**SECURITIES AND EXCHANGE COMMISSION  
Washington, D.C. 20549  
FORM 10-K**

**Annual report pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934  
For the fiscal year ended December 31, 2006  
Commission file number 0-31164  
Preformed Line Products Company  
(Exact Name of Registrant as Specified in Its Charter)**

Ohio 34-0676895

(State or Other Jurisdiction of Incorporation or Organization) (I.R.S. Employer Identification No.)

660 Beta Drive  
Mayfield Village, Ohio 44143

(Address of Principal Executive Office) (Zip Code)

(440) 461-5200

(Registrant's telephone number, including area code)

Securities registered pursuant to Section 12(b) of the Act:

Title of each class Name of each exchange on which registered

Common Shares, \$2 par value per share NASDAQ

Securities registered pursuant to Section 12(g) of the Act: (None)

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.

Yes  No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes  No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15 (d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports) and (2) has been subject to such filing requirements for the past 90 days. Yes  No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of the registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of "accelerated filer and large accelerated filer" in Rule 12b-2 of the Exchange act.

Large accelerated filer  Accelerated filer  Non-accelerated filer

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes  No

The aggregate market value of voting and non-voting common shares held by non-affiliates of the registrant as of June 30, 2006 was \$102,142,433, based on the closing price of such common shares, as reported on the NASDAQ National Market System. As of March 12, 2007, there were 5,358,437 common shares of the Company (\$2 par value) outstanding.

**DOCUMENTS INCORPORATED BY REFERENCE**

Edgar Filing: PREFORMED LINE PRODUCTS CO - Form 10-K

Portions of the Definitive Proxy Statement for the Annual Meeting of Shareholders to be held April 23, 2007 are incorporated by reference into Part III, Items 10, 11, 12, 13 and 14.

**Forward-Looking Statements**

This Form 10-K and other documents we file with the Securities and Exchange Commission contain forward-looking statements regarding the Company's and management's beliefs and expectations. As a general matter, forward-looking statements are those focused upon future plans, objectives or performance (as opposed to historical items) and include statements of anticipated events or trends and expectations and beliefs relating to matters not historical in nature. Such forward-looking statements are subject to uncertainties and factors relating to the Company's operations and business environment, all of which are difficult to predict and many of which are beyond the Company's control. Such uncertainties and factors could cause the Company's actual results to differ materially from those matters expressed in or implied by such forward-looking statements.

The following factors, among others, could affect the Company's future performance and cause the Company's actual results to differ materially from those expressed or implied by forward-looking statements made in this report:

The overall demand for cable anchoring and control hardware for electrical transmission and distribution lines on a worldwide basis, which has a slow growth rate in mature markets such as the United States, Canada, and Western Europe;

Technological developments that affect longer-term trends for communication lines such as wireless communication;

The Company's success at continuing to develop proprietary technology to meet or exceed new industry performance standards and individual customer expectations;

The potential impact of consolidation, deregulation and bankruptcy among the Company's suppliers, competitors and customers;

The rate of progress in continuing to reduce costs and in modifying the Company's cost structure to maintain and enhance the Company's competitiveness;

The Company's success in strengthening and retaining relationships with the Company's customers, growing sales at targeted accounts and expanding geographically;

The extent to which the Company is successful in expanding the Company's product line into new areas;

The Company's ability to identify, complete and integrate acquisitions for profitable growth;

The relative degree of competitive and customer price pressure on the Company's products;

The cost, availability and quality of raw materials required for the manufacture of products;

The effects of fluctuation in currency exchange rates upon the Company's reported results from international operations, together with non-currency risks of investing in and conducting significant operations in foreign countries, including those relating to political, social, economic and regulatory factors;

Changes in significant government regulations affecting environmental compliances;

The Company's ability to compete in the domestic data communication market;

The effect on the Company's business resulting from economic uncertainty within Latin American regions;

The telecommunication market's continued deployment of Fiber-to-the-Premises;

**Table of Contents**

The Company's ability to increase sales or margins to recover the compliance costs of being a publicly listed company; and

Those factors described under the heading "Risk Factors" on page 12.

**Part I**

**Item 1. Business**

**Background**

Prefomed Line Products Company and its subsidiaries (the Company) is an international designer and manufacturer of products and systems employed in the construction and maintenance of overhead and underground networks for the energy, telecommunication, cable operators, information (data communication) and other similar industries. The Company's primary products support, protect, connect, terminate and secure cables and wires. The Company also manufactures a line of products serving the voice and data transmission markets. The Company's goal is to continue to achieve profitable growth as a leader in the innovation, development, manufacture and marketing of technically advanced products and services related to energy, communications and cable systems and to take advantage of this leadership position to sell additional quality products in familiar markets.

The Company serves a worldwide market through strategically located domestic and foreign manufacturing facilities. Each of the Company's domestic and foreign manufacturing facilities have obtained an International Standards Organization (ISO) 9001:2000 Certification for our Management System. The ISO 9001:2000 certified management system is a globally recognized quality standard for manufacturing and assists the Company in marketing its products throughout the world. The Company's customers include public and private energy utilities and communication companies, cable operators, financial institutions, governmental agencies, original equipment manufacturers, contractors and subcontractors, distributors and value-added resellers. The Company is not dependent on a single customer or a few customers. No single customer accounts for more than ten percent of the Company's consolidated revenues.

The Company's products include:

Formed Wire and Related Hardware Products

Protective Closures

Data Communication Interconnection Devices

Plastic Products

Other Products

*Formed Wire Products* are used in the energy, communications, cable and non-utility industries to support, protect, terminate and secure both power conductor and communication cables and to control cable dynamics (e.g., vibration). These products are based on the principle of forming a variety of stiff wire materials into a helical (spiral) shape. Advantages of using the Company's helical formed wire products are that they are economical, dependable and easy to use. The Company introduced formed wire products to the power industry almost 60 years ago and such products enjoy an almost universal acceptance in the Company's markets. Formed wire and related hardware products are approximately 54% of the Company's revenues in 2006, 49% in 2005, and 46% in 2004.

*Protective Closures*, including splice cases, are used to protect fixed line communication networks, such as copper cable or fiber optic cable, from moisture, environmental hazards and other potential contaminants. Protective closures are approximately 26% of the Company's revenues in 2006 and 29% in 2005 and 2004.

*Data Communication Interconnection Devices* are products used in high-speed data systems to connect electronic equipment. Data communication interconnection devices are approximately 13% of the Company's revenues in 2006, 15% in 2005 and 17% in 2004.

**Table of Contents**

*Plastic Products*, including guy markers, tree guards, fiber optic cable markers and pedestal markers are used in energy, communications, cable television and non-utility industries to identify power conductors, communication cables and guy wires. Plastic products are approximately 2% of the Company's revenues in 2006 and 2005, and 3% in 2004.

*Other Products* include hardware assemblies, pole line hardware, resale products, underground connectors and urethane products. They are used by energy, communications, cable and non-utility industries for various applications and are defined as products that compliment the Company's core line offerings. Other products are approximately 5% of the Company's revenues in 2006, 2005 and 2004.

**Corporate History**

The Company was incorporated in Ohio in 1947 to manufacture and sell helically shaped armor rods, which are sets of stiff helically shaped wires applied on an electrical conductor at the point where it is suspended or held. Thomas F. Peterson, the Company's founder, developed and patented a unique method to manufacture and apply these armor rods to protect electrical conductors on overhead power lines. Over a period of years Mr. Peterson and the Company developed, tested, patented, manufactured and marketed a variety of helically shaped products for use by the electrical and telephone industries. Although all of Mr. Peterson's patents have now expired, those patents served as the nucleus for licensing the Company's formed wire products abroad.

The success of the Company's formed wire products in the United States led to expansion abroad. The first international license agreement was established in the mid-1950s in Canada. In the late 1950s the Company's products were being sold through joint ventures and licensees in Canada, England, Germany, Spain and Australia. Additionally, the Company began export operations and promoted products into other selected offshore markets. The Company continued its expansion program, bought out most of the original licensees, and, by the mid-1990s, had complete ownership of operations in Australia, Brazil, Canada, Great Britain, South Africa and Spain and held a minority interest in two joint ventures in Japan. The majority of the Company's international subsidiaries operate as independent business units with the necessary infrastructure (i.e. manufacturing, engineering, marketing and general management) to support local business activities. Each is staffed with local personnel to ensure that the Company is well versed in local business practices, cultural constraints, technical requirements and the intricacies of local client relationships.

In 1968, the Company expanded into the underground telecommunications field by its acquisition of the Smith Company located in California. The Smith Company had a patented line of buried closures and pressurized splice cases. These closures and splice cases protect copper cable openings from environmental damage and degradation. The Company continued to build on expertise acquired through the acquisition of the Smith Company and in 1995 introduced the highly successful COYOTE Closure line of products. Since 1995 eleven domestic and three foreign patents have been granted to the Company on the COYOTE Closure. None of the COYOTE Closure patents have expired. The earliest COYOTE Closure patent was filed in April 1995 and will not expire until April 2015.

In 1993, the Company purchased the assets of Superior Modular Products Company. Located in Asheville, North Carolina, Superior Modular Products is a technical leader in the development and manufacture of high-speed interconnection devices for voice, data and video applications. This acquisition was the catalyst to expand the Company's range of communication products to components for structuring cabling systems used inside a customer's premises.

Recognizing the need for a stronger presence in the fast growing Asian market, in 1996 the Company formed a joint venture in China and, in 2000, became sole owner of this venture.

In 2000, the Company acquired Rack Technologies Pty. Ltd, headquartered in Sydney, Australia. Rack Technologies is a specialist manufacturer of rack system enclosures for the communications, electronics and securities industries. This acquisition complements and broadens the Company's existing line of data communication products used inside a customer's premises.

In 2002, the Company acquired the remaining 2.6% minority interest in its operations in Mexico.

**Table of Contents**

In 2003, the Company acquired the assets of Richardson Pacific Ltd located in Sydney, Australia. This acquisition complements the existing product lines manufactured at Rack Technologies for the data communication industry.

In 2003, the Company sold its 24% interest in Toshin Denko Kabushiki Kaisha in Osaka, Japan. The Company's investment in Toshin Denko dates back to 1961 when the joint venture company was founded.

In 2004, the Company acquired the assets of Union Electric Manufacturing Co. Ltd, located in Bangkok, Thailand.

In 2004, the Company sold its 49% interest in Japan PLP Co. Ltd., a joint venture in Japan. The sale resulted in an after-tax gain of \$1.7 million.

The Company's World headquarters is located at 660 Beta Drive, Mayfield Village, Ohio 44143.

**Business**

The demand for the Company's products comes primarily from new, maintenance and repair construction for the energy, telecommunication and data communication industries. The Company's customers use many of the Company's products, including formed wire products, to revitalize the aging outside plant infrastructure. Many of the Company's products are used on a proactive basis by the Company's customers to reduce and prevent lost revenue. A single malfunctioning line could cause the loss of thousands of dollars per hour for a power or communication customer. A malfunctioning fiber cable could also result in substantial revenue loss. Repair construction by the Company's customers generally occurs in the case of emergencies or natural disasters, such as hurricanes, tornadoes, earthquakes, floods or ice storms. Under these circumstances, the Company provides 24-hour service to provide the repair products to customers as quickly as possible.

The Company has adapted the formed wire products' helical technology for use in a wide variety of fiber optic cable applications that have special requirements. The Company's formed wire products are uniquely qualified for these applications due to the gentle gripping over a greater length of the fiber cable. This is an advantage over traditional pole line hardware clamps that compress the cable to the point of possible fatigue and optical signal deterioration.

The Company's protective closures and splice cases are used to protect cable from moisture, environmental hazards and other potential contaminants. The Company's splice cases are easily re-enterable closures that allow utility maintenance workers access to the cables located inside the closure to repair or add communications services. Over the years, the Company has made many significant improvements in the splice case that have greatly increased their versatility and application in the market place. The Company also designs and markets custom splice cases to satisfy specific customer requirements. This has allowed the Company to remain a strong partner with several primary customers and has earned the Company the reputation as a responsive and reliable supplier.

Fiber optic cable was first deployed in the outside plant environment in the early 1980's. Through fiber optic technologies, a much greater amount of both voice and data communication can be transmitted reliably. In addition, this technology solved the cable congestion problem that the large count copper cable was causing in underground, buried and aerial applications. The Company developed and adapted copper closures for use in the emerging fiber optic world. In the late 1980's, the Company developed a series of splice cases designed specifically for fiber application. In the mid-1990's, the Company developed its plastic COYOTE Closure, and has since expanded the product line to address emerging Fiber-to-the-Premise (FTTP) applications. The COYOTE Closure is an example of the Company developing a new line of proprietary products to meet the changing needs of its customers.

