Form 10-K
February 25, 2011

**UNITED STATES SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549**

Form 10-K

- ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934**
for the fiscal year ended December 31, 2010
- Or
- TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934**
for the transition period from to

Commission File No. 001-32548

NeuStar, Inc.

(Exact name of registrant as specified in its charter)

Delaware
*State or other jurisdiction of
incorporation or organization)*

52-2141938
*(I.R.S. Employer
Identification No.)*

**46000 Center Oak Plaza
Sterling, Virginia**
(Address of principal executive offices)

20166
(Zip Code)

(571) 434-5400

(Registrant's telephone number, including area code)

Securities registered pursuant to Section 12(b) of the Act:

Title of Each Class	Name of Each Exchange on Which Registered
Class A Common Stock	New York Stock Exchange

Securities registered pursuant to Section 12(g) of the Act:

None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Edgar Filing: NEUSTAR INC - Form 10-K

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company
(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

On February 18, 2011, 73,786,714 shares of NeuStar Class A common stock were outstanding and 3,082 shares of NeuStar Class B common stock were outstanding. The aggregate market value of the NeuStar common equity held by non-affiliates as of June 30, 2010 was approximately \$1.63 billion.

DOCUMENTS INCORPORATED BY REFERENCE:

Information required by Part III (Items 10, 11, 12, 13 and 14) is incorporated by reference to portions of NeuStar's definitive proxy statement for its 2011 Annual Meeting of Stockholders, which NeuStar intends to file with the Securities and Exchange Commission within 120 days of December 31, 2010.

PART I

ITEM 1. BUSINESS

Overview

We provide authoritative directory and policy management services to our customers, which include communications service providers, or carriers, and non-carrier, commercial businesses, or enterprises. We were founded to meet the technical and operational challenges of the communications industry when the U.S. government mandated local number portability in 1996. We provide the authoritative solution that the communications industry relies upon to meet this mandate, and we also provide a broad range of innovative services to meet an expansive range of our customers' needs.

We provide critical directory services that our carrier and enterprise customers rely upon to manage a wide range of technical and operating requirements, including the following:

Carrier Services. Our carrier services include numbering services, order management services and Internet Protocol, or IP, services. Through our set of unique databases and system infrastructure in geographically dispersed data centers, we manage the increasing complexity in the telecommunications industry and ensure the seamless connection of our carrier customers' numerous networks, while also enhancing the capabilities and performance of their infrastructure. We operate the authoritative databases that manage virtually all telephone area codes and numbers, and enable the dynamic routing of calls among numerous competing carriers in the United States and Canada. All carriers that offer telecommunications services to the public at large must access a copy of our unique database to properly route their customers' calls. We also facilitate order management and work flow processing among carriers, and allow operators to manage and optimize the addressing and routing of IP communications.

Enterprise Services. Our enterprise services include Internet infrastructure services and registry services. Through our global directory platform, we provide a suite of domain name system, or DNS, services to our enterprise customers. We manage a collection of directories that maintain addresses in order to direct, prioritize and manage Internet traffic, and to find and resolve Internet queries and top-level domains on behalf of our enterprise customers. We are the authoritative provider of essential registry services and manage directories of similar resources, or addresses, that our customers use for reliable, fair and secure access and connectivity. In addition, enterprise customers rely on our services to monitor and load-test websites to help identify issues and optimize performance. We also provide geolocation database services that help enterprises identify the location of their consumers for a variety of purposes, such as target marketing and fraud prevention. Additionally, we provide directory services for the 5 and 6-digit number strings used for all U.S. Common Short Codes, which is part of the short messaging service relied upon by the U.S. wireless industry.

Background

Changes in the structure of the communications industry over the past two decades have presented increasingly complex technical and operating challenges. Whereas the Bell Operating System once dominated the U.S. telecommunications industry, there are now thousands of service providers, all with disparate networks. Today these service providers must interconnect their networks and carry each other's traffic to route phone calls, unlike in the past when a small number of incumbent wireline carriers used established, bilateral relationships. In addition,

carriers and enterprises are delivering a broad set of new services using a diverse array of technologies. These services, which include voice, data and video, are used in combinations that are far more complex than the historical, uniform voice services of traditional carriers.

The increasing complexity of the communications industry has produced operational challenges, as the in-house network management and back office systems of traditional carriers were not designed to capture all of the

information necessary for provisioning, authorizing, routing and billing these new services. In particular, it has become significantly more difficult for service providers to:

Locate end-users. Identify the appropriate destination for a given communication among multiple networks and unique addresses, such as wireline and wireless phone numbers as well as IP and e-mail addresses;

Establish identity. Authenticate that the users of the communications networks are who they represent themselves to be and that they are authorized to use the services being provided;

Connect. Route the communication across disparate networks;

Provide services. Authorize and account for the exchange of communications traffic across multiple networks; and

Process transactions. Capture, process and clear accounting records for billing, and generate settlement data for inter-provider compensation.

Enterprises in the United States and throughout the world have become increasingly reliant on the Internet and other DNS-based systems to support their businesses. With the growth in e-commerce and the emergence of advanced DNS-based communication services, large and small enterprises have increased demand for:

secure and reliable email and networks;

authoritative directories for Internet domain names; and

domain name registration services.

Our Company

We incorporated in Delaware in 1998 to acquire our number portability business from Lockheed Martin Corporation. We completed this acquisition in November 1999. Our principal executive offices are located at 46000 Center Oak Plaza, Sterling, Virginia, 20166, and our telephone number at that address is (571) 434-5400.

The advent of local number portability, or LNP, the Internet and telecommunications mobility has made the routing of worldwide communications significantly more complex and challenging. We simplify this complexity and help solve these challenges for our customers by providing directory services that enable trusted communication across networks, applications and businesses around the world. Our service offerings are aligned to the way we sell to our two common customer bases, carriers and enterprises. We have a shared operations group that spans across our organization to support our global infrastructure. Our global infrastructure has been designed to provide services that are:

Reliable. Our services depend on complex technology that is configured to deliver high reliability consistent with stringent industry and customer standards. We have made a commitment to our customers to deliver high quality services meeting numerous measured service level requirements, such as system availability, response times for help desk inquiries and billing accuracy.

Scalable. The modular design of our infrastructure enables capacity expansion without service interruption or quality of service degradation, and with incremental investment that provides significant economies of scale.

Neutral. We provide our services in a competitively neutral way to ensure that no customer is favored over any other. Our databases and capabilities provide competing entities with fair, equal and secure access to essential shared resources. Moreover, we have made a commitment not to compete with our customers.

Trusted. The data we collect are important and proprietary. Accordingly, we have implemented appropriate procedures and systems to protect the privacy and security of customer data, restrict access to our system and protect the integrity of our databases. Our performance with respect to neutrality, privacy and security is independently audited on a regular basis.

Carrier Services

As noted above, our carrier customers face increasingly complex technical and operating challenges resulting from changes in the structure of the communications industry over the past two decades. Through our set of unique databases and system infrastructure in geographically dispersed data centers, we manage this complexity and ensure the seamless connection of our carrier customers' numerous networks, while enhancing the capabilities and performance of their infrastructure. We enable our carrier customers to use, exchange and share critical information, such as telephone numbers; facilitate order management and work flow processing among carriers; and allow operators to direct, prioritize and optimize the addressing and routing of emerging IP communications, particularly as they migrate to the mobile environment.

Through our Carrier Services operating segment, we provide a range of services to our carrier customers, including:

Numbering Services. We operate and maintain authoritative databases that help manage the increased complexity in the telecommunications industry. We also ensure the seamless connection of our carrier customers' numerous networks, while also enhancing the capabilities and performance of their infrastructure. Our unique set of databases enables our carrier customers to obtain data successfully to dynamically route telephone calls in the United States and Canada. The numbering services we provide to our carrier customers using these databases include number portability administration center services, or NPAC Services, NPAC Services in Canada and LNP services in Taiwan and Brazil, or international LNP solutions, and number inventory and allocation management. Additionally, we enable carriers to manage their networks more efficiently by centrally processing essential changes they use to route communications.

Order Management Services. Our Order Management Services permit our carrier customers, through a single interface, to exchange essential operating data with multiple carriers in order to provision services.

IP Services. We provide scalable IP services to global carriers that allow them to manage access for the routing of IP communications, such as multimedia messaging service. Our solutions solve the complexity of mapping a phone number to an IP address for accurate and reliable routing to a carrier's network. We also enable direct network-to-network peering between carriers for voice, video and content services.

Enterprise Services

Our Enterprise Services segment provides an innovative suite of network and directory services for our enterprise customers. We provide DNS solutions and geolocation services for non-carrier, commercial businesses, and serve as the authoritative provider of essential registry services. We manage a directory of similar resources, or addresses, where customers have reliable, fair and secure access and connectivity to their data. We maintain a collection of these essential directories that maintain addresses to help find and resolve Internet queries and top-level domains on behalf of our enterprise customers. Additionally, we provide directory services for the 5 and 6-digit number strings used for all U.S. Common Short Codes, which is part of the short messaging service relied upon by the U.S. wireless industry.

The range of services we offer to our enterprise customers includes:

Internet Infrastructure Services. We provide a suite of DNS services to our enterprise customers built on a global directory platform. These services play a key role in directing and managing Internet traffic flow, resolving Internet queries, providing security protection against Internet breaches called Distributed Denial of Service attacks, providing geolocation services used to enhance target marketing and fraud prevention, and monitoring, testing and measuring the performance of websites and networks.

Registry Services. We operate the authoritative registries of Internet domain names for the .biz, .us, .co, .tel and .travel top-level domains. We also provide international registry gateways for China's .cn and Taiwan's .tw country-code top-level domains. All Internet communications routed to any of these domains must query a copy of our directory to ensure that the communication is routed to the appropriate destination. We also operate the authoritative Common Short Codes registry on behalf of the US wireless industry.

Operations

Sales Force and Marketing

As of December 31, 2010, our sales and marketing organization consisted of approximately 324 people who work together to offer our customers advanced technologies and solutions to serve our customers' needs. Our sales teams work closely with our customers to identify and address their needs, while our marketing team works closely with our sales teams to develop a clear and consistent corporate image.

We have an experienced sales and marketing staff who have extensive knowledge about the management of telephone numbers and domain name systems, number portability and IP directory services. We believe we have close relationships with our customers, and we understand their systems and operations. We have worked closely with our customers to develop solutions such as national pooling, U.S. Common Short Codes, number translation services, and the provisioning of service requests for Voice over Internet Protocol, or VoIP, providers. Our sales teams strive to attract new customers, increase the amount and level of services purchased by existing customers and expand the range of services we provide to our customers.

Customer Support

Customer support personnel are responsible for the resolution of all customer inquiries and provisioning and trouble requests. Our staff works closely with our customers to ensure that our service level agreements are being met. They continually solicit customer feedback and are in charge of bringing together the appropriate internal resources to troubleshoot any problems or issues that customers may have. Performance of these individuals is measured by customer satisfaction surveys and measurements of key performance indicators.

Operational Capabilities

We provide our services through our state-of-the-art data centers and remotely hosted computer hardware that is located in third-party facilities throughout the world. Our data centers, including third-party facilities that we use, are custom designed for the processing and transmission of high volumes of transaction-related, time-sensitive data in a highly secure environment. We are committed to employing best-of-breed tools and equipment for application development, infrastructure management, operations management and information security. In general, we subscribe to the highest level of service and responsiveness available from each third-party vendor that we use. Further, to protect the integrity of our systems, the major components of our networks are generally designed to eliminate any single point of failure.

We consistently meet and frequently exceed our contractual service level requirements. Our performance results for certain services are monitored internally and subjected to independent audits on a regular basis.

Research and Development

We maintain a research and development group, the principle functions of which are to develop new services and improvements to existing services, oversee quality control processes and perform application testing. Our processes surrounding the development of new services and improvement to existing services focus on the challenges our customers face related to the management of an expanding array of technologies and end-user services across a growing number of carriers and enterprises. We employ industry experts in areas of technology that we believe are key to solving these problems. Our quality control and application testing processes focus predominantly on resolving highly technical issues related to the performance of our technology platforms. These issues are identified through

both internal and external feedback mechanisms, and continuous testing of our applications and system platforms to ensure uptime commensurate with the service level standards we have agreed to provide to our customers. As of December 31, 2010, we had approximately 83 employees dedicated to research and development, which include software engineers, quality assurance engineers, technical project managers and documentation specialists. We expense our research and development costs as they are incurred. Our research and development expense was \$27.5 million, \$16.2 million and \$14.0 million for the years ended December 31, 2008, 2009 and 2010, respectively.

Customers

We serve traditional providers of communications, including local exchange carriers, such as Verizon Communications Inc. and AT&T Inc.; competitive local exchange carriers, such as XO Holdings, Inc. and Level 3 Communications, Inc.; wireless service providers, such as Verizon Wireless Inc., and long distance carriers. We also serve emerging providers, including Comcast Corporation, Cox Communications, Inc. and Cbeyond, Inc., and emerging providers of VoIP services, such as Vonage Holdings Corp.

In addition to serving traditional carriers, we also serve a growing number of customers who are either enablers of Internet services or providers of information and content to Internet and telephone users. For example, customers for our managed DNS services include a wide range of both large and small enterprises, including registry operators, such as the Canadian Internet Registration Authority, and e-commerce companies. All Internet service providers rely on our Internet registry services to route all communications to .biz and .us Internet addresses. Domain name registrars, including Network Solutions, Inc., The Go Daddy Group, Inc., and Web.com Group, Inc. pay us for each .biz and .us domain name they register on behalf of their customers. Wireless service providers rely on our registry to route all U.S. Common Short Code communications, but the bulk of our customers for U.S. Common Short Codes are the information and entertainment content providers who register codes with us to allow wireless subscribers to communicate with them via text messaging.

Our customers include over 12,100 different corporate entities, each of which is separately billed for the services we provide, regardless of whether it may be affiliated with one or more of our other customers. No single corporate entity accounted for more than 10% of our total revenue in 2010. The amount of our revenue derived from customers inside the United States was \$434.0 million, \$431.2 million and \$480.2 million for the years ended December 31, 2008, 2009 and 2010, respectively. The amount of our revenue derived from customers outside the United States was \$54.8 million, \$49.2 million and \$46.6 million for the years ended December 31, 2008, 2009 and 2010, respectively. The amount of our revenue derived under our contracts with North American Portability Management LLC, or NAPM, an industry group that represents all telecommunications service providers in the United States, was \$331.8 million, \$306.1 million and \$337.1 million for the years ended December 31, 2008, 2009 and 2010, respectively, representing 68%, 64% and 64% of our revenue for the years ended December 31, 2008, 2009, and 2010, respectively. Our total revenue from our contracts with NAPM includes revenues from our NPAC Services, connection services related to our NPAC Services and NPAC-related system enhancements.

We have two operating segments, Carrier Services and Enterprise Services, which are the same as our reportable segments. Due to the realignment of our operating structure and internal financial reporting in the first quarter of 2010, these segments differ from those reported for the year ended December 31, 2009. We chose to realign our operating structure and internal financial reporting by customer type, reflecting how our chief operating decision maker, or CODM, allocates resources and assesses performance. This changed our operating segments and the underlying reporting units, and we have restated the corresponding items of segment information from earlier periods throughout this Form 10-K. For further discussion of the operating results of our segments, including revenue, segment contribution, consolidated income from operations, total long-lived assets, goodwill, and intangible assets, as well as information concerning our international operations, see Note 6 and Note 16 to our Consolidated Financial Statements in Item 8 of Part II of this report.

Competition

Our services most frequently compete against the in-house systems of our customers. We believe our services offer greater reliability and flexibility on a more cost-effective basis than these in-house systems.

With respect to our roles as the North American Numbering Plan Administrator, National Pooling Administrator, administrator of local number portability for the communications industry, operator of the sole authoritative registry for the .us and .biz Internet domain names, and operator of the sole authoritative registry for U.S. Common Short Codes, there are no other providers currently providing the services we offer. However, we were awarded the contracts to administer these services in open and competitive procurement processes where we competed against companies including Accenture plc, Computer Sciences Corporation, Hewlett-Packard Company, International Business Machines Corporation, or IBM, Noblis, Inc., Nortel Networks Corporation, Pearson Education, Inc., Perot Systems Corporation, Telcordia Technologies, Inc. and VeriSign, Inc. We have

renewed or extended the term of several of these contracts since they were first awarded to us. Prior to the expiration of our contracts in June 2015 to provide NPAC Services in the United States, our competitors may submit proposals to replace us, in whole or in part, as the provider of the services covered by these contracts. In addition, NAPM has publicly announced plans to issue a request for proposal to solicit offers to provide services under a new NPAC Services contract or contracts that would become effective upon the expiration of our existing NPAC contracts in June 2015. Similarly, with respect to our contracts to act as the North American Number Plan Administrator, the National Pooling Administrator, operator of the authoritative registry for the .us and .biz Internet domain names, and the operator of the authoritative registry for U.S. Common Short Codes, the relevant counterparty could elect not to exercise the extension period under the contract, if applicable, or to terminate the contract in accordance with its terms, in which case we could be forced to compete with other providers to continue providing the services covered by the relevant contract. However, we believe that our position as the incumbent provider with high customer satisfaction of these services will enable us to compete favorably for contract renewals or for new contracts to continue to provide these services.

While we do not face direct competition for the registry of .us and .biz Internet domain names, we compete with other companies that maintain the registries for different domain names, including VeriSign, Inc., which manages the .com and .net registries, Afilias Limited, which manages the .org and .info registries, and a number of managers of country-specific domain name registries, such as .uk for domain names in the United Kingdom.

We compete against a range of providers of carrier and enterprise services, as well as the in-house network management and information technology organizations of our customers. Our competitors, other than in-house network systems, generally fall into these categories:

systems integrators such as Accenture plc, Hewlett-Packard Company, IBM, Oracle Corporation and Perot Systems Corporation, which develop customized solutions for carriers and in some cases operate and manage certain back-office systems for carriers on an outsourced basis;

with respect to Order Management Services, companies such as Synchronoss Technologies, Inc., Telcordia Technologies, Inc., Syniverse Technologies, Inc. and Evolving Systems, Inc., which offer communication services, including inter-carrier order processing and workflow management on an outsourced basis; and

with respect to our Internet Infrastructure Services, companies such as Akamai Technologies, Inc., Afilias Limited, F5 Networks, Inc., Keynote Systems, Inc., Compuware Corporation, and VeriSign, Inc., which compete with us in one or more of our Ultra Services, including internal and external managed DNS services, network monitoring and load testing.

Competitive factors in the market for our services include breadth and quality of services offered, reliability, security, cost-efficiency, and customer support. Our ability to compete successfully depends on numerous factors, both within and outside our control, including:

our responsiveness to customers' needs;

our ability to support existing and new industry standards and protocols;

our ability to continue development of technical innovations; and

the quality, reliability, security and price-competitiveness of our services.

We may not be able to compete successfully against current or future competitors and competitive pressures that we face may materially and adversely affect our business. The market for Carrier Services may not continue to develop, and carriers and enterprises may not continue to use directory services rather than in-house systems and purchased or internally-developed software.

Employees

As of December 31, 2010, we employed 1,022 persons worldwide. None of our employees is currently represented by a labor union. We have not experienced any work stoppages and consider our relationship with our employees to be good.

Contracts

We provide many of our services pursuant to private commercial and government contracts. Specifically, in the United States, we provide wireline and wireless number portability, implement the allocation of pooled blocks of telephone numbers and provide network management services pursuant to seven regional contracts with NAPM. Although the Federal Communications Commission, or FCC, has plenary authority over the administration of telephone number portability, it is not a party to our contracts with NAPM. The North American Numbering Council, a federal advisory committee to which the FCC has delegated limited oversight responsibilities, reviews and oversees NAPM's management of these contracts. See Regulatory Environment Telephone Numbering. We recognized revenue under our contracts with NAPM primarily on a per-transaction basis through December 31, 2008, and the aggregate fees for transactions processed under these contracts were determined by the total number of transactions.

In January 2009, we amended our seven regional contracts with NAPM to provide for an annual fixed-fee pricing model under which the annual fixed fee, or Base Fee, was set at \$340.0 million and \$362.1 million in 2009 and 2010, respectively, and is subject to an annual price escalator of 6.5% in subsequent years. In the event that the volume of transactions in a given year is above or below the contractually established volume range for that year, the Base Fee may be adjusted up or down, respectively, with any such adjustment being applied in the following year. The amendments also provide for a fixed credit of \$40.0 million in 2009, \$25.0 million in 2010 and \$5.0 million 2011, which will be applied to reduce the Base Fee for the applicable year. Additional credits of up to \$15.0 million annually in 2009, 2010 and 2011 may be triggered if the customers reach certain levels of aggregate telephone number inventories and adopt and implement certain IP fields and functionality.

During 2009, our customers adopted and implemented these IP fields and functionality, and earned \$7.5 million of the additional credits as a result, but did not reach the levels of aggregate telephone number inventories required to earn additional credits. During 2010, our customers earned all of the available additional credits of \$15.0 million for the adoption and implementation of certain IP fields and functionality and the attainment of specific levels of aggregate telephone number inventories.

Under both the transaction-based and fixed-fee models, our fees are billed to telecommunications service providers based on their allocable share of the total transaction charges. This allocable share is based on each respective telecommunications service provider's share of the aggregate end-user services revenues of all U.S. telecommunications service providers as determined by the FCC. Under these contracts, we also bill a revenue recovery collections, or RRC, fee of a percentage of monthly billings to our customers, which is available to us if any telecommunications service provider fails to pay its allocable share of total transaction charges. If the RRC fee is insufficient for that purpose, these contracts also provide for the recovery of such differences from the remaining telecommunications service providers. Under these contracts, users of our directory services also pay fees to connect to our data center and additional fees for reports that we generate at the user's request. Our contracts with NAPM continue through June 2015.

We also provide wireline and wireless number portability and network management services in Canada pursuant to a contract with the Canadian LNP Consortium Inc., a private corporation composed of telecommunications service providers who participate in number portability in Canada. The Canadian Radio-television and Telecommunications Commission oversees the Canadian LNP Consortium's management of this contract. We bill each telecommunications service provider for our services under this contract primarily on a per-transaction basis. In July 2010, this contract was amended to continue through December 2016. The services we provide under the contracts with NAPM and the Canadian LNP Consortium are subject to rigorous performance standards, and we are subject to corresponding penalties for failure to meet those standards.

We serve as the North American Numbering Plan Administrator and the National Pooling Administrator pursuant to two separate contracts with the FCC. Under these contracts, we administer the assignment and implementation of new area codes in North America, the allocation of central office codes (which are the prefixes following the area codes) to telecommunications service providers in the United States, and the assignment and allocation of pooled blocks of telephone numbers in the United States in a manner designed to conserve telephone number resources. The North American Numbering Plan Administration contract is a fixed-fee government contract that was originally awarded by the FCC to us in 2003. In July 2009, the FCC awarded us a short-term

contract to continue to serve as the North American Numbering Plan Administrator. The contract commenced on July 9, 2009 and has an initial term of six-months with two six-month extension options exercisable by the FCC. In July 2010, the FCC exercised the second of these two six-month extension options and extended this contract through January 8, 2011. In December 2010, the FCC extended this contract through July 8, 2011. The National Pooling Administration contract was originally awarded to us by the FCC in 2001. Under this contract, we perform the administrative functions associated with the allocation of pooled blocks of telephone numbers in the United States. The terms of this contract provide for a fixed fee associated with the administration of the pooling system. In August 2007, the FCC awarded us a new contract to continue as the National Pooling Administrator. The initial contract term was two years, commencing in August 2007, and the contract has three one-year extension options that are exercisable at the election of the FCC. In August 2010, the FCC exercised the second of the three one-year extension options to extend the contract through August 14, 2011.

We are the operator of the .biz Internet top-level domain by contract with the Internet Corporation for Assigned Names and Numbers, or ICANN. The .biz contract was originally granted to us in May 2001. In December 2006, ICANN renewed our .biz contract through December 2012. Under the terms of the amended agreement, the .biz contract automatically renews after 2012 unless it is determined that we have been in fundamental and material breach of certain provisions of the agreement and failed to cure such breach. Similarly, pursuant to a contract with the U.S. Department of Commerce, we operate the .us Internet domain registry. This contract was originally awarded in October 2001. In October 2007, the government renewed our .us contract for a period of three years. This term may be extended by the government for two additional one-year periods. In response to a bid protest filed by one of our competitors, the Department of Commerce evaluated the procedures it followed in awarding to us the .us contract. Pending resolution of this evaluation, performance under our new .us contract was stayed, and the terms of our previous .us contract remained in effect. The evaluation was completed in August 2008 and the terms of the new .us contract were amended. The amended contract expires in August 2011, with two one-year renewal options exercisable by the Department of Commerce. The .biz and .us contracts allow us to provide domain name registration services to domain name registrars, who pay us on a per-name basis.

We have an exclusive contract with the CTIA – The Wireless Association® to serve as the registry operator for the administration of U.S. Common Short Codes. U.S. Common Short Codes are short strings of numbers to which text messages can be addressed – a common addressing scheme that works across all participating wireless networks. We were awarded this contract in October 2003 through an open procurement process by the major wireless carriers. In June 2008, the contract was amended to include a term through December 2015. We provide U.S. Common Short Code registration services to wireless content providers, who pay us subscription fees per U.S. Common Short Code registered.

Regulatory Environment

Telephone Numbering

Overview. Congress enacted the Telecommunications Act of 1996 to remove barriers to entry in the communications market. Among other things, the Telecommunications Act of 1996 mandates portability of telephone numbers and requires traditional telephone companies to provide non-discriminatory access and interconnection to potential competitors. The FCC has plenary jurisdiction over issues relating to telephone numbers, including telephone number portability and the administration of telephone number resources. Under this authority, the FCC promulgated regulations governing the administration of telephone numbers and telephone number portability. In 1995, the FCC established the North American Numbering Council, a federal advisory committee, to advise and make recommendations to the FCC on telephone numbering issues, including telephone number resources administration and telephone number portability. The members of the North American Numbering Council include representatives from local exchange carriers, interexchange carriers, wireless providers, VoIP providers, manufacturers, state

regulators, consumer groups, and telecommunications associations.

Telephone Number Portability. The Telecommunications Act of 1996 requires telephone number portability, which is the ability of users of telecommunications services to retain existing telephone numbers without impairment of quality, reliability, or convenience when switching from one telecommunications service provider to another. Through a series of competitive procurements, a consortium of service providers

representing the telecommunications industry selected us to develop, build and operate a solution to enable telephone number portability in the United States. We ultimately entered into seven regional contracts to administer the system that we developed, after which the North American Numbering Council recommended to the FCC, and the FCC approved, our selection to serve as a neutral administrator of telephone number portability. The FCC also directed the seven original regional entities, each comprising a consortium of service providers operating in the respective regions, to manage and oversee the administration of telephone number portability in their respective regions, subject to North American Numbering Council oversight. Under the rules and policies adopted by the FCC, NAPM, as successor in interest to the seven regional consortiums, has the power and authority to negotiate master agreements with an administrator of telephone number portability, so long as that administrator is neutral.

