash and cash equivalents we would have reported on September 30, 2010, would have increased or decreased by approximately \$10.0 million.

Because our foreign subsidiaries generally operate in a local functional currency that differs from the U.S. dollar, revenues and expenses in these foreign currencies translate into higher or lower revenues and expenses in U.S. dollars as the U.S. dollar continuously weakens or strengthens against these other currencies. Therefore, changes in exchange rates may affect our consolidated revenues and expenses (as expressed in U.S. dollars) from foreign operations.

Historically, this impact on our consolidated earnings has not been material since foreign currency movements in the major currencies in which we operate tend to impact our revenues and expenses fairly equally.

Transaction Risk

We also have foreign exchange transaction risk since we typically enter into transactions in the normal course of business that are denominated in foreign currencies that differ from the local functional currency in which the foreign subsidiary operates.

We typically enter into foreign currency forward exchange contracts to offset the effects of this foreign currency transaction risk. These contracts are normally short term in duration and unrealized and realized gains and losses are recognized in current period

earnings. At September 30, 2010, we had 20 outstanding foreign currency forward contracts with a total notional amount of \$82.5 million and a net unrealized loss of approximately \$0.4 million. All of these contracts matured by the end of October 2010.

Concentration of Credit Risk

Financial instruments that potentially subject the Company to concentration of credit risk consist primarily of short-term, highly liquid investments classified as cash equivalents, accounts receivable, and interest rate swap contracts. The majority of the Company's cash equivalent investments and its two interest rate swap contracts are with investment grade commercial banks that are participants in the Company's Credit Agreement. Accounts receivable balances deemed to be collectible from customers have limited concentration of credit risk due to our diverse customer base and geographic dispersion.

ITEM 4. CONTROLS AND PROCEDURES

We have established disclosure controls and procedures that are designed to ensure that the information we are required to disclose in our reports filed under the Securities Exchange Act of 1934, as amended (the "Act"), is recorded, processed, summarized and reported in a timely manner. Specifically, these controls and procedures ensure that the information is accumulated and communicated to our executive management team, including our chief executive officer and our chief financial officer, to allow timely decisions regarding required disclosure.

Management conducted an evaluation, as of September 30, 2010, of the effectiveness of the design and operation of our disclosure controls and procedures, under the supervision and with the participation of our chief executive officer and chief financial officer. Based upon that evaluation, our chief executive officer and chief financial officer have concluded that the Company's disclosure controls and procedures are effective in alerting them in a timely manner to material Company information required to be disclosed by us in reports filed under the Act.

In addition, there have been no changes in the Company's internal control over financial reporting during the period covered by this report that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II OTHER INFORMATION**ITEM 1. LEGAL PROCEEDINGS**

We are involved in legal and administrative proceedings and litigation arising in the ordinary course of business. We believe that the potential liability, if any, in excess of amounts already accrued from all proceedings, claims and litigation will not have a material effect on our financial position or results of operations when resolved in a future period.

ITEM 1A. RISK FACTORS

A description of the risk factors associated with our business is included under **Risk Factors** contained in Item 1A. of our 2009 Annual Report on Form 10-K and is incorporated herein by reference.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

There were no unregistered sales of equity securities during the period covered by this report.

Issuer Purchases of Equity Securities

On August 5, 2010, the Company's Board of Directors approved a new \$500.0 million share repurchase program to be utilized to acquire additional shares of Common Stock. Repurchases may be made from time-to-time through open market purchases, private transactions, tender offers or other transactions. The amount and timing of repurchases will be subject to the availability of stock, prevailing market conditions, the trading price of the stock, the Company's financial performance and other conditions. Repurchases may also be made from time-to-time in connection with the settlement of the Company's shared-based compensation awards. Repurchases will be funded from cash flow from operations and borrowings under the Company's Credit Agreement.

The following table provides detail related to repurchases of our Common Stock for treasury in the nine months ended September 30, 2010:

Period	Total Number of Shares Purchased	Average Price Paid Per Share	Approximate Dollar Value of Shares that may yet be Purchased Under our Share Repurchase Program (in thousands)
2010			
January	2,291	\$ 21.39	
February	949,467	22.93	
March	551,942	24.18	
Total	1,503,700	\$ 23.39