The Company also designs and manufactures data communication interconnect devices and enclosures for data communication networks, offering a comprehensive line of copper and fiber optic cross-connect systems. The product line enables reliable, high-speed transmission of data over customers' local area networks.

## **Table of Contents**

### **License Agreements**

The Company receives royalties under twenty-three separate license agreements. The Company does not believe that its business is materially dependent on any individual license agreement.

### **Markets**

The Company markets its products to the energy, telecommunication, cable, data communication and non-utility industries. While rapid changes in technology have blurred the distinctions between telephone, cable, and data communication, the energy industry is clearly distinct. The Company's role in the energy industry is to supply formed wire products and related hardware used with the electrical conductors, cables and wires that transfer power from the generating facility to the ultimate user of that power. Formed wire products are used to support, protect, terminate and secure both power conductor and communication cables and to control cable dynamics.

*Electric Utilities - Transmission.* The electric transmission grid is the interconnected network of high voltage aluminum conductors used to transport large blocks of electric power from generating facilities to distribution networks. Currently, there are three major power grids in the United States: the Eastern Interconnect, the Western Interconnect and the Texas Interconnect. Virtually all electrical energy utilities are connected with at least one other utility by one of these major grids. The Company believes that the transmission grid has been neglected throughout much of the United States for more than a decade. Additionally, because of deregulation, some electric utilities have turned this responsibility over to Independent System Operators (ISOs), who have also been slow to add transmission lines. With demand for power now exceeding supply in some areas, the need for the movement of bulk power from the energy-rich states to the energy-deficient areas means that new transmission lines will likely be built and many existing lines will likely be refurbished. In addition, passage of The Energy Policy Act of 2005 has attracted new investment into the industry through the requirements it establishes for enforceable reliability standards, incentives for transmission grid improvements and reform of the transmission line construction approval process. The Company believes that this will generate growth for the Company's products in this market over at least the next several years. In addition, increased construction of international transmission grids is occurring in many regions of the world. However, consolidation in the markets that the Company services may also have an adverse impact on the Company's revenues.

*Electric Utilities - Distribution.* The distribution market includes those utilities that distribute power from a substation where voltage is reduced to levels appropriate for the consumer. Unlike the transmission market, distribution is still handled primarily by local electric utilities. These utilities are motivated to reduce cost in order to maintain and enhance their profitability. The Company believes that its growth in the distribution market will be achieved primarily as a result of incremental gains in market share driven by emphasizing the Company's quality products and service over price. Internationally, particularly in the developing regions, there is increasing political pressure to extend the availability of electricity to additional populations. Through its global network of factories and sales offices, the Company is prepared to take advantage of this new growth in construction.

*Communication and Cable.* Major developments, including growing competition between the cable and communications industries and increasing overall demand for high-speed communication services, have led to a changing regulatory and competitive environment in many markets throughout the world. The deployment of new access networks and improvements to existing networks for advanced applications continues to gain momentum.

Cable operators, local communication operators and power utilities are building, rebuilding or upgrading signal delivery networks in developed countries. These networks are designed to deliver video and voice transmissions and provide Internet connectivity to individual residences and businesses. Operators deploy a variety of network technologies and architectures to carry broadband and narrowband signals. These architectures are constructed of electronic hardware connected via coaxial cables, copper wires or optical fibers. The Company manufactures closures that these industries use to securely connect and protect these vital networks.

As critical components of the outdoor infrastructure, closures provide protection against weather and vandalism and permit technicians who maintain and manage the system ready access to the devices. Cable operators and local telephone network operators place great reliance on manufacturers of protective closures because any material damage to the signal delivery networks is likely to disrupt communication services. In addition to closures,

**Table of Contents**

the Company supplies the communication and cable industry with its formed wire products to hold, support, protect and terminate the copper wires and cables and the fiber optic cables used by that industry to transfer voice, video or data signals.

The industry has developed new technological methods to increase the usage of copper-based plant through high-speed digital subscriber lines (DSLs). The popularity of these services, the regulatory environment and the increasingly fierce competition between communications and cable operators has driven the recent move toward building out the last mile in fiber networks. FTTP promises to be the next wave in broadband innovation by carrying fiber optic technology into homes and businesses. The Company has been actively developing products that address this market.

*Data Communication.* The data communication market is being driven by the continual demand for increased bandwidth. Growing Internet Service Providers (ISPs), construction in Wide Area Networks (WANs) and demand for data communication in the workplace are all key elements to the increased demand for the connecting devices made by the Company. This market will increasingly be focused on the systems that provide the highest speed and highest quality signal, such as fiber optic and copper networks. The Company's connecting devices are sold to a number of categories of customers including (i) original equipment manufacturers (OEMs), which incorporate the Company's connector technology in their product offering, (ii) ISPs, (iii) large companies and organizations which have their own local area network for data communication, and (iv) national and international distributors of structured cabling systems and components for use in the above markets.

*Non-Utility Industries.* The Company's formed wire products can also be used in other industries which require a method of securing or terminating cables, including the metal building, tower and antenna industries, the arborist industry, and various applications within the marine systems industry. Products other than formed wire products are also marketed to other industries. For example, the Company's urethane capabilities allow it to market products to the light rail industry. The Company continues to explore new and innovative uses of its manufacturing capabilities; however, these markets remain a small portion of overall consolidated sales.

See Note J to the Notes to Consolidated Financial Statements for certain information relating to the business segments.

**Foreign Operations**

Except for location, the foreign business segment of the Company is essentially the same as its domestic business. The Company manufactures the same types of products in its foreign plants as are sold domestically, it sells to the same types of customers and faces the same types of competition (and in some cases the same competitors). Sources of supply of raw materials are not significantly different internationally. See Note J in the Notes To Consolidated Financial Statements for information relating to certain foreign and domestic financial data of the Company.

While a number of the Company's foreign plants are in developed countries, the Company believes it has strong market opportunities in developing countries where the need for the transmission and distribution of electrical power is significant. The Company is now serving the Far East market, other than China and Japan, primarily from Thailand. In addition, as the need arises, the Company is prepared to establish new manufacturing facilities abroad. During 2003 a 25,000 square foot addition was completed at the manufacturing facility in China. In 2004, through a small acquisition, a new manufacturing operation was established outside of Bangkok, Thailand. In 2005, a 35,600 square foot addition was made to the Company's operation in Australia. During 2006, the Company moved its Thailand manufacturing operations from a leased facility to a 60,000 square foot company-owned facility in Bangkok, Thailand.

**Table of Contents**

**Sales and Marketing**

Nationally and internationally, the Company markets its products through a direct sales force and manufacturing representatives. The direct sales force is employed by the Company and works with the manufacturer's representatives, as well as, key direct accounts and distributors, who also buy and resell the Company's products. The manufacturer's representatives are independent organizations that represent the Company as well as other complimentary product lines. These organizations are paid a commission based on the sales amount.

**Research and Development**

The Company is committed to providing technical leadership through scientific research and product development in order to continue to expand the Company's position as a supplier to the communications and power industries. Research is conducted on a continuous basis using internal experience in conjunction with outside professional expertise to develop state-of-the-art materials for several of the Company's products. These products capitalize on cost-efficiency while offering exacting mechanical performance that meets or exceeds industry standards. The Company's research and development activities have resulted in numerous patents being issued to the Company (see Patents and Trademarks below).

Early in its history the Company recognized the need to understand the performance of its products and the needs of its customers. To that end, the Company developed its own Research and Engineering Center in Cleveland, Ohio. Using the Research and Engineering Center, engineers and technicians simulate a wide range of external conditions encountered by the Company's products to ensure quality, durability and performance. The work performed in the Research and Engineering Center includes advanced studies and experimentation with various forms of vibration. This work has contributed significantly to the collective knowledge base of the industries the Company serves and is the subject matter of many papers and seminars presented to these industries.

In 1979, the Company relocated and expanded its Research and Engineering Center as a 29,000-square-foot addition to its World Headquarters in Mayfield Village, Ohio. The Company believes that this facility is one of the most sophisticated in the world in its specialized field. The expanded Research and Engineering Center also has an advanced prototyping technology machine on-site to develop models of new designs where intricate part details are studied prior to the construction of expensive production tooling. Today, the Company's reputation for vibration testing, tensile testing, fiber optic cable testing, environmental testing, field vibration monitoring and third-party contract testing is a competitive advantage. In addition to testing, the work done at the Company's Research and Development Center continues to fuel product development efforts. For example, the Company estimates that approximately 24% of 2006 revenues were attributed to products developed by the Company in the past five years. In addition, the Company's position in the industry is further reinforced by its long-standing leadership role in many key international technical organizations which are charged with the responsibility of establishing industry wide specifications and performance criteria, including IEEE (Institute of Electrical and Electronics Engineers), CIGRE (Counsil Internationale des Grands Reseaux Electriques a Haute Tension), and IEC (International Electromechanical Commission). Research and development costs are expensed as incurred. Research and development costs for new products were \$3.2 million in 2006 and \$2.6 million in 2005 and 2004.

**Patents and Trademarks**

The Company applies for patents in the United States and other countries, as appropriate, to protect its significant patentable developments. As of December 31, 2006, the Company had in force 42 U.S. patents and 45 foreign patents in 10 countries and had pending seven U.S. patent applications and 27 foreign applications. While such domestic and foreign patents expire from time to time, the Company continues to apply for and obtain patent protection on a regular basis. Patents held by the Company in the aggregate are of material importance in the operation of the Company's business. The Company, however, does not believe that any single patent, or group of related patents, is essential to the Company's business as a whole or to any of its businesses. Additionally, the Company owns and uses a substantial body of proprietary information and numerous trademarks. The Company relies on nondisclosure agreements to protect trade secrets and other proprietary data and technology. As of December 31, 2006, the Company had obtained U.S. registration on 32 trademarks and four trademark applications

**Table of Contents**

remained pending. Foreign registrations amounted to 188 registrations in 32 countries, with 17 pending foreign registrations.

Since June 8, 1995, United States patents have been issued for terms of 20 years beginning with the date of filing of the patent application. Prior to that time, a U.S. patent had a term of 17 years from the date of its issuance. Patents issued by foreign countries generally expire 20 years after filing. U.S. and foreign patents are not renewable after expiration of their initial term. U.S. and foreign trademarks are generally perpetual, renewable in 10-year increments upon a showing of continued use. To the knowledge of management, the Company has not been subject to any significant allegation or charges of infringement of intellectual property rights by any organization.

In the normal course of business, the Company occasionally makes and receives inquiries with regard to possible patent and trademark infringement. The extent of such inquiries from third parties has been limited generally to verbal remarks to Company representatives. The Company believes that it is unlikely that the outcome of these inquiries will have a material adverse effect on the Company's financial position.

**Competition**

All of the markets that the Company serves are highly competitive. In each market the principal methods of competition are price, performance, and service. The Company believes, however, that several factors (described below) provide the Company with a competitive advantage.

The Company has a strong and stable workforce. This consistent and continuous knowledge base has afforded the Company the ability to provide superior service to the Company's customers and representatives.

The Company's Research and Engineering Center in Mayfield Village, Ohio and departments of subsidiary locations maintain a strong technical support function to develop unique solutions to customer problems.

The Company is vertically integrated both in manufacturing and distribution and is continually upgrading equipment and processes.

The Company is sensitive to the marketplace and provides an extra measure of service in cases of emergency, storm damage and other rush situations. This high level of customer service and customer responsiveness has become a hallmark of the Company.

The Company's 12 manufacturing locations ensure close support and proximity to customers worldwide.

Domestically, there are several competitors for formed wire products. Although it has other competitors in many of the countries where it has plants, the Company has leveraged its expertise and is very strong in the global market. The Company believes that it is the world's largest manufacturer of formed wire products for energy and communications markets. However, the Company's formed wire products compete against other pole line hardware products manufactured by other companies.

Minnesota Manufacturing and Mining Company (3M) is the primary domestic competitor of the Company for pressurized copper closures. The Company believes that its market share exceeds 3M's market share. Based on its experience in the industry, the Company believes its market share stands at 60%.

The fiber optic closure market is one of the most competitive product areas for the Company, with the Company competing against, among others, Tyco International Ltd., 3M and Corning Cable Systems. There are a number of primary competitors and several smaller niche competitors that compete at all levels in the marketplace. The Company believes that it is one of four leading suppliers of fiber optic closures.