On November 3, 2005, BellSouth Corporation filed a petition with the FCC seeking changes in the way our customers are billed for services provided by us under our contracts with NAPM. In response to the BellSouth petition, the FCC requested comments from interested parties. As of February 18, 2011, the FCC had not initiated a formal rulemaking process, and the BellSouth petition remains pending. In addition, after the amendment of our contracts with NAPM in September 2006, Telcordia Technologies, Inc. filed a petition with the FCC requesting an order that would require NAPM to conduct a new bidding process to appoint a provider of telephone number portability services in the United States. In response to our amendment of these contracts in January 2009, Telcordia filed another petition asking that the FCC abrogate these contracts and initiate a government-managed procurement in their place. As of February 18, 2011, the FCC had not initiated a formal rulemaking process on either of these petitions, and the Telcordia petitions are still pending. If a Telcordia petition is successful, we may lose one or more of our contracts with North American Portability LLC or lose a portion of our business in one or more geographic regions where we provide services.

North American Numbering Plan Administrator and National Pooling Administrator. We have contracts with the FCC to act as the North American Numbering Plan Administrator and the National Pooling Administrator, and we must comply with the rules and regulations of the FCC that govern our operations in each capacity. We are charged with administering numbering resources in an efficient and non-discriminatory manner, in accordance with FCC rules and industry guidelines developed primarily by the Industry Numbering Committee. These guidelines provide governing principles and procedures to be followed in the performance of our duties under these contracts. The communications industry regularly reviews and revises these guidelines to adapt to changed circumstances or as a result of the experience of industry participants in applying the guidelines. A committee of the North American Numbering Council evaluates our performance against these rules and guidelines each year and provides an annual review to the North American Numbering Council and the FCC. If we violate these rules and guidelines, or if we fail to perform at required levels, the FCC may reevaluate our fitness to serve as the North American Numbering Plan Administrator and the National Pooling Administrator and may terminate our contracts or impose fines on us. The division of the North American Numbering Council responsible for reviewing our performance as the North American Numbering Plan Administrator and the National Pooling Administrator has determined that, with respect to our performance in 2009, we exceeded and more than met our performance guidelines under each such respective review. Similar reviews of our performance in 2010 have not yet been completed.

Neutrality. Under FCC rules and orders establishing the qualifications and obligations of the North American Numbering Plan Administrator and National Pooling Administrator, and under our contracts with NAPM to provide telephone number portability services, we are required to comply with neutrality regulations and policies. Under these neutrality requirements, we are required to operate our numbering plan, pooling administration and number portability functions in a neutral and impartial manner, which means that we cannot favor any particular telecommunications service provider, telecommunications industry segment or technology or group of telecommunications consumers over any other telecommunications service provider, industry segment, technology or group of consumers in the conduct of those businesses. We are examined periodically on our compliance with these requirements by independent third parties. The combined effect of our contracts and the FCC's regulations and orders requires that we:

not be a telecommunications service provider, which is generally defined by the FCC as an entity that offers telecommunications services to the public at large, and is, therefore, providing telecommunications services on a common carrier basis, or an interconnected VoIP provider;

not be an affiliate of a telecommunications service provider or VoIP provider, which means, among other things, that we:

must restrict the beneficial ownership of our capital stock by telecommunications service providers, VoIP providers or affiliates of a telecommunications service provider or VoIP provider; and

may not otherwise, directly or indirectly, control, be controlled by, or be under common control with, a telecommunications service provider or VoIP provider;

not derive a majority of our revenue from any single telecommunications service provider; and

not be subject to undue influence by parties with a vested interest in the outcome of numbering administration and activities. Notwithstanding our satisfaction of the other neutrality criteria above, the North American Numbering Council or the FCC could determine that we are subject to such undue influence. The North American Numbering Council may conduct an evaluation to determine whether we meet this undue influence criterion.

We are required to maintain confidentiality of competitive customer information obtained during the conduct of our business. In addition, as part of our neutrality framework, we are required to comply with a code of conduct that is designed to ensure our continued neutrality. Among other things, our code of conduct, which was approved by the FCC, requires that:

we never, directly or indirectly, show any preference or provide any special consideration to any telecommunications service provider;

we prohibit access by our stockholders to user data and proprietary information of telecommunications service providers served by us (other than access of employee stockholders that is incident to the performance of our numbering administration duties);

our stockholders take steps to ensure that they do not disclose to us any user data or proprietary information of any telecommunications service provider in which they hold an interest, other than the sharing of information in connection with the performance of our numbering administration duties;

we not share confidential information about our business services and operations with employees of any telecommunications service provider;

we refrain from simultaneously employing, whether on a full-time or part-time basis, any individual who is an employee of a telecommunications service provider and that none of our employees hold any interest, financial or otherwise, in any company that would violate these neutrality standards;

we prohibit any individual who serves in the management of any of our stockholders to be involved directly in our day-to-day operations;

we implement certain requirements regarding the composition of our Board of Directors;

no member of our Board of Directors simultaneously serves on the Board of Directors of a telecommunications service provider; and

we hire an independent party to conduct a quarterly neutrality audit to ensure that we and our stockholders comply with all the provisions of our code of conduct.

In connection with the neutrality requirements imposed by our code of conduct and under our contracts, we are subject to a number of neutrality audits that are performed on a quarterly and annual basis. In connection with these audits, all of our employees, directors and officers must sign a neutrality certification that states that they are familiar with our neutrality requirements and have not violated them. Failure to comply with applicable neutrality requirements could result in government fines, corrective measures, curtailment of contracts or even the revocation of contracts. See Risk Factors Risks Related to Our Business Failure to comply with neutrality requirements could result in loss of significant contracts in Item 1A of this report.

In contemplation of the initial public offering of our securities, we sought and obtained FCC approval for a safe harbor from previous orders of the FCC that allowed us to consummate the initial public offering for our

securities but required us to seek prior approval from the FCC for any change in our overall ownership structure, corporate structure, bylaws, or distribution of equity interests, as well as certain types of transactions, including the issuance of indebtedness by us. Under the safe harbor order, we are required to maintain provisions in our organizational and other corporate documents that require us to comply with all applicable neutrality rules and orders. However, we are no longer required to seek prior approval from the FCC for many of these changes and transactions, although we are required to provide notice of such changes or transactions. In addition, we are subject to the following requirements:

we may not issue indebtedness to any entity that is a telecommunications service provider or an affiliate of a telecommunications service provider without prior approval of the FCC;

we may not acquire any equity interest in a telecommunications service provider or an affiliate of a telecommunications service provider without prior approval of the FCC;

we must restrict any telecommunications service provider or affiliate of a telecommunications service provider from acquiring or beneficially owning 5% or more of our outstanding capital stock;

we must report to the FCC the names of any telecommunications service providers or telecommunications service provider affiliates that own a 5% or greater interest in our company; and

we must make beneficial ownership records available to our auditors, and must certify upon request that we have no actual knowledge of any ownership of our outstanding capital stock by a telecommunications service provider or telecommunications service provider affiliate other than as previously disclosed.

Internet Domain Name Registrations

We are also subject to government and industry regulation under our Internet registry contracts with the U.S. government and ICANN, the industry organization responsible for regulation of Internet top-level domains. We are the operator of the .biz Internet domain under a contract with ICANN, as described above under [Contracts](#). Similarly, pursuant to a contract with the U.S. Department of Commerce, we operate the .us Internet domain registry. This contract is also described above under [Contracts](#). Under each of these registry service contracts, we are required to:

provide equal access to all registrars of domain names;

comply with Internet standards established by the industry;

implement additional policies as they are adopted by the U.S. government or ICANN; and

with respect to the .us registry, establish, operate and ensure appropriate content on a kids.us domain to serve as a haven for material that promotes positive experiences for children and families using the Internet.

Intellectual Property

Our success depends in part upon our proprietary technology. We rely principally upon trade secret and copyright law to protect our technology, including our software, network design, and subject matter expertise. We enter into confidentiality or license agreements with our employees, distributors, customers, and potential customers and limit access to and distribution of our software, documentation, and other proprietary information. We believe, however, that because of the rapid pace of technological change, these legal protections for our services are less significant

factors in our success than the knowledge, ability, and experience of our employees and the timeliness and quality of services provided by us. In addition, we have recently expanded our patent efforts in other service offerings.

Available Information and Exchange Certifications

We maintain an Internet website at www.neustar.biz. Information contained on, or that may be accessed through, our website is not part of this report. Our annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and amendments to reports filed or furnished pursuant to Sections 13(a) and 15(d) of the Securities Exchange Act of 1934, as amended, are available, free of charge, on the Investor Relations section of

our website under the heading SEC Filings by NeuStar, as soon as reasonably practicable after we electronically file such reports with, or furnish those reports to, the Securities and Exchange Commission. Our Principles of Corporate Governance, Board of Directors committee charters (including the charters of the Audit Committee, Compensation Committee, and Nominating and Corporate Governance Committee) and code of ethics entitled Corporate Code of Business Conduct also are available on the Investor Relations section of our website. Stockholders may request free copies of these documents, including a copy of our annual report on Form 10-K, by sending a written request to our Corporate Secretary at NeuStar, Inc., 46000 Center Oak Plaza, Sterling, VA 20166. In the event that we make any changes to, or provide any waivers from, the provisions of our Corporate Code of Business Conduct, we intend to disclose these events on our website or in a report on Form 8-K within four business days of such event.

We have filed, as exhibits to this Annual Report on Form 10-K, the certification of our principal executive officer and principal financial officer required under Section 302 of the Sarbanes-Oxley Act of 2002 to be filed with the Securities and Exchange Commission regarding the quality of our public disclosure.

Cautionary Note Regarding Forward-Looking Statements

This report contains forward-looking statements. In some cases, you can identify forward-looking statements by terminology such as may, will, should, expects, intends, plans, anticipates, believes, estimates, continue or the negative of these terms or other comparable terminology. These statements relate to future events or our future financial performance and involve known and unknown risks, uncertainties and other factors that may cause our actual results, levels of activity, performance or achievements to differ materially from any future results, levels of activity, performance or achievements expressed or implied by these forward-looking statements. Many of these risks are beyond our ability to control or predict. These risks and other factors include those listed under Risk Factors in Item 1A of this report and elsewhere in this report and include:

failures or interruptions of our systems and services;

security or privacy breaches;

loss of, or damage to, a data center;

termination, modification or non-renewal of our contracts to provide telephone number portability and other directory services;

adverse changes in statutes or regulations affecting the communications industry;

our failure to adapt to rapid technological change in the communications industry;

competition from our customers in-house systems or from other providers of carrier or enterprise services;

our failure to achieve or sustain market acceptance at desired pricing levels;

a decline in the volume of transactions we handle;

inability to manage our growth;

economic, political, regulatory and other risks associated with our further potential expansion into international markets;

inability to obtain sufficient capital to fund our operations, capital expenditures and expansion; and loss of members of senior management, or inability to recruit and retain skilled employees.

ITEM 1A. RISK FACTORS

Risks Related to Our Business

The loss of, or damage to, a data center or any other failure or interruption to our network infrastructure could materially harm our revenue and impair our ability to conduct our operations.

Because virtually all of the services we provide require carriers to query a copy of our continuously updated databases and directories to obtain necessary routing, operational and marketing data, the integrity of our data centers, including network elements managed by third parties throughout the world, and the systems through which we deliver our services are essential to our business. Notably, our data centers and related systems are essential to the orderly operation of the U.S. telecommunications system because they enable carriers to ensure that telephone calls are routed to the appropriate destinations.

Our system architecture is integral to our ability to process a high volume of transactions in a timely and effective manner. Moreover, both we and our customers rely on hardware, software and other equipment developed, supported and maintained by third-party providers. We could experience failures or interruptions of our systems and services, or other problems in connection with our operations, as a result of:

- damage to, or failure of, our computer software or hardware or our connections and outsourced service arrangements with third parties;

- failure of, or defects in, the third-party systems, software or equipment on which we or our customers rely to access our data centers and other systems;

- errors in the processing of data by our systems;

- computer viruses, malware or software defects;

- physical or electronic break-ins, sabotage, distributed denial of service, penetration attacks, intentional acts of vandalism and similar events;

- increased capacity demands or changes in systems requirements of our customers;

- virtual hijacking of traffic destined to our systems; or

- power loss, telecommunications failures, pandemics, wars, acts of terrorism, political unrest or other man-made or natural disasters.

We may not have sufficient redundant systems or back-up facilities to allow us to receive and process data if one of the foregoing events occurs. Further, increases in the scope of services that we provide increase the complexity of our network infrastructure. As the scope of services we provide expands or changes in the future, we may be required to make significant expenditures to establish new data centers from which we may provide services. Moreover, as we add customers, expand our service offerings and increase our visibility in the market we may become a more likely target of attacks similar to those listed in the bullets above. The number of electronic attacks and viruses grows significantly every year, as does the sophistication of these attacks. For example, undetected attackers are able to monitor unencrypted Internet traffic anywhere in the world and modify it before it reaches our destination, and these

attackers can harm our customers by stealing identity, Internet email or IP addresses. If we are not able to react to threats and stop attackers from exploiting vulnerabilities, the integrity of our systems and our customers and trading partners may be impacted adversely. If we cannot adequately secure and protect the ability of our data centers, offices, and related systems to perform consistently at a high level and without interruptions, or if we otherwise fail to meet our customers' expectations:

our reputation may be damaged, which may adversely affect our ability to market our services and attract or retain customers;

we may be subject to significant penalties or damages claims, under our contracts or otherwise, including the requirement to pay substantial penalties related to service level requirements in our contracts;

we may be required to make significant expenditures to repair or replace equipment, third-party systems or, in some cases, an entire data center, or to establish new data centers and systems from which we may provide services;

our operating expenses or capital expenditures may increase as a result of corrective efforts that we must perform; or

one or more of our significant contracts may be terminated early, or may not be renewed.

Any of these consequences would adversely affect our revenue, performance and business prospects.

If our security measures are breached and personally identifiable information is obtained by an unauthorized person, our service may be perceived as not being secure and customers may curtail or stop using our services.

As a number of our products and services are Internet or DNS based, the amount of data we store for our users on our servers (including personal information) has increased. For example, our registry, Ultraviolet[™], and mobile service offerings may involve the storage and transmission of consumer information, such as names, addresses, email addresses and other personally identifiable information, and security breaches could expose us to a risk of loss of this information, litigation and possible liability. If our security measures are breached or our systems fail in the future as a result of third-party action, employee error, malfeasance or otherwise, and as a result, someone obtains unauthorized access to consumers' data, our reputation and brands will be damaged, the adoption of our products and services could be severely limited, and we could incur significant liability, any of which may cause our business to suffer.

Accordingly, we may need to expend significant resources to protect against security breaches, including encrypting personal information, or remedy breaches after they occur, including notifying each person whose personal data may have been compromised. The risk that these types of events could seriously harm our business is likely to increase as we expand the number of Internet or DNS-based products and services we offer as well as increase the number of countries where we operate. If an actual or perceived breach of our security measures occurs, the market perception of the effectiveness of our security measures and our reputation could be harmed and we could lose sales, existing and future business opportunities and customers, and potentially face costly litigation.

Our seven contracts with North American Portability Management LLC represent in the aggregate a substantial portion of our revenue, are not exclusive and could be terminated or modified in ways unfavorable to us. These contracts are due to expire in June 2015 and we may not win a competitive procurement.

Our seven contracts with North American Portability Management LLC, or NAPM, an industry group that represents all carriers in the United States, to provide NPAC Services are not exclusive and could be terminated or modified in ways unfavorable to us. These seven separate contracts, each of which represented between 7% and 13% of our total revenue in 2010, represented in the aggregate approximately 64% of our total revenue in 2010. These contracts have finite terms and are currently scheduled to expire in June 2015. NAPM has publicly announced plans to issue a request for proposal to solicit offers to provide services under a new NPAC Services contract or contracts. We expect that there will be significant competition as a result of this process. Further, we may not win such a competitive procurement if another provider offers to provide the same or similar services at a lower cost. The failure to win the competitive procurement would have a material adverse effect on our business, prospects, financial condition and results of operations. Even if we win the competitive procurement, the new contracts may have different pricing structures or performance requirements than are currently in effect, which could negatively affect our operating performance and may result in additional costs and expenses and possibly lower revenues.

In addition, under the current contracts, NAPM could, at any time, solicit or receive proposals from other providers to provide services that are the same as or similar to ours. These contracts can be terminated or modified in advance of their scheduled expiration date in limited circumstances, most notably if we are in default of these agreements. Although these contracts do not contain cross-default provisions, conditions leading to a default by us under one of our contracts could lead to a default under others, or all seven. If these contracts are terminated or modified in a manner that is adverse to us, it would have a material adverse effect on our business, prospects, financial condition and results of operations.

A significant decline in the volume of transactions we handle could have a material adverse effect on our results of operations.

Under our contracts with NAPM, we earn revenue for NPAC Services on an annual, fixed-fee basis. However, in the event that the volume of transactions in a given year is above or below the contractually established volume range for that year, the fixed-fee may be adjusted up or down, respectively, with any such adjustment being applied to the following year's invoices. In addition, under our contract with the Canadian LNP Consortium Inc., we earn revenue on a per transaction basis. As a result, if industry participants in the United States reduce their usage of our services in a particular year to levels below the established volume range for that year or if industry participants in Canada reduce their usage of our services from their current levels, our revenue and results of operations may suffer. For example, consolidation in the industry could result in a decline in transactions if the remaining carriers decide to handle changes to their networks internally rather than use the services that we provide. Moreover, if customer turnover among carriers in the industry stabilizes or declines, or if carriers do not compete vigorously to lure customers away from their competitors, use of our telephone number portability and other services may decline. If carriers develop internal systems to address their infrastructure needs, or if the cost of such transactions makes it impractical for a given carrier to use our services for these purposes, we may experience a reduction in transaction volumes. Finally, the trends that we believe will drive the future demand for our services, such as the emergence of IP services, growth of wireless services, consolidation in the industry, and pressure on carriers to reduce costs, may not actually result in increased demand for our existing services or for the ancillary directory services that we expect to offer, which would harm our future revenue and growth prospects.

Certain of our other contracts may be terminated or modified at any time prior to their completion, which could lead to an unexpected loss of revenue and damage our reputation.

In addition to our contracts with NAPM, we provide other carrier services that generate significant revenue and bolster our reputation as a premier solutions provider to communication service providers. Under various contracts, we serve as the provider of NPAC Services in Canada; operator of the .biz registry; and operator of the registry of U.S. Common Short Codes. Each of these contracts provides for early termination in limited circumstances, most notably if we are in default. In addition, our contracts to serve as the North American Numbering Plan Administrator and as the National Pooling Administrator and to operate the .us registry, each of which is with the U.S. government, may be terminated by the government at will. If we fail to meet the expectations of the FCC, the U.S. Department of Commerce or our customers, as the case may be, for any reason, including for performance-related or other reasons, the customer may unilaterally terminate or modify the contracts. A termination arising out of our default could expose us to liability, adversely affect our operating performance and lead to an unexpected loss of revenue. Further, each of the contracts discussed above establishes us as the sole provider of the particular services covered by that contract during its term. If one of these contracts was terminated, we would no longer be able to provide the services covered by that contract and could suffer a loss of prestige that would make it more difficult for us to compete for contracts to provide similar services in the future.

Failure to comply with neutrality requirements could result in loss of significant contracts.

Pursuant to orders and regulations of the U.S. government and provisions contained in our material contracts, we must continue to comply with certain neutrality requirements, meaning generally that we cannot favor any particular telecommunications service provider, telecommunications industry segment or technology or group of telecommunications consumers over any other telecommunications service provider, industry segment, technology or group of consumers in the conduct of our business. The FCC oversees our compliance with the neutrality requirements applicable to us in connection with some of the services we provide. We provide to the FCC and the North American Numbering Council, a federal advisory committee established by the FCC to advise and make recommendations on telephone numbering issues, regular certifications relating to our compliance with these

requirements. Our ability to comply with the neutrality requirements to which we are subject may be affected by the activities of our stockholders or lenders. For example, if the ownership of our capital stock subjects us to undue influence by parties with a vested interest in the outcome of numbering administration, the FCC could determine that we are not in compliance with our neutrality obligations. Our failure to continue to comply with the neutrality requirements to which we are subject under applicable orders and regulations of the U.S. government and

commercial contracts may result in fines, corrective measures or termination of our contracts, any one of which could have a material adverse effect on our results of operations.

Regulatory and statutory changes that affect us or the communications industry in general may increase our costs or otherwise adversely affect our business.

Our domestic operations and those of many of our customers are subject to regulation by the FCC and other federal, state and local agencies. As communications technologies and the communications industry continue to evolve, the statutes governing the communications industry or the regulatory policies of the FCC may change. If this were to occur, the demand for many of our services could change in ways that we cannot predict and our revenue could decline. These risks include the ability of the federal government, most notably the FCC, to:

increase or change regulatory oversight over the services we provide;

adopt or modify statutes, regulations, policies, procedures or programs that are disadvantageous to the services we provide, or that are inconsistent with our current or future plans, or that require modification of the terms of our existing contracts, including the manner in which we charge for certain of our services. For example,

in November 2005, BellSouth Corporation filed a petition with the FCC seeking changes in the way our customers are billed for services provided by us under our contracts with North American Portability Management LLC; and

after the amendment of our contracts with North American Portability Management LLC in September 2006, Telcordia Technologies, Inc. filed a petition with the FCC requesting an order that would require North American Portability Management LLC to conduct a new bidding process to appoint a provider of telephone number portability services in the United States. In response to our amendment of these contracts in January 2009, Telcordia filed another petition asking that the FCC abrogate these contracts and initiate a government managed procurement in their place. If successful, either of these petitions could result in the loss of one or more of our contracts with North American Portability Management LLC or otherwise frustrate our strategic plans;

prohibit us from entering into new contracts or extending existing contracts to provide services to the communications industry based on actual or suspected violations of our neutrality requirements, business performance concerns, or other reasons;

adopt or modify statutes, regulations, policies, procedures or programs in a way that could cause changes to our operations or costs or the operations of our customers;

appoint, or cause others to appoint, substitute or add additional parties to perform the services that we currently provide; and

prohibit or restrict the provision or export of new or expanded services under our contracts, or prevent the introduction of other services not under the contracts based upon restrictions within the contracts or in FCC policies.

In addition, we are subject to risks arising out of the delegation of the Department of Commerce's responsibilities for the domain name system to ICANN. Changes in the regulations or statutes to which our customers are subject could cause our customers to alter or decrease the services they purchase from us. We cannot predict when, or upon what terms and conditions, further regulation or deregulation might occur or the effect future regulation or deregulation

may have on our business.

If we are unable to protect our intellectual property rights adequately, the value of our services and solutions could be diminished.

Our success is dependent in part on obtaining, maintaining and enforcing our proprietary rights and our ability to avoid infringing on the proprietary rights of others. While we take precautionary steps to protect our technological advantages and intellectual property and rely in part on patent, trademark, trade secret and

copyright laws, we cannot assure that the precautionary steps we have taken will completely protect our intellectual property rights. Effectively policing our intellectual property is time consuming and costly, and the steps taken by us may not prevent infringement of our intellectual property or proprietary rights in our products, technology and trademarks, particularly in foreign countries where in many instances the local laws or legal systems do not offer the same level of protection as in the United States. Further, because patent applications in the United States are maintained in secrecy until either the patent application is published or a patent is issued, we may not be aware of third-party patents, patent applications and other intellectual property relevant to our services and solutions that may block our use of our intellectual property or may be used by third-parties who compete with our services and solutions.

As we expand our business and introduce new services and solutions, there may be an increased risk of infringement and other intellectual property claims by third-parties. From time to time, we and our customers may receive claims alleging infringement of intellectual property rights, or may become aware of certain third-party patents that may relate to our services and solutions.

Additionally, some of our customer agreements require that we indemnify our customers for infringement claims resulting from their use of our intellectual property embedded in their products. Any litigation regarding patents or other intellectual property could be costly and time consuming and could divert our management and key personnel from our business operations. The complexity of the technology involved, and the number of parties holding intellectual property within the communications industry, increase the risks associated with intellectual property litigation. Moreover, the commercial success of our services and solutions may increase the risk that an infringement claim may be made against us. Royalty or licensing arrangements, if required, may not be available on terms acceptable to us, if at all. Any infringement claim successfully asserted against us or against a customer for which we have an obligation to defend could result in costly litigation, the payment of substantial damages, and an injunction that prohibits us from continuing to offer the service or solution in question, any of which could have a material adverse effect on our business, operating results and financial condition.

The market for certain of our carrier and enterprise services is competitive, and if we do not adapt to rapid technological change, we could lose customers or market share.

We compete in some areas against our customers, well-funded providers of carrier and enterprise services, communications software companies and system integrators that provide systems and services used by carriers and enterprises to manage their networks and internal operations in connection with telephone number portability and other communications transactions. In addition, our industry is characterized by rapid technological change and frequent new service offerings. Significant technological changes could make our technology and services obsolete. We must adapt to our rapidly changing market by continually improving the features, functionality, reliability and responsiveness of our services, and by developing new features, services and applications to meet changing customer needs. Our ability to take advantage of opportunities in the market may require us to invest in development and incur other expenses well in advance of our ability to generate revenue from these services. We cannot guarantee that we will be able to adapt to these challenges or respond successfully or in a cost-effective way, particularly in the early stages of launching a new service. Further, we may experience delays in the development of one or more features of our solutions, which could materially reduce the potential benefits to us for providing these services. In addition, there can be no assurance that our solutions will be adopted by potential customers, or that we will be able to reach acceptable contract terms with customers to provide these services. Our failure to adapt to meet market demand in a cost-effective manner could adversely affect our ability to compete and retain customers or market share.

If we are unable to manage our costs, our profits could be adversely affected.

Historically, sustaining our growth has placed significant demands on our management as well as on our administrative, operational and financial resources. For example, in 2010, our profits were negatively affected by our business realignment, including a restructuring charge of \$3.8 million related to the reduction of employee headcount, CEO severance costs of \$2.2 million and a long-lived asset impairment charge of \$8.5 million related to our Converged Messaging Services. For us to continue to manage our expanded operations, as well as any future growth, we must continue to improve our operational, financial and management information systems and expand,

motivate and manage our workforce. If our quality of service is compromised because we are unable to successfully manage our costs, or if new systems that we implement to assist in managing our operations do not produce the expected benefits, we may experience higher turnover in our customer base and our revenue and profits could be adversely affected.

We must recruit and retain skilled employees to succeed in our business, and our failure to recruit and retain qualified employees could harm our ability to maintain and grow our business.