The Company's data communication competitors range from assemblers of low cost, low quality components, to well-established multinational corporations. The Company's competitive strength is its

**Table of Contents**

technological leadership and manufacturing expertise. Additionally, the Company provides product to its licensees and other companies on a privately branded basis. Patented technology developed by the Company is currently licensed to many of its largest competitors. Low-cost Asian competitors, however, keep pressure on prices and will continue to do so.

**Sources and Availability of Raw Materials**

The principal raw materials used by the Company are galvanized wire, stainless steel, aluminum covered steel wire, aluminum re-draw rod, plastic resins, glass-filled plastic compounds, neoprene rubbers and aluminum castings. The Company also uses certain other materials such as fasteners, packaging materials and communications cable. The Company believes that it has adequate sources of supply for the raw materials used in its manufacturing processes and it regularly attempts to develop and maintain sources of supply in order to extend availability and encourage competitive pricing of these products.

Most plastic resins are purchased under contracts to stabilize costs and improve delivery performance and are available from a number of reliable suppliers. Wire and re-draw rod are purchased in standard stock diameters and coils under contracts available from a number of reliable suppliers. Contracts have firm prices except for fluctuations of base metals and petroleum prices, which result in surcharges when global demand is greater than the available supply.

The Company also relies on certain other manufacturers to supply products that complement the Company's product lines, such as aluminum and ferrous castings, fiber optic cable and connectors, circuit boards and various metal racks and cabinets. The Company believes there are multiple sources of supply for these products.

Due to increasing worldwide demand for carbon steel, stainless steel and aluminum, costs of raw materials have risen significantly during 2006. The Company anticipates further increases in 2007 as the economy continues to expand. Prices for stainless steel and aluminum have increased to five-year highs and increased costs have been passed along in the supply chain. Worldwide demand in these commodities continues to exceed supply and price pressure will continue as the demand outpaces the supply.

**Backlog Orders**

The Company's backlog was approximately \$23.4 million at the end of 2006. The Company's order backlog generally represents four to six weeks of sales. All customer orders entered are firm at the time of entry. Substantially all orders are shipped within a two to four week period unless the customer requests an alternative date.

**Seasonality**

The Company markets products that are used by utility maintenance and construction crews worldwide. The products are marketed through distributors and directly to end users, who maintain stock to ensure adequate supply for their customers or construction crews. As a result, the Company does not have a wide variation in sales from quarter to quarter.

**Environmental**

The Company is subject to extensive and changing federal, state, and local environmental laws, including laws and regulations that (i) relate to air and water quality, (ii) impose limitations on the discharge of pollutants into the environment, (iii) establish standards for the treatment, storage and disposal of toxic and hazardous waste, and (iv) require proper storage, handling, packaging, labeling, and transporting of products and components classified as hazardous materials. Stringent fines and penalties may be imposed for noncompliance with these environmental laws. In addition, environmental laws could impose liability for costs associated with investigating and remediating contamination at the Company's facilities or at third-party facilities at which the Company has arranged for the disposal treatment of hazardous materials.

**Table of Contents**

Although no assurances can be given, the Company believes it is in compliance in all material respects, with all applicable environmental laws and the Company is not aware of any noncompliance or obligation to investigate or remediate contamination that could reasonably be expected to result in a material liability. The Company does not expect to make any material capital expenditure during 2007 for environmental control facilities. The environmental laws continue to be amended and revised to impose stricter obligations, and compliance with future additional environmental requirements could necessitate capital outlays. However, the Company does not believe that these expenditures should ultimately result in a material adverse effect on its financial position or results of operations. The Company cannot predict the precise effect such future requirements, if enacted, would have on the Company. The Company believes that such regulations would be enacted over time and would affect the industry as a whole.

**Employees**

At December 31, 2006, the Company and its consolidated subsidiaries had 1,528 employees. Approximately 43% of the Company's employees are located in the United States.

**Available Information**

The Company maintains an Internet site at <http://www.preformed.com>, on which, the Company makes available, free of charge, the annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and any amendments to those reports, as soon as reasonably practicable after the Company electronically files such material with, or furnishes it to, the SEC. The Company's SEC reports can be accessed through the investor relations section of its Internet site. The information found on the Company's Internet site is not part of this or any other report that is filed or furnished to the SEC.

The public may read and copy any materials the Company files with or furnishes to the SEC at the SEC's Public Reference Room at 450 Fifth Street, NW., Washington, DC 20549. Information on the operation of the Public Reference Room is available by calling the SEC at 1-800-SEC-0330. In addition, the SEC maintains an Internet site that contains reports, proxy and information statements, and other information filed with the SEC by electronic filers. The SEC's Internet site is <http://www.sec.gov>. The Company also has a link from its Internet site to the SEC's Internet site, this link can be found on the investor relations page of the Company's Internet site.

**Item 1A. Risk Factors**

***Due to the Company's dependency on the energy, telecommunication and data communication industries, the Company is susceptible to negative trends relating to those industries that could adversely affect the Company's operating results.***

The Company's sales to the energy, telecommunication and data communication industries represent a substantial portion of the Company's historical sales. The concentration of revenue in such industries is expected to continue into the foreseeable future. Demand for products to these industries depends primarily on capital spending by customers for constructing, rebuilding, maintaining or upgrading their systems. The amount of capital spending and, therefore, the Company's sales and profitability are affected by a variety of factors, including general economic conditions, access by customers to financing, government regulation, demand for energy and cable services, and technological factors. As a result, some customers may not continue as going concerns, which could have a material adverse effect on the Company's business, operating results and financial condition. Consolidation and deregulation present the additional risk to the Company that combined or deregulated customers will rely on relationships with a source other than the Company. Consolidation and deregulation may also increase the pressure on suppliers, such as the Company, to sell product at lower prices.

***The Company's business will suffer if the Company fails to develop and successfully introduce new and enhanced products that meet the changing needs of the Company's customers.***

The Company's ability to anticipate changes in technology and industry standards and to successfully develop and introduce new products on a timely basis will be a significant factor in the Company's ability to grow and remain competitive. New product development often requires long-term forecasting of market trends,

**Table of Contents**

development and implementation of new designs and processes and a substantial capital commitment. The trend toward consolidation of the energy, telecommunication and data communication industries may require the Company to quickly adapt to rapidly changing market conditions and customer requirements. Any failure by the Company to anticipate or respond in a cost-effective and timely manner to technological developments or changes in industry standards or customer requirements, or any significant delays in product development or introduction or any failure of new products to be widely accepted by the Company's customers, could have a material adverse effect on the Company's business, operating results and financial condition as a result of reduced net sales.

***The intense competition in the Company's markets, particularly telecommunication and data communication markets, may lead to a reduction in sales and profits.***

The markets in which the Company operates are highly competitive. The level of intensity of competition may increase in the foreseeable future due to anticipated growth in the telecommunication and data communication industries. The Company's competitors in the telecommunication and data communication markets are larger companies with significant influence over the distribution network. The product lines within the data communication market have thin profit margins. Success in these product lines depends upon the Company's ability to increase volume and reduce the cost structure. There can be no assurance that the Company will be able to compete successfully against its competitors, many of which may have access to greater financial resources than the Company. In addition, the pace of technological development in the telecommunication and data communication markets is rapid and the Company cannot assure that these advances (i.e., wireless, fiber optic network infrastructure, etc.) will not adversely affect the Company's ability to compete in this market.

***The introduction of products embodying new technologies or the emergence of new industry standards can render existing products or products under development obsolete or unmarketable.***

The energy, telecommunication and data communication industries are characterized by rapid technological change. Satellite, wireless and other communication technologies currently being deployed may represent a threat to copper, coaxial and fiber optic-based systems by reducing the need for wire-line networks. There can be no assurance that future advances or further development of these or other new technologies will not have a material adverse effect on the Company's business, operating results and financial condition as a result of lost sales.

***Price increases of raw materials could result in lower earnings.***

The Company's cost of sales may be materially adversely affected by increases in the market prices of the raw materials used in the Company's manufacturing processes. There can be no assurance that price increases in raw materials can be passed onto the Company's customers through increases in product prices. As a result, the Company's operating results could be adversely affected.

***The Company's international operations subject the Company to additional business risks.***

International sales account for a substantial portion of the Company's net sales (49%, 44% and 42% in 2006, 2005 and 2004, respectively) and the Company expects these sales will increase as a percentage of net sales in the future. Due to its international sales, the Company is subject to the risks of conducting business internationally, including unexpected changes in, or impositions of, legislative or regulatory requirements, fluctuations in the U.S. dollar which could materially adversely affect U.S. dollar revenues or operating expenses, tariffs and other barriers and restrictions, potentially longer payment cycles, greater difficulty in accounts receivable collection, reduced or limited protection of intellectual property rights, potentially adverse taxes and the burdens of complying with a variety of international laws and communications standards. The Company is also subject to general geopolitical risks, such as political and economic instability and changes in diplomatic and trade relationships, in connection with its international operations. There can be no assurance that these risks of conducting business internationally will not have a material adverse effect on the Company's business, operating results and financial condition.

***The Company may not be able to successfully integrate businesses that it may acquire in the future.***

A portion of the Company's growth in sales and earnings has been generated from acquisitions. The Company expects to continue a strategy of identifying and acquiring businesses with complementary products. In

**Table of Contents**

connection with this strategy, the Company faces certain risks and uncertainties relating to acquisitions. The factors affecting this exposure are in addition to the risks faced in the Company's day-to-day operations. Acquisitions involve a number of special risks, including the risks pertaining to integrating acquired businesses. In addition, the Company may incur debt to finance future acquisitions, and the Company may issue securities in connection with future acquisitions that may dilute the holdings of current and future shareholders. Covenant restrictions relating to additional indebtedness could restrict the Company's ability to pay dividends, fund capital expenditures, consummate additional acquisitions and significantly increase the Company's interest expense. Any failure to successfully complete acquisitions or to successfully integrate such strategic acquisitions could have a material adverse effect on the Company's business, operating results and financial condition.

**Item 1B. Unresolved Staff Comments**

The Company does not have any unresolved staff comments.

**Item 2. Properties**

The Company currently owns or leases 17 facilities, which together contain approximately 1.5 million square feet of manufacturing, warehouse, research and development, sales and office space worldwide. Most of the Company's international facilities contain space for offices, research and engineering (R&E), warehousing and manufacturing with manufacturing using a majority of the space. The following table provides information regarding the Company's principal facilities:

<b>Location</b>	<b>Use</b>	<b>Owned/Leased</b>	<b>Square Feet</b>
1. Mayfield Village, Ohio	Corporate Headquarters Research and Engineering Center	Owned	62,000
2. Rogers, Arkansas	Manufacturing Warehouse Office	Owned	310,000
3. Albemarle, North Carolina	Manufacturing Warehouse Office	Owned	261,000
4. Asheville, North Carolina	Manufacturing R&E Warehouse Office	Owned	64,100
5. Sydney, Australia	Manufacturing R&E Warehouse Office	Owned	123,000
6. São Paulo, Brazil	Manufacturing R&E Warehouse Office	Owned	148,500
7. Cambridge, Ontario, Canada	Manufacturing Warehouse Office	Owned	73,300

**Table of Contents**

<b>Location</b>	<b>Use</b>	<b>Owned/Leased</b>	<b>Square Feet</b>
8. Andover, Hampshire, England	Manufacturing R&E Warehouse Office	Building Owned, Land Leased	89,400
9. Queretaro, Mexico	Manufacturing Warehouse Office	Owned	52,900
10. Beijing, China	Manufacturing Warehouse Office	Building Owned, Land Leased	61,000
11. Pietermaritzburg, South Africa	Manufacturing R&E Warehouse Office	Owned	73,100
12. Sevilla, Spain	Manufacturing R&E Warehouse Office	Owned	63,300
13. Bangkok, Thailand	Manufacturing Warehouse Office	Owned	60,400

**Item 3. Legal Proceedings**

From time to time, the Company may be subject to litigation incidental to its business. The Company is not a party to any pending legal proceedings that the Company believes would, individually or in the aggregate, have a material adverse effect on its financial condition, results of operations or cash flows.

**Item 4. Submission of Matters to a Vote of Security Holders**

No matter was submitted to a vote of the security holders of the Registrant during the quarter ended December 31, 2006.

**Executive Officers of the Registrant**

Each executive officer is elected by the Board of Directors, serves at its pleasure and holds office until a successor is appointed, or until the earliest of death, resignation or removal.