We believe that an integral part of our success is our ability to recruit and retain employees who have advanced skills in the services and solutions that we provide and who work well with our customers. In particular, we must hire and retain employees with the technical expertise and industry knowledge necessary to maintain and continue to develop our operations and must effectively manage our growing sales and marketing organization to ensure the growth of our operations. Our future success depends on the ability of our sales and marketing organization to establish direct sales channels and to develop multiple distribution channels with Internet service providers and other third-parties. The employees with the skills we require are in great demand and are likely to remain a limited resource in the foreseeable future. If we are unable to recruit and retain a sufficient number of these employees at all levels, our ability to maintain and grow our business could be negatively impacted.

Our failure to achieve or sustain market acceptance at desired pricing levels could impact our ability to maintain profitability or positive cash flow.

Our competitors and customers may cause us to reduce the prices we charge for our services and solutions. The primary sources of pricing pressure include:

competitors offering our customers services at reduced prices, or bundling and pricing services in a manner that makes it difficult for us to compete. For example, a competing provider of interoperability services might offer its services at lower rates than we do, a competing domain name registry provider may reduce its prices for domain name registration or an Internet service provider or a competitor may offer mobile instant messaging solutions at reduced prices or at no cost to the customer;

customers with a significant volume of transactions may have enhanced leverage in pricing negotiations with us; and

if our prices are too high, potential customers may find it economically advantageous to handle certain functions internally instead of using our services.

We may not be able to offset the effects of any price reductions by increasing the number of transactions we handle or the number of customers we serve, by generating higher revenue from enhanced services or by reducing our costs.

Our expansion into international markets may be subject to uncertainties that could increase our costs to comply with regulatory requirements in foreign jurisdictions, disrupt our operations, and require increased focus from our management.

We currently provide services to customers in Brazil, Taiwan and China. We intend to pursue additional international business opportunities. International operations and business expansion plans are subject to numerous additional risks, including:

economic and political risks in foreign jurisdictions in which we operate or seek to operate;

difficulties in enforcing contracts and collecting receivables through some foreign legal systems;

differences in foreign laws and regulations, including foreign tax, intellectual property, labor and contract law, as well as unexpected changes in legal and regulatory requirements;

differing technology standards and pace of adoption;

export restrictions on encryption and other technologies;

fluctuations in currency exchange rates and any imposition of currency exchange controls;

increased competition by local, regional, or global companies; and

difficulties associated with managing a large organization spread throughout various countries.

If we continue to expand our business globally, our success will depend, in large part, on our ability to anticipate and effectively manage these and other risks associated with our international operations. However, any of these factors could adversely affect our international operations and, consequently, our operating results.

We may be unable to complete acquisitions, or we may undertake acquisitions that could increase our costs or liabilities or be disruptive to our business.

We have made a number of acquisitions in the past, and one of our strategies is to pursue acquisitions selectively in the future. We may not be able to locate acquisition candidates at prices that we consider appropriate or on terms that are satisfactory to us. If we do identify an appropriate acquisition candidate, we may not be able to successfully negotiate the terms of the acquisition or, if the acquisition occurs, integrate the acquired business into our existing business. Acquisitions of businesses or other material operations may require additional debt or equity financing, resulting in additional leverage or dilution to our stockholders. Integration of acquired business operations could disrupt our business by diverting management away from day-to-day operations. The difficulties of integration may be increased by the necessity of coordinating geographically dispersed organizations, integrating personnel with disparate business backgrounds and combining different corporate cultures. We also may not realize cost efficiencies or synergies or other benefits that we anticipated when selecting our acquisition candidates, and we may be required to invest significant capital and resources after acquisition to maintain or grow the businesses that we acquire. In addition, we may need to record write-downs from impairments of goodwill, intangible assets, or long-lived assets, or record adjustments to the purchase price that occur after the closing of the transaction, which could reduce our future reported earnings. For example, in the fourth quarter of 2010 we recognized an \$8.5 million non-cash long-lived asset impairment charge related to our Converged Messaging business. If we fail to successfully integrate and support the operations of the businesses we acquire, or if anticipated revenue enhancements and cost savings are not realized from these acquired businesses, our business, results of operations and financial condition would be materially adversely affected. Further, at times, acquisition candidates may have liabilities, neutrality-related risks or adverse operating issues that we fail to discover through due diligence prior to the acquisition. The failure to discover such issues prior to such acquisition could have a material adverse effect on our business and results of operations.

Risks Related to the Financial Market Conditions

The recent financial crisis could negatively affect market utilization of our existing and new services and may harm our financial results.

Our success depends on our ability to generate revenues from our existing services and our introduction of new services, extensions of existing services and geographic expansion. For some of the services we provide, the market has only recently developed, and the viability and profitability of these services is unproven. Our ability to grow our business will be compromised if we do not develop and market services that achieve broad market acceptance with our current and potential customers. If our service offerings do not gain widespread market acceptance, our financial results could suffer. Any unfavorable changes in economic conditions, such as the recent global economic disruption that began in the second half of 2008, may result in lower overall spending by our current and potential customers, and adversely affect our ability to generate revenue from our existing services, introduce new services or extensions of existing services and expand geographically. If the economic downturn is prolonged, we may have difficulty in

maintaining and establishing a market for our existing and new services and our financial performance may suffer.

We may need additional capital in the future and it may not be available on acceptable terms.

We have historically relied on outside financing and cash flow from operations to fund our operations, capital expenditures and expansion. We may require additional capital in the future to fund our operations, finance

investments in equipment or infrastructure, or respond to competitive pressures or strategic opportunities. However, our neutrality requirements may limit or prohibit our ability to obtain debt or equity financing by restricting the ability of certain parties from acquiring our stock or our debt, or the amount that such parties may acquire. In addition, difficulties in the global credit markets may result in a substantial decrease in the availability of credit and more onerous terms on borrowers, including higher interest rates. As a result, additional financing may not be available on terms favorable to us, or at all. Further, the terms of available financing may place limits on our financial and operating flexibility. If we are unable to obtain sufficient capital in the future, we may:

not be able to continue to meet customer demand for service quality, availability and competitive pricing;

be forced to reduce our operations;

not be able to expand or acquire complementary businesses; and

not be able to develop new services or otherwise respond to changing business conditions or competitive pressures.

Risks Related to Our Common Stock

Our common stock price may be volatile.

The market price of our Class A common stock may fluctuate widely. Fluctuations in the market price of our Class A common stock could be caused by many things, including:

our perceived prospects and the prospects of the telephone and Internet industries in general;

differences between our actual financial and operating results and those expected by investors and analysts;

changes in analysts' recommendations or projections;

changes in general valuations for communications companies;

adoption or modification of regulations, policies, procedures or programs applicable to our business;

sales of our Class A common stock by our officers, directors or principal stockholders;

sales of significant amounts of our Class A common stock in the public market, or the perception that such sales may occur;

sales of our Class A common stock due to a required divestiture under the terms of our certificate of incorporation; and

changes in general economic or market conditions and broad market fluctuations.

Each of these factors, among others, could have a material adverse effect on the market price of our Class A common stock. Recently, the stock market in general has experienced extreme price fluctuations. This volatility has had a substantial effect on the market prices of securities issued by many companies for reasons unrelated to the operating performance of the specific companies. Some companies that have had volatile market prices for their securities have had securities class action suits filed against them. If a suit were to be filed against us, regardless of the outcome, it

could result in substantial costs and a diversion of our management's attention and resources. This could have a material adverse effect on our business, prospects, financial condition and results of operations.

Delaware law and provisions in our certificate of incorporation and bylaws could make a merger, tender offer or proxy contest difficult, and the market price of our Class A common stock may be lower as a result.

We are a Delaware corporation, and the anti-takeover provisions of the Delaware General Corporation Law may discourage, delay or prevent a change in control by prohibiting us from engaging in a business combination with an interested stockholder for a period of three years after the person becomes an interested stockholder, even if a change of control would be beneficial to our existing stockholders. In addition, our certificate of incorporation and

bylaws may discourage, delay or prevent a change in our management or control over us that stockholders may consider favorable. Our certificate of incorporation and bylaws:

authorize the issuance of blank check preferred stock that could be issued by our Board of Directors to thwart a takeover attempt;

prohibit cumulative voting in the election of directors, which would otherwise enable holders of less than a majority of our voting securities to elect some of our directors;

establish a classified Board of Directors, as a result of which the successors to the directors whose terms have expired will be elected to serve from the time of election and qualification until the third annual meeting following election;

require that directors only be removed from office for cause;

provide that vacancies on the Board of Directors, including newly-created directorships, may be filled only by a majority vote of directors then in office;

disqualify any individual from serving on our board if such individual's service as a director would cause us to violate our neutrality requirements;

limit who may call special meetings of stockholders;

prohibit stockholder action by written consent, requiring all actions to be taken at a meeting of the stockholders; and

establish advance notice requirements for nominating candidates for election to the Board of Directors or for proposing matters that can be acted upon by stockholders at stockholder meetings.

In order to comply with our neutrality requirements, our certificate of incorporation contains ownership and transfer restrictions relating to telecommunications service providers and their affiliates, which may inhibit potential acquisition bids that our stockholders may consider favorable, and the market price of our Class A common stock may be lower as a result.

In order to comply with neutrality requirements imposed by the FCC in its orders and rules, no entity that qualifies as a telecommunications service provider or affiliate of a telecommunications service provider, as defined under the Communications Act of 1934 and FCC rules and orders, may beneficially own 5% or more of our capital stock. In general, a telecommunications service provider is an entity that offers telecommunications services to the public at large, and is, therefore, providing telecommunications services on a common carrier basis. Moreover, a party will be deemed to be an affiliate of a telecommunications service provider if that party controls, is controlled by, or is under common control with, a telecommunications service provider. A party is deemed to control another if that party, directly or indirectly:

owns 10% or more of the total outstanding equity of the other party;

has the power to vote 10% or more of the securities having ordinary voting power for the election of the directors or management of the other party; or

has the power to direct or cause the direction of the management and policies of the other party.

As a result of this regulation, subject to limited exceptions, our certificate of incorporation (a) prohibits any telecommunications service provider or affiliate of a telecommunications service provider from beneficially owning, directly or indirectly, 5% or more of our outstanding capital stock and (b) empowers our Board of Directors to determine whether any particular holder of our capital stock is a telecommunications service provider or an affiliate of a telecommunications service provider. Among other things, our certificate of incorporation provides that:

if one of our stockholders experiences a change in status or other event that results in the stockholder violating this restriction, or if any transfer of our stock occurs that, if effective, would violate the 5% restriction, we may elect to purchase the excess shares (i.e., the shares that cause the violation of the

restriction) or require that the excess shares be sold to a third-party whose ownership will not violate the restriction;

pending a required divestiture of these excess shares, the holder whose beneficial ownership violates the 5% restriction may not vote the shares in excess of the 5% threshold; and

if our Board of Directors, or its permitted designee, determines that a transfer, attempted transfer or other event violating this restriction has taken place, we must take whatever action we deem advisable to prevent or refuse to give effect to the transfer, including refusal to register the transfer, disregard of any vote of the shares by the prohibited owner, or the institution of proceedings to enjoin the transfer.

Any person who acquires, or attempts or intends to acquire, beneficial ownership of our stock that will or may violate this restriction must notify us as provided in our certificate of incorporation. In addition, any person who becomes the beneficial owner of 5% or more of our stock must notify us and certify that such person is not a telecommunications service provider or an affiliate of a telecommunications service provider. If a 5% stockholder fails to supply the required certification, we are authorized to treat that stockholder as a prohibited owner meaning, among other things, that we may elect to require that the excess shares be sold. We may request additional information from our stockholders to ensure compliance with this restriction. Our board will treat any group, as that term is defined in Section 13(d)(3) of the Securities Exchange Act of 1934, as a single person for purposes of applying the ownership and transfer restrictions in our certificate of incorporation.

Nothing in our certificate of incorporation restricts our ability to purchase shares of our capital stock. If a purchase by us of shares of our capital stock results in a stockholder's percentage interest in our outstanding capital stock increasing to over the 5% threshold, such stockholder must deliver the required certification regarding such stockholder's status as a telecommunications service provider or affiliate of a telecommunications service provider. In addition, to the extent that a repurchase by us of shares of our capital stock causes any stockholder to violate the restrictions on ownership and transfer contained in our certificate of incorporation, that stockholder will be subject to all of the provisions applicable to prohibited owners, including required divestiture and loss of voting rights.

These restrictions and requirements may:

discourage industry participants that might have otherwise been interested in acquiring us from making a tender offer or proposing some other form of transaction that could involve a premium price for our shares or otherwise be in the best interests of our stockholders; and

discourage investment in us by other investors who are telecommunications service providers or who may be deemed to be affiliates of a telecommunications service provider, which may decrease the demand for our Class A common stock and cause the market price of our Class A common stock to be lower.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 2. PROPERTIES

Our corporate headquarters complex is located in Sterling, Virginia. As of December 31, 2010, we leased approximately 399,000 square feet of space, primarily in the United States, and to a lesser extent in Israel and Europe. Our leased locations each support both of our Carrier Services and Enterprise Services operating segments. We do not own any real property. As of February 18, 2011, we believe that our leased facilities have sufficient

capacity to meet the current and projected needs of our business. The following table lists our major locations and primary use for continuing operations:

Leased Property Locations	Approximate Square Footage	General Usage
Sterling, VA, United States	263,000	Corporate headquarters
California, United States	47,000	General office and sales
Kentucky, United States	18,000	Customer support
District of Columbia, United States	13,000	General office and sales
Haifa, Israel	47,000	General office and sales
Staines, United Kingdom	6,000	General office and sales

Upon expiration of the property leases, we expect to obtain renewals or to lease alternative space. Lease expiration dates range from 2011 through 2021.

ITEM 3. LEGAL PROCEEDINGS

From time to time, we are subject to claims in legal proceedings arising in the normal course of our business. We do not believe that we are party to any pending legal action that could reasonably be expected to have a material adverse effect on our business or operating results.

ITEM 4. [REMOVED AND RESERVED]

PART II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASE OF EQUITY SECURITIES

Market for Our Common Stock

Since June 29, 2005, our Class A common stock has traded on the New York Stock Exchange under the symbol NSR. As of February 18, 2011, our Class A common stock was held by 316 stockholders of record. The following table sets forth the per-share range of the high and low sales prices of our Class A common stock as reported on the New York Stock Exchange for the periods indicated:

	High	Low
Fiscal year ended December 31, 2009		
First quarter	\$ 19.87	\$ 12.77
Second quarter	\$ 22.36	\$ 16.48
Third quarter	\$ 23.57	\$ 19.65
Fourth quarter	\$ 24.32	\$ 21.79
Fiscal year ended December 31, 2010		
First quarter	\$ 26.10	\$ 21.87
Second quarter	\$ 26.73	\$ 20.23
Third quarter	\$ 25.12	\$ 20.20
Fourth quarter	\$ 27.07	\$ 23.89

There is no established public trading market for our Class B common stock. As of February 18, 2011, our Class B common stock was held by 6 stockholders of record.

Dividends

We did not pay any cash dividends on our Class A or Class B common stock in 2009 or 2010 and we do not expect to pay any cash dividends on our common stock for the foreseeable future. We currently intend to retain any future earnings to finance our operations and growth. Our revolving credit facility limits our ability to declare or pay dividends. We are also limited by Delaware law in the amount of dividends we can pay. Any future determination to pay cash dividends will be at the discretion of our Board of Directors and will depend on earnings, financial condition, operating results, capital requirements, any contractual restrictions and other factors that our Board of Directors deems relevant.

Purchases of Equity Securities

The following table is a summary of our repurchases of common stock during each of the three months in the quarter ended December 31, 2010:

**Approximate
Dollar Value**

Month	Total Number of Shares Purchased(1)	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs(2)(3)	of Shares that May Yet Be Purchased Under the Plans or Programs(3)
October 1 through October 31, 2010	249,222	\$ 24.65	248,665	\$ 268,452,734
November 1 through November 30, 2010	92,643	26.25	92,070	266,035,908
December 1 through December 31, 2010	253,032	26.22	245,354	259,600,457
Total	594,897	\$ 25.57	586,089	\$ 259,600,457

- (1) The number of shares purchased includes shares of common stock tendered by employees to us to satisfy the employees' tax withholding obligations arising as a result of vesting of restricted stock grants under our stock incentive plan. We purchased these shares for their fair market value on the vesting date.
- (2) The difference between the total number of shares purchased and the total number of shares purchased as part of publicly announced plans or programs is 8,808 shares, all of which relate to shares surrendered to us by employees to satisfy the employees' tax withholding obligations arising as a result of vesting of restricted stock grants under our incentive stock plans.
- (3) On July 28, 2010, we announced the adoption of a share repurchase program. The program authorizes the repurchase of up to \$300 million of Class A common shares through Rule 10b5-1 programs, open market purchases, privately negotiated transactions or otherwise as market conditions warrant, at prices we deem appropriate. The program will expire in July 2013.

Performance Graph

The following chart compares Neustar's cumulative stockholder return on its common stock over the last five fiscal years compared with \$100 invested in the: (a) Russell 2000 Index; (b) Russell 3000 Index; and (c) NYSE TMT Index, and Index of Technology, Media and Telecommunications companies, each over that same period. We have moved from the Russell 2000 Index, the index used in previous years, to the Russell 3000. For comparative purposes, both the Russell 2000 and Russell 3000 Indices are reflected in the following chart. Neustar will not include the Russell 2000 Index in next year's performance graph.

The comparison assumes reinvestment of dividends. The stock performance in the graph is included to satisfy our SEC disclosure requirements, and is not intended to forecast or to be indicative of future performance.

This Performance Graph shall not be deemed to be incorporated by reference into our SEC filings and shall not constitute soliciting material or otherwise be considered filed under the Securities Act of 1933, as amended, or the Securities Exchange Act of 1934, as amended.

ITEM 6. SELECTED FINANCIAL DATA

The tables below present selected consolidated statements of operations data and selected consolidated balance sheet data for each year in the five year period ended December 31, 2010. The selected consolidated statements of operations data for each of the three years ended December 31, 2008, 2009 and 2010, and the selected consolidated balance sheet data as of December 31, 2009 and 2010, have been derived from, and should be read together with, our audited consolidated financial statements and related notes appearing in this report. The selected consolidated statements of operations data for each of the two years ended December 31, 2006 and 2007, and the selected consolidated balance sheet data as of December 31, 2006, 2007 and 2008, have been derived from our audited consolidated financial statements and related notes not included in this report.

The following information should be read together with, and is qualified in its entirety by reference to, the more detailed information contained in Management's Discussion and Analysis of Financial Condition and Results of Operations in Item 7 of this report and our consolidated financial statements and related notes in Item 8 of this report.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

You should read the following discussion and analysis in conjunction with the information set forth under "Selected Financial Data" in Item 6 of this report and our consolidated financial statements and related notes in Item 8 of this report. The statements in this discussion related to our expectations regarding our future performance, liquidity and capital resources, and other non-historical statements in this discussion, are forward-looking statements. These forward-looking statements are subject to numerous risks and uncertainties, including, but not limited to, the risks and uncertainties described in "Risk Factors" in Item 1A of this report and "Business - Cautionary Note Regarding Forward-Looking Statements" in Item 1 of this report. Our actual results may differ materially from those contained in or implied by any forward-looking statements.

Overview

In the first quarter of 2010, we realigned our organizational structure and internal financial reporting by customer type to reflect our strategic focus which is to serve our customers more effectively. This reorganization has resulted in two operating segments: Carrier Services and Enterprise Services. Customers of the Carrier Services segment are comprised primarily of communications service providers, or carriers, and customers of the Enterprise Services segment are comprised primarily of non-carrier, commercial businesses, or enterprises. We anticipate that this new structure will give us a greater ability to create a solutions approach for our customers with value propositions focused on mission critical solutions for our customers, rather than simply targeting individual services. In addition, this approach will enable greater efficiencies in our direct and indirect distribution channels.

Revenue growth, profitability and cash generation was strong in 2010. Our consolidated revenue for the year increased 9.7% to \$526.8 million as compared to \$480.4 million from 2009. Our cash flows from operations for the year ended December 31, 2010 were \$144.8 million due to the increased demand for our services and our disciplined cost management. This resulted in total cash, cash equivalents and investments of \$382.4 million as of December 31, 2010.

Our revenue increase of \$46.4 million was primarily driven by an established increase in the fixed fee under our contracts with the North American Portability Management LLC, or NAPM, for our number portability administration center services, or NPAC Services. We recognized \$322.1 million of revenue under our contracts to provide NPAC Services in 2010, a \$29.6 million increase, or 10.1%, from 2009. Additionally, as Internet traffic and web complexity increases, and the need for secure and scalable DNS solutions rise, we continued to realize demand from our existing and new Internet Infrastructure Services, or IIS, customers. We recognized \$69.1 million of revenue from IIS in 2010, a 24.2% increase over 2009.

As demand for our services increased, we also continued to make discrete investments in new, early-stage growth opportunities to help further our growth for the future. One such investment is our digital content authentication directory, which supports the UltraViolet™ digital content locker by which consumers can gain access to their entertainment content. These services utilize our core competencies to help create IP-based ecosystems that will rely on seamless interoperability. While making these investments, we also returned wealth to stockholders in the form of a share repurchase plan announced on July 28, 2010. For the full-year 2010, we have repurchased 1.7 million shares of our Class A common stock at an average price of \$24.21 per share, for a total purchase price of \$40.4 million.

Our Company

We provide authoritative technology and policy management services to our customers, which include carriers and enterprises. We were founded to meet the technical and operational challenges of the communications industry when the U.S. government mandated local number portability in 1996. We provide the authoritative solution that the

communications industry relies upon to meet this mandate and we also provide a broad range of innovative services to meet an expansive range of our customers' needs.

We provide critical directory and clearinghouse services that our carrier and enterprise customers rely upon to manage a wide range of technical and operating requirements, including the following:

Carrier Services. Our carrier services include numbering services, order management services and IP services. Through our set of unique databases and system infrastructure in geographically dispersed data centers, we manage the increasing complexity in the telecommunications industry and ensure the seamless connection of our carrier customers' numerous networks, while also enhancing the capabilities and performance of their infrastructure. We operate the authoritative databases that manage virtually all telephone area codes and numbers, and enable the dynamic routing of calls among numerous competing carriers in the United States and Canada. All carriers that offer telecommunications services to the public at large must access a copy of our unique database to properly route their customers' calls. We also facilitate order management and work flow processing among carriers, and allow operators to manage and optimize the addressing and routing of IP communications.

Enterprise Services. Our enterprise services include Internet infrastructure services and registry services. Through our global directory platform, we provide a suite of DNS services to our enterprise customers. We manage a collection of directories that maintain addresses in order to direct, prioritize and manage Internet traffic, and to find and resolve Internet queries and top-level domains. We are the authoritative provider of essential registry services and manage directories of similar resources, or addresses, that our customers use for reliable, fair and secure access and connectivity. In addition, enterprise customers rely on our services to monitor and load-test websites to help identify issues and optimize performance. We also provide geolocation database services that help enterprises identify the location of their consumers for a variety of purposes, such as target marketing and fraud prevention. Additionally, we provide directory services for the 5 and 6-digit number strings used for all U.S. Common Short Codes, which is part of the short messaging service relied upon by the U.S. wireless industry.

Our costs and expenses consist of cost of revenue, sales and marketing, research and development, general and administrative, depreciation and amortization, and restructuring charges.

Cost of revenue includes all direct materials costs, direct labor costs, and indirect costs related to the generation of revenue such as indirect labor, outsourced services, materials and supplies, payment processing fees, and general facilities cost. Our primary cost of revenue is personnel costs associated with service implementation, product maintenance, customer deployment and customer care, including salaries, stock-based compensation and other personnel-related expense. In addition, cost of revenue includes costs relating to developing modifications and enhancements of our existing technology and services, as well as royalties paid related to our U.S. Common Short Code services and registry gateway services. Cost of revenue also includes costs relating to our information technology and systems department, including network costs, data center maintenance, database management, data processing costs and general facilities costs.

Sales and marketing expense consists of personnel costs, such as salaries, sales commissions, travel, stock-based compensation, and other personnel-related expense; costs associated with attending and sponsoring trade shows; facilities costs; professional fees; costs of marketing programs, such as Internet and print marketing programs, as well as costs for product branding, market analysis and forecasting; and customer relationship management.

Research and development expense consists primarily of personnel costs, including salaries, stock-based compensation and other personnel-related expense; contractor costs; and the costs of facilities, computer and support services used in service and technology development.

General and administrative expense consists primarily of personnel costs, including salaries, stock-based compensation, and other personnel-related expense, for our executive, administrative, legal, finance and human resources functions. General and administrative expense also includes facilities, support services and professional services fees.

Depreciation and amortization relates to amortization of identifiable intangibles, and the depreciation of our property and equipment, including our network infrastructure and facilities related to our services.

Restructuring charges relate to the termination of certain employees and reduction in or closure of leased facilities in some of our international locations.

Critical Accounting Policies and Estimates

The discussion and analysis of our financial condition and results of operations are based on our consolidated financial statements, which have been prepared in accordance with U.S. generally accepted accounting principles, or U.S. GAAP. The preparation of these financial statements in accordance with U.S. GAAP requires us to utilize accounting policies and make certain estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingencies as of the date of the financial statements and the reported amounts of revenue and expense during a fiscal period. The Securities and Exchange Commission, or SEC, considers an accounting policy to be critical if it is important to a company's financial condition and results of operations, and if it requires significant judgment and estimates on the part of management in its application. We have discussed the selection and development of the critical accounting policies with the audit committee of our board of directors, and the audit committee has reviewed our related disclosures in this report.

Although we believe that our judgments and estimates are appropriate and reasonable, actual results may differ from those estimates. In addition, while we have used our best estimates based on the facts and circumstances available to us at the time, we reasonably could have used different estimates in the current period. Changes in the accounting estimates we use are reasonably likely to occur from period to period, which may have a material impact on the presentation of our financial condition and results of operations. If actual results or events differ materially from those contemplated by us in making these estimates, our reported financial condition and results of operation could be materially affected. See Item 1A of this report, *Risk Factors*, for certain matters that may bear on our results of operations.

Revenue Recognition

As part of our carrier services, we provide wireline and wireless number portability, implement the allocation of pooled blocks of telephone numbers and provide network management services pursuant to seven contracts with NAPM. In 2008, we recognized revenue under our contracts with NAPM primarily on a per-transaction basis. The aggregate fees for transactions processed under these contracts were determined by the total number of transactions.

In January 2009, we amended our seven regional contracts with NAPM. The aggregate fees for transactions processed under the amended contracts are determined by an annual fixed-fee pricing model under which the annual fixed fee, or Base Fee, was set at \$340.0 million and \$362.1 million in 2009 and 2010, respectively, and is subject to an annual price escalator of 6.5% in subsequent years. These amended contracts also provide for a fixed credit of \$40.0 million in 2009, \$25.0 million in 2010 and \$5.0 million in 2011, which will be applied to reduce the Base Fee for the applicable year. Additional credits of up to \$15.0 million annually in 2009, 2010 and 2011 may be earned if the customers under these amended contracts reach certain levels of aggregate telephone number inventories and adopt and implement certain IP fields and functionality. The amendments also enable our customers to earn credits if the volume of transactions in a given year is above or below the contractually established volume range for that year. The determination of credits earned based on transaction volume is done annually at the end of the year and earned credits are applied to the following year's invoices. To the extent any available additional credits expire unused at the end of a year, they will be recognized as revenue at that time. We determine the fixed and determinable fee under these amended contracts on an annual basis at the beginning of each year and recognize this fee in our Carrier Services operating segment on a straight-line basis over twelve months.

For 2009, we concluded that the fixed and determinable fee equaled \$285.0 million, which represented the Base Fee of \$340.0 million reduced by the \$40.0 million fixed credit and \$15.0 million of available additional credits. During

2009, our carrier customers adopted and implemented the requisite IP fields and functionality, and as a result earned \$7.5 million of the additional credits for each of 2009, 2010 and 2011. However, the customers did not reach the levels of aggregate telephone number inventories required to earn additional credits in 2009 and as a result, we recognized \$7.5 million of additional revenue in the fourth quarter of 2009. Our total revenue recognized under our seven regional contracts with NAPM to provide NPAC Services was \$292.5 million for the year ended December 31, 2009.

For 2010, we concluded that the fixed and determinable fee equaled \$322.1 million, which represented the Base Fee of \$362.1 million, reduced by the \$25.0 million fixed credit and \$15.0 million of available additional

credits. During 2010, our carrier customers earned all of the available additional credits of \$15.0 million attributable to the adoption and implementation of the requisite IP fields and functionality and the achievement of specific levels of aggregate telephone number inventories.

Fees under our contracts with NAPM are billed to telecommunications service providers based on their allocable share of the total transaction charges. This allocable share is based on each respective telecommunications service provider's share of the aggregate end-user services revenues of all U.S. telecommunications service providers, as determined by the FCC. Under our contracts with NAPM, we also bill a Revenue Recovery Collections, or RRC, fee of a percentage of monthly billings to our customers, which is available to us if any telecommunications service provider fails to pay its allocable share of total transactions charges. If the RRC fee is insufficient for that purpose, these contracts also provide for the recovery of such differences from the remaining telecommunications service providers.

For more information regarding our revenue recognition policy, please see Note 2 to our Consolidated Financial Statements in Item 8 of Part II of this report.

Service Level Standards

Some of our private commercial contracts require us to meet service level standards and impose corresponding penalties for failure to meet those standards. We record a provision for these performance-related penalties when we become aware that we have failed to meet required service levels, which results in a corresponding reduction of our revenue.

Restructuring

As of December 31, 2010, the accrued liability associated with our restructuring and other related charges was \$5.0 million. As part of our restructuring costs, we recorded a liability for the estimated cost of the net lease expense for facilities that we are no longer using. This accrual is equal to the present value of the minimum future lease payments under our contractual lease obligations, offset by the present value of the estimated sublease income. As of December 31, 2010, our accrued restructuring liability related to our net lease expense and other related charges was \$1.0 million. These lease payments will be made over the remaining lives of the leases for facilities that we have vacated, the longest of which extends through 2013. If actual market conditions are different than those we have projected, we will be required to recognize additional restructuring costs or benefits associated with these facilities.

Acquisitions

We record acquisitions using the purchase method of accounting. All of the assets acquired, liabilities assumed, contractual contingencies and contingent consideration, when applicable, are recognized at their fair value as of the acquisition date. The excess of the purchase price over the estimated fair values of the net tangible and net intangible assets acquired is recorded as goodwill. The application of the purchase method of accounting for business combinations requires management to make significant estimates and assumptions in the determination of the fair value of assets acquired and liabilities assumed in order to properly allocate purchase price consideration. These assumptions and estimates reflect a market participant's expected use of the asset and the appropriate discount rates from a market participant perspective. Our estimates are based on historical experience, information obtained from the management of the acquired companies and includes assistance from an independent third-party appraisal firm. Our significant assumptions and estimates can include, but are not limited to, the cash flows that an asset is expected to generate in the future and the appropriate weighted-average cost of capital. These estimates are inherently uncertain and unpredictable. In addition, unanticipated events and circumstances may occur which may affect the accuracy or validity of such estimates. During the year ended 2010, we completed the acquisitions of BrowserMob LLC and Quova, Inc. and recorded values of \$1.1 million and \$5.1 million to goodwill, respectively, and \$1.0 million and

\$15.0 million of definite-lived intangible assets, respectively. See Note 3 to our Consolidated Financial Statements in Item 8 of Part II of this report.

Goodwill

Goodwill represents the excess purchase price paid over the fair value of tangible or identifiable intangible assets acquired and liabilities assumed in our acquisitions. In accordance with the Intangibles-Goodwill and Other

Topic of the Financial Accounting Standards Board, or FASB, Accounting Standards Codification, or ASC, we test our goodwill for impairment on an annual basis, or on an interim basis if an event occurs or circumstances change that indicate an impairment may have occurred.

In the first quarter of 2010, we realigned our operating structure and internal financial reporting by customer type, reflective of how our chief operating decision maker, or CODM, allocates resources and assesses performance. This realignment changed our operating segments and the underlying reporting units. As a result of this realignment, we reassigned our goodwill to each of our reporting units. The goodwill attributable to our former Next Generation Messaging, or NGM, reporting unit has been assigned to our Carrier Services reporting unit. The services, technology and customer base of our NGM business was renamed Converged Messaging Services while the sales and marketing functions were transitioned to the broader Carrier Services reporting unit. Our goodwill attributable to our former Clearinghouse reporting unit was allocated among each of our three reporting units, Carrier Services, Internet Infrastructure Services and Registry Services, using a relative fair value approach. We determined the estimated fair value of each of our reporting units for purposes of allocating our goodwill using both an income approach and a market approach. We did not identify indicators of impairment in connection with this realignment.

Our 2010 annual goodwill impairment analysis, which we performed for each of our three reporting units as of October 1, 2010, did not result in an impairment charge. We determined the estimated fair value of our reporting units using the income approach and the market approach, consistent with the approach we utilized in our analysis performed in the first quarter of 2010. To assist in the process of determining fair value, we performed internal valuation analyses, considered other publicly available market information and obtained appraisals from external advisors. Significant assumptions used in the determination of fair value under the income approach included assumptions regarding market penetration, anticipated growth rates, and risk-adjusted discount rates. Significant assumptions used in the determination of fair value under the market approach included the selection of comparable companies.

The key assumptions used in our 2010 annual goodwill impairment test to determine the fair value of our reporting units included: (a) cash flow projections, which include growth and allocation assumptions for forecasted revenue and expenses; (b) a residual growth rate of 3.0% to 5.0%; (c) a discount rate of 13.0% to 18.5%, which was based upon each respective reporting unit's weighted-average cost of capital adjusted for the risks associated with the operations at the time of the assessment; (d) selection of comparable companies used in the market approach; and (e) assumptions in weighting the results of the income approach and the market approach valuation techniques.

As of the date of our 2010 annual impairment test, our estimated fair values for each of our reporting units substantially exceeded each of our reporting units' carrying value. We believe that the assumptions and estimates used to determine the estimated fair values of each of our reporting units are reasonable; however, these estimates are inherently subjective, and there are a number of factors, including factors outside of our control that could cause actual results to differ from our estimates. Changes in estimates and assumptions could have a significant impact on whether or not an impairment charge is recognized and also the magnitude of any such charge.

Any changes to our key assumptions about our businesses and our prospects, or changes in market conditions, could cause the fair value of one of our reporting units to fall below its carrying value, resulting in a potential impairment charge. In addition, changes in our organizational structure or how our management allocates resources and assesses performance, could result in a change of our operating segments or reporting units, requiring a reallocation and impairment analysis of our goodwill. A goodwill impairment charge could have a material effect on our consolidated financial statements because of the significance of goodwill to our consolidated balance sheet. As of December 31, 2010, we had \$108.5 million and \$16.2 million, respectively, in goodwill for our Carrier Services and Enterprise Services operating segments.

Impairment of Long-Lived Assets

Our long-lived assets primarily consist of property and equipment and intangible assets. We review long-lived assets and identifiable intangible assets for impairment whenever events or changes in circumstances indicate the carrying amount of an asset may not be recoverable. We measure recoverability of assets to be held and used by comparing the carrying amount of the assets to future undiscounted net cash flows expected to be generated by the assets. Recoverability measurement and estimation of undiscounted cash flows is done at the lowest possible level for which there are identifiable cash flows. If such assets fail the recoverability test, the impairment to be recognized

is measured as the amount by which the carrying amount of assets exceeds the fair value of the assets. Assets to be disposed of are recorded at the lower of the carrying amount or fair value less costs to sell. Management must exercise judgment in determining whether an event has occurred that may impair the value of the long-lived assets. Factors that could indicate that impairment may exist include significant underperformance relative to a plan or long-term projections, significant changes in business strategy, significant negative industry or economic trends or a significant decline in our stock price or in the value of our reporting units for a sustained period of time.

In the fourth quarter of 2010, we decided to exit one of our IP Services businesses, specifically our Converged Messaging business. We believe that our decision to exit this business was an indicator of impairment for long-lived assets in our Converged Messaging asset group. As a result, in the fourth quarter of 2010, we performed a recoverability test and determined that the future undiscounted cash flows of the asset group was less than the carrying value. We recorded an \$8.5 million charge for impairment of long-lived assets, the largest component of which consisted of capitalized technology. In determining fair value, we utilized estimates from external advisors and valuation models that involved assumptions about replacement cost, obsolescence factors, future cash flows, discount rates and, as appropriate, review of market comparables. We believe that the assumptions and estimates used to determine the estimated fair value of this asset group are reasonable; however, assumptions and estimates used by management that are incorporated within the estimated fair value of our Converged Messaging asset group may not reflect specific incentives or attributes of a particular buyer from which a sales price is determined and may result in further impairment or a loss on sale. As of December 31, 2010, we had \$1.6 million in long-lived assets in our Converged Messaging asset group.

Accounts Receivable, Revenue Recovery Collections, and Allowance for Doubtful Accounts

Accounts receivable are recorded at the invoiced amount and do not bear interest. In accordance with our contracts with NAPM, we bill an RRC fee of a percentage of monthly billings to our customers. The aggregate RRC fees collected may be used to offset uncollectible receivables from an individual customer. Beginning July 1, 2005, the RRC fee was 1% of monthly billings. On July 1, 2008, the RRC fee was reduced to 0.75% and further reduced to 0.65% on July 1, 2010. Any accrued RRC fees in excess of uncollectible receivables are paid back to the customers annually on a pro rata basis. All other receivables related to services not covered by the RRC fees are evaluated and, if deemed not collectible, are appropriately reserved.

Investments

As of December 31, 2010, we have approximately \$50.8 million of investments in pre-refunded municipal bonds that are secured by an escrow fund of U.S. Treasury notes. These investments are accounted for as available-for-sale securities and unrealized gains or losses are recorded in other comprehensive income. We determined the fair value of our investments using observable inputs such as quoted prices in active markets. As of December 31, 2010, we determined that any declines in the fair value of our investments are not other-than-temporary. Given the significance of investments to our consolidated balance sheet, declines in the fair value that are considered to be other-than-temporary could have a material effect on our consolidated financial statements. We are exposed to investment risk as it relates to changes in the market value of our investments.

Income Taxes

We recognize deferred tax assets and liabilities based on temporary differences between the financial reporting bases and the tax bases of assets and liabilities. These deferred tax assets and liabilities are measured using the enacted tax rates and laws that will be in effect when such amounts are expected to reverse or be utilized. The realization of deferred tax assets is contingent upon the generation of future taxable income. When appropriate, we recognize a valuation allowance to reduce such deferred tax assets to amounts that are more likely than not to be ultimately

realized. The calculation of deferred tax assets, including valuation allowances, and liabilities requires us to apply significant judgment related to such factors as the application of complex tax laws, changes in tax laws and our future operations. We review our deferred tax assets on a quarterly basis to determine if a valuation allowance is required based upon these factors. Changes in our assessment of the need for a valuation allowance could give rise to a change in such allowance, potentially resulting in additional expense or benefit in the period of change.

Our income tax provision includes U.S. federal, state, local and foreign income taxes and is based on pre-tax income or loss. In determining the annual effective income tax rate, we analyzed various factors, including our annual earnings and taxing jurisdictions in which the earnings were generated, the impact of state and local income taxes and our ability to use tax credits and net operating loss carryforwards.

We assess uncertain tax positions and recognize income tax benefits when, based on the technical merits of a tax position, we believe that if a dispute arose with the taxing authority and was taken to a court of last resort, it is more likely than not (i.e., a probability of greater than 50 percent) that the tax position would be sustained as filed. If a position is determined to be more likely than not of being sustained, the reporting enterprise should recognize the largest amount of tax benefit that is greater than 50 percent likely of being realized upon ultimate settlement with the taxing authority. Our practice is to recognize interest and penalties related to income tax matters in income tax expense.

Tax years 2006 through 2010 remain open to examination by the major taxing jurisdictions to which we are subject. The Internal Revenue Service, or IRS, has initiated an examination of our federal income tax returns for the years 2007 and 2008. While the ultimate outcome of the audit is uncertain, we do not believe that the outcome will have a material adverse effect on our financial position, results of operations or cash flows. The IRS completed an examination of our federal income tax returns for the years 2005 and 2006. The audit resulted in no material adjustments.

Stock-Based Compensation

We recognize stock-based compensation expense in accordance with the Compensation – Stock Compensation Topic of the FASB ASC which requires the measurement and recognition of compensation expense for stock-based awards based on estimated fair values on the date of grant. We estimate the fair value of each option-based award on the date of grant using the Black-Scholes option-pricing model. This option pricing model requires that we make several estimates, including the option's expected life and the price volatility of the underlying stock.

Because stock-based compensation expense is based on awards that are ultimately expected to vest, the amount of expense takes into account estimated forfeitures at the time of grant, which estimate may be revised, if necessary, in subsequent periods if actual forfeitures differ from those estimates. Changes in these estimates and assumptions can materially affect the estimated fair value of our stock-based compensation. See Note 14 to our Consolidated Financial Statements in Item 8 of Part II of this report for information regarding our assumptions related to stock-based compensation and the amount of stock-based compensation expense we incurred for the periods covered in this report. As of December 31, 2010, total unrecognized compensation expense was \$32.9 million, which relates to unvested stock options, unvested restricted stock units, unvested restricted stock awards and unvested performance vested restricted stock units, or PVRSUs, and is expected to be recognized over a weighted-average period of 1.45 years.

We estimate the fair value of our restricted stock unit awards based on the fair value of our common stock on the date of grant. Our outstanding restricted stock unit awards are subject to service-based vesting conditions and/or performance-based vesting conditions. We recognize the estimated fair value of service-based awards, net of estimated forfeitures, as stock-based compensation expense over the vesting period on a straight-line basis. Awards with performance-based vesting conditions require the achievement of specific financial targets at the end of the specified performance period and the employee's continued employment over the vesting period. We recognize the estimated fair value of performance-based awards, net of estimated forfeitures, as stock-based compensation expense over the vesting period, which considers each period or tranche separately, based upon our determination of whether it is probable that the performance targets and vesting will be achieved. At each reporting period, we reassess the probability of achieving the performance targets within the related performance period. Determining whether the performance targets will be achieved involves judgment, and the estimate of stock-based compensation expense may

be revised periodically based on changes in the probability of achieving the performance targets. If any performance goals are not met, no compensation cost is ultimately recognized against that goal, and, to the extent previously recognized, compensation cost is reversed. As of December 31, 2010, we estimate achievement of

0%, 133% and 100% of the performance targets related to our PVRsUs granted during 2008, 2009 and 2010, respectively.

Changes in our assumptions regarding the achievement of specific financial targets could have a material effect on our consolidated financial statements. In the first quarter of 2010, we revised our estimate of the achievement of the performance target related to the PVRsUs granted during 2008 from 50% of target to 0% of target. In addition, in the first quarter of 2010 we revised our estimate of achievement of the performance target related to the PVRsUs granted during 2009 from 100% of target to 135% of target and further revised our estimate to 133% of target in the fourth quarter of 2010.

Our consolidated net income for the year ended December 31, 2010 was \$106.2 million and diluted earnings per share was \$1.40 per share. If we had continued to use the previous estimate of achievement of 50% of the performance target for our PVRsUs granted during 2008, our as adjusted net income would have been approximately \$104.8 million and our as adjusted diluted earnings per share would have been approximately \$1.38 per share. If we had continued to use the previous estimate of achievement of 100% of the performance target for our PVRsUs granted during 2009, our as adjusted net income would have been approximately \$107.0 million and our as adjusted diluted earnings per share would have been approximately \$1.41 per share. If we had continued to use the previous estimates of achievement for our PVRsUs granted during 2008 and 2009, our as adjusted net income would have been approximately \$105.7 million and our as adjusted diluted earnings per share would have been approximately \$1.39 per share.

Consolidated Results of Operations***Year Ended December 31, 2009 Compared to the Year Ended December 31, 2010***

The following table presents an overview of our results of operations for the years ended December 31, 2009 and 2010.

	Years Ended December 31,			
	2009	2010	2009 vs. 2010	
	\$	\$	\$ Change	% Change
(in thousands, except per share data)				
Revenue:				
Carrier Services	\$ 370,471	\$ 397,708	\$ 27,237	7.4%
Enterprise Services	109,914	129,104	19,190	17.5%
Total revenue	480,385	526,812	46,427	9.7%
Operating expense:				
Cost of revenue (excludes depreciation and amortization shown separately below)	113,260	121,712	8,452	7.5%
Sales and marketing	83,371	90,609	7,238	8.7%

Revenue

Total revenue. Total revenue increased \$46.4 million due to a \$27.2 million increase in revenue from our Carrier Services operating segment and a \$19.2 million increase in revenue from our Enterprise Services operating segment.

Carrier Services. Revenue from our Carrier Services operating segment increased \$27.2 million primarily due to an increase of \$32.3 million in revenue from our Numbering Services. Of this \$32.3 million increase, \$29.6 million resulted from an established increase in the fixed fee under our contracts to provide NPAC Services and \$2.0 million was primarily due to system enhancements and additional functionality requested by our Numbering Services customers. These revenue increases were partially offset by a decrease of \$3.9 million in revenue from our IP Services and a decrease of \$1.2 million in revenue from our Order Management Services.

Enterprise Services. Revenue from our Enterprise Services operating segment increased \$19.2 million primarily due to an increase of \$13.5 million in revenue from our IIS. This was primarily driven by increased demand from existing and new customers for our expanded service offerings, such as IP geolocation database services. In addition, Registry Services revenue increased \$5.7 million due to an increase in the number of common short codes and domain names under management.

Expense

Cost of revenue. Cost of revenue increased \$8.5 million primarily due to a \$4.8 million increase in general facility costs that include data center and database management costs, computer rental and maintenance costs and payment processing fees to support business growth and ongoing operations. Royalty expense in our Registry Services increased \$3.1 million due to more common short codes under management. In addition, cost of revenue increased by \$1.4 million in personnel and personnel-related expense to support our expanded service offerings, including new directory services, and system enhancements for functionality improvements requested by our customers. These increases were offset by a decrease of \$1.2 million in other direct costs primarily related to setup and implementation costs.

Sales and marketing. Sales and marketing expense increased \$7.2 million due to an increase in personnel and personnel-related expense for our expanded sales and marketing teams, primarily in our Enterprise Services. This increased headcount supports our growth as we broaden our portfolio of services, geographic presence and brand awareness through product initiatives, as well as, customer and industry events.

Research and development. Research and development expense decreased \$2.2 million due to a \$3.5 million decrease in personnel and personnel-related expense primarily in our Converged Messaging Services business, partially offset by an increase of \$1.3 million in contractor costs. The decrease in personnel and personnel-related expense resulted from headcount reductions in connection with restructuring activities attributable to our Converged Messaging Services business, while the increase in contractor costs related to the development of new directory services.

General and administrative. General and administrative expense increased \$13.0 million, primarily due to costs incurred to support business growth and costs incurred in preparation for new business opportunities and corporate initiatives. The driver of the increase also included further investments in our core teams in support of the business operations. Personnel and personnel-related expense increased \$7.2 million, primarily as a result of headcount additions, an increase of \$3.0 million in stock-based compensation expense, and severance-related costs of \$2.2 million for the departure of our former Chairman and Chief Executive Officer. In addition, contractor costs and professional fees increased \$5.7 million, including legal and finance.

Depreciation and amortization. Depreciation and amortization expense increased \$2.1 million due to an increase of \$4.7 million in depreciation due to an increase in capital assets to build out our infrastructure. This increase was partially offset by a decrease of \$2.5 million in amortization of intangible assets related to acquisitions.

Restructuring charges. Restructuring charges increased \$1.3 million primarily due to an increase of \$3.8 million in severance and severance-related charges attributable to our 2010 management transition restructuring plan and to an increase of \$0.6 million attributable to our 2009 restructuring plan to relocate certain operations and support functions to Louisville, Kentucky. These increases were offset by a decrease of

\$3.1 million attributable to our restructuring plan initiated in 2008 to reduce headcount and close certain facilities specific to our Converged Messaging Services business.

Impairment of long-lived assets. In the fourth quarter of 2010, we decided to exit our Converged Messaging Services business and recorded an impairment charge of \$8.5 million to write down our Converged Messaging property and equipment assets, including capitalized technology, by \$7.9 million and Converged Messaging intangible assets by \$0.6 million. There was no corresponding charge for the year ended December 31, 2009. On February 7, 2011, we sold certain assets and liabilities of our Converged Messaging Services business.

Interest and other expense. Interest and other expense increased \$2.1 million primarily due to a \$3.1 million net increase in losses recorded in connection with our ARS and ARS Rights and a \$0.4 million loss on asset disposals, partially offset by a decrease of \$1.7 million in interest expense primarily due to a reduction in accrued interest related to a sales tax liability.

Interest and other income. Interest and other income increased \$0.1 million primarily due to a net increase of \$2.1 million in gains recorded in connection with our Auction Rate Securities, or ARS, and a settlement offer in the form of a rights offering from the investment firm that brokered the original purchases of the ARSs, or ARS Rights. This net increase was partially offset by the receipt in the first quarter of 2009 of a \$1.2 million payment for indemnification claims made in connection with our 2006 acquisition of Followap, Inc. and a decrease in realized gains of \$0.5 million on our investment in a cash reserve fund that was completely liquidated as of December 31, 2009.

Provision for income taxes. Our estimated annual effective tax rate decreased to 39.3% for the year ended December 31, 2010 from 40.2% for the year ended December 31, 2009 due primarily to an income tax benefit associated with a worthless stock deduction claimed in our 2009 consolidated U.S. Federal income tax return and an increase in the U.S. benefit of foreign branch losses, net of an increase in foreign withholding income taxes.

Summary of Operating Segments

The following table presents a summary of our operating segments' revenue, contribution and the reconciliation to consolidated income from operations for the years ended December 31, 2009 and 2010.

	Year Ended December 31,			
	2009	2010	2009 vs. 2010	
	\$	\$	\$ Change	% Change
	(dollars in thousands)			
Revenue:				
Carrier Services	\$ 370,471	\$ 397,708	\$ 27,237	7.4%
Enterprise Services	109,914	129,104	19,190	17.5%
Total revenue	\$ 480,385	\$ 526,812	\$ 46,427	9.7%
Segment contribution:				
Carrier Services	\$ 309,091	\$ 340,391	\$ 31,300	10.1%
Enterprise Services	46,130	59,284	13,154	28.5%

Edgar Filing: NEUSTAR INC - Form 10-K

Total segment contribution	355,221	399,675	44,454	12.5%
Indirect operating expenses:				
Cost of revenue (excluding depreciation and amortization shown separately below)	67,093	75,862	8,769	13.1%
Sales and marketing	15,437	16,345	908	5.9%
Research and development	10,905	11,972	1,067	9.8%
General and administrative	50,166	63,982	13,816	27.5%
Depreciation and amortization	38,040	40,167	2,127	5.6%
Restructuring charges	6,022	7,331	1,309	21.7%
Impairment of long-lived assets		8,495	8,495	100.0%
Consolidated income from operations	\$ 167,558	\$ 175,521	\$ 7,963	4.8%

Segment contribution is determined based on internal performance measures used by the CODM to assess the performance of each operating segment in a given period. In connection with this assessment, the CODM reviews revenue and segment contribution, which excludes certain unallocated costs within the following expense classifications: cost of revenue, sales and marketing, research and development and general and administrative. Depreciation and amortization and restructuring charges are also excluded from the segment contribution.

Year Ended December 31, 2008 Compared to the Year Ended December 31, 2009

The following table presents an overview of our results of operations for the years ended December 31, 2008 and 2009.

	Years Ended December 31,			
	2008	2009	2008 vs. 2009	
	\$	\$	\$ Change	% Change
(in thousands, except per share data)

Revenue

Total revenue. Total revenue decreased \$8.5 million due to a \$21.9 million decrease in revenue from our Carrier Services operating segment, offset by a \$13.4 million increase in revenue from our Enterprise Services operating segment.

Carrier Services. Revenue from our Carrier Services operating segment decreased \$21.9 million primarily due to a decrease of \$20.9 million in revenue from our Numbering Services. This \$20.9 million decrease was primarily due to a \$28.5 million decrease resulting from a pricing model change in our contracts to provide NPAC Services from a transaction-based model in effect for 2008 to an annual fixed fee with price escalators, offset by an increase of \$4.6 million in revenue primarily due to system enhancements and additional functionality requested by our Numbering Services customers. Revenue from our Order Management Services decreased \$2.6 million and revenue from our IP Services increased \$1.6 million.

Enterprise Services. Revenue from our Enterprise Services operating segment increased \$13.4 million primarily due to an increase of \$11.2 million in revenue from our IIS. This was primarily driven by increased demand from existing and new customers for our expanded service offerings. In addition, Registry Services revenue increased \$2.2 million due to an increase in the number of common short codes and domain names under management.

Expense

Cost of revenue. Cost of revenue increased \$7.7 million primarily due to a \$5.2 million increase in personnel and personnel-related expense and a \$1.2 million increase in outsourced services. Royalty expense in our Registry Services increased \$1.0 million due to more common short codes under management. In addition, other direct costs increased \$0.7 million related to setup and implementation costs. These increases were offset by a decrease of \$0.5 million in general facility costs, primarily attributable to computer rental and maintenance costs.

Sales and marketing. Sales and marketing expense increased \$9.2 million primarily due to an increase of \$6.8 million in contractor costs and \$1.7 million in personnel and personnel-related expense, both of which primarily related to our focus on branding and our expanded service offerings, and a \$0.7 million increase in general facility costs.