<b>Name</b>	<b>Age</b>	<b>Position</b>
Robert G. Ruhlman	50	Chairman, President and Chief Executive Officer
Eric R. Graef	54	Vice President Finance and Treasurer
William H. Haag	43	Vice President International Operations
J. Cecil Curlee Jr.	50	Vice President Human Resources
Dennis F. McKenna	40	Vice President Marketing and Business Development
Michael A. Fout	48	Vice President Manufacturing
David C. Sunkle	48	Vice President Research and Engineering
Caroline A. Saylor	40	General Counsel and Corporate Secretary

**Table of Contents**

The following sets forth the name and recent business experience for each person who is an executive officer of the Company at March 1, 2007.

Robert G. Ruhlman was elected Chairman in July 2004. Mr. Ruhlman has served as Chief Executive Officer since July 2000 and as President since 1995 (positions he continues to hold). He had served as Chief Operating Officer from 1995 until July 2000. Mr. Ruhlman is the brother of Randall M. Ruhlman and son of Barbara P. Ruhlman, both Directors of the Company.

Eric R. Graef was elected Vice President Finance and Treasurer in December 1999.

William H. Haag was elected Vice President International Operations in April 1999.

J. Cecil Curlee Jr. was hired in 1982 in the position of Personnel Manager at the Albemarle, North Carolina facility. He was promoted to Director of Employee Relations in September 2002 and was elected Vice President Human Resources in January 2003.

Dennis F. McKenna was elected Vice President Marketing and Business Development in April 2004. Mr. McKenna joined the Company in 1993 as a sales engineer and has served in various international and domestic product management, operations, and general management roles within the Company.

Michael A. Fout was elected Vice President Manufacturing in April 2005. Mr. Fout joined the Company in 2000 as Manager Manufacturing Engineering and has led the Company's Lean Manufacturing initiatives since that time.

David C. Sunkle was elected Vice President-Research and Engineering in January 2007. Mr. Sunkle joined the Company in 1978. He has served a variety of positions in Research and Engineering until 2002 when he became Director of International Operations. In 2006, Mr. Sunkle rejoined Research and Engineering as the Director of Engineering.

Caroline A. Saylor was elected General Counsel and Corporate Secretary in January 2007. Ms. Saylor joined the Company in 2005 as General Counsel and has led the Company's legal affairs since that time. Prior to that time, Ms. Saylor worked as an attorney for The Timken Company from 2003 to 2005, and in the litigation department of Calfee, Halter and Griswold from 2000 to 2003.

**Part II**

**Item 5. Market for Registrant's Common Shares and Related Shareholder Matters**

The Company's Common Shares are traded on NASDAQ under the trading symbol PLPC. As of March 12, 2007, the Company had approximately 1,205 shareholders of record. The following table sets forth for the periods indicated (i) the high and low closing sale prices per share of the Company's Common Shares as reported by the NASDAQ and (ii) the amount per share of cash dividends paid by the Company.

While the Company expects to continue to pay dividends of a comparable amount in the near term, the declaration and payment of future dividends will be made at the discretion of the Company's Board of Directors in light of then current needs of the Company. Therefore, there can be no assurance that the Company will continue to make such dividend payments in the future.

**Table of Contents**

Quarter	High	Year ended December 31				2005 Low	Dividend
		2006 Low	Dividend	High	2006 High		
First	\$45.58	\$31.74	\$0.20	\$34.35	\$28.85	\$0.20

November			51,646	48,354
December			51,646	48,354

**Total**

On December 16, 2004, the Company announced the Board of Directors authorized a plan to repurchase up to 100,000 of Preformed Line Products common shares. The repurchase plan does not have an expiration date. During the fourth quarter of 2006, the Company did not repurchase any of its common shares under this plan. The remaining shares that may be purchased under this plan were 48,354 during the fourth quarter of 2006. On February 15, 2007, the Board of Directors authorized a plan to repurchase up to 200,000 shares of Preformed Line Products Company, superseding any previously authorized plan, including the December 2004 plan that is the subject of the table above.

**Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations**

The following discussion and analysis should be read in conjunction with the Consolidated Financial Statements and related Notes To Consolidated Financial Statements included in Item 8 in this report. The discussion and analysis is relevant to our historical results of operations, which reports consolidated results including two segments, Domestic and Foreign.

**Table of Contents****Market Overview**

Domestically our business continues to be concentrated in the communications and energy markets. During 2006, industry consolidation continued as distributors and service provider consolidations took place in all of our major markets.

In our communications markets, which consist of telecommunications, cable television (CATV) and data communication, telecommunication companies continued to curtail their investment in the construction and maintenance of copper networks while diverting some of these resources into Fiber-to-the-Premise (FTTP) projects. Purchasing patterns for FTTP material stabilized in 2006 as service providers worked off the inventory built up during 2005. Sales of products for the CATV markets were negatively impacted as service providers continued to delay investment in infrastructure improvements. Sales into the data communications market were flat. As a result, our sales to the overall communications market decreased in 2006. We anticipate growth in the level of activity related to fiber network build-outs in 2007 and renewed investment in the CATV market. We expect data communications sales to remain flat and investment in the copper network will continue to decline.

In 2006, we experienced growth in our domestic energy markets. We believe the investment in new transmission and distribution grids, new technologies, and upgrading and maintenance of the existing energy infrastructure will continue to increase over the next five years. We continue to introduce new transmission and distribution products to satisfy this anticipated growth.

Our foreign business is more concentrated in the energy markets. Historically, our foreign sales were primarily to the distribution portion of the energy market. In 2006, we continued to increase our energy distribution sales while also experiencing significant sales growth in the energy transmission market. We expect that growth in the energy markets will continue for the foreseeable future not only as new construction projects are added in developing markets but, as in the domestic markets, there is a need to rebuild and refurbish much of the foreign energy transmission and distribution infrastructure. We believe that we are positioned to supply the needs of the world's diverse energy market requirements as a result of our strategically located operations and array of product designs and technologies.

**Preface**

Sales increased 5% in 2006 on the strength of our foreign operations. The impact of rising material costs partially softened the full impact of the sales increase resulting in only a 4% increase in gross profit. Costs and expenses increased 7% with the result being a decrease in operating income of \$1.2 million from 2005. However, a more favorable effective tax rate in 2006 resulted in a small increase in net income.

**2006 Results of Operations compared to 2005**

In 2006, net sales were \$216.9 million, an increase of \$11.1 million, or 5%, from 2005. In 2006, domestic net sales of \$111.4 million decreased \$3.9 million, or 3%, from 2005 sales and our foreign net sales of \$105.5 million increased \$15 million, or 17%. Domestic net sales accounted for 51% of our consolidated net sales. Our domestic sales decrease was due primarily to a volume decrease partially offset by an improvement in price and mix. Our top ten domestic customers represent less than 50% of our domestic net sales. We anticipate that our 2007 sales in the domestic energy and communication markets will increase. We achieved record sales in our foreign segment in 2006 due primarily to volume. Foreign net sales in 2006 were favorably impacted by \$2.8 million, or 2.5%, when converted to U.S. dollars, as the result of a weaker U.S. dollar to certain foreign currencies. Our top ten foreign customers accounted for less than 30% of our foreign net sales. We believe our foreign net sales will continue to increase in 2007 but at a slower pace than we experienced in 2006 as a result of continued competitive pricing pressures.

Gross profit of \$69.8 million for 2006 increased \$2.4 million, or 4%, compared to 2005. Domestic gross profit of \$33 million decreased \$3.5 million, or 10% due primarily to \$1.7 million related to lower net sales, a \$1.1 million increase in product cost and mix coupled with a \$.7 million increase in freight and depreciation expenses. Foreign gross profit of \$36.8 million increased \$5.9 million, or 19%. The favorable impact resulting from converting native currency to U.S. dollars was \$.8 million with the remaining increase due primarily to the increase in sales when compared to 2005. Higher material costs in our foreign markets were offset by lower manufacturing expenses as a

**Table of Contents**

percentage of sales. We anticipate raw material cost increases to continue in 2007.

Costs and expenses increased \$3.4 million, or 7%, compared to 2005 as summarized in the following table:

<i>(thousands of dollars)</i>	Year ended December 31			% Change
	2006	2005	Change	
Costs and expenses				
Domestic:				
Selling	\$ 14,666	\$ 14,274	\$ 392	3%
General and administrative	13,585	12,931	654	5
Research and engineering	5,258	4,702	556	12
Other operating (income) expense net	(17)	452	(469)	NM*
	33,492	32,359	1,133	4
Foreign:				
Selling	7,817	7,391	426	6
General and administrative	10,308	9,461	847	9
Research and engineering	2,401	1,998	403	20
Other operating (income) expense net	404	(233)	637	NM*
	20,930	18,617	2,313	12
Total	\$ 54,422	\$ 50,976	\$ 3,446	7%

\* NM Not Meaningful

Domestic costs and expenses of \$33.5 million increased \$1.1 million, or 4%. The increase in domestic selling expense was primarily due to a \$.4 million increase in personnel expenses, a \$.2 million increase in travel expenses and a \$.1 million increase in sales promotional expense partially offset by a \$.3 million reduction in commission expense on lower net sales. General and administrative expense and research and engineering expense both increased primarily due to increases in personnel expenses. Other operating income improved as a result of a gain on the sale of land, a decrease in the loss on foreign currency transactions and an increase in restocking charges.

Foreign costs and expenses of \$20.9 million increased \$2.3 million, or 12%. The weaker dollar unfavorably impacted costs and expenses by \$.5 million when foreign costs in local currency were translated to U.S. dollars. Additionally, selling expense increased as a result of increased personnel expenses. General and administrative expense increased primarily due to a \$.4 million increase in personnel expenses, and increases in professional services and facility maintenance expenses. Research and engineering expense increased as a result of increased personnel expenses. Other operating expense increased as a result of a \$.4 million increase in the loss on foreign currency transactions, and increases in the loss on the disposal of capital assets and other miscellaneous charges.

Royalty income of \$1.3 million decreased \$.1 million as a result of lower data communications royalties compared to 2005.

Operating income of \$16.7 million for the year ended December 31, 2006 decreased \$1.2 million, or 7%, compared to 2005. This decrease was primarily a result of a \$2.4 million increase in gross profit being more than offset by the \$3.4 million increase in costs and expenses and a \$.1 million reduction in royalty income. Domestic operating income decreased \$4 million primarily as a result of a \$3.5 million decrease in gross profit, a \$1.1 million increase in costs

and expenses and a \$.1 million decrease in data communications royalty income being partially offset by a \$.8 million increase in intercompany royalty income. Foreign operating income of \$11.8 million increased \$2.8 million as a result of a \$5.9 million increase in gross profit partially offset by a \$2.3 million increase in costs and expenses and a \$.8 million increase in intercompany royalty expense.

**Table of Contents**

Other income for the year ended December 31, 2006 of \$.8 million improved \$.2 million compared to 2005 as a result of an increase in interest income net of interest expense.

Income taxes for the year ended December 31, 2006 of \$5.5 million were \$1 million lower than the previous year. The effective tax rate in 2006 on income before income taxes was 31% compared to 35% in 2005. The 2006 effective tax rate is lower than the 34% statutory rate primarily as a result of a reduction in the valuation allowance related to foreign tax credit carryforwards.

As a result of the preceding items, net income for the year ended December 31, 2006 was \$12.1 million, or \$2.13 per diluted share, which represents an increase of \$.1 million or \$.06 per diluted share, compared to net income of \$12 million or \$2.07 per diluted share in 2005.

**2005 Results of Operations compared to 2004**

In 2005, consolidated net sales were \$205.8 million, an increase of \$22.7 million, or 12%, from 2004. Domestic net sales in 2005 of \$115.3 million increased \$8.3 million, or 8%. The domestic increase was primarily due to volume increases in the energy and communications markets. Foreign net sales in 2005 of \$90.5 million increased \$14.4 million, or 19%. Foreign net sales were favorably impacted by \$4.9 million, or 6%, when converted to U.S. dollars, as a result of the weaker U.S. dollar compared to most foreign currencies. Our foreign net sales increased in all markets throughout the world.

Gross profit of \$67.4 million for 2005 increased \$7.9 million, or 13%, compared to 2004. Domestic gross profit of \$36.5 million increased \$3.2 million, or 10%. Domestic gross profit increased \$2.6 million primarily due to increased sales and product mix and \$.6 million due to lower per unit manufacturing costs. The lower per unit manufacturing costs are a result of fixed expenses being spread over more sales. Foreign gross profit of \$30.9 million increased by \$4.7 million, or 18%. The favorable impact resulting from converting native currency to U.S. dollars was \$1.5 million with the remaining increase due to the increase in sales when compared to 2004.

Costs and expenses increased \$5.4 million, or 12%, compared to 2004, as summarized in the following table:

<i>(thousands of dollars)</i>	Year ended December 31			% Change
	2005	2004	Change	
Costs and expenses				
Domestic:				
Selling	\$ 14,274	\$ 12,621	\$ 1,653	13%
General and administrative	12,931	12,967	(36)	0
Research and engineering	4,702	4,032	670	17
Other operating (income) expense net	452	(166)	618	NM*
	32,359	29,454	2,905	10

Research and engineering	1,998	1,634	364	22
Other operating income net	(233)	(68)	(165)	NM*
	18,617	16,118	2,499	16
Total	\$ 50,976	\$ 45,572	\$ 5,404	12%

\* NM Not  
Meaningful

**Table of Contents**

Domestic costs and expenses of \$32.4 million increased \$2.9 million, or 10%. Domestic selling expense increased primarily as a result of a \$.6 million increase in commissions on higher sales, a \$.4 million increase in advertising and sales promotion expense, a \$.4 million increase in personnel expenses and a \$.2 million increase in travel related expenses. General and administrative expense remained relatively unchanged as a \$.6 million increase in costs related to complying with the Sarbanes-Oxley Act of 2002 was principally offset by a reduction in personnel expenses. Research and engineering expense increased \$.7 million primarily as a result of a \$.6 million increase in development supplies and services and a \$.1 million increase in personnel expenses. Other operating expense increased \$.6 million primarily due to a \$.4 million increase in losses on foreign currency transactions and a reduction of \$.2 million on the gain on sale of property.

Foreign costs and expenses of \$18.6 million increased \$2.5 million, or 16%. The weaker dollar unfavorably impacted costs and expenses by \$1 million when foreign costs in local currency were translated to U.S. dollars. Additionally, selling expense increased \$.4 million as a result of an increase in commissions on higher sales and a \$.2 million increase in personnel expenses. General and administrative expense increased \$.8 million primarily as a result of \$.5 million in expenses related to complying with the Sarbanes-Oxley Act of 2002 and a \$.3 million increase in personnel expenses. Research and engineering expense increased \$.3 million due primarily to an increase in personnel expenses. Other operating income increased \$.2 million primarily due to a decrease in losses on foreign currency transactions.

Royalty income of \$1.4 million decreased by \$.4 million as a result of lower data communication royalties compared to 2004. Our aggressive pursuit of our intellectual property rights resulted in a significant settlement in 2004.

Operating income of \$17.9 million for the year ended December 31, 2005 increased \$2.1 million compared to the previous year. This increase was primarily a result of an increase in gross profit of \$7.9 million partially offset by a \$5.4 million increase in costs and expenses and a \$.4 million decrease in royalty income. Domestic operating income increased \$.1 million as a result of \$3.2 million higher gross profit partially offset by a \$2.9 million increase in costs and expenses and a \$.2 million decrease in royalty income. Foreign operating income of \$9 million increased \$1.9 million primarily as a result of \$4.7 million higher gross profit partially offset by a \$2.5 million increase in costs and expenses, and a \$.3 million increase in intercompany royalty expense.

Other income for the year ended December 31, 2005 of \$.6 million improved \$.5 million compared to 2004. This increase is primarily due to a \$.5 million increase in interest income, net of interest expense, as a result of higher cash balances.

Income taxes for the year ended December 31, 2005 of \$6.5 million were \$1.3 million higher than the prior year. The effective tax rate in 2005 on income before income taxes was 35% compared to 29% in 2004. The 2004 effective tax rate is lower than the 35% statutory federal rate primarily as a result of the American Jobs Creation Act of 2004 allowing us to adjust our valuation allowance related to foreign tax credit carryforwards. The tax laws of China entitle us to a preferential tax rate of a 50% tax reduction for the succeeding three years beginning in 2003. The favorable aggregate tax and per share effect was less than \$.1 million or \$.01 per share for the years ended December 31, 2005 and 2004.

Equity in net income of joint ventures decreased \$2.4 million compared to 2004. We sold our interest in Japan PLP Co. Ltd. in 2004 for a pre-tax gain of \$2.3 million, which is included in Equity in net income of joint ventures (\$1.7 million gain net of tax). We no longer have an investment in any joint venture.

As a result of the preceding items, net income for the year ended December 31, 2005 was \$12 million, or \$2.07 per diluted share, which represents a decrease of \$1 million, or \$0.18 per diluted share, compared to net income of \$13 million, or \$2.25 per diluted share in 2004.

**Working Capital, Liquidity and Capital Resources**

Cash decreased \$9.6 million for the year ended December 31, 2006. Net cash provided by operating activities was \$14.8 million. The major uses of cash were purchase of common shares of \$12.1 million, capital expenditures of \$10.2 million and dividends of \$4.5 million.

**Table of Contents**

Net cash provided by operating activities decreased \$6.8 million compared to 2005 primarily as a result of an increase in working capital to support higher sales.

Net cash used in investing activities of \$9.9 million represents an increase of \$2.1 million when compared to cash used in investing activities in 2005. Capital expenditures in 2006 were \$2.5 million greater than 2005. During 2006, we received \$.3 million greater proceeds from the sale of property and equipment when compared to 2005.

Cash used in financing activities was \$15.2 million compared to \$2.9 million in the previous year. This increase was primarily a result of an \$11.5 million repurchase of 365,311 Common Shares from a principal shareholder.

We have commitments under operating leases primarily for office and manufacturing space, transportation equipment, office and computer equipment and capital leases primarily for equipment. One such lease is for our aircraft with a lease commitment through April 2012. Under the terms of the lease, we maintain the risk for the residual value in excess of the market value of the aircraft. At the present time, we believe our risks, if any, to be immaterial because the estimated market value of the aircraft approximates its residual value.

Our financial position remains strong and our current ratio at December 31, 2006 and 2005 was 3.2:1. Working capital of \$72.1 million has decreased from the December 31, 2005 amount of \$75.7 million primarily due to \$9.6 million less cash on hand partially offset by a \$3.5 million increase in receivables and a \$2.8 million increase in inventories. At December 31, 2006, our unused balance under our main credit facility was \$20 million and our bank debt to equity percentage was 6%. The revolving credit agreement contains, among other provisions, requirements for maintaining levels of working capital, net worth, and profitability. At December 31, 2006, we were in compliance with these covenants. We believe our future operating cash flows will be more than sufficient to cover debt repayments, other contractual obligations, capital expenditures and dividends. In addition, we believe our existing cash position, together with our untapped borrowing capacity, provides substantial financial resources. If we were to incur significant additional indebtedness, we expect to be able to meet liquidity needs under the credit facilities but at an increased cost for interest and commitment fees. We do not believe we would increase our debt to a level that would have a material adverse impact upon results of operations or financial condition.

Contractual obligations and other commercial commitments are summarized in the following tables:

Contractual Obligations <i>Thousands of dollars</i>	Total	Payments Due by Period			
		Less than 1 year	1-3 years	4-5 years	After 5 years
Long-term debt (A)	\$ 4,808	\$2,353	\$1,366	\$ 707	\$ 382
Leases	15,800	973	1,803	1,683	11,341
Purchase commitments	2,632	2,632			
Pension contribution (B)	506	506			

Other Commercial Commitments <i>Thousands of dollars</i>	Total	Amount of Commitment Expiration by Period			
		Less than 1 year	1-3 years	4-5 years	After 5 years
Letters of credit	\$ 4,512	\$4,396	\$ 116	\$	\$
Guarantees	432	238	170		24

(A) Interest on long-term debt is included in the table at interest rates from 5.8% to 6.8% based on the variable interest rates in effect at December 31, 2006.

**Table of Contents**

(B) Amount represents the expected contribution to the Company's defined benefit pension plan in 2007. Future expected amounts have not been disclosed as such amounts are subject to change based on performance of the assets in the plan as well as the discount rate used to determine the obligation.

**Critical Accounting Policies and Estimates**

Our discussion and analysis of our financial condition and results of operations are based upon the consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States. The preparation of these consolidated financial statements requires us to make estimates and judgments that affect the reported amount of assets and liabilities, revenues and expenses and related disclosure of contingent assets and liabilities at the date of the consolidated financial statements. Actual results may differ from these estimates under different assumptions or conditions.

Critical accounting policies are defined as those that are reflective of significant judgment and uncertainties, and potentially may result in materially different outcomes under different assumptions and conditions.

**Allowance for Doubtful Accounts**

We maintain an allowance for doubtful accounts for estimated losses resulting from the inability of our customers to make required payments. We record estimated allowances for uncollectible accounts receivable based upon the number of days the accounts are past due, the current business environment, and specific information such as bankruptcy or liquidity issues of customers. If the financial condition of our customers were to deteriorate, resulting in an impairment of their ability to make payments, additional allowances may be required. During 2006, we recorded a provision for doubtful accounts of \$.4 million. The allowance represented approximately 2% of our trade receivables at December 31, 2006 and 2005.

**Excess and Obsolescence Reserves**

We have provided an allowance for excess inventory and obsolescence based on estimates of future demand, which is subject to change. Additionally, discrete provisions are made when facts and circumstances indicate that particular inventories will not be utilized. At December 31, 2006, the allowance for excess inventory and obsolescence was 9% of gross inventories, compared to 6% of gross inventories at December 31, 2005. If actual market conditions are different than those projected by management, additional inventory write-downs or reversals of existing reserves may be necessary.

**Impairment of Long-Lived Assets**

We record impairment losses on long-lived assets used in operations when events and circumstances indicate that the assets might be impaired and the discounted cash flows estimated to be generated by those assets are less than the carrying value of those items. Our cash flows are based on historical results adjusted to reflect the best estimate of future market and operating conditions. The net carrying value of assets not recoverable is then reduced to fair value. The estimates of fair value represent the best estimate based on industry trends and reference to market rates and transactions.

**Goodwill**

We perform our annual impairment test for goodwill and intangibles with indefinite lives utilizing a discounted cash flow methodology, market comparables, and an overall market capitalization reasonableness test in computing fair value by reporting unit. We then compare the fair value of the reporting unit with its carrying value to assess if goodwill and other indefinite life intangibles have been impaired. Based on the assumptions as to growth, discount rates and the weighting used for each respective valuation methodology, results of the valuations could be significantly changed. However, we believe that the methodologies and weightings used are reasonable and result in appropriate fair values of the reporting units.

**Table of Contents**

Our measurement date for our annual impairment test is January 1 of each year. We perform interim impairment tests if trigger events or changes in circumstances indicate the carrying amount may not be recoverable. There were no trigger events during 2006, 2005 or 2004 and as such only an annual impairment test was performed.

**Deferred Tax Assets**

Deferred taxes are recognized at currently enacted tax rates for temporary differences between the financial reporting and income tax bases of assets and liabilities and operating loss and tax credit carryforwards. We established a valuation allowance to record our deferred tax assets at an amount that is more likely than not to be realized. In the event we were to determine that we would be able to realize our deferred tax assets in the future in excess of their recorded amount, an adjustment to the valuation allowance would increase income in the period such determination was made. Likewise, should we determine that we would not be able to realize all or part of our net deferred tax assets in the future, an adjustment to the valuation allowance would be charged to expense in the period such determination was made.

**New Accounting Pronouncements**

In November 2004, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standards (SFAS) No. 151, *Inventory Costs*, to clarify the accounting for abnormal amounts of idle facility expense, freight, handling costs and wasted material. This standard requires that such items be recognized as current-period charges. The standard also establishes the concept of *normal capacity* and requires the allocation of fixed production overhead to inventory based on the normal capacity of the production facilities. Any unallocated overhead must be recognized as an expense in the period incurred. The Company adopted this standard effective January 1, 2006, and the impact was immaterial on its consolidated financial statements.

Effective January 1, 2006, the Company adopted SFAS No. 123 (Revised 2004), *Share-Based Payment* (SFAS No. 123R). SFAS No. 123R affects the value of stock options that have been granted and requires the Company to expense share-based payment awards with compensation cost for transactions measured at fair value. For the year ended December 31, 2006 the Company recorded compensation costs related to the stock options currently vesting, reducing income before taxes and net income by \$.2 million, or \$.04 per diluted share. The Company adopted the modified-prospective-transition method and accordingly has not restated the amounts in prior periods.