Research and development. Research and development expense decreased \$11.4 million primarily due to a decrease of \$9.4 million in personnel and personnel-related expense and a decrease of \$1.5 million in contractor costs. The decrease of \$9.4 million in personnel and personnel-related expense was related to decreased headcount, including a decrease of \$6.8 million attributable to restructuring of our former NGM business initiated in 2008.

General and administrative. General and administrative expense decreased \$2.4 million primarily due to a \$1.7 million decrease in contractor and professional fees and a \$1.5 million decrease in personnel and personnel-related expense primarily related to headcount reductions attributable to the restructuring of our former NGM business. These decreases were partially offset by a \$0.7 million increase in general facility costs.

Depreciation and amortization. Depreciation and amortization expense decreased \$2.5 million primarily due to a \$4.0 million decrease in amortization as a result of a write-down in the book value of our intangible assets resulting from an impairment charge recorded in the fourth quarter of 2008. This decrease was partially offset by a \$1.3 million increase in the depreciation of capital assets.

Restructuring charges. Restructuring charges increased \$4.3 million primarily due to a \$3.6 million increase in severance and severance-related expenses attributable to our former NGM business restructuring initiated in 2008 and a \$1.0 million increase attributable to our restructuring plan initiated in the fourth quarter of 2009 to relocate certain

operations and support functions to Louisville, Kentucky.

Impairment of goodwill. We recorded total impairment charges of \$93.6 million to write down the value of goodwill from our former NGM operating segment in 2008. There was no corresponding expense for the year ended December 31, 2009. As of December 31, 2010, our former NGM operating segment is included in our Carrier Services operating segment.

Impairment of long-lived assets. In the fourth quarter of 2008, we recorded an impairment charge of \$18.2 million to write-down our former NGM operating segment intangible assets by \$12.9 million and property and equipment assets by \$5.3 million. There was no corresponding expense for the year ended December 31, 2009. As of December 31, 2010, our former NGM operating segment is included in our Carrier Services operating segment.

Interest and other expense. Interest and other expense decreased \$10.2 million primarily due to a \$10.2 million decrease in other-than-temporary impairment charges and trading losses recorded for our ARS in 2008.

Interest and other income. Interest and other income decreased \$5.6 million primarily due to a decrease of \$8.5 million in gains on our ARS rights and a \$2.7 million decrease in interest income due to lower yields on our investments as compared to the year ended December 31, 2008. These decreases were partially offset by a \$4.5 million increase in realized gains on our short-term investments and the receipt of a \$1.2 million payment for indemnification claims made in connection with our 2006 acquisition of Followap Inc.

Provisions for income taxes. Our annual effective tax rate decreased to 40.2% for the year ended December 31, 2009 from 93.5% for the year ended December 31, 2008 due primarily to the impact of the \$93.6 million non-cash impairment charges during 2008 related to our write-down of goodwill, none of which is deductible for tax purposes. The income tax provision for the year ended December 31, 2009 increased \$6.2 million as compared to the year ended December 31, 2008 due primarily to an increase in income from operations excluding the goodwill impairment charges during 2008 and gains from the reduction of reserves associated with uncertain tax positions during 2008.

Summary of Operating Segments

The following table presents a summary of our operating segments revenue, contribution and the reconciliation to consolidated income from operations for the years ended December 31, 2008 and 2009.

	2008	Year Ended December 31,		
	\$	2009	2008 vs. 2009	
		\$	\$ Change	% Change
		(dollars in thousands)		
Revenue:				
Carrier Services	\$ 392,336	\$ 370,471	\$ (21,865)	(5.6)%
Enterprise Services	96,509	109,914	13,405	13.9%
Total revenue	\$ 488,845	\$ 480,385	\$ (8,460)	(1.7)%
Segment contribution:				
Carrier Services	\$ 315,455	\$ 309,091	\$ (6,364)	(2.0)%
Enterprise Services	36,120	46,130	10,010	27.7%
Total segment contribution	351,575	355,221	3,646	1.0%
Indirect operating expenses:				
Cost of revenue (excluding depreciation and amortization shown separately below)	59,439	67,093	7,654	12.9%
Sales and marketing	12,574	15,437	2,863	22.8%
Research and development	14,566	10,905	(3,661)	(25.1)%
General and administrative	41,856	50,166	8,310	19.9%

Edgar Filing: NEUSTAR INC - Form 10-K

Depreciation and amortization	40,582	38,040	(2,542)	(6.3)%
Restructuring charges	1,691	6,022	4,331	256.1%
Impairment of goodwill	93,602		(93,602)	(100.0)%
Impairment of long-lived assets	18,159		(18,159)	(100.0)%
Consolidated income from operations	\$ 69,106	\$ 167,558	\$ 98,452	142.5%

Segment contribution is determined based on internal performance measures used by the CODM to assess the performance of each operating segment in a given period. In connection with this assessment, the CODM reviews revenue and segment contribution, which excludes certain unallocated costs within the following expense classifications: cost of revenue, sales and marketing, research and development and general and administrative. Depreciation and amortization and restructuring charges are also excluded from the segment contribution.

Consolidated Results of Operations

We operate in two operating segments – Carrier Services and Enterprise Services. We have provided consolidated results of operations for our Carrier Services operating segment and our Enterprise Services operating segment. For further discussion of the operating results of our Carrier Services operating segment and our Enterprise Services operating segment, including revenue, segment contribution, consolidated income from continuing operations, and enterprise-wide related disclosures, see Note 16 to the Consolidated Financial Statements in Item 8 of Part II of this report.

Liquidity and Capital Resources

Our principal source of liquidity is cash provided by operating activities. Our principal uses of cash have been to fund working capital, capital expenditures, facility expansions, share repurchases, acquisitions and debt service requirements. We anticipate that our principal uses of cash in the future will be for acquisitions, share repurchases, working capital, capital expenditures and facility expansion.

Total cash, cash equivalents and short-term investments were \$345.4 million at December 31, 2010, a slight increase from \$342.2 million at December 31, 2009.

We have a credit facility that is available for cash borrowings up to \$100 million that may be used for working capital, capital expenditures, general corporate purposes and to finance acquisitions. Our credit agreement contains customary representations and warranties, affirmative and negative covenants, and events of default. Our credit agreement requires us to maintain a minimum ratio of consolidated earnings before interest, taxes, depreciation and amortization, or EBITDA, to consolidated interest charges and a maximum ratio of consolidated senior funded indebtedness to consolidated EBITDA. As of and for the year ended December 31, 2010, we were in compliance with these covenants. As of December 31, 2010, we had no borrowings under the credit facility and we utilized \$8.8 million of the availability under the facility for outstanding letters of credit.

We believe that our existing cash and cash equivalents, short-term investments, and cash from operations will be sufficient to fund our operations for the next twelve months.

On February 7, 2011, we sold certain business assets and liabilities of Neustar NGM Services, Inc., or NGM Services, and its subsidiaries. We expect to treat the common stock of NGM Services as worthless for U.S. income tax purposes. As a result of the anticipated worthless stock deduction for the common stock of NGM Services, we expect to recognize an associated income tax benefit of approximately \$27.0 million to \$37.0 million, during the year ended December 31, 2011, which primarily represents the book and tax basis differences associated with our investment in NGM Services.

Discussion of Cash Flows

2010 compared to 2009

Cash flows from operations

Net cash provided by operating activities for the year ended December 31, 2010 was \$144.8 million, as compared to \$175.3 million for the year ended December 31, 2009. This \$30.5 million decrease in net cash provided by operating activities was principally the result of a decrease in accounts payable and accrued expenses of \$23.0 million and an increase in accounts receivable of \$21.1 million. These decreases in net cash provided by operating activities were partially offset by a decrease in deferred revenue of \$10.9 million.

Cash flows from investing

Net cash used investing activities for the year ended December 31, 2010 was \$72.8 million, as compared to \$10.6 million for the year ended December 31, 2009. This \$62.2 million increase in net cash used in investing activities was principally due to our use of cash for the purchases of the pre-refunded municipal bonds of \$50.8 million in 2010, an increase of \$21.3 million in cash paid for acquisitions, and an increase of \$12.6 million in purchases of property and equipment. These uses of cash were partially offset by an increase in cash provided by sales of short-term investments of \$22.5 million attributable to our ARS and ARS Rights.

Cash flows from financing

Net cash used in financing activities was \$45.0 million for the year ended December 31, 2010, as compared to \$11.1 million for the year ended December 31, 2009. The \$33.9 million increase in net cash used in financing activities was primarily driven by \$40.4 million in repurchases of our Class A common stock under a share repurchase program announced in July 2010, and this use was partially offset by an increase of \$6.1 million in proceeds from the exercise of stock options.

2009 compared to 2008

Cash flows from operations

Net cash provided by operating activities for the year ended December 31, 2009 was \$175.3 million, as compared to \$167.6 million for the year ended December 31, 2008. This \$7.7 million increase in net cash provided by operating activities was principally the result of an increase in net income of \$96.8 million and an increase in net changes in operating assets and liabilities of \$14.3 million. These increases were partially offset by a decrease in non-cash adjustments of \$103.4 million. The increase in net changes in operating assets and liabilities of \$14.3 million was primarily due to an increase of \$7.7 million in our accounts payable and accrued expenses and an increase of \$6.0 million in our income taxes payable. Non-cash adjustments decreased \$103.4 million, primarily due to a decrease of \$93.6 million in goodwill impairment charges and a decrease of \$18.2 million in a long-lived assets impairment charge, both recorded in the year ended December 31, 2008. The decreases of impairment charges included non-cash adjustments that were partially offset by an increase in the net gains of \$5.0 million related to our short-term investments.

Cash flows from investing

Net cash used investing activities for the year ended December 31, 2009 was \$10.6 million, as compared to net cash provided by investing activities of \$5.9 million for the year ended December 31, 2008. This \$16.5 million increase in net cash used in investing activities was principally due to a \$30.6 million decrease in cash provided by short-term investment sales that was partially offset by a \$13.8 million decrease in cash paid for acquisitions.

Cash flows from financing

Net cash used in financing activities was \$11.1 million for the year ended December 31, 2009, as compared to net cash used in financing activities of \$119.9 million for the year ended December 31, 2008. The \$108.8 million decrease in net cash used in financing activities principally resulted from the use of \$124.9 million in 2008 to repurchase our Class A common stock; there were no corresponding repurchases in 2009. This decrease in net cash used was partially offset by a \$7.6 million decrease in excess tax benefits from stock-based compensation, a reduction of \$4.4 million in proceeds from the exercise of stock options, and an increase of \$3.9 million in principal repayments on capital lease obligations.

Contractual Obligations

Our principal commitments consist of obligations under leases for office space, computer equipment and furniture and fixtures. The following table summarizes our long-term contractual obligations as of December 31, 2010.

Payments Due by Period

	Total	Less Than 1 Year	2-3 Years	4-5 Years	More Than 5 Years
	(in thousands)				
Capital lease obligations	\$ 11,260	\$ 6,892	\$ 4,368	\$	\$
Operating lease obligations	64,253	8,756	15,075	11,690	28,732
Total	\$ 75,513	\$ 15,648	\$ 19,443	\$ 11,690	\$ 28,732

Some of our commercial commitments are secured by standby letters of credit. The following is a summary of our commercial commitments secured by standby letters of credit by commitment date as of December 31, 2010:

	Total	Less Than 1 Year	1-3 Years	4-5 Years	More Than 5 Years
	(in thousands)				
Standby letters of credit	\$ 8,805	\$ 8,805	\$	\$	\$

The amounts presented in the tables above may not necessarily reflect our actual future cash funding requirements because the actual timing of the future payments made may vary from the stated contractual obligation. In addition, due to the uncertainty with respect to the timing of future cash flows associated with our unrecognized tax benefits at December 31, 2010, we are unable to make reasonably reliable estimates of the period of cash settlement with the respective taxing authority. Therefore, \$1.2 million of unrecognized tax benefits have been excluded from the contractual obligations table above. See Note 13 to the consolidated financial statements in Item 8 of Part II of this report for a discussion on income taxes.

Effect of Inflation

Inflation generally affects us by increasing our cost of labor and equipment. We do not believe that inflation had any material effect on our results of operations during the years ended December 31, 2008, 2009 and 2010.

Recent Accounting Pronouncements

See Note 2 to our Consolidated Financial Statements in Item 8 of Part II of this report for a discussion of the effects of recent accounting pronouncements.

Off-Balance Sheet Arrangements

We had no off-balance sheet arrangements as of December 31, 2009 and 2010.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We are exposed to a variety of market risks, including changes in interest rates affecting the return on our investments and foreign currency fluctuations.

Exposure to market rate risk for changes in interest rates affects the value of our investment portfolio. We have not used derivative financial instruments to hedge against such risk in our investment portfolio. We invest in securities of highly-rated issuers and follow investment policies limiting, among other things, the amount of credit exposure to any one issuer. We seek to limit default risk by purchasing only investment-grade securities. We do not actively manage the risk of interest rate fluctuations on our short-term investments; however, our exposure to this risk is mitigated by the relatively short-term nature of these investments. Based on a hypothetical 10% adverse

movement in interest rates, the impact on our interest income for our short-term investments for the year ended December 31, 2010 would have been insignificant.

We have accounts on our foreign subsidiaries' ledgers which are maintained in the respective subsidiary's local foreign currency and remeasured into the United States dollar. As a result, we are exposed to movements in the exchange rates of various currencies against the United States dollar and against the currencies of other countries in which we sell services. As of December 31, 2010, our assets and liabilities related to non-dollar denominated currencies were primarily related to intercompany payables and receivables. An increase or decrease of 10% in foreign exchange rate would not have a material impact on our financial position.

Because our sales and expense are primarily denominated in local currency, the impact of foreign currency fluctuations on sales and expenses has not been material, and we do not employ measures intended to manage foreign exchange rate risk.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

Board of Directors and Stockholders
NeuStar, Inc.

We have audited the accompanying consolidated balance sheets of NeuStar, Inc. as of December 31, 2009 and 2010, and the related consolidated statements of operations, stockholders' equity, and cash flows for each of the three years in the period ended December 31, 2010. Our audits also included the financial statement schedule listed in the Index at Item 15(a)(2). These financial statements and schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of NeuStar, Inc. at December 31, 2009 and 2010, and the consolidated results of its operations and its cash flows for each of the three years in the period ended December 31, 2010, in conformity with U.S. generally accepted accounting principles. Also, in our opinion, the related financial statement schedule, when considered in relation to the basic financial statements taken as a whole, presents fairly in all material respects the information set forth therein.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), NeuStar, Inc.'s internal control over financial reporting as of December 31, 2010, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated February 25, 2011 expressed an unqualified opinion thereon.

NEUSTAR, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. DESCRIPTION OF BUSINESS AND ORGANIZATION

NeuStar, Inc. (the Company or Neustar) was incorporated as a Delaware corporation in 1998. The Company provides authoritative directory and policy management services to its customers, which include communications service providers, or carriers, and non-carrier, commercial businesses, or enterprises. The Company was founded to meet the technical and operational challenges of the communications industry when the U.S. government mandated local number portability in 1996. The Company provides the authoritative solution that the communications industry relies upon to meet this mandate and the Company also provides a broad range of innovative services to meet an expansive range of its customers' needs.

The Company provides critical directory services that its carrier and enterprise customers rely upon to manage a wide range of technical and operating requirements, including the following:

Carrier Services. The Company's carrier services include numbering services, order management services and Internet protocol (IP) services. Through its set of unique databases and system infrastructure in geographically dispersed data centers, the Company manages the increasing complexity in the telecommunications industry and ensures the seamless connection of its carrier customers' numerous networks, while also enhancing the capabilities and performance of their infrastructure. The Company operates the authoritative databases that manage virtually all telephone area codes and numbers, and enables the dynamic routing of calls among numerous competing carriers in the United States and Canada. All carriers that offer telecommunications services to the public at large must access a copy of the Company's unique database to properly route their customers' calls. The Company also facilitates order management and work flow processing among carriers, and allows operators to manage and optimize the addressing and routing of IP communications.

Enterprise Services. The Company's enterprise services include Internet infrastructure services and registry services. Through the Company's global directory platform, the Company provides a suite of domain name system (DNS) services to its enterprise customers. The Company manages a collection of directories that maintain addresses in order to direct, prioritize and manage Internet traffic, and to find and resolve Internet queries and top-level domains. The Company is the authoritative provider of essential registry services and manages directories of similar resources, or addresses, that its customers use for reliable, fair and secure access and connectivity. In addition, enterprise customers rely on the Company's services to monitor and load-test websites to help identify issues and optimize performance. The Company also provides geolocation database services that help enterprises identify the location of their consumers for a variety of purposes, such as target marketing and fraud prevention. Additionally, the Company provides directory services for the 5 and 6-digit number strings used for all U.S. Common Short Codes, which is part of the short messaging service relied upon by the U.S. wireless industry.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation and Consolidation

The consolidated financial statements include the accounts of the Company and its wholly owned subsidiaries. All material intercompany transactions and accounts have been eliminated in consolidation. The Company consolidates investments where it has a controlling financial interest. The usual condition for controlling financial interest is ownership of a majority of the voting interest and, therefore, as a general rule, ownership, directly or indirectly, of

more than 50% of the outstanding voting shares is a condition indicating consolidation. The Company does not have any variable interest entities or investments accounted for under the equity method of accounting.

NEUSTAR, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Segment Reporting

Operating segments are components of an enterprise about which discrete financial information is available that is evaluated regularly by the chief operating decision maker (CODM) in deciding how to allocate resources and in assessing performance. Prior to the first quarter of 2010, the Company reported its results of operations based on two operating segments: Clearinghouse and Next Generation Messaging (NGM). In the first quarter of 2010, the Company realigned its organizational structure and internal financial reporting by customer type, reflecting how the CODM allocates resources and assesses performance. This realignment by customer type resulted in two operating segments: Carrier Services and Enterprise Services. The Company's operating segments are the same as its reportable segments.

Reclassification

In the first quarter of 2010, the Company changed its presentation of revenues to conform to its operating segments by customer type (see Note 16). Prior year revenues have been reclassified to conform to the current year presentation.

Use of Estimates

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expense during the reporting periods. Significant estimates and assumptions are inherent in the analysis and the measurement of deferred tax assets; the identification and quantification of income tax liabilities due to uncertain tax positions; restructuring liabilities; valuation of investments; recoverability of intangible assets, other long-lived assets and goodwill; and the determination of the allowance for doubtful accounts. The Company bases its estimates on historical experience and assumptions that it believes are reasonable. Actual results could differ from those estimates.

Fair Value of Financial Instruments

The Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) Topic Financial Instruments requires disclosures of fair value information about financial instruments, whether or not recognized in the balance sheet, for which it is practicable to estimate that value. Due to their short-term nature, the carrying amounts reported in the accompanying consolidated financial statements approximate the fair value for cash and cash equivalents, accounts receivable, accounts payable and accrued expenses. The Company determined the fair value of its short-term investments as of December 31, 2009 using discounted cash flow models (see Note 5). As of December 31, 2010, the Company determined the fair value of its short-term and long-term investments utilizing quoted market prices in active markets (see Note 5). The Company believes the carrying value of its notes receivable approximates fair value as the interest rate approximates a market rate.

NEUSTAR, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The estimated fair values of the Company's financial instruments are as follows (in thousands):

	December 31,			
	2009		2010	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
Cash and cash equivalents	\$ 304,581	\$ 304,581	\$ 331,570	\$ 331,570
Restricted cash (current assets)	\$ 512	\$ 512	\$ 556	\$ 556
Short-term investments	\$ 37,610	\$ 37,610	\$ 13,802	\$ 13,802
Notes receivable	\$	\$	\$ 1,590	\$ 1,590
Marketable securities (long-term other assets)	\$ 1,665	\$ 1,665	\$ 3,681	\$ 3,681
Long-term investments	\$	\$	\$ 37,009	\$ 37,009
Deferred compensation (long-term other liabilities)	\$ 1,682	\$ 1,682	\$ 3,621	\$ 3,621

Cash and Cash Equivalents

The Company considers all highly liquid investments, which are investments that are readily convertible into cash and have original maturities of three months or less at the time of purchase, to be cash equivalents. Supplemental non-cash information to the consolidated statements of cash flows is as follows:

	Year Ended December 31,		
	2008	2009	2010
	(in thousands)		
Fixed assets acquired through capital leases	\$ 14,150	\$ 10,787	\$ 1,414
Accounts payable incurred to purchase fixed assets	294	3,672	1,104

Restricted Cash

As of December 31, 2009 and 2010, approximately \$0.5 million and \$0.6 million, respectively, of cash was held with a local bank in the form of a bank guarantee as security for the Company's performance under a noncancelable operating lease agreement and was classified as restricted cash on the consolidated balance sheets.

Concentrations of Credit Risk

Financial instruments that are potentially subject to a concentration of credit risk consist principally of cash, cash equivalents, investments, and accounts receivable. The Company's cash management and investment policies are in place to restrict placement of these instruments with only financial institutions evaluated as highly creditworthy.

With respect to accounts receivable, the Company performs ongoing evaluations of its customers, generally granting uncollateralized credit terms to its customers, and maintains an allowance for doubtful accounts based on historical experience and management's expectations of future losses. Customers under the Company's contracts with North

American Portability Management LLC are charged a Revenue Recovery Collection fee (see Accounts Receivable, Revenue Recovery Collection and Allowance for Doubtful Accounts below).

Investments

The Company's investments classified as available-for-sale are carried at estimated fair value, as determined by quoted market prices or other valuation methods, with unrealized gains and losses reported as a separate component of accumulated other comprehensive income. Realized gains and losses and declines in value judged to be other-than-temporary, if any, on available-for-sale securities are included in other (expense) income. Upon sale, the cost of available-for-sale investments originally purchased prior to 2010 was based on a pro-rata allocation of

NEUSTAR, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

other-than-temporary losses previously recognized as a charge to earnings. The cost at time of sale of available-for-sale investments purchased during 2010 is based upon the specific identification method. Interest and dividends on these securities is included in interest and other income.

The Company periodically evaluates whether any declines in the fair value of its investments are other-than-temporary. This evaluation consists of a review of several factors, including but not limited to: the length of time and extent that a security has been in an unrealized loss position; the existence of an event that would impair the issuer's future earnings potential; the near-term prospects for recovery of the market value of a security; the Company's intent to sell an impaired security; and the probability that the Company will be required to sell the security before the market value recovers. Prior to April 1, 2009, declines in value below cost for investments which the Company had the ability and intent to hold the investment for a period of time sufficient to allow for a market recovery, were not recognized as an other-than-temporary charge in earnings. Beginning April 1, 2009, if an investment which the Company does not intend to sell prior to recovery declines in value below its amortized cost basis and it is not more likely than not that the Company will be required to sell the related security before the recovery of its amortized cost basis, the Company recognizes the difference between the present value of the cash flows expected to be collected and the amortized cost basis, or credit loss, as an other-than-temporary charge in interest and other expense. The difference between the estimated fair value and the security's amortized cost basis at the measurement date related to all other factors is reported as a separate component of accumulated other comprehensive loss.

The Company's investments classified as trading are carried at estimated fair value with unrealized gains and losses reported in other (expense) income. During 2009 and 2010, the Company classified its auction rate securities as trading pursuant to the Investments—Debt and Equity Securities Topic of the FASB ASC, with changes in the fair value of these securities recorded in earnings (see Note 4 and Note 5). Interest and dividends on these securities are included in interest and other income.

Accounts Receivable, Revenue Recovery Collections and Allowance for Doubtful Accounts

Accounts receivable are recorded at the invoiced amount and do not bear interest. In accordance with the Company's contracts with North American Portability Management LLC (NAPM), the Company bills a Revenue Recovery Collections (RRC) fee to offset uncollectible receivables from any individual customer. The RRC fee is based on a percentage of monthly billings. On July 1, 2008, the RRC fee was reduced from 1% to 0.75%. On July 1, 2010, the RRC fee was reduced to 0.65%. The RRC fees are recorded as an accrued liability when collected. If the RRC fee is insufficient, the amounts can be recovered from the customers. Any accrued RRC fees in excess of uncollectible receivables are paid back to the customers annually on a pro rata basis. RRC fees of \$2.6 million and \$2.6 million are included in accrued expenses as of December 31, 2009 and 2010, respectively. All other receivables related to services not covered by the RRC fees are evaluated and, if deemed not collectible, are reserved. The Company recorded an allowance for doubtful accounts of \$1.4 million and \$1.4 million as of December 31, 2009 and 2010, respectively. Bad debt expense amounted to \$2.4 million, \$3.0 million and \$2.6 million for the years ended December 31, 2008, 2009 and 2010, respectively.

Property and Equipment

Property and equipment, including leasehold improvements and assets acquired through capital leases, are recorded at cost, net of accumulated depreciation and amortization. Depreciation and amortization of property and equipment are

Edgar Filing: NEUSTAR INC - Form 10-K

determined using the straight-line method over the estimated useful lives of the assets, as follows:

Computer hardware	3-5 years
Equipment	5 years
Furniture and fixtures	5-7 years
Leasehold improvements	Lesser of related lease term or useful life

NEUSTAR, INC.**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Amortization expense of assets acquired through capital leases is included in depreciation and amortization expense in the consolidated statements of operations. Replacements and major improvements are capitalized; maintenance and repairs are charged to expense as incurred. Impairments of long-lived assets are determined in accordance with the Property, Plant and Equipment Topic of the FASB ASC. In the fourth quarter of 2010, the Company recorded an impairment charge of \$7.9 million related to property and equipment, including capitalized technology, used by its Converged Messaging asset group (see Impairment of Long-Lived Assets below).

The Company capitalizes software development and acquisition costs in accordance with the Intangibles Goodwill and Other, Internal-Use Software Topic of the FASB ASC, which requires the capitalization of costs incurred in connection with developing or obtaining software for internal use. Costs incurred to develop the application are capitalized, while costs incurred for planning the project and for post-implementation training and maintenance are expensed as incurred. The capitalized costs of purchased technology and software development are amortized using the straight-line method over the estimated useful life of three to five years. During the years ended December 31, 2009 and 2010, the Company capitalized costs related to internal use software of \$19.3 million and \$28.8 million, respectively. Amortization expense related to internal use software for the years ended December 31, 2008, 2009 and 2010 was \$11.1 million, \$12.4 million and \$15.2 million, respectively, and is included in depreciation and amortization expense in the consolidated statements of operations.

Goodwill

Goodwill represents the excess of the purchase price over the fair value of assets acquired, as well as other definite-lived intangible assets. In accordance with the Intangibles Goodwill and Other Topic of the FASB ASC, goodwill and indefinite-lived intangible assets are not amortized, but are reviewed for impairment at least annually and upon the occurrence of events or changes in circumstances that would reduce the fair value of such assets below their carrying amount. For purposes of the Company's annual impairment test completed on October 1st of 2008 and 2009, the Company identified and assigned goodwill to two reporting units, Clearinghouse and NGM. For purposes of the Company's annual impairment test completed on October 1st of 2010, the Company identified and assigned goodwill to three reporting units, Carrier Services, Internet Infrastructure Services, and Registry Services (see Note 6).