In June 2006, the FASB issued FASB interpretation No. 48, *Accounting for Uncertainty in Income taxes* an interpretation of FASB Statement No. 109, *Accounting for Income Taxes*. This interpretation prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. This interpretation also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure, and transition. This interpretation is effective for the Company starting January 1, 2007. Upon adoption, the Company estimates that a cumulative effect adjustment of approximately \$1.1 million to \$1.3 million will be charged to retained earnings to increase reserves for uncertain tax positions, which is subject to revision as the Company completes its analysis.

In September 2006, the FASB issued SFAS No. 157, *Fair Value Measurements*. This standard defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles and expands disclosures about fair value measurements. This standard does not require new fair value measurements; however the application of this standard may change current practice for an entity. This standard is effective for financial statements issued for fiscal years beginning after November 15, 2007 and interim periods within those fiscal periods. The Company is evaluating the impact this standard will have on its consolidated financial statements.

In September 2006, the FASB issued SFAS No. 158, *Employers Accounting for Defined Benefit Pension and Other Postretirement Plans*. This standard requires an employer to recognize the overfunded or underfunded status of a defined benefit postretirement plan as an asset or liability in its statement of financial position and to recognize changes in the funded status in the year in which the changes occur through comprehensive income. This standard also requires an employer to measure the funded status of a plan as of the date of its year-end statement of financial position. This standard also requires disclosure in the notes to financial statements, additional information about certain effects on net periodic benefit cost for the next fiscal year that arise from delayed recognition of the

**Table of Contents**

gains or losses, prior service costs or credits, and transition asset or obligation. The requirement to initially recognize the funded status of a defined benefit postretirement plan and to provide the required disclosures is effective for an employer with publicly traded equity securities as of the end of the fiscal year ending after December 15, 2006. The requirement to measure plan assets and benefit obligations as of the date of the employer's fiscal year-end statement of financial position is effective for fiscal years ending after December 15, 2008. The required December 31, 2006 disclosures are included in the Notes To Consolidated Financial Statements. Adoption of this standard resulted in a decrease of \$2.3 million in Accumulated Other Comprehensive Income.

In September 2006, the FASB issued FASB Staff Position AUG AIR-1, Accounting for Planned Major Maintenance Activities. This staff position amends certain provisions in the AICPA Industry Audit Guide, Audits of Airlines (Airline Guide), and APB No. 28, Interim Financial Reporting. This staff position prohibits the use of the accrue-in-advance method of accounting for planned major maintenance activities in annual and interim financial reporting periods. This staff position is effective as of January 1, 2007. The Company will adopt the direct expense method effective January 1, 2007, and will record a cumulative effect increasing beginning retained earnings by \$.2 million, or \$.04 per diluted share.

In September 2006, the FASB issued Emerging Issues Task Force (EITF) abstract Issue No. 06-5, Accounting for Purchases of Life Insurance - Determining the Amount that Could be Realized in Accordance with FASB Technical Bulletin No. 85-4. This issue clarifies the calculation of the amount that could be realized under an insurance contract as of the date of the statement of financial position. This issue concludes that the policyholder should consider any additional amounts included in contractual terms of the policy in determining the amount that could be realized under the insurance contract. Contractual limitations should be considered, as well as the amount recoverable by the policyholder at the discretion of the insurance company should be excluded from the amount that could be realized. All fixed amounts recoverable by the policyholder in future periods in excess of one year from the surrender of the policy should be recognized at their present values. Last, any amount that is realized by the policyholder upon surrender of the final policy shall be included in the amount that could be realized. This issue should be applied by either a change in accounting principle through a cumulative-effect adjustment to retained earnings or to other components of equity or net assets or a change in accounting principle through retrospective application to all prior periods. This issue is effective for fiscal years beginning after December 15, 2006. The Company is evaluating the impact this EITF issue will have on its consolidated financial statements.

In September 2006, the Securities and Exchange Commission issued Staff Accounting Bulletin No. 108 (SAB 108) to provide interpretive guidance on the considerations of the effects of prior year misstatements in qualifying current year misstatements for the purpose of materiality assessment. If a material misstatement exists after recording the adjustment in the current year financial statements, the prior year financial statements should be corrected, even though such revision previously was and continues to be immaterial to the prior year financial statements. This bulletin is effective for years ending after November 15, 2006. Effective December 31, 2006, the Company adopted SAB 108 which did not have a material effect on its consolidated financial statements.

In February 2007, the FASB issued SFAS No. 159, The Fair Value Option for Financial Assets and Financial Liabilities Including and Amendment to FAS No. 115. This standard permits entities to measure certain financial instruments and other certain items at fair value. The fair value option established by this standard permits all entities to choose to measure eligible items at fair value at specified election dates. A business entity shall report unrealized gains and losses on items for which the fair values option has been elected at each subsequent reporting period. The fair value option election is irrevocable, unless a new election date occurs. SFAS No. 159 establishes presentation and disclosure requirements to help financial statement users understand the effect of the entity's election on earnings, but does not eliminate disclosure requirements of other accounting standards. This standard is effective as of the beginning of the first fiscal year that begins after November 15, 2007. The Company is evaluating the impact this standard will have on its consolidated financial statements.

**Item 7A. Quantitative and Qualitative Disclosures About Market Risk**

The Company operates manufacturing facilities and offices around the world and uses fixed and floating rate debt to finance the Company's global operations. As a result, the Company is subject to business risks inherent in non-U.S. activities, including political and economic uncertainty, import and export limitations and market risk related to

changes in interest rates and foreign currency exchange rates. The Company believes the political and

**Table of Contents**

economic risks related to the Company's foreign operations are mitigated due to the stability of the countries in which the Company's largest foreign operations are located.

The Company has no foreign currency forward exchange contracts outstanding at December 31, 2006. The Company does not hold derivatives for trading purposes.

The Company is exposed to market risk, including changes in interest rates. The Company is subject to interest rate risk on its variable rate revolving credit facilities and term notes, which consisted of borrowings of \$8.1 million at December 31, 2006. A 100 basis point increase in the interest rate would have resulted in an increase in interest expense of approximately \$.1 million for the year ended December 31, 2006.

The Company's primary currency rate exposures are related to foreign denominated debt, intercompany debt, forward exchange contracts, foreign denominated receivables and cash and short-term investments. A hypothetical 10% change in currency rates would have a favorable/unfavorable impact on fair values of \$1.7 million and on income before tax of less than \$.1 million.

**Item 8. Financial Statements and Supplementary Data**

**MANAGEMENT'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING**

The management of the Company is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Exchange Act Rules 13a-15(f) and 15d-15(f). The Company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and preparation of the consolidated financial statements in accordance with generally accepted accounting principles.

Because of inherent limitations, internal control over financial reporting may not prevent or detect misstatements and even when determined to be effective, can only provide reasonable assurance with respect to financial statement preparation and presentation.

Management, with the participation of the Company's principal executive officer and principal financial officer, assessed the effectiveness of the Company's internal control over financial reporting as of December 31, 2006. In making this assessment, management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in *Internal Control - Integrated Framework*. Based on our assessment, management has concluded that the Company's internal control over financial reporting was effective as of December 31, 2006.

Management's assessment of the effectiveness of the Company's internal control over financial reporting as of December 31, 2006 has been audited by Deloitte & Touche LLP, an independent registered public accounting firm, who expressed an unqualified opinion as stated in their report, a copy of which is included herein.

**REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM**

To the Board of Directors and Shareholders of  
Preformed Line Products Company

We have audited management's assessment, included in the accompanying Management's Report on Internal Control Over Financial Reporting that Preformed Line Products Company and its subsidiaries (the Company) maintained effective internal control over financial reporting as of December 31, 2006, based on the criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission. The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting. Our responsibility is to express an opinion on management's assessment and an opinion on the effectiveness of the Company's internal control over financial reporting based on our audit.

**Table of Contents**

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, evaluating management's assessment, testing and evaluating the design and operating effectiveness of internal control, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinions. A company's internal control over financial reporting is a process designed by, or under the supervision of, the company's principal executive and principal financial officers, or persons performing similar functions, and effected by the company's board of directors, management, and other personnel to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of the inherent limitations of internal control over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may not be prevented or detected on a timely basis. Also, projections of any evaluation of the effectiveness of the internal control over financial reporting to future periods are subject to the risk that the controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, management's assessment that the Company maintained effective internal control over financial reporting as of December 31, 2006, is fairly stated, in all material respects, based on the criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2006, based on the criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated financial statements as of and for the year ended December 31, 2006 of the Company and our report dated March 15, 2007 expressed an unqualified opinion on those financial statements and included an explanatory paragraph regarding the Company's adoption of new accounting standards.

/s/ Deloitte & Touche LLP

Cleveland, Ohio

**REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM**

To the Board of Directors and Shareholders of  
Preformed Line Products Company

We have audited the accompanying consolidated balance sheets of Preformed Line Products Company and its subsidiaries (the Company) as of December 31, 2006 and 2005, and the related consolidated statements of operations, shareholders' equity, and cash flows for each of the three years in the period ended December 31, 2006. Our audits also included the financial statement schedule listed in the Index at Item 15(a). These financial

**Table of Contents**

statements and financial statement schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on the financial statements and financial statement schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such consolidated financial statements present fairly, in all material respects, the financial position of Preformed Line Products Company and subsidiaries as of December 31, 2006 and 2005, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2006, in conformity with accounting principles generally accepted in the United States of America. Also, in our opinion, such financial statement schedule, when considered in relation to the basic consolidated financial statements taken as a whole, presents fairly, in all material respects, the information set forth therein.

As discussed in Notes A and G to the consolidated financial statements, the Company changed its method of accounting for stock-based compensation with the adoption of Statement of Financial Accounting Standards ( SFAS ) No. 123R, Share-Based Payment effective January 1, 2006. Also, as discussed in Notes A and C to the consolidated financial statements, the Company changed its method of accounting for defined benefit pension and other postretirement plans with the adoption of SFAS No. 158, Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans effective December 31, 2006.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the effectiveness of the Company's internal control over financial reporting as of December 31, 2006, based on *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated March 15, 2007 expressed an unqualified opinion on management's assessment of the effectiveness of the Company's internal control over financial reporting and an unqualified opinion on the effectiveness of the Company's internal control over financial reporting.

**Table of Contents**

**PREFORMED LINE PRODUCTS COMPANY  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

**(Tables in thousands of dollars, except share and per share data, unless specifically noted)**

**Note A Significant Accounting Policies**

*Nature of Operations*

Preformed Line Products Company and subsidiaries ( the Company ) is a designer and manufacturer of products and systems employed in the construction and maintenance of overhead and underground networks for the energy, telecommunication, cable operators, data communication and other similar industries. The Company s primary products support, protect, connect, terminate and secure cables and wires. The Company also manufactures a line of products serving the voice and data transmission markets. The Company s customers include public and private energy utilities and communication companies, cable operators, financial institutions, governmental agencies, original equipment manufacturers, contractors and subcontractors, distributors and value-added resellers. The Company serves its worldwide markets through strategically located domestic and international manufacturing facilities.

*Consolidation*

The consolidated financial statements include the accounts of the Company and its subsidiaries where ownership is greater than 50%. All intercompany accounts and transactions have been eliminated upon consolidation.

*Cash and Cash Equivalents*

Cash equivalents are stated at fair value and consist of highly liquid investments with original maturities of three months or less at the time of acquisition.

*Inventories*

The Company uses the last-in, first-out (LIFO) method of determining cost for the majority of its material portion of inventories in the United States. All other inventories are determined by the first-in, first-out (FIFO) method. Inventories are carried at the lower of cost or market.

*Fair Value of Financial Instruments*

The Company s financial instruments include cash and cash equivalents, accounts receivable, accounts payable, notes payable and debt. The carrying amount of all financial instruments approximates fair value.

*Property, Plant, and Equipment and Depreciation*

Property, plant, and equipment is recorded at cost. Depreciation for the Company s domestic assets is computed using accelerated methods over the estimated useful lives, with the exception of personal computers which are depreciated over three years using the straight line method. Depreciation for the Company s foreign assets is computed using the straight line method over the estimated useful lives. The estimated useful lives used are: land improvements, ten years; buildings, forty years; and machinery and equipment, three to ten years.

*Long-Lived Assets*

The Company records impairment losses on long-lived assets used in operations when events and circumstances indicate that the assets might be impaired and the discounted cash flows estimated to be generated by those assets are less than the carrying value of those items. The Company s cash flows are based on historical results adjusted to reflect the best estimate of future market and operating conditions. The net carrying value of assets not recoverable is then reduced to fair value. The estimates of fair value represent the best estimate based on industry trends and reference to market rates and transactions.

**Table of Contents**

*Goodwill and Other Intangibles*

Goodwill and intangible assets deemed to have indefinite lives are not amortized but are subject to annual impairment tests. The Company's measurement date for its annual impairment test is January 1 of each year. Patents and other intangible assets with finite lives represent primarily the value assigned to patents acquired, with purchased businesses and are amortized using the straight-line method over their useful lives. Goodwill and other intangible assets are reviewed for impairment whenever events or changes in circumstances indicate the carrying amount may be impaired, or in the case of finite lived intangible assets, when the carrying amount may not be recoverable. Events or circumstances that would result in an impairment review primarily include operations reporting losses or a significant change in the use of an asset. Impairment charges are recognized pursuant to Statement of Financial Accounting Standards (SFAS) No. 142.

*Sales Recognition*

Sales are recognized when products are shipped and the title and risk of loss has passed to unaffiliated customers. Shipping and handling billed-to customers is included in net sales while shipping and handling costs are included in cost of products sold.

*Research and Development*

Research and development costs are expensed as incurred. The Company sponsored costs for research and development of new products were \$3.2 million in 2006 and \$2.6 million in 2005 and 2004.

*Advertising*

Advertising costs are expensed in the period incurred.

*Foreign Currency Translation*

Asset and liability accounts are translated into U.S. dollars using exchange rates in effect at the date of the consolidated balance sheet; and revenues and expenses are translated at weighted average exchange rates in effect during the period. Transaction gains and losses arising from exchange rate changes on transactions denominated in a currency other than the functional currency are included in income and expense as incurred. Such transactions have not been material. Unrealized translation adjustments are recorded as accumulated foreign currency translation adjustments in shareholders' equity. Upon the sale or upon substantially complete liquidation of an investment in a foreign entity, the cumulative translation adjustment for that entity is removed from accumulated foreign currency translation adjustment in shareholders' equity and reclassified to earnings.

*Use of Estimates*

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from these estimates.

*Derivative Financial Instruments*

The Company had no foreign currency forward exchange contracts outstanding at December 31, 2006 and 2005. The Company does not hold derivatives for trading purposes.

**Table of Contents***Stock-Based Compensation*

Effective January 1, 2006, the Company adopted SFAS No. 123 (Revised 2004), Share-Based Payment (SFAS No. 123R). SFAS No. 123R affects the value of stock options that have been granted and requires the Company to expense share-based payment awards with compensation cost for transactions measured at fair value. The Company adopted the modified-prospective-transition method and accordingly has not restated amounts in prior periods.

Prior to the adoption of the SFAS No. 123R, the Company applied the intrinsic value based method prescribed in APB Opinion No. 25, Accounting for Stock Issued to Employees, to account for stock options granted to employees to purchase common shares. Under this method, compensation expense was measured as the excess, if any, of the market price at the date of grant over the exercise price of the options. No compensation expense has been recorded because the exercise price was equal to market value at the date of grant. The following table illustrates the effect on net income and net income per share for the years ended December 31, 2005 and 2004, as if the fair value based method had been applied to all outstanding and vested awards

	Year ended December 31	
	2005	2004
Net income, as reported	\$ 11,986	\$ 13,037
Less: Stock-based compensation expense, pro forma	191	74
Pro forma net income	\$ 11,795	\$ 12,963
Earnings per share:		
Basic as reported	\$ 2.09	\$ 2.27
Basic pro forma	\$ 2.06	\$ 2.26
Diluted as reported	\$ 2.07	\$ 2.25
Diluted pro forma	\$ 2.04	\$ 2.24

*New Accounting Pronouncements*

In November 2004, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standards (SFAS) No. 151, Inventory Costs, to clarify the accounting for abnormal amounts of idle facility expense, freight, handling costs and wasted material. This standard requires that such items be recognized as current-period charges. The standard also establishes the concept of normal capacity and requires the allocation of fixed production overhead to inventory based on the normal capacity of the production facilities. Any unallocated overhead must be recognized as an expense in the period incurred. The Company adopted this standard effective January 1, 2006, and the impact was immaterial on its consolidated financial statements.

Effective January 1, 2006, the Company adopted SFAS No. 123 (Revised 2004), Share-Based Payment (SFAS No. 123R). SFAS No. 123R affects the value of stock options that have been granted and requires the Company to expense share-based payment awards with compensation cost for transactions measured at fair value. For the year ended December 31, 2006 the Company recorded compensation costs related to the stock options currently vesting, reducing income before taxes and net income by \$.2 million, or \$.04 per diluted share. The Company adopted the modified-prospective-transition method and accordingly has not restated the amounts in prior periods.

In June 2006, the FASB issued FASB interpretation No. 48, Accounting for Uncertainty in Income taxes an interpretation of FASB Statement No. 109, Accounting for Income Taxes. This interpretation prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken

or expected to be taken in a tax return. This interpretation also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure, and transition. This interpretation is effective for the Company starting January 1, 2007. Upon adoption, the Company estimates that a cumulative effect adjustment of approximately \$1.1 million to \$1.3 million will be charged to retained earnings to increase reserves

**Table of Contents**

for uncertain tax positions, which is subject to revision as the Company completes its analysis.

In September 2006, the FASB issued SFAS No. 157, Fair Value Measurements. This standard defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles and expands disclosures about fair value measurements. This standard does not require new fair value measurements; however the application of this standard may change current practice for an entity. This standard is effective for financial statements issued for fiscal years beginning after November 15, 2007 and interim periods within those fiscal periods. The Company is evaluating the impact this standard will have on its consolidated financial statements.

In September 2006, the FASB issued SFAS No. 158, Employers Accounting for Defined Benefit Pension and Other Postretirement Plans. This standard requires an employer to recognize the overfunded or underfunded status of a defined benefit postretirement plan as an asset or liability in its statement of financial position and to recognize changes in the funded status in the year in which the changes occur through comprehensive income. This standard also requires an employer to measure the funded status of a plan as of the date of its year-end statement of financial position. This standard also requires disclosure in the notes to financial statements, additional information about certain effects on net periodic benefit cost for the next fiscal year that arise from delayed recognition of the gains or losses, prior service costs or credits, and transition asset or obligation. The requirement to initially recognize the funded status of a defined benefit postretirement plan and to provide the required disclosures is effective for an employer with publicly traded equity securities as of the end of the fiscal year ending after December 15, 2006. The requirement to measure plan assets and benefit obligations as of the date of the employer's fiscal year-end statement of financial position is effective for fiscal years ending after December 15, 2008. Adoption of this standard resulted in a decrease of \$2.3 million in Accumulated Other Comprehensive Income.

In September 2006, the FASB issued FASB Staff Position AUG AIR-1, Accounting for Planned Major Maintenance Activities. This staff position amends certain provisions in the AICPA Industry Audit Guide, Audits of Airlines (Airline Guide), and APB No. 28, Interim Financial Reporting. This staff position prohibits the use of the accrue-in-advance method of accounting for planned major maintenance activities in annual and interim financial reporting periods. This staff position is effective as of January 1, 2007. The Company will adopt the direct expense method effective January 1, 2007, and will record a cumulative effect increasing beginning retained earnings by \$.2 million, or \$.04 per diluted share.

In September 2006, the FASB issued Emerging Issues Task Force (EITF) abstract Issue No. 06-5, Accounting for Purchases of Life Insurance Determining the Amount that Could be Realized in Accordance with FASB Technical Bulletin No. 85-4. This issue clarifies the calculation of the amount that could be realized under an insurance contract as of the date of the statement of financial position. This issue concludes that the policyholder should consider any additional amounts included in contractual terms of the policy in determining the amount that could be realized under the insurance contract. Contractual limitations should be considered, as well as the amount recoverable by the policyholder at the discretion of the insurance company should be excluded from the amount that could be realized. All fixed amounts recoverable by the policyholder in future periods in excess of one year from the surrender of the policy should be recognized at their present values. Lastly, any amount that is realized by the policyholder upon surrender of the final policy shall be included in the amount that could be realized. This issue should be applied by either a change in accounting principle through a cumulative-effect adjustment to retained earnings or to other components of equity or net assets or a change in accounting principle through retrospective application to all prior periods. This issue is effective for fiscal years beginning after December 15, 2006. The Company is evaluating the impact this EITF issue will have on its consolidated financial statements.

In September 2006, the Securities and Exchange Commission issued Staff Accounting Bulletin No. 108 (SAB 108) to provide interpretive guidance on the considerations of the effects of prior year misstatements in qualifying current year misstatements for the purpose of materiality assessment. If a material misstatement exists after recording the adjustment in the current year financial statements, the prior year financial statements should be corrected, even though such revision previously was and continues to be immaterial to the prior year financial statements. This bulletin is effective for years ending after November 15, 2006. Effective December 31, 2006, the Company adopted SAB 108 which did not have a material effect on its consolidated financial statements.

In February 2007, the FASB issued SFAS No. 159, The Fair Value Option for Financial Assets and

**Table of Contents**

Financial Liabilities Including and Amendment to FAS No. 115. This standard permits entities to measure certain financial instruments and other certain items at fair value. The fair value option established by this standard permits all entities to choose to measure eligible items at fair value at specified election dates. A business entity shall report unrealized gains and losses on items for which the fair values option has been elected at each subsequent reporting period. The fair value option election is irrevocable, unless a new election date occurs. SFAS No. 159 establishes presentation and disclosure requirements to help financial statement users understand the effect of the entity's election on earnings, but does not eliminate disclosure requirements of other accounting standards. This standard is effective as of the beginning of the first fiscal year that begins after November 15, 2007. The Company is evaluating the impact this standard will have on its consolidated financial statements.

**Note B Other Financial Statement Information***Inventories net*

	December 31	
	2006	2005
Finished products	\$ 17,044	\$ 15,550
Work-in-process	1,844	1,732
Raw materials	25,431	23,021
	44,319	40,303
Excess of current cost over LIFO cost	(3,904)	(2,685)
	\$ 40,415	\$ 37,618

Material inventories using the LIFO method of determining costs were approximately \$15.2 million in 2006 and \$14 million in 2005.

*Property and equipment net*

Major classes of property, plant and equipment are stated at cost and were as follows:

	December 31	
	2006	2005
Land and improvements	\$ 8,422	\$ 6,762
Buildings and improvements	41,941	37,902
Machinery and equipment	101,339	93,619
Construction in progress	2,629	5,627
	154,331	143,910
Less accumulated depreciation	101,521	95,106
	\$ 52,810	\$ 48,804

Depreciation of property and equipment was \$7.1 million in 2006, \$6.7 million in 2005 and \$6.9 million in 2004.

Machinery and equipment includes \$.8 million in capital leases in 2006 and \$.4 million in 2005.

Property and equipment includes less than \$.1 million of purchases in trade accounts payable at December 31, 2006 and \$.5 million in 2005.

*Guarantees*

The Company establishes a warranty reserve when a known measurable exposure exists. Such reserves are adjusted for management's best estimate of warranty obligations based on current and historical trends. The change

**Table of Contents**

in the carrying amount of product warranty reserves for the years ended December 31, 2006 and 2005 are as follows:

	2006	2005	2004
Balance at January 1	\$ 10	\$ 177	\$ 202
Additions charged to costs	82	26	53
Deductions	(10)	(204)	(78)
Currency translation		11	
Balance at December 31	\$ 82	\$ 10	\$ 177

*Legal proceedings*

From time to time, the Company may be subject to litigation incidental to its business. The Company is not a party to any pending legal proceedings that the Company believes would, individually or in the aggregate, have a material adverse effect on its financial condition, results of operations or cash flows.

*Share Retirements*

During 2006, the Company retired 529,050 shares of common stock that had been previously held as treasury sales.

**Note C Pension Plans**

Domestic hourly employees of the Company who meet specific requirements as to age and service are covered by a defined benefit pension plan. The Company uses a December 31 measurement date for its plan.