Goodwill is tested for impairment at the reporting unit level using a two-step approach. The first step is to compare the fair value of a reporting unit's net assets, including assigned goodwill, to the book value of its net assets, including assigned goodwill. Fair value of the reporting unit is determined using both an income and a market approach. To assist in the process of determining if a goodwill impairment exists, the Company performs internal valuation analyses and considers other market information that is publicly available, and the Company may obtain valuations from external advisors. If the fair value of the reporting unit is greater than its net book value, the assigned goodwill is not considered impaired. If the fair value is less than the reporting unit's net book value, the Company performs a second step to measure the amount of the impairment, if any. The second step is to compare the book value of the reporting unit's assigned goodwill to the implied fair value of the reporting unit's goodwill, using a theoretical purchase price allocation. If the carrying value of goodwill exceeds the implied fair value, an impairment has occurred and the Company is required to record a write-down of the carrying value and charge the impairment as an operating expense in the period the determination is made. In 2008, the Company recorded goodwill impairment charges of \$93.6 million related to its former NGM reporting unit (see Note 6). There was no impairment charge related to the Company's former Clearinghouse reporting unit in the year ended December 31, 2008. There were no goodwill impairment charges recognized during the years ended December 31, 2009 and 2010.

Identifiable Intangible Assets

Identifiable intangible assets are amortized over their respective estimated useful lives using a method of amortization that reflects the pattern in which the economic benefits of the intangible assets are consumed or otherwise used and are periodically reviewed for impairment. In 2008, the Company recorded an intangible asset

NEUSTAR, INC.**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

impairment of \$12.9 million related to its former NGM operating segment (see Note 6). There were no impairment charges recognized during the year ended December 31, 2009. In the fourth quarter of 2010, the Company recorded an intangible asset impairment charge of \$0.6 million related to its Converged Messaging asset group (see Impairment of Long-Lived Assets below).

The Company's identifiable intangible assets are amortized as follows:

	Years	Method
Acquired technologies	3-5	Straight-line
Customer lists and relationships	3-7	Various
Trade name	3	Straight-line

Amortization expense related to identifiable intangible assets is included in depreciation and amortization expense in the consolidated statements of operations.

Impairment of Long-Lived Assets

In accordance with Property, Plant and Equipment Topic of the FASB ASC, the Company reviews long-lived assets and certain identifiable intangible assets for impairment whenever events or changes in circumstances indicate the carrying amount of an asset may not be recoverable. The Company measures recoverability of assets to be held and used by comparing the carrying amount of the assets to future undiscounted net cash flows expected to be generated by the assets. Recoverability measurement and estimating undiscounted cash flows is performed at the lowest possible level for which there are identifiable cash flows. If the carrying amount of the assets exceeds the future undiscounted cash flows expected to be generated by those assets, such assets fail the recoverability test and an impairment charge would be recognized, measured as the amount by which the carrying amount of the assets exceeds the fair value. Assets to be disposed of are recorded at the lower of the carrying amount or fair value less costs to sell.

In connection with the interim and annual goodwill impairment tests of the former NGM reporting unit, in the first and fourth quarters of 2008, the Company performed a recoverability test of the NGM long-lived assets. For purposes of recognition and measurement of impairment, the Company determined that the lowest level of identifiable cash flows was at the former NGM reporting unit level. This asset grouping was determined at the former NGM reporting unit level because the NGM long-lived assets do not have identifiable cash flows that are independent of the cash flows of other NGM assets and liabilities.

The Company concluded that the future undiscounted cash flows of the NGM asset group exceeded its carrying amount as of March 31, 2008 and no asset impairment charge was recognized at such time. The Company determined that the undiscounted cash flows of the NGM asset group were below the carrying amount as of October 1, 2008, and an impairment of long-lived assets charge of \$18.2 million was recognized during the fourth quarter of 2008 in the consolidated statements of operations (see Note 6 and Note 7).

In the fourth quarter of 2008, the Company commenced a plan to restructure its NGM business. In August 2009, the Company announced the extension of this restructuring plan to include further headcount reductions and the closure of certain facilities. Due to the Company's extension of its NGM restructuring plan and the resulting change in the

projected results of the NGM business, the Company performed a recoverability test of its long-lived assets, including intangible assets, in the NGM asset group and determined that the carrying value of the assets was recoverable from the undiscounted cash flows.

In the first quarter of 2010, the Company realigned its organizational structure, and its NGM business was included with other IP-related services in the Company's Carrier Services operating segment. The services, technology and customer base of the NGM business was renamed Converged Messaging Services while the sales and marketing functions were transitioned to the broader Carrier Services operating segment. In the fourth quarter of 2010, the Company decided to exit the Converged Messaging business. The Company believes that its decision to

NEUSTAR, INC.**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

exit this business was an indicator of impairment for long-lived assets in its Converged Messaging asset group. As a result, in the fourth quarter of 2010, the Company performed a recoverability test and determined that the future undiscounted cash flows of the asset group was less than the carrying value. The Company recorded an \$8.5 million charge for impairment of long-lived assets, the largest component of which was capitalized technology. In determining fair value, the Company utilized estimates from external advisors and valuation models that involved assumptions about replacement cost, obsolescence factors, future cash flows, discount rates and, as appropriate, review of market comparables. The Company believes that the assumptions and estimates used to determine the estimated fair value of its asset group are reasonable; however, assumptions and estimates used by management that are incorporated within the estimated fair value of the Company's Converged Messaging asset group may not reflect specific incentives or attributes of a particular buyer from which a sales price is determined and may result in further impairment or a loss on sale. As of December 31, 2010, the Company had \$1.6 million in long-lived assets in its Converged Messaging asset group.

Revenue Recognition

The Company provides essential technology and directory services to carrier and enterprise customers pursuant to various private commercial and government contracts. The Company's revenue recognition policies are in accordance with the Revenue Recognition Topic of the FASB ASC.

Significant Contracts

As part of its carrier services, the Company provides number portability administration center services (NPAC Services), which include wireline and wireless number portability, implementation of the allocation of pooled blocks of telephone numbers and network management services in the United States pursuant to seven contracts with NAPM, an industry group that represents all telecommunications service providers in the United States. In 2008, the Company recognized revenue under its contracts with NAPM primarily on a per-transaction basis. The aggregate fees for transactions processed under these contracts were determined by the total number of transactions. In January 2009, the Company amended its seven regional contracts with NAPM. As a result of these amendments, the aggregate fees for transactions processed under these contracts are determined by an annual fixed-fee pricing model under which the annual fixed fee (Base Fee) was set at \$340.0 million and \$362.1 million in 2009 and 2010, respectively, and is subject to an annual price escalator of 6.5% in subsequent years. These amended contracts also provide for a fixed credit of \$40.0 million in 2009, \$25.0 million in 2010 and \$5.0 million in 2011, which will be applied to reduce the Base Fee for the applicable year. Customers under these amended contracts may earn additional credits of up to \$15.0 million annually in 2009, 2010 and 2011 if the customers reach specific levels of aggregate telephone number inventories and adopt and implement certain IP fields and functionality. The amendments also enable the Company's customers to earn credits if the volume of transactions in a given year is above or below the contractually established volume for that year. The determination of credits earned based on transaction volume is done annually at the end of the year and earned credits are applied to the following year's invoices. To the extent any available additional credits expire unused at the end of a year, they will be recognized in revenue at that time. The Company determines the fixed and determinable fee under these amended contracts on an annual basis at the beginning of each year and recognizes this fee in its Carrier Services operating segment on a straight-line basis over twelve months.

For 2009, the Company concluded that the fixed and determinable fee equaled \$285.0 million, which represented the Base Fee of \$340.0 million reduced by the \$40.0 million fixed credit and \$15.0 million of available additional credits. During 2009, the Company's carrier customers adopted and implemented the requisite IP fields and functionality, and

as a result earned \$7.5 million of the additional credits for each of 2009, 2010 and 2011. However, the customers did not reach the levels of aggregate telephone number inventories required to earn additional credits and as a result, the Company recognized \$7.5 million of additional revenue in the fourth quarter of 2009.

NEUSTAR, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

For 2010, the Company concluded that the fixed and determinable fee equaled \$322.1 million, which represented the Base Fee of \$362.1 million, reduced by the \$25.0 million fixed credit and \$15.0 million of available additional credits. During 2010, the Company's carrier customers earned all of the available additional credits of \$15.0 million attributable to the adoption and implementation of the requisite IP fields and functionality and the achievement of specific levels of aggregate telephone number inventories.

The amount of total revenue derived under the Company's contracts with NAPM, comprising of NPAC Services, connection service fees related to our NPAC Services, and system enhancements, was approximately \$331.8 million, \$306.1 million and \$337.1 million for the years ended December 31, 2008, 2009 and 2010, respectively.

Fees under our contracts with NAPM are billed to telecommunications service providers based on their allocable share of the total transaction charges. This allocable share is based on each respective telecommunications service provider's share of the aggregate end-user services revenues of all U.S. telecommunications service providers, as determined by the Federal Communications Commission. The Company also bills an RRC fee equal to a percentage of monthly billings to its customers, which is available to the Company if any customer under the contracts to provide NPAC Services fails to pay its allocable share of total transactions charges.

Carrier Services

Under its seven contracts with NAPM, the Company provides NPAC Services. As discussed above under the heading Revenue Recognition Significant Contracts, the Company determines the fixed and determinable fee on an annual basis and recognizes such fee on a straight-line basis over twelve months.

The Company provides NPAC Services in Canada under its long-term contract with the Canadian LNP Consortium Inc. The Company recognizes revenue on a per-transaction fee basis as the services are performed.

The Company generates revenue from its telephone number administration services under two government contracts: North American Numbering Plan Administrator (NANPA) and National Pooling Administrator (NPA). Under its NANPA contract, the Company earns a fixed annual fee and recognizes this fee as revenue on a straight-line basis as services are provided. Under its NPA contract, the Company earns a fixed fee associated with administration of the pooling system. The Company recognizes revenue for this contract on a straight-line basis over the term of the contract. In the event the Company estimates losses on these fixed price contracts, the Company recognizes these losses in the period in which a loss becomes apparent.

The Company generates revenue from connection fees and system enhancements under its contracts with NAPM. The Company recognizes connection fee revenue as the service is performed. System enhancements are provided under contracts in which the Company is reimbursed for costs incurred plus a fixed fee, and revenue is recognized based on costs incurred plus a pro rata amount of the fee.

The Company provides Order Management Services, consisting of customer set-up and implementation followed by transaction processing, under contracts with terms ranging from one to three years. Customer set-up and implementation is not considered a separate deliverable; accordingly, the fees for these services are deferred and recognized as revenue on a straight-line basis over the term of the contract. Per-transaction fees are recognized as the transactions are processed.

The Company generates revenue from its Converged Messaging Services under contracts with global mobile operators that range from one to three years. These contracts consist of fees for set-up and implementation and include either user subscription fees based on the number of subscribers that use mobile instant messaging services, or license fees based on the number of subscribers that use mobile instant messaging services. Customer set-up and implementation is not considered a separate deliverable; accordingly, the fees for these services are deferred and recognized as revenue on a straight-line basis over the remaining term of the contract following delivery of the set-up and implementation services. The Company recognizes user subscription fee revenue on a monthly basis

NEUSTAR, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

over the term of the contract after completion of customer set-up and implementation. The Company recognizes license fee revenue on a straight-line basis over the term of the contract after completion of customer set-up and implementation.

Enterprise Services

The Company generates revenue from the management of internal and external DNS services. The Company's revenue from these services consists of customer set-up fees, monthly recurring fees and per-transaction fees for transactions in excess of pre-established monthly minimums under contracts with terms ranging from one to three years. Customer set-up fees are not considered a separate deliverable and are deferred and recognized on a straight-line basis over the term of the contract. Under the Company's contracts to provide DNS services, customers have contractually established monthly transaction volumes for which they are charged a recurring monthly fee. Transactions processed in excess of the pre-established monthly volume are billed at a contractual per-transaction rate. Each month, the Company recognizes the recurring monthly fee and usage in excess of the established monthly volume on a per-transaction basis as services are provided.

The Company generates revenue related to its Internet domain name registry services under contracts with terms generally between one and ten years. The Company recognizes revenue on a straight-line basis over the term of the related customer contracts.

The Company generates revenue from its U.S. Common Short Code services under short-term contracts ranging from three to twelve months, and the Company recognizes revenue on a straight-line basis over the term of the customer contracts.

Service Level Standards

Some of the Company's private commercial contracts require the Company to meet service level standards and impose corresponding penalties if the Company fails to meet those standards. The Company records a provision for these performance-related penalties when it becomes aware that it has failed to meet required service levels, triggering the requirement to pay a penalty, which results in a corresponding reduction to revenue.

Cost of Revenue and Deferred Costs

Cost of revenue includes all direct materials costs, direct labor costs, and those costs related to generation of revenue such as indirect labor, materials and supplies and facilities cost. The Company's primary cost of revenue is personnel costs associated with service implementation, product maintenance, customer deployment and customer care, including salaries, stock-based compensation and other personnel-related expense. In addition, cost of revenue includes costs relating to maintaining the Company's existing technology and services, as well as royalties paid related to the Company's U.S. Common Short Code services. Cost of revenue also includes the costs incurred by the Company's information technology and systems department, including network costs, data center maintenance, database management, data processing costs, and facilities costs.

Deferred costs represent direct labor related to professional services incurred for the setup and implementation of contracts. These costs are recognized in cost of revenue on a straight-line basis over the contract term. Deferred costs also include royalties paid related to the Company's U.S. Common Short Code services, which are recognized in cost

of revenue on a straight-line basis over the contract term. Deferred costs are classified as such on the consolidated balance sheets.

Research and Development

The Company expenses its research and development costs as they are incurred. Research and development expense consists primarily of personnel costs, including salaries, stock-based compensation and other personnel-

NEUSTAR, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

related expense, consulting fees, and the costs of facilities, computer and support services used in service and technology development.

Advertising

The Company expenses advertising costs as they are incurred. Advertising expense was approximately \$3.4 million, \$5.3 million and \$6.7 million for the years ended December 31, 2008, 2009 and 2010, respectively.

Stock-Based Compensation

The Company accounts for its stock-based compensation plans under the recognition and measurement provisions of the Compensation Stock Compensation Topic of the FASB ASC. The Company estimates the value of stock-based awards on the date of grant using the Black-Scholes option-pricing model. For stock-based awards subject to graded vesting, the Company has utilized the straight-line method for allocating compensation cost by period.

The Company presents benefits of tax deductions in excess of the compensation cost recognized (excess tax benefits) as a financing cash inflow with a corresponding operating cash outflow. For the years ended December 31, 2008, 2009 and 2010, the Company included \$8.2 million, \$0.6 million and \$1.6 million, respectively, of excess tax benefits as a financing cash inflow with a corresponding operating cash outflow.

Basic and Diluted Net Income per Common Share

In 2009, the Company adopted and retrospectively applied the FASB standard which updated the Earnings Per Share Topic of the FASB ASC for determining whether instruments granted in share-based payment transactions should be included in the computation of earnings per share. The authoritative literature effective in 2009 clarifies that unvested share-based payment awards that contain non-forfeitable rights to dividends or dividend equivalents (whether paid or unpaid) are participating securities that should be included in the computation of earnings per share under the two-class method. The Company's restricted stock awards are considered to be participating securities because they contain non-forfeitable rights to cash dividends, if declared and paid. In lieu of presenting earnings per share pursuant to the two-class method, the Company has included shares of unvested restricted stock awards in the computation of basic net income per common share as the resulting earnings per share would be the same under both methods. Diluted net income per common share for the year ended December 31, 2008 was not materially affected.

Basic net income per common share is computed by dividing net income by the weighted-average number of common shares and participating securities outstanding during the period. Unvested restricted stock units and performance vested restricted stock units (PVRSU) are excluded from the computation of basic net income per common share because the underlying shares have not yet been earned by the stockholder and are not participating securities. Shares underlying stock options are also excluded because they are not considered outstanding shares. Diluted net income per common share assumes dilution and is computed based on the weighted-average number of common shares outstanding after consideration of the dilutive effect of stock options, unvested restricted stock units and PVRSU. The effect of dilutive securities is computed using the treasury stock method and average market prices during the period. Dilutive securities with performance conditions are excluded from the computation until the performance conditions are met.

Income Taxes

The Company accounts for income taxes in accordance with the Income Taxes Topic of the FASB ASC. Deferred tax assets and liabilities are determined based on temporary differences between the financial reporting bases and the tax bases of assets and liabilities. Deferred tax assets are also recognized for tax net operating loss carryforwards. These deferred tax assets and liabilities are measured using the enacted tax rates and laws that will be

NEUSTAR, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

in effect when such amounts are expected to be reversed or utilized. Valuation allowances are provided to reduce such deferred tax assets to amounts more likely than not to be ultimately realized.

The income tax provision includes U.S. federal, state, local and foreign income taxes and is based on pre-tax income or loss. In determining the annual effective income tax rate, the Company analyzed various factors, including the Company's annual earnings and taxing jurisdictions in which the earnings were generated, the impact of state and local income taxes and the ability of the Company to use tax credits and net operating loss carryforwards.

The Company assesses uncertain tax positions in accordance with income tax accounting standards. Under these standards, income tax benefits should be recognized when, based on the technical merits of a tax position, the Company believes that if a dispute arose with the taxing authority and were taken to a court of last resort, it is more likely than not (*i.e.*, a probability of greater than 50 percent) that the tax position would be sustained as filed. If a position is determined to be more likely than not of being sustained, the reporting enterprise should recognize the largest amount of tax benefit that is greater than 50 percent likely of being realized upon ultimate settlement with the taxing authority. The Company's practice is to recognize interest and penalties related to income tax matters in income tax expense.

Foreign Currency

Assets and liabilities of consolidated foreign subsidiaries, whose functional currency is the local currency, are translated to U.S. dollars at fiscal year end exchange rates. Revenue and expense items are translated to U.S. dollars at the average rates of exchange prevailing during the fiscal year. The adjustment resulting from translating the financial statements of such foreign subsidiaries to U.S. dollars is reflected as a foreign currency translation adjustment and reported as a component of accumulated other comprehensive loss in the consolidated statements of stockholders equity.

Transactions denominated in currencies other than the functional currency are recorded based on exchange rates at the time such transactions arise. Subsequent changes in exchange rates result in transaction gains or losses, which are reflected within interest and other expense in the consolidated statements of operations.

Comprehensive Income

Comprehensive income is comprised of net earnings and other comprehensive income (loss), which includes certain changes in equity that are excluded from income. The Company includes unrealized holding gains and losses on available-for-sale securities, if any, and foreign currency translation adjustments in other comprehensive income (loss) in the consolidated statements of stockholders' equity. Comprehensive income was approximately \$3.6 million, \$101.6 million and \$106.5 million for the years ended December 31, 2008, 2009 and 2010, respectively.

Recent Accounting Pronouncements

In September 2009, the FASB ratified Accounting Standard Update (ASU) 2009-13, Revenue Recognition Topic 605 Multiple-Deliverable Revenue Arrangements (ASU 2009-13). When vendor specific objective evidence or third party evidence for deliverables in a multiple-element arrangement cannot be determined, the Company will be required to develop a best estimate of the selling price for separate deliverables and allocate arrangement consideration using the relative selling price method. ASU 2009-13 is effective for revenue arrangements entered into or materially modified

beginning January 1, 2011, with earlier application permitted. The Company does not expect the adoption to have a material impact on its consolidated financial statements.

In January 2010, the FASB issued guidance amending the disclosure requirements related to recurring and non-recurring fair value measurements. The guidance requires new disclosures on the transfers of assets and

NEUSTAR, INC.**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

liabilities between those whose fair value is measured using Level 1 inputs (quoted prices in an active market for identical assets or liabilities) and using Level 2 inputs (significant other observable inputs) of the fair value measurement hierarchy, including the reasons and the timing of the transfers. Additionally, the guidance requires separate disclosure of purchases, sales, issuance and settlements of assets and liabilities measured using significant unobservable inputs (Level 3 fair value measurements). This standard is effective for all interim and year-end financial statements issued after January 1, 2010, except for the disclosure on the activities for Level 3 fair value measurements, which is effective for all interim and year-end financial statements issued after January 1, 2011. The Company does not currently expect the adoption of this guidance to have a material impact on its consolidated financial statements.

3. ACQUISITIONS***Webmetrics, Inc.***

On January 10, 2008, the Company acquired Webmetrics, Inc. (Webmetrics) for cash consideration of \$12.5 million, subject to certain purchase price adjustments and contingent cash consideration of up to \$6.0 million, and acquisition costs of approximately \$0.7 million. The acquisition of Webmetrics, a provider of web and network performance testing, monitoring and measurement services, expanded the Company's Internet and Infrastructure Services. The acquisition was accounted for as a purchase business combination in accordance with the Business Combinations Topic of the FASB ASC and the results of operations of Webmetrics have been included within the Enterprise Services operating segment in the Company's consolidated statements of operations since the date of acquisition. Of the total purchase price, the Company allocated \$0.4 million to net tangible assets acquired, \$6.4 million to definite-lived intangible assets and \$7.2 million to goodwill. Definite-lived intangible assets consist of customer relationships and acquired technology. The Company is amortizing the value of the customer relationships in proportion to the discounted cash flows over an estimated useful life of 3 years. Acquired technology is being amortized on a straight-line basis over 5 years.

In 2009, the Company recorded \$0.4 million in purchase price adjustments to goodwill related to earn-out consideration in accordance with the original purchase agreement.

BrowserMob LLC

On July 7, 2010, the Company acquired BrowserMob LLC (BrowserMob) for cash consideration of \$2.2 million. The acquisition of BrowserMob, a provider of on-demand load testing and website monitoring services, expanded the Company's Internet Infrastructure Services. The acquisition was accounted for as a purchase business combination in accordance with the Business Combinations Topic of the FASB ASC and the results of operations of BrowserMob have been included within the Enterprise Services segment in the Company's consolidated statement of operations since the date of acquisition. Of the total purchase price, the Company recorded \$1.1 million of goodwill and \$1.0 million of definite-lived intangible assets. Definite-lived intangible assets consist of customer relationships and acquired technology. The Company is amortizing customer relationships and acquired technology on a straight-line basis over an estimated useful life of 3 years and 5 years, respectively.

Quova, Inc.

On October 27, 2010, the Company acquired Quova, Inc. (Quova) for cash consideration of \$21.7 million, subject to certain purchase price adjustments. Quova expanded the Company's Internet Infrastructure Services by providing internet geography data services that enable online businesses to detect and prevent fraud, ensure regulatory compliance, manage digital content rights distribution and localize ads and web content. The acquisition was accounted for as a purchase business combination in accordance with the Business Combinations Topic of the FASB ASC and the results of operations of Quova have been included within the Enterprise Services segment in the Company's consolidated statement of operations since the date of acquisition. Of the total purchase price, the

NEUSTAR, INC.**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Company recorded \$5.1 million of goodwill and \$15.0 million of definite-lived intangible assets. Definite-lived intangible assets consist of customer relationships, acquired technology and trade name and trademarks. The Company is amortizing customer relationships on a straight-line basis over an estimated useful life of 7 years. Acquired technology and trade names and trademarks are being amortized on a straight-line basis over the estimated useful life of 3 years, respectively. The allocation of the purchase price is preliminary pending the finalization of analysis of assumed uncertain tax positions.

The application of the purchase method of accounting for business combinations requires management to make significant estimates and assumptions in the determination of the fair value of assets acquired and liabilities assumed in order to properly allocate purchase price consideration. These assumptions and estimates include a market participant's expected use of the asset and the appropriate discount rates from a market participant perspective. The Company's estimates are based on historical experience, information obtained from the management of the acquired companies and includes assistance from an independent third-party appraisal firm. The Company's significant assumptions and estimates include the cash flows that an asset is expected to generate in the future and the weighted-average cost of capital.

4. INVESTMENTS***Cash Reserve Fund***

In December 2007, the Company's investment in a cash reserve fund, classified as an available-for-sale investment, was closed to new investments and subject to scheduled redemptions as determined by the cash reserve fund. Unrealized losses on the Company's investment in the cash reserve fund represented an other-than-temporary impairment and were charged to earnings. During 2008, the Company evaluated and determined that any unrealized losses on the cash reserve fund represented an other-than-temporary impairment and recorded a \$2.7 million charge to earnings. During the years ended December 31, 2008 and 2009, the cash reserve fund redeemed \$35.4 million and \$11.3 million, respectively, of the Company's investment in the fund and the Company recognized losses from redemptions of \$0.9 million and gains from redemptions of \$0.5 million, respectively. The Company's investment in this fund was completely liquidated as of December 31, 2009.

Auction Rate Securities and Rights

As of December 31, 2009, the Company held investments with an original par value of \$37.7 million and an estimated fair value of \$30.7 million that consisted of auction rate securities (ARS) whose underlying assets were student loans, the majority of which were guaranteed by the federal government. In November 2008, the Company accepted a settlement offer from the investment firm that brokered the Company's original purchases of the ARS, under which the Company received rights (ARS Rights) to sell these securities at par value to the investment firm during a two year period beginning June 30, 2010. As of December 31, 2009, the Company's estimated fair values of its ARS and ARS Rights of \$30.7 million and \$6.9 million, respectively, were recorded in short-term investments in the Company's consolidated balance sheets. On June 30, 2010, the Company exercised the ARS Rights. The sale of the ARS settled on July 1, 2010 and the Company received the remaining original par value of the ARS of \$21.3 million.

The Company elected to measure the ARS Rights at their fair value pursuant to the Financial Instruments Topic of the FASB ASC and to classify the associated ARS as trading securities. During the years ended December 31, 2008, 2009 and 2010, the Company recorded a gain of \$9.4 million and losses of \$2.5 million and \$6.9 million, respectively,

related to the change in estimated fair value of the ARS Rights.

Under the terms of the ARS Rights, if the investment firm was successful in selling any ARS prior to June 30, 2010, the investment firm was obligated to pay the Company par value for the ARS sold. During the year ended December 31, 2009, the investment firm sold ARS with an original par value of \$4.0 million; the Company received these amounts in cash from the investment firm and recognized realized gains of \$1.2 million. During 2010, prior to

NEUSTAR, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

the Company's exercise of the ARS Rights on June 30, 2010, the investment firm sold ARS with an original par value of \$16.5 million, and the Company received this amount in cash from the investment firm and recognized realized gains of \$2.1 million.

During the years ended December 31, 2008, 2009 and 2010, the Company recorded losses of \$10.6 million and gains of \$2.4 million and \$4.9 million, respectively, related to the change in estimated fair value of the ARS.

Pre-refunded Municipal Bonds

During the fourth quarter of 2010, the Company invested approximately \$50.8 million in pre-refunded municipal bonds that are secured by an escrow fund of U.S. Treasury notes. These investments are accounted for as available-for-sale securities in the Company's consolidated balance sheet pursuant to the Investments Debt and Equity Securities Topic of the FASB ASC. The Company did not have any sales or record any impairment charges related to these investments during 2010. The following table summarizes the Company's investment in these municipal bonds as of December 31, 2010 (in thousands):

	Amortized Cost	December 31, 2010 Gross		Estimated Fair Value
		Unrealized Gains	Losses	
Due within one year	\$ 13,782	\$ 23	\$ (3)	\$ 13,802
Due after one year through two years	36,968	61	(20)	37,009
Total	\$ 50,750	\$ 84	\$ (23)	\$ 50,811

5. FAIR VALUE MEASUREMENTS

The Company adopted the Fair Value Measurements and Disclosures Topic of FASB ASC on January 1, 2008, with respect to its financial assets and liabilities, and on January 1, 2009, with respect to its nonfinancial assets and nonfinancial liabilities that are recognized and disclosed at fair value on a nonrecurring basis. Fair value is the price that would be received in the sale of asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The Fair Value Measurements and Disclosure Topic of FASB ASC establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value and requires that assets and liabilities carried at fair value be classified and disclosed in one of the following three categories:

Level 1. Observable inputs, such as quoted prices in active markets;

Level 2. Inputs, other than the quoted prices in active markets, that are observable either directly or indirectly; and

Level 3. Unobservable inputs in which there is little or no market data, which require the reporting entity to develop its own assumptions.

The Company evaluates assets and liabilities subject to fair value measurements on a recurring and non-recurring basis to determine the appropriate level at which to classify them for each reporting period. This determination requires the Company to make significant judgments.

NEUSTAR, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The following table sets forth, as of December 31, 2009 and 2010, the Company's financial and non-financial assets and liabilities that are measured at fair value on a recurring basis, by level within the fair value hierarchy (in thousands):

	December 31, 2009			Total
	Level 1	Level 2	Level 3	
Auction rate securities trading securities (short-term investments)	\$	\$	\$ 30,718	\$ 30,718
Auction rate securities rights (short-term investments)	\$	\$	\$ 6,892	\$ 6,892
Marketable securities(1)	\$ 1,665	\$	\$	\$ 1,665
Deferred compensation(2)	\$ 1,682	\$	\$	\$ 1,682

	December 31, 2010			Total
	Level 1	Level 2	Level 3	
Municipal bonds (maturities less than 1 year)	\$ 13,802	\$	\$	\$ 13,802
Municipal bonds (maturities 1 to 2 years)	\$ 37,009	\$	\$	\$ 37,009
Marketable securities(1)	\$ 3,681	\$	\$	\$ 3,681
Deferred compensation(2)	\$ 3,621	\$	\$	\$ 3,621

(1) The NeuStar, Inc. Deferred Compensation Plan (the Plan) provides directors and certain employees with the ability to defer a portion of their compensation. The assets of the Plan are invested in marketable securities held in a Rabbi Trust and reported at market value in other assets.

(2) Obligations to pay benefits under the Plan are included in other long-term liabilities.

The following table provides a reconciliation of the beginning and ending balances for the major classes of assets measured at fair value using significant unobservable inputs (Level 3) (in thousands):

	Auction Rate Securities	ARS Rights
Balance on December 31, 2009	\$ 30,718	\$ 6,892
Transfers in and/or (out) of Level 3		
Total gains (losses) realized / unrealized included in earnings	7,007	(6,892)
Total unrealized gains included in accumulated other comprehensive loss		
Purchases, sales, issuances and settlements, net	(37,725)	
Balance on December 31, 2010	\$	\$

The valuation technique used to measure fair value for the Level 3 ARS was the average of the values obtained using discounted cash flow valuation methods. The discounted cash flow valuation methods involved management's judgment and assumptions regarding discount rates, coupon rates, estimated maturity for each of the ARS and judgment regarding the selection of comparable transactions in a secondary market. The valuation technique used to measure fair value of the ARS Rights was the discounted cash flow valuation method, which involved judgment and assumptions regarding the timing of cash flows, fair value of the underlying ARS and the ability of the investment firm to settle its obligation in accordance with the ARS Rights.

The estimate of fair value of the Converged Messaging asset group (see Impairment of Long-Lived Assets in Note 2) and the Company's reporting units (see Note 6) are a Level 3 fair value measurement.

NEUSTAR, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

6. GOODWILL AND INTANGIBLE ASSETS

Goodwill

In the first quarter of 2010, the Company realigned its operations into two operating segments: Carrier Services and Enterprise Services. This realignment changed the composition of the Company's reporting units and resulted in the reassignment of goodwill to the reporting units affected. The goodwill attributable to the Company's former NGM reporting unit was assigned to the Company's Carrier Services reporting unit. The Company's goodwill attributable to the former Clearinghouse reporting unit was allocated among each of the Company's three reporting units, Carrier Services, Internet Infrastructure Services and Registry Services, using a relative fair value approach.

The Company's historical goodwill disclosures have been recast for comparative purposes to reflect its current operating segments. The carrying amount of goodwill by operating segment as of December 31, 2009 and 2010 is as follows (in thousands):

	December 31, 2008	Purchase Price Adjustments	December 31, 2009	Acquisitions	December 31, 2010
Carrier Services					
Gross goodwill	\$ 202,055	\$	\$ 202,055	\$	\$ 202,055
Accumulated impairment losses	(93,602)		(93,602)		(93,602)
Net goodwill	108,453		108,453		108,453
Enterprise Services					
Gross goodwill	9,614	350	9,964	6,234	16,198
Accumulated impairment losses					
Net goodwill	9,614	350	9,964	6,234	16,198
Total					
Gross goodwill	211,669	350	212,019	6,234	218,253
Accumulated impairment losses	(93,602)		(93,602)		(93,602)
Net goodwill	\$ 118,067	\$ 350	\$ 118,417	\$ 6,234	\$ 124,651

In January 2008, the Company recorded \$6.4 million of goodwill related to its acquisition of Webmetrics, which is included in the Company's Enterprise Services operating segment. During 2008 and 2009, in connection with the Company's 2008 Webmetrics acquisition, the Company recorded \$1.2 million and \$0.4 million, respectively, in

purchase price adjustments related to earn-out consideration in accordance with the original purchase agreement.

In 2008, changes to the Company's key assumptions in determining the fair value of the former NGM reporting unit resulted in two goodwill impairment charges totaling \$93.6 million. Late in the first quarter of 2008, changes in market conditions for the NGM business and NGM customer-related events that caused NGM to revise its business forecast, triggered the requirement to perform an interim goodwill impairment test. First, the Company compared the estimated fair value of the former NGM reporting unit's net assets, including assigned goodwill, to the book value of these net assets. The estimated fair value for the former reporting unit was calculated using a combination of discounted cash flow projections, market values for comparable businesses, and terms, prices and conditions found in sales of comparable businesses. The Company determined that the fair value of the former reporting unit was less than its net book value. The Company then performed a theoretical purchase price allocation to compare

NEUSTAR, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

the carrying value of NGM's assigned goodwill to its implied fair value and recorded an impairment charge of \$29.0 million in the first quarter of 2008.

In the fourth quarter of 2008, in response to lower than anticipated adoption rates of NGM's services by its customers and the resulting underperformance of the NGM business, as well as the manner in which the mobile data market had evolved and was evolving, the Company added new leadership and conducted a strategic evaluation of the NGM business. The goal of this strategic evaluation was to position NGM for future long-term success in the mobile instant messaging market. As a result of the Company's strategic re-assessment and the underperformance in the NGM business, Company management made fundamental changes to certain key assumptions and estimates regarding the NGM business. These changes resulted in a new business forecast for the NGM business which was used in connection with the annual goodwill impairment test. First, the Company compared the fair value of the former NGM's reporting unit's net assets, including assigned goodwill, to the book value of these net assets. The estimated fair value for the former reporting unit was calculated using a combination of discounted cash flow projections, market values for comparable businesses, and terms, prices and conditions found in sales of comparable businesses. The Company determined that the estimated fair value of the former reporting unit was less than its net book value as of the annual impairment test date. As such, the Company then performed a theoretical purchase price allocation to compare the carrying value of NGM's assigned goodwill to its implied fair value and recorded an impairment charge of \$64.6 million in the fourth quarter of 2008. These 2008 goodwill impairment charges were recorded in Impairment of Goodwill in the consolidated statements of operations.

The Company's 2009 and 2010 annual goodwill impairment analysis, which was performed for each of its reporting units as of October 1 in each respective year, did not result in an impairment charge.

The key assumptions used in the Company's 2010 annual goodwill impairment test to determine the fair value of its reporting units included: (a) cash flow projections, which include growth and allocation assumptions for forecasted revenue and expenses; (b) a residual growth rate of 3.0% to 5.0%; (c) a discount rate of 13.0% to 18.5%, which was based upon each respective reporting unit's weighted-average cost of capital adjusted for the risks associated with the operations at the time of the assessment; (d) selection of comparable companies used in the market approach; and (e) assumptions in weighting the results of the income approach and the market approach valuation techniques.

As of the date of the Company's 2010 annual impairment test, the estimated fair values for each of the Company's reporting units substantially exceeded each of its reporting units' carrying value. The Company believes that the assumptions and estimates used to determine the estimated fair values of each of its reporting units are reasonable; however, these estimates are inherently subjective, and there are a number of factors, including factors outside of the Company's control that could cause actual results to differ from the Company's estimates. Changes in estimates and assumptions could have a significant impact on whether or not an impairment charge is recognized and also the magnitude of any such charge.

Any changes to the Company's key assumptions about its businesses and its prospects, or changes in market conditions, could cause the fair value of one of its reporting units to fall below its carrying value, resulting in a potential impairment charge. In addition, changes in the Company's organizational structure or how the Company's management allocates resources and assesses performance, could result in a change of its operating segments or reporting units, requiring a reallocation and impairment analysis of goodwill. A goodwill impairment charge could have a material effect on the Company's consolidated financial statements because of the significance of goodwill to its consolidated balance sheet. As of December 31, 2010, the Company had \$108.5 million and \$16.2 million,

respectively, in goodwill for its Carrier Services and Enterprise Services operating segments.

Intangible Assets

During the fourth quarter of 2008, the Company determined that its strategic decision to reposition the former NGM business and the resulting change in its projected results was an indicator of impairment for long-lived assets

NEUSTAR, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

in the former NGM business reporting unit. The Company performed an impairment analysis of the former NGM reporting unit's long-lived assets and concluded that the carrying amount of the NGM asset group exceeded the estimated future undiscounted cash flows of the former NGM asset group. The Company performed a recoverability test, determined that the fair value of these long-lived assets was less than the carrying value, and recorded a total impairment charge of \$18.2 million in the fourth quarter of 2008, consisting of a charge of \$12.9 million to write down the carrying value of the former NGM reporting unit's intangible assets and a charge of \$5.3 million to write down the carrying value of the former NGM reporting unit's property and equipment (see Note 7). The NGM intangible assets impairment charge of \$12.9 million includes a \$10.9 million impairment charge related to customer lists and relationships and a \$2.0 million impairment charge related to acquired technology. The valuation techniques utilized by the Company in its fair value estimates primarily included the discounted cash flow method and the relief from royalty method.

In August 2009, the Company announced the extension of the NGM restructuring plan initiated in the fourth quarter of 2008 to include further headcount reductions and the closure of certain facilities. Due to the Company's extension of the NGM restructuring plan and the resulting change in NGM's projected results, the Company performed a recoverability test of its long-lived assets, including intangible assets, in the former NGM asset group and determined that the carrying value of the assets was recoverable from the undiscounted cash flows.

In the first quarter of 2010, the Company realigned its organizational structure, and its NGM business was included with other IP-related services in the Company's Carrier Services operating segment. In the fourth quarter of 2010, the Company decided to exit a portion of its IP Services business, specifically its Converged Messaging business. The Company believes that its decision to exit this business was an indicator of impairment for long-lived assets in its Converged Messaging asset group. As a result, in the fourth quarter of 2010, the Company performed a recoverability test and determined that the future undiscounted cash flows of the Converged Messaging asset group was less than the carrying value. The Company recorded an \$8.5 million charge for impairment of long-lived assets, consisting of a charge of \$7.9 million to write down the carrying value of the Converged Messaging property and equipment (see Note 7) and a charge of \$0.6 million to write down the carrying value of the Converged Messaging intangible assets related to customer lists and relationships. The valuation technique utilized by the Company in its fair value estimates included the discounted cash flow method.

Intangible assets consist of the following (in thousands):

	December 31,		Weighted- Average Amortization Period (in years)
	2009	2010	
Intangible assets:			
Customer lists and relationships	\$ 36,659	\$ 49,881	6.0

Trade name, net		406	
Intangible assets, net	\$ 8,789	\$ 18,974	

NEUSTAR, INC.**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

In July 2010, the Company recorded \$1.0 million of definite-lived intangible assets in connection with its acquisition of BrowserMob. The \$1.0 million of definite-lived intangible assets consisted of \$0.8 million related to acquired technology and \$0.2 million related to customer relationships.

In October 2010, the Company recorded \$15.0 million of definite-lived intangible assets in connection with its acquisition of Quova. The \$15.0 million of definite-lived intangible assets consisted of \$13.6 million related to customer relationships, \$1.0 million related to acquired technology and \$0.4 million related to trade names.

Amortization expense related to intangible assets for the years ended December 31, 2008, 2009 and 2010 of approximately \$13.9 million, \$7.8 million and \$5.3 million, respectively, is included in depreciation and amortization expense. Amortization expense related to intangible assets for the years ended December 31, 2011, 2012, 2013, 2014, 2015 and thereafter is expected to be approximately \$4.4 million, \$4.1 million, \$2.7 million, \$2.1 million, \$2.0 million and \$3.6 million, respectively. Intangible assets as of December 31, 2010 will be fully amortized during the year ended December 31, 2017.

7. PROPERTY AND EQUIPMENT

Property and equipment consists of the following (in thousands):

	December 31,	
	2009	2010
Computer hardware	\$ 82,121	\$ 86,990
Equipment	1,700	1,800
Furniture and fixtures	3,821	4,485
Leasehold improvements	20,757	22,233
Construction in-progress	10,649	17,731
Capitalized software	64,426	81,076
	183,474	214,315
Accumulated depreciation and amortization	(109,593)	(140,019)
Property and equipment, net	\$ 73,881	\$ 74,296

The Company entered into capital lease obligations of \$10.8 million and \$1.6 million for the years ended December 31, 2009 and 2010, respectively, primarily for computer hardware.

Depreciation and amortization expense related to property and equipment for the years ended December 31, 2008, 2009 and 2010 was \$26.7 million, \$30.2 million and \$34.9 million, respectively.

In the fourth quarter of 2008, the Company recorded a \$5.3 million impairment charge to write down the carrying value of property and equipment of its former NGM reporting unit (see Note 6).

In the fourth quarter of 2010, the Company recorded a \$7.9 million impairment charge to write down the carrying value of property and equipment of the Converged Messaging asset group (see Note 6). The Converged Messaging property and equipment impairment charge of \$7.9 million includes a \$5.3 million impairment charge related to internally developed technology and a \$1.3 million impairment charge related to capitalized software. The valuation techniques utilized by the Company in its fair value estimates included the replacement cost method.

NEUSTAR, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

8. ACCRUED EXPENSES

Accrued expenses consist of the following (in thousands):

	December 31,	
	2009	2010
Accrued compensation	\$ 39,419	\$ 35,675
RRC reserve	2,594	2,581
Other	18,167	19,552
Total	\$ 60,180	\$ 57,808

As of December 31, 2010, the Company recorded accrued expense of \$2.2 million in severance and severance-related expense for its former Chairman and Chief Executive Officer. These costs are included in general and administrative expenses. The severance and severance-related benefits include \$1.5 million that is payable through June 2012, a cash bonus of \$0.6 million payable at the same time bonuses are paid to the Company's executives in 2011, and reimbursement of COBRA continued coverage under the Company's medical plan through June 2012 and up to \$60,000 in legal fees.

9. NOTES PAYABLE

As of December 31, 2010, the Company did not have any notes payable. As of December 31, 2009, notes payable consisted of the following (in thousands):

	December 31, 2009	
Promissory note payable to vendor; principal and interest payable quarterly at 5.58% per annum with a maturity date of April 1, 2010; secured by the equipment financed	\$	187
Promissory note payable to vendor; non-interest bearing, principal payable quarterly with a maturity date of April 1, 2010; secured by the equipment financed		800
		987
Less: current portion		(987)
Notes payable, long-term	\$	

Revolving Credit Facility

On February 6, 2007, the Company entered into a credit agreement which provides for a revolving credit facility in an aggregate principal amount of up to \$100 million (the Credit Facility). Borrowings under the Credit Facility bear

interest, at the Company's option, at either a Eurodollar rate plus a spread ranging from 0.625% to 1.25%, or at a base rate plus a spread ranging from 0.0% to 0.25%, with the amount of the spread in each case depending on the ratio of the Company's consolidated senior funded indebtedness to consolidated earnings before interest, taxes, depreciation and amortization (EBITDA). The Credit Facility expires on February 6, 2012. Borrowings under the Credit Facility may be used for working capital, capital expenditures, general corporate purposes and to finance acquisitions. There were no borrowings outstanding under the Credit Facility as of December 31, 2009 and 2010, but available borrowings were reduced by outstanding letters of credit of \$9.0 million and \$8.8 million, respectively.

The Credit Facility contains customary representations and warranties, affirmative and negative covenants, and events of default. The Credit Facility requires the Company to maintain a minimum ratio of consolidated EBITDA to consolidated interest charges and a maximum ratio of consolidated senior funded indebtedness to

NEUSTAR, INC.**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

consolidated EBITDA. If an event of default occurs and is continuing, the Company may be required to repay all amounts outstanding under the Credit Facility. Lenders holding more than 50% of the loans and commitments under the Credit Facility may elect to accelerate the maturity of amounts due under the Credit Facility upon the occurrence and during the continuation of an event of default. As of and for the years ended December 31, 2009 and 2010, the Company was in compliance with these covenants.

10. COMMITMENTS AND CONTINGENCIES**Capital Leases**

The following is a schedule of future minimum lease payments due under capital lease obligations as of December 31, 2010 (in thousands):

2011	\$ 6,892
2012	3,370
2013	998
2014	
2015	
Thereafter	
Total minimum lease payments	11,260
Less: amounts representing interest	(859)
Present value of minimum lease payments	10,401
Less: current portion	(6,325)
Capital lease obligation, long-term	\$ 4,076

The following assets were capitalized under capital leases at the end of each period presented (in thousands):

	December 31,	
	2009	2010
Equipment and hardware	\$ 41,540	\$ 38,137
Furniture and fixtures	334	334
Subtotal	41,874	38,471
Less: accumulated amortization	(24,305)	(30,370)
Net assets under capital leases	\$ 17,569	\$ 8,101

NEUSTAR, INC.**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Operating Leases**

The Company leases office space under noncancelable operating lease agreements. The leases terminate at various dates through 2021 and generally provide for scheduled rent increases. Future minimum lease payments under noncancelable operating leases as of December 31, 2010, are as follows (in thousands):

2011	\$ 8,756
2012	8,176
2013	6,899
2014	5,789
2015	5,901
Thereafter	28,732
	\$ 64,253

Rent expense was \$7.5 million, \$7.4 million and \$7.8 million for the years ended December 31, 2008, 2009 and 2010, respectively.

Contingencies

Currently, and from time to time, the Company is involved in litigation incidental to the conduct of its business. The Company is not a party to any lawsuit or proceeding that, in the opinion of management, is reasonably likely to have a material adverse effect on its financial position, results of operations or cash flows.

11. RESTRUCTURING CHARGES

As of December 31, 2009 and 2010, the total accrued liabilities associated with the Company's restructuring and other related charges were \$3.6 million and \$5.0 million, respectively. The accrued restructuring liability is attributable to a 2001 restructuring plan related to reductions in certain leased facilities, reductions in headcount and closure of certain facilities used in the Company's former NGM business in 2008, 2009 and 2010, the relocation of certain operations and support functions to Louisville, Kentucky in 2009, and a 2010 management transition restructuring to reduce domestic employee headcount.

As of December 31, 2009 and 2010, the total accrued liability associated with the 2001 restructuring plan related to the reduction in leased facilities was \$1.3 million and \$0.8 million, respectively. The Company paid approximately \$0.5 million and \$0.5 million, net of sublease payments, in each of the years ended December 31, 2009 and 2010, respectively. Amounts related to lease terminations due to the closure of excess facilities will be paid over the respective lease terms, the longest of which extends through 2011.

During the fourth quarter of 2008, management implemented a restructuring plan for the Company's former NGM operating segment to more appropriately allocate resources to the Company's key mobile instant messaging initiatives. In the first quarter of 2010, the services, technology and customer base of the NGM business was renamed Converged Messaging Services. The restructuring plan involved a reduction in headcount and closure of specific leased facilities

in some of the Company's international locations. In the third quarter of 2009 and fourth quarter of 2010, the Company extended the restructuring plan to include further headcount reductions and closure of certain facilities. Total net restructuring charges recorded under this plan since inception included \$7.8 million of severance and related costs and \$0.8 million of lease and facility exit costs. The Company anticipates it will incur additional severance and related costs of \$1.3 million to \$1.5 million through the second quarter of 2011.

During the fourth quarter of 2008, the Company recorded severance and related costs of \$1.2 million, and lease and facilities exit costs of \$0.5 million related to the Company's former NGM business. The Company did not make

NEUSTAR, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

any cash payments or adjustments to the former NGM restructuring estimates during 2008. The activity and balance of the restructuring liability for the years ended December 31, 2009 and 2010 are as follows (in thousands):

	Severance and Related Costs	Lease and Facilities Exit Costs	Total
Balance at December 31, 2008	\$ 1,187	\$ 460	\$ 1,647
Additional restructuring cost	4,912	249	5,161
Adjustments	(113)		(113)
Cash payments	(4,357)	(246)	(4,603)
Balance at December 31, 2009	1,629	463	2,092
Additional restructuring cost	2,257	296	2,553
Adjustments	(423)	(160)	(583)
Cash payments	(2,807)	(427)	(3,234)
Balance at December 31, 2010	\$ 656	\$ 172	\$ 828

Amounts related to the lease and facilities exit costs will be paid over the respective lease terms, the longest of which extends through 2013.

In October 2009, the Company adopted a plan to relocate certain operations and support functions to Louisville, Kentucky. As of December 31, 2010, total restructuring charges recorded under this plan since inception were \$2.6 million, of which \$1.6 million was recorded in the year ended December 31, 2010. In the year ended December 31, 2010, the Company recorded \$0.4 million in recoveries related to employee severance and related costs. The Company paid approximately \$1.7 million of severance and severance-related costs in the year ended December 31, 2010. The accrued restructuring liability relating to this plan was \$0.2 million at December 31, 2009. As of December 31, 2010, the restructuring plan was complete and the accrued liability relating to this plan was zero.

In the fourth quarter of 2010, the Company recorded severance and severance-related charges of \$3.8 million related to a domestic work-force reduction impacting both of its operating segments. The Company does not anticipate it will incur additional expenses under this plan. As of December 31, 2010, the accrued restructuring liability relating to the 2010 management transition restructuring plan was \$3.4 million. The Company paid approximately \$0.4 million of severance and severance-related costs in the year ended December 31, 2010 and expects to pay approximately \$2.3 million in the first quarter of 2011, and \$1.1 million to be paid through the third quarter of 2012. The Company did not record any adjustments to the 2010 management transition - restructuring plan estimates.

NEUSTAR, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

12. OTHER (EXPENSE) INCOME

Other (expense) income consists of the following (in thousands):

	Year Ended December 31,		
	2008	2009	2010
Interest and other expense:			
Interest expense	\$ 1,944	\$ 2,320	\$ 654
(Gain) loss on asset disposals	(74)	203	587
Loss on ARS Rights		3,410	6,892
Foreign currency transaction loss (gain)	109	(272)	45
Impairments and realized losses cash reserve fund	3,623		
ARS impairments and trading losses	10,635	410	
Total	\$ 16,237	\$ 6,071	\$ 8,178
Interest and other income:			
Interest income	\$ 3,696	\$ 965	\$ 585
Realized gains on cash reserve fund		450	
ARS trading gains		4,038	7,007
Gain on ARS Rights	9,416	886	
Gain on indemnification claims		1,180	
Total	\$ 13,112	\$ 7,519	\$ 7,592

During 2009, the Company received a \$1.2 million payment for indemnification claims related to the acquisition of Followap, Inc. in 2006. During 2010, the Company recorded a reduction of \$1.2 million in interest expense related to a decrease in an accrued sales tax liability.

13. INCOME TAXES

The provision for income taxes consists of the following components (in thousands):

	Year Ended December 31,		
	2008	2009	2010
Current:			
Federal	\$ 53,555	\$ 55,141	\$ 62,185
State	10,319	12,249	13,476
Total current	63,874	67,390	75,661

Edgar Filing: NEUSTAR INC - Form 10-K

Deferred:

State	(832)	(634)	(2,276)
Total deferred	(2,187)	475	(6,935)
Total provision for income taxes	\$ 61,687	\$ 67,865	\$ 68,726

NEUSTAR, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

A reconciliation of the statutory United States income tax rate to the effective income tax rate follows:

	Year Ended December 31,		
	2008	2009	2010
Tax at statutory rate	35.0%	35.0%	35.0%
State taxes	9.3	4.4	4.4
Impairment of goodwill	49.7		
Other	(2.2)	0.9	
Change in valuation allowance	1.7	(0.1)	(0.1)
Effective tax rate	93.5%	40.2%	39.3%

The Company's annual effective tax rate decreased to 39.3% for the year ended December 31, 2010 from 40.2% for the year ended December 31, 2009 due primarily to an income tax benefit associated with a worthless stock deduction claimed in the 2009 consolidated U.S. Federal income tax return and an increase in the U.S. benefit of foreign branch losses, net of an increase in foreign withholding income taxes. The Company's annual effective tax rate decreased to 40.2% for the year ended December 31, 2009 from 93.5% for the year ended December 31, 2008 due primarily to the impact of the \$93.6 million non-cash impairment charge during 2008 related to the impairment of goodwill, which is not deductible for tax purposes.

The Company realized certain tax benefits related to nonqualified and incentive stock option exercises in the amounts of \$8.2 million, \$0.6 million and \$1.6 million for the years ended December 31, 2008, 2009 and 2010, respectively.

NEUSTAR, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Deferred income taxes reflect the net tax effects of temporary differences between the carrying amount of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. Significant components of the Company's net deferred income taxes are as follows (in thousands):

Unrealized gains on investments	(2,708)	
Other	(151)	(15)
Total deferred tax liabilities	(21,384)	(23,976)
Net deferred tax assets	\$ 12,097	\$ 16,283

As of December 31, 2010, the Company had U.S. net operating loss carryforwards for federal tax purposes of approximately \$23.2 million which expire, if unused, in various years from 2021 to 2030. As of December 31, 2010, the Company had foreign net operating loss carryforwards of approximately \$4.8 million, of which \$2.9 million can be carried forward indefinitely under current local tax laws and \$1.9 million which expire, if unused, in years beginning 2014.

As of December 31, 2010, the amount of earnings from foreign subsidiaries that the Company considers indefinitely reinvested and for which deferred taxes have not been provided was approximately \$2.0 million. United States income taxes have not been provided on earnings that are planned to be reinvested indefinitely outside the United States as a determination of the amount of such taxes is not practicable.

As of December 31, 2009 and 2010, the Company had unrecognized tax benefits of \$1.1 million and \$1.2 million, respectively, of which \$1.1 million and \$1.2 million, respectively, would affect the Company's

NEUSTAR, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

effective tax rate if recognized. The net increase in the liability for unrecognized income tax benefits is as follows (in thousands):

Balance at January 1, 2008	\$ 1,970
Increase related to current year tax positions	75
Increase related to prior year tax positions	329
Reductions for prior year tax positions	(1,320)
Balance at December 31, 2008	1,054
Increase related to current year tax positions	48
Increase related to prior year tax positions	353
Reductions due to lapse in statutes of limitations	(158)
Settlements	(225)
Balance at December 31, 2009	1,072
Increase related to current year tax positions	95
Increase related to prior year tax positions	
Reductions due to lapse in statutes of limitations	(8)
Settlements	
Balance at December 31, 2010	\$ 1,159

The Company recognizes interest and penalties related to uncertain tax positions in income tax expense. During the years ended December 31, 2008, 2009 and 2010, the Company recognized potential interest and penalties of \$78,000, \$66,000 and \$26,000, respectively. As of December 31, 2009 and 2010, the Company had established reserves of approximately \$60,000 and \$84,000, respectively, for accrued potential interest and penalties related to uncertain tax positions. To the extent interest and penalties are not assessed with respect to uncertain tax positions, amounts accrued will be reduced and reflected as a reduction of the overall income tax provision. During the year ended December 31, 2010, accrued interest and penalties decreased by \$2,000 due to the expiration of certain statutes of limitations.

The Company files income tax returns in the United States Federal jurisdiction and in many state and foreign jurisdictions. The tax years 2006 through 2010 remain open to examination by the major taxing jurisdictions to which the Company is subject. The Internal Revenue Service (IRS) has initiated an examination of the Company's federal income tax returns for years 2007 and 2008. While the ultimate outcome of the audit is uncertain, management does not currently believe that the outcome will have a material adverse effect on the Company's financial position, results of operations or cash flows. The IRS completed an examination of the Company's federal income tax returns for the years 2005 and 2006. The audit resulted in no material adjustments.

The Company anticipates that total unrecognized tax benefits will decrease by approximately \$18,000 over the next 12 months due to the expiration of certain statutes of limitations.

14. STOCKHOLDERS EQUITY

Preferred Stock

The Company is authorized to issue up to 100,000,000 shares of preferred stock, \$0.001 par value per share, in one or more series, to establish from time to time the number of shares to be included in each series, and to fix the rights, preferences, privileges, qualifications, limitations and restrictions of the shares of each wholly unissued series. As of December 31, 2009 and 2010, there are no preferred stock shares issued or outstanding.

NEUSTAR, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Common Stock

The Company is authorized to issue up to 200,000,000 shares of Class A common stock, \$0.001 par value per share and 100,000,000 shares of Class B common stock, \$0.001 par value per share. Each holder of Class A and Class B common stock is entitled to one vote for each share of common stock held on all matters submitted to a vote of stockholders. Subject to preferences that may apply to shares of preferred stock outstanding at the time, the holders of Class A and Class B common stock are entitled to receive dividends out of assets legally available at the time and in the amounts as the Company's Board of Directors may from time to time determine.

Stock-Based Compensation

The Company has three stock incentive plans: the NeuStar, Inc. 1999 Equity Incentive Plan (1999 Plan); the NeuStar, Inc. 2005 Stock Incentive Plan (2005 Plan); and the NeuStar, Inc. 2009 Stock Incentive Plan (2009 Plan) (collectively, the Plans). The Company may grant to its directors, employees and consultants awards under the 2009 Plan in the form of incentive stock options, nonqualified stock options, stock appreciation rights, shares of restricted stock, restricted stock units, performance vested restricted stock units (PVRSUs) and other stock-based awards. The aggregate number of shares of Class A common stock with respect to which all awards may be granted under the 2009 Plan is 10,950,000, plus the number of shares underlying awards granted under the 1999 Plan and the 2005 Plan that remain undelivered following any expiration, cancellation or forfeiture of such awards. As of December 31, 2010, 8,756,604 shares were available for grant or award under the 2009 Plan.

The term of any stock option granted under the Plans may not exceed ten years. The exercise price per share for options granted under the Plans may not be less than 100% of the fair market value of the common stock on the option grant date. The Board of Directors or Compensation Committee of the Board of Directors determines the vesting schedule of the options, with a maximum vesting period of ten years. Options issued generally vest with respect to 25% of the shares underlying the option on the first anniversary of the grant date and 2.083% of the shares on the last day of each succeeding calendar month thereafter. The options expire seven to ten years from the date of issuance and are forfeitable upon termination of an option holder's service.

The Company has granted and may in the future grant restricted stock to directors, employees and consultants. The Board of Directors or Compensation Committee of the Board of Directors determines the vesting schedule of the restricted stock, with a maximum vesting period of ten years. Restricted stock issued generally vests in equal annual installments over a four-year term.

Stock-based compensation expense recognized for the years ended December 31, 2008, 2009 and 2010 was \$13.4 million, \$14.3 million and \$18.3 million, respectively. As of December 31, 2010, total unrecognized compensation expense related to non-vested stock options, non-vested restricted stock awards, non-vested restricted stock units and non-vested PVRSUs granted prior to that date was estimated at \$32.9 million, which the Company expects to recognize over a weighted average period of approximately 1.45 years. Total unrecognized compensation expense as of December 31, 2010 was estimated based on outstanding non-vested stock options, non-vested restricted stock awards, non-vested restricted stock units and non-vested PVRSUs, and may be increased or decreased in future periods for subsequent grants or forfeitures.

Stock Options

The Company utilizes the Black-Scholes option pricing model for estimating the fair value of stock options granted. The weighted-average grant date fair value of options granted during the years ended December 31, 2008, 2009 and 2010 was \$8.24, \$6.47 and \$8.12, respectively. The following are the weighted-average assumptions used

NEUSTAR, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

in valuing the stock options granted during the years ended December 31, 2008, 2009 and 2010, and a discussion of the Company's assumptions.

	Year Ended December 31,		
	2008	2009	2010
Dividend yield			
Expected volatility	36.46%	43.37%	39.13%
Risk-free interest rate	2.57%	1.60%	2.07%
Expected life of options (in years)	4.37	4.42	4.42

Dividend yield The Company has never declared or paid dividends on its common stock and does not anticipate paying dividends in the foreseeable future.

Expected volatility Volatility is a measure of the amount by which a financial variable such as a share price has fluctuated (historical volatility) or is expected to fluctuate (expected volatility) during a period. The Company considered the implied volatility and historical volatility of its stock price over a term similar to the expected life of the grant in determining its expected volatility.

Risk-free interest rate The risk-free interest rate is based on U.S. Treasury bonds issued with similar life terms to the expected life of the grant.

Expected life of the options The expected life is the period of time that options granted are expected to remain outstanding. The Company determined the expected life of stock options based on the weighted average of (a) the time-to-settlement from grant of historically settled options and (b) a hypothetical holding period for the outstanding vested options as of the date of fair value estimation. The hypothetical holding period is the amount of time the Company assumes a vested option will be held before the option is exercised. To determine the hypothetical holding period, the Company assumes that a vested option will be exercised at the midpoint of the time between the date of fair value estimation and the remaining contractual life of the unexercised vested option.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Restricted Stock

The following table summarizes the Company's non-vested restricted stock activity:

	Shares	Weighted-Average Grant Date Fair Value	Aggregate Intrinsic Value (in millions)
Outstanding at December 31, 2007	75,660	\$ 31.55	
Restricted stock granted	286,920	24.57	
Restricted stock vested	(45,827)	28.16	
Restricted stock forfeited	(56,455)	27.07	
Outstanding at December 31, 2008	260,298	25.50	
Restricted stock granted	192,000	20.69	
Restricted stock vested	(61,375)	25.90	
Restricted stock forfeited	(37,766)	27.11	
Outstanding at December 31, 2009	353,157	22.64	
Restricted stock granted	330,890	23.18	
Restricted stock vested	(85,619)	24.76	
Restricted stock forfeited	(63,838)	22.60	
Outstanding at December 31, 2010	534,590	\$ 22.82	\$ 13.9

The total aggregate intrinsic value of restricted stock vested during the years ended December 31, 2008, 2009 and 2010 was approximately \$1.0 million, \$1.3 million and \$2.0 million, respectively. During the years ended December 31, 2008, 2009 and 2010, the Company repurchased 13,375, 18,208, and 26,720 shares of common stock, respectively, for an aggregate purchase price of \$0.3 million, \$0.4 million, and \$0.6 million, respectively, pursuant to the participants' rights under the Company's stock incentive plans to elect to use common stock to satisfy their tax withholding obligations.

Performance Vested Restricted Stock Units

During the years ended 2008, 2009 and 2010, the Company granted 291,083, 532,943, and 266,580 PVRsUs, respectively, to certain employees with an aggregate fair value of \$7.6 million, \$8.3 million, and \$6.1 million, respectively. The vesting of these stock awards is contingent upon the Company achieving specified financial targets at the end of the specified performance period and an employee's continued employment through the vesting period. The level of achievement of the performance conditions affects the number of shares that will ultimately be issued. The range of possible stock-based award vesting is between 0% and 150% of the initial target. Compensation expense related to these awards is recognized over the requisite service period based on the Company's estimate of the achievement of the performance target and vesting period. As of December 31, 2010, the Company estimates that 0%

of the performance target for its PVRsUs granted during 2008 will be achieved, 133% of the performance target for PVRsUs granted during 2009 will be achieved and 100% of the performance target for PVRsUs granted during 2010 will be achieved. In the first quarter of 2010, the Company revised its estimate of achievement of the performance target related to the PVRsUs granted during 2008 from 50% of target to 0% of target. In addition, in the first quarter of 2010 the Company revised its estimate of achievement of the performance target related to the PVRsUs granted during 2009 from 100% of target to 135% of target, and further revised its estimate of achievement in the fourth quarter of 2010 to 133% of target.

The Company's consolidated net income for the year ended December 31, 2010 was \$106.2 million and diluted earnings per share was \$1.40 per share. If the Company had continued to use the previous estimate of achievement of 50% of the performance target for PVRsUs granted during 2008, the as adjusted net income for the year ended

NEUSTAR, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

December 31, 2010 would have been approximately \$104.8 million and the as adjusted diluted earnings per share would have had been approximately \$1.38 per share. If the Company had continued to use the previous estimate of achievement of 100% of the performance target for its PVRsUs granted during 2009, the as adjusted net income for the year ended December 31, 2010 would have been approximately \$107.0 million and the as adjusted diluted earnings per share would have been approximately and \$1.41 per share. If the Company had continued to use the previous estimates of achievement for PVRsUs granted during 2008 and 2009, the as adjusted net income for the year ended December 31, 2010 would have been approximately \$105.7 million and the as adjusted diluted earnings per share would have been approximately and \$1.39 per share.

The fair value of a PVRsU is measured by reference to the closing market price of the Company's common stock on the date of the grant. Compensation expense is recognized on a straight-line basis over the requisite service period based on the number of PVRsUs expected to vest.

The following table summarizes the Company's non-vested PVRsU activity:

	Shares	Weighted-Average Grant Date Fair Value	Aggregate Intrinsic Value (in millions)
Non-vested December 31, 2007	303,080	\$ 32.59	
Granted	291,083	26.21	
Vested			
Forfeited	(181,020)	30.60	
Non-vested December 31, 2008	413,143	28.98	
Granted	532,943	15.57	
Vested			
Forfeited	(106,300)	23.38	
Non-vested December 31, 2009	839,786	21.17	
Granted	266,580	22.84	
Vested	(6,000)	29.32	
Forfeited	(259,443)	28.01	
Non-vested December 31, 2010	840,923	\$ 19.53	\$ 21.9

The total aggregate intrinsic value of PVRsUs vested during the year ended December 31, 2010 was approximately \$0.2 million. During the year ended December 31, 2010, the Company repurchased 2,129 shares of common stock for an aggregate purchase price of \$0.1 million pursuant to the participants' rights under the Plans to elect to use common stock to satisfy their tax withholding obligations. No PVRsUs vested in the years ended December 31, 2008 and 2009.

NEUSTAR, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Restricted Stock Units

The following table summarizes the Company's restricted stock units activity:

	Shares	Weighted-Average Grant Date Fair Value	Aggregate Intrinsic Value (in millions)
Outstanding at December 31, 2007	54,822	\$ 30.53	
Granted	55,777	21.96	
Vested			
Forfeited			
Outstanding at December 31, 2008	110,599	26.21	
Granted	52,512	22.85	
Vested			
Forfeited			
Outstanding at December 31, 2009	163,111	25.13	
Granted	68,754	21.31	
Vested			
Forfeited			
Outstanding at December 31, 2010	231,865	\$ 23.99	\$ 6.0

These restricted stock units were issued to non-management directors of the Company's Board of Directors and will fully vest on the earlier of the first anniversary of the date of grant or the day preceding the date in the following calendar year on which the Company's annual meeting of stockholders is held. Upon vesting, each director's restricted stock units will be automatically converted into deferred stock units, which will be delivered to the director in shares of the Company's stock six months following the director's termination of Board service.

Share Repurchase Program

The Company announced on July 28, 2010 that its Board of Directors had authorized a three-year program under which the Company may acquire up to \$300 million of its outstanding Class A common shares. Share repurchases under this program may be made through Rule 10b5-1 programs, open market purchases, privately negotiated transactions or otherwise as market conditions warrant, at prices the Company deems appropriate, and subject to applicable legal requirements and other factors. As of December 31, 2010, a total of 1,668,399 shares at an average price of \$24.21 had been repurchased under this program for an aggregate purchase price of approximately \$40.4 million. All repurchased shares are accounted for as treasury shares.

NEUSTAR, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

15. BASIC AND DILUTED NET INCOME PER COMMON SHARE

The following table provides a reconciliation of the numerators and denominators used in computing basic and diluted net income per common share (in thousands, except per share data):

	Year Ended December 31,		
	2008	2009	2010
Computation of basic net income per common share:			
Net income	\$ 4,294	\$ 101,141	\$ 106,209
Weighted average common shares and participating securities outstanding basic	74,350	74,301	74,555
Basic net income per common share	\$ 0.06	\$ 1.36	\$ 1.42
Computation of diluted net income per common share:			
Net income	\$ 4,294	\$ 101,141	\$ 106,209
Weighted average common shares and participating securities outstanding basic	74,350	74,301	74,555
Effect of dilutive securities:			
Stock-based awards	1,757	1,164	1,510
Weighted average common shares outstanding diluted	76,107	75,465	76,065
Diluted net income per common share	\$ 0.06	\$ 1.34	\$ 1.40

Diluted earnings per common share reflects the potential dilution of common stock equivalents such as options and warrants, to the extent the impact is dilutive. The dilutive effect of common stock options to purchase an aggregate of 3,038,750, 3,965,256 and 4,155,395 shares were excluded from the calculation of the denominator for diluted net income per common share due to their anti-dilutive effect for the years ended December 31, 2008, 2009, and 2010, respectively.

16. SEGMENT INFORMATION

In the first quarter of 2010, the Company realigned its operating structure and internal financial reporting by customer type: Carrier Services and Enterprise Services, reflective of how the CODM allocates resources and assesses performance. The Company's operating segments are the same as its reportable segments.

The Company's Carrier Services operating segment provides services that ensure the seamless connection of its carrier customers' numerous networks, while also enhancing the capabilities and performance of their customers' infrastructure. The Company enables its carrier customers to use, exchange and share critical resources, such as

telephone numbers, to facilitate order management and work flow processing among carriers, and to allow operators to manage and optimize the addressing and routing of IP communications.

The Company's Enterprise Services operating segment provides services to its enterprise customers to meet their respective directory-related needs, as well as Internet infrastructure services. The Company provides a suite of DNS services to its enterprise customers built on a global directory platform. The Company manages a collection of directories that maintain addresses in order to direct, prioritize and manage Internet traffic, and to find and resolve Internet queries and top-level domains. The Company is the authoritative provider of essential registry services and manages directories of similar resources, or addresses, that its customers use for reliable, fair and secure access and connectivity. The Company's services monitor and load-test websites to help identify issues and optimize performance. In addition, the Company provides geolocation services that help enterprises identify the location of their consumers used in a variety of purposes, such as target marketing and fraud prevention. Additionally, the

NEUSTAR, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Company provides directory services for the 5 and 6-digit number strings used for all U.S. Common Short Codes, which is part of the short messaging service relied upon by the U.S. wireless industry.

The Company reports segment information based on the management approach which relies on the internal performance measures used by the CODM to assess the performance of each operating segment in a given period. In connection with that assessment, the CODM reviews revenues and segment contribution, which excludes certain unallocated costs within the following expense classifications: cost of revenue, sales and marketing, research and development and general and administrative. Depreciation and amortization and restructuring charges are also excluded from segment contribution.

The Company's historical segment disclosures have been recast for comparative purpose to reflect its new reportable segments. Information for the years ended December 31, 2008, 2009, and 2010 regarding the Company's reportable segments is as follows (in thousands):

	Year Ended December 31,		
	2008	2009	2010
Revenue:			
Carrier Services	\$ 392,336	\$ 370,471	\$ 397,708
Enterprise Services	96,509	109,914	129,104
Total revenue	\$ 488,845	\$ 480,385	\$ 526,812
Segment contribution:			
Carrier Services	\$ 315,455	\$ 309,091	\$ 340,391
Enterprise Services	36,120	46,130	59,284
Total segment contribution	351,575	355,221	399,675
Indirect operating expenses:			
Cost of revenue (excluding depreciation and amortization shown separately below)	59,439	67,093	75,862
Sales and marketing	12,574	15,437	16,345
Research and development	14,566	10,905	11,972
General and administrative	41,856	50,166	63,982
Depreciation and amortization	40,582	38,040	40,167
Restructuring charges (recoveries)	1,691	6,022	7,331
Impairment of goodwill	93,602		
Impairment of long-lived assets	18,159		8,495
Consolidated income from operations	\$ 69,106	\$ 167,558	\$ 175,521

Assets are not tracked by segment and the CODM does not evaluate segment performance based on asset utilization.

NEUSTAR, INC.

17. EMPLOYEE BENEFIT PLANS

The Company has a 401(k) Profit-Sharing Plan for the benefit of all employees who meet certain eligibility requirements. This plan covers substantially all of the Company's full-time employees. The Company makes matching and other discretionary contributions under this plan, as determined by the Board of Directors. The Company recognized contribution expense totaling \$5.2 million, \$4.3 million and \$4.2 million for the years ended December 31, 2008, 2009 and 2010, respectively.

In June 2008, the Company established the NeuStar, Inc. Deferred Compensation Plan. The Deferred Compensation Plan allows directors and key employees to defer a portion of their salary and up to 100% of their bonus, commissions, incentive awards, directors' fees, and certain equity-based cash compensation, as applicable. The assets of the Deferred Compensation Plan are held in a Rabbi Trust, and are therefore available to satisfy the claims of creditors in the event of bankruptcy or insolvency of the Company. The assets of the Rabbi Trust are invested in marketable securities and reported at market value. Changes in the fair value of the securities are reflected in

NEUSTAR, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

accumulated other comprehensive loss. The assets of the Rabbi Trust are recorded within other assets on the consolidated balance sheets. As of December 31, 2009 and 2010, the assets held in the Rabbi Trust were approximately \$1.7 million and \$3.7 million, respectively. As of December 31, 2009 and 2010, the Company's unrealized gain was approximately \$0.2 million and \$0.6 million, respectively, attributable to the securities held in the Rabbi Trust.

The Deferred Compensation Plan participants make investment allocation decisions on amounts deferred under the Deferred Compensation Plan solely for the purpose of adjusting the value of a participant's account balance. The participant does not have a real or beneficial ownership interest in any securities held in the Rabbi Trust. Obligations to pay benefits under the Deferred Compensation Plan are reported at fair value as deferred compensation in other long-term liabilities. As of December 31, 2009 and 2010, deferred compensation obligation related to the Deferred Compensation Plan was approximately \$1.7 million and \$3.6 million, respectively. Changes in the fair value of the deferred compensation obligation are reflected in deferred compensation expense. The Company recognized gains of approximately \$33,000 and losses of \$0.4 million and \$0.3 million in compensation expense for changes in the fair value of the deferred compensation obligation during the years ended December 31, 2008, 2009 and 2010, respectively.

18. QUARTERLY FINANCIAL INFORMATION (UNAUDITED)

The following is unaudited quarterly financial information for the two year period ended December 31, 2010. In management's opinion, the unaudited financial information has been prepared on the same basis as the audited information and includes all adjustments (consisting only of normal recurring adjustments) necessary for fair presentation of the quarterly financial information presented.

19. SUBSEQUENT EVENT

On February 7, 2011, the Company sold certain business assets and liabilities of Neustar NGM Services, Inc. (NGM Services) and its subsidiaries. The Company expects to treat the common stock of NGM Services as worthless for U.S. income tax purposes. As a result of the anticipated worthless stock deduction for the common stock of NGM Services, the Company expects to recognize an associated income tax benefit of approximately \$27.0 million to \$37.0 million during the year ended December 31, 2011, which primarily represents the book and tax basis differences associated with its investment in NGM Services.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

Not applicable.

ITEM 9A. CONTROLS AND PROCEDURES

Attached as exhibits to this Form 10-K are certifications of our Chief Executive Officer and Chief Financial Officer, which are required in accordance with Rule 13a-14 of the Securities Exchange Act of 1934, as amended. This

Controls and Procedures section includes information concerning the controls and controls evaluation referred to in the certifications. The report of Ernst & Young LLP, our independent registered public accounting firm, regarding its audit of our internal control over financial reporting is set forth below in this section. This section should be read in conjunction with the certifications and the Ernst & Young report for a more complete understanding of the topics presented.

Evaluation of Disclosure Controls and Procedures

We conducted an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures as of the end of the period covered by this Form 10-K. The controls evaluation was conducted under the supervision and with the participation of management, including our Chief Executive Officer and Chief Financial Officer. Disclosure controls are controls and procedures designed to reasonably assure that information required to be disclosed in our reports filed under the Securities Exchange Act of 1934, such as this Form 10-K, is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms. Disclosure controls are also designed to reasonably assure that such information is accumulated and communicated to our management, including the Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure. Our quarterly evaluation of disclosure controls includes an evaluation of some components of our internal control over financial reporting, and internal control over financial reporting is also separately evaluated on an annual basis for purposes of providing the management report which is set forth below.

The evaluation of our disclosure controls included a review of the controls' objectives and design, our implementation of the controls and their effect on the information generated for use in this Form 10-K. In the course of the controls evaluation, we reviewed identified data errors, control problems or indications of potential fraud and, where appropriate, sought to confirm that appropriate corrective actions, including process improvements, were being undertaken. This type of evaluation is performed on a quarterly basis so that the conclusions of management, including the Chief Executive Officer and Chief Financial Officer, concerning the effectiveness of the disclosure controls can be reported in our periodic reports on Form 10-Q and Form 10-K. Many of the components of our disclosure controls are also evaluated on an ongoing basis by our finance organization. The overall goals of these various evaluation activities are to monitor our disclosure controls, and to modify them as necessary. Our intent is to maintain the disclosure controls as dynamic systems that change as conditions warrant.

Based upon the controls evaluation, our Chief Executive Officer and Chief Financial Officer have concluded that, as of the end of the period covered by this Form 10-K, our disclosure controls were effective to provide reasonable assurance that information required to be disclosed in our Securities Exchange Act reports is recorded, processed, summarized and reported within the time periods specified by the SEC, and that material information related to NeuStar and its consolidated subsidiaries is made known to management, including the Chief Executive Officer and Chief Financial Officer, particularly during the period when our periodic reports are being prepared. We reviewed the results of management's evaluation with the Audit Committee of our Board of Directors.

Management Report on Internal Control Over Financial Reporting

Our management is responsible for establishing and maintaining effective internal control over financial reporting to provide reasonable assurance regarding the reliability of our financial reporting and the preparation of financial statements for external purposes in accordance with U.S. generally accepted accounting principles. Internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of the assets of the

Company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with U.S. generally accepted accounting principles; and (iii) provide reasonable assurance regarding authorization to effect the acquisition, use or disposition of Company assets, as well as the prevention or timely detection of unauthorized acquisition, use or disposition of the Company's assets that could have a material effect on the consolidated financial statements.

Management assessed our internal control over financial reporting as of December 31, 2010, the end of our fiscal year. Management based its assessment on criteria established in Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission. Management's assessment included evaluation of such elements as the design and operating effectiveness of key financial reporting controls, process documentation, accounting policies and our overall control environment. This assessment is supported by testing and monitoring performed by our finance organization.

Based on this assessment, management has concluded that our internal control over financial reporting was effective as of the end of the fiscal year to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external reporting purposes in accordance with U.S. generally accepted accounting principles.

Our independent registered public accounting firm, Ernst & Young LLP, independently assessed the effectiveness of the company's internal control over financial reporting. Ernst & Young has issued an attestation report, which is included at the end of this section.

Inherent Limitations on Effectiveness of Controls

A control system, no matter how well designed and operated, can provide only reasonable, not absolute, assurance that the control system's objectives will be met. The design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Other inherent limitations include the realities that judgments in decision-making can be faulty and that breakdowns can occur because of simple error or mistake. Controls can also be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the controls. Projections of any evaluation of controls effectiveness to future periods are subject to risks. Over time, controls may become inadequate because of changes in conditions or deterioration in the degree of compliance with policies or procedures.

Changes in Internal Control over Financial Reporting

On a quarterly basis we evaluate any changes to our internal control over financial reporting to determine if material changes occurred. There were no changes in our internal controls over financial reporting during the quarterly period ended December 31, 2010 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

Board of Directors and Stockholders
NeuStar, Inc.

We have audited NeuStar, Inc.'s internal control over financial reporting as of December 31, 2010, based on criteria established in Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (the COSO criteria). NeuStar, Inc.'s management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, NeuStar, Inc. maintained, in all material respects, effective internal control over financial reporting as of December 31, 2010 based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of NeuStar, Inc. as of December 31, 2009 and 2010, and the related consolidated statements of operations, stockholders' equity, and cash flows for each of the three years in the period ended December 31, 2010 and our report dated February 25, 2011 expressed an unqualified opinion thereon.

/s/ Ernst & Young LLP

McLean, Virginia