Net periodic benefit cost for the Company's domestic plan consists of the following components for the years ended December 31:

	2006	2005	2004
Service cost	\$ 793	\$ 719	\$ 560
Interest cost	901	808	701
Expected return on plan assets	(872)	(751)	(614)
Recognized net actuarial loss	214	204	107
Net periodic benefit cost	\$ 1,036	\$ 980	\$ 754

The following tables set forth benefit obligations, assets and the accrued benefit cost of the Company's domestic defined benefit plan at December 31:

**Table of Contents**

	2006	2005
Projected benefit obligation at beginning of the year	\$ 15,957	\$ 13,534
Service cost	793	719
Interest cost	901	808
Actuarial (gain) loss	(922)	1,168
Benefits paid	(319)	(272)
Projected benefit obligation at end of year	\$ 16,410	\$ 15,957
Fair value of plan assets at beginning of the year	\$ 11,122	\$ 9,983
Actual return on plan assets	972	429
Employer contributions	653	982
Benefits paid	(319)	(272)
Fair value of plan assets at end of the year	\$ 12,428	\$ 11,122
Benefit obligations in excess of plan assets	(\$ 3,982)	(\$ 4,835)
Unrecognized net loss	3,681	4,917
Minimum pension liability		(1,161)
Accrued benefit cost	(301)	(\$ 1,079)
Adjustment to accumulated other comprehensive loss for unrecognized net loss	(3,681)	
Unfunded pension obligation	(\$ 3,982)	

The domestic defined benefit pension plan with accumulated benefit obligations in excess of plan assets was:

	2006	2005
Projected benefit obligation	\$16,410	\$15,957
Accumulated benefit obligation	12,488	12,201
Fair market value of assets	12,428	11,122

Weighted-average assumptions used to determine benefit obligations at December 31 are as follows:

	2006	2005
Discount rate	6.00%	5.75%
Rate of compensation increase	3.50	3.50

Weighted-average assumptions used to determine net periodic benefit cost for the years ended December 31 are as follows:

	2006	2005	2004
Discount rate	5.75%	5.75%	6.25%
Rate of compensation increase	3.50	3.50	3.50
Expected long-term return on plan assets	8.00	8.00	7.50

The net periodic pension cost for 2006 was based on a long-term asset rate of return of 8.0%. This rate is based upon management's estimate of future long-term rates of return on similar assets and is consistent with historical

returns on such assets.

The Company's pension plan weighted-average asset allocations at December 31, 2006 and 2005, by asset category, are as follows:

40

---

**Table of Contents**

Asset category	Plan assets at December 31	
	2006	2005
Equity securities	65.0%	59.1%
Debt securities	32.6	39.4
Cash and equivalents	2.4	1.5
	100.0%	100.0%

Management seeks to maximize the long-term total return of financial assets consistent with the fiduciary standards of ERISA. The ability to achieve these returns is dependent upon the need to accept moderate risk to achieve long-term capital appreciation.

In recognition of the expected returns and volatility from financial assets, retirement plan assets are invested in the following ranges with the target allocation noted:

	Range	Target
Equities	30-80%	60%
Fixed Income	20-70%	40%
Cash Equivalents	0-10%	

Investment in these markets is projected to provide performance consistent with expected long-term returns with appropriate diversification.

The Company's policy is to fund amounts deductible for federal income tax purposes. The Company expects to contribute \$.5 million to its pension plan in 2007.

The benefits expected to be paid out of the plan assets in each of the next five years and the aggregate benefits expected to be paid for the subsequent five years are as follows:

Year	Pension Benefits
2007	\$ 323
2008	380
2009	428
2010	461
2011	503
2012-2016	3,598

Because this is the first disclosure under SFAS No. 158, the charge to other comprehensive income is the full unrecognized net loss. The estimated net loss for the defined benefit pension plan that will be amortized from accumulated other comprehensive income into periodic benefit cost for 2007 is \$.1 million. There is no prior service cost to be amortized in the future.

The incremental effect of applying FASB Statement No. 158 on individual line items in the statement of financial position is as follows:

**Table of Contents**

	December 31, 2006		After Application of Statement 158
	Before Application of Statement 158	Adjustment	
Deferred income taxes	\$ 3,790	\$ 1,355	\$ 5,145
Total assets	169,608	1,355	170,963
Unfunded pension obligation	301	3,681	3,982
Accumulated other comprehensive loss	(10,758)	(2,326)	(13,084)
Total shareholders' equity	133,259	(2,326)	130,933
Total liabilities and shareholders' equity	169,608	1,355	170,963

Expense for defined contribution plans was \$3.7 million in 2006, \$3 million in 2005, and \$2.8 million in 2004.

**Note D Debt and Credit Arrangements**

	December 31	
	2006	2005
<b>Short-term debt</b>		
Secured Notes		
Chinese Rmb denominated at 5.4% in 2006 (5.58% in 2005)	\$ 385	\$ 496
Thailand Baht denominated at 6.08% in 2006 (6.15% in 2005)	3,353	660
Current portion of long-term debt	2,157	4,806
Total short-term debt	5,895	5,962
<b>Long-term debt</b>		
Australian dollar denominated term loans (A\$4,967), at 5.83 to 6.54% (5.56 to 5.88% in 2005), due 2008 and 2013, secured by land and building	3,910	2,730
Australian dollar denominated term loans (A\$2,594) at 6.50 to 7.00% in 2005, due 2006		1,889
Australian dollar denominated capital loan (A\$1,137) at 6.80% (6.80% in 2005), due 2007 and 2009	451	285
Brazilian Reais denominated term loan (R\$848) at 15.30% in 2005, due 2006		24
Total long-term debt	4,361	4,928
Less current portion	(2,157)	(4,806)
	2,204	122
Total debt	\$ 8,099	\$ 6,084

A domestic revolving credit agreement makes \$20 million available to the Company at an interest rate of money market plus .875%. At December 31, 2006, the interest rate on the revolving credit agreement was 6.1875%. However, there was no debt outstanding at December 31, 2006 on the revolving credit agreement. The Company paid less than \$.1 million in commitment fees on the revolving credit agreement during 2006. The revolving credit agreement contains, among other provisions, requirements for maintaining levels of working capital, net worth and

profitability. At December 31, 2006, the Company was in compliance with these covenants.

Aggregate maturities of long-term debt during the next five years are as follows: \$2.2 million for 2007, \$.8 million for 2008, \$.4 million for 2009, \$.3 million for 2010 and 2011.

Interest paid was \$.5 million in 2006 and \$.4 million in 2005 and 2004.

**Table of Contents****Note E Leases**

The Company has commitments under operating leases primarily for office and manufacturing space, transportation equipment, office equipment and computer equipment. Rental expense was \$1.3 million in 2006 and 2005, and \$1.2 million in 2004. Future minimum rental commitments having non-cancelable terms exceeding one year are \$1 million in 2007, \$.9 million in 2008 and 2009, \$.8 million in 2010 and 2011, and an aggregate \$11.3 million thereafter. One such lease is for our aircraft with a lease commitment through April 2012. Under the terms of the lease, we maintain the risk for the residual value in excess of the market value of the aircraft. At the present time, we believe our risks, if any, to be immaterial because the estimated market value of the aircraft approximates its residual value.

The Company has commitments under capital leases for equipment. Future minimum rental commitments for capital leases are \$.3 million in 2007, \$.2 million in 2008, and less than \$.1 million thereafter. The imputed interest for the capital leases is less than \$.1 million.

**Note F Income Taxes**

The provision for income taxes is based upon income before tax and equity in net income of joint ventures for financial reporting purposes. Deferred tax assets and liabilities are recognized for the expected future tax consequences of temporary differences between the tax basis of assets and liabilities and their carrying value for financial statement purposes. In estimating future tax consequences, the Company considers anticipated future events, except changes in tax laws or rates, which are recognized when enacted.

The components of income tax expense for the years ended December 31 are as follows:

	2006	2005	2004
Current			
Federal	\$ 1,361	\$ 3,330	\$ 3,084
Foreign	4,592	3,621	2,372
State and local	221	407	343
	6,174	7,358	5,799
Deferred			
Federal	(263)	(612)	(462)
Foreign	(365)	(234)	(66)
State and local	(30)	8	(3)
	(658)	(838)	(531)
	\$ 5,516	\$ 6,520	\$ 5,268

The differences between the provision for income taxes at the U.S. statutory rate and the tax shown in the Statements of Consolidated Operations for the years ended December 31 are summarized as follows:

**Table of Contents**

	2006	2005	2004
Statutory Federal Tax Rate	34%	35%	35%
Federal tax at statutory rate	\$ 5,976	\$ 6,477	\$ 6,407
State and local taxes, net of federal benefit	164	269	224
Non-deductible expenses	109	196	141
Foreign earnings and related tax credits	47	(521)	(147)
Non-U.S. tax rate variances	(132)	(173)	(298)
Capital gain on the sale of foreign joint venture			(173)
Valuation allowance	(527)	343	(759)
Tax credits	(168)	(175)	(168)
Other, net	47	104	41
	\$ 5,516	\$ 6,520	\$ 5,268

The tax effects of temporary differences that give rise to significant portions of the Company's deferred tax assets (liabilities) at December 31 are as follows:

	2006	2005
Deferred tax assets:		
Accrued compensation and benefits	\$ 1,033	\$ 1,073
Depreciation and other basis differences	445	716
Inventory valuation reserves	1,543	1,234
Allowance for doubtful accounts	207	166
Benefit plans reserves	1,611	632
Foreign tax credits	4,235	4,364
NOL carryforwards	648	694
Other accrued expenses	1,158	943
Gross deferred tax assets	10,880	9,822
Valuation allowance	(2,119)	(2,646)
Net deferred tax assets	8,761	7,176
Deferred tax liabilities:		
Depreciation and other basis differences	(1,128)	(1,104)
Undistributed foreign earnings	(81)	
Inventory	(89)	(133)
Prepaid expenses	(96)	(123)
Other	(22)	(43)
Net deferred tax liabilities	(1,416)	(1,403)
Net deferred tax assets	\$ 7,345	\$ 5,773

2006 2005

Change in net deferred tax assets:		
Deferred income tax benefit	\$ 658	\$ 838
Items of other comprehensive income	914	182
Total change in net deferred tax assets	\$ 1,572	\$ 1,020

Deferred taxes are recognized at currently enacted tax rates for temporary differences between the financial reporting and income tax bases of assets and liabilities and operating loss and tax credit carryforwards.

**Table of Contents**

At December 31, 2006, the Company had \$4.2 million of foreign tax credit carryforwards that will expire in 2014. At December 31, 2006, the Company had \$.4 million state and \$.2 million foreign operating loss carryforwards, which will expire in 2009 through 2021. The Company has established a valuation allowance to record its deferred tax assets at an amount that is more likely than not to be realized. The valuation allowance of \$2.1 million at December 31, 2006, relates to foreign tax credits and loss carryforwards that may expire before being realized. The net reduction in the valuation allowance was \$.5 million in 2006. In 2005, the net increase in the valuation allowance was \$.3 million, resulting from a \$1.2 million increase in foreign tax credits available, a net increase on the valuation allowance of \$.2 million for other activity, and a \$1.1 million decrease due to a reassessment of utilizable foreign tax credits.

As of December 31, 2006, the Company has established a deferred tax liability of \$.1 million associated with its plans to repatriate approximately \$2.4 million of its undistributed foreign earnings. Upon repatriation, the associated U.S. income taxes will be fully offset by foreign tax credit carryforwards. The Company has not provided for U.S. income taxes or foreign withholding taxes on the remaining undistributed earnings of its foreign subsidiaries, which are considered to be permanently reinvested. The amount of such earnings is approximately \$47.5 million at December 31, 2006. These earnings would be taxable upon the sale or liquidation of these foreign subsidiaries, or upon the remittance of dividends. While the measurement of the unrecognized U.S. income taxes with respect to these earnings is not practicable, foreign tax credits would be available to offset some or all of any portion of such earnings that are remitted as dividends.

In accordance with the applicable tax laws in China, the Company was entitled to a preferential tax rate of 0% for the first two profit making years after utilization of any tax loss carryforwards, which may be carried forward for five years; and a 50% tax reduction for the succeeding three years beginning in 2003. The favorable aggregate tax and per share effect was less than \$.1 million, or less than \$.01 per share, for 2005 and 2004.

Income taxes paid, net of refunds, were approximately \$5.3 million in 2006, \$7.6 million in 2005, and \$7.3 million in 2004.

**Note G -Stock Options**

The 1999 Stock Option Plan (the Plan) permits the grant of 300,000 options to buy common shares of the Company to certain employees at not less than fair market value of the shares on the date of grant. At December 31, 2006 there were 42,000 shares remaining available for issuance under the Plan. Options issued to date under the Plan vest 50% after one year following the date of the grant, 75% after two years, and 100% after three years and expire from five to ten years from the date of grant. Shares issued as a result of stock option exercises will be funded with the issuance of new shares.

Effective January 1, 2006, the Company adopted SFAS No. 123 (Revised 2004), Share-Based Payment (SFAS No. 123R). SFAS No. 123R affects the value of stock options that have been granted and requires the Company to expense share-based payment awards with compensation cost for transactions measured at fair value. The Company adopted the modified-prospective-transition method and accordingly has not restated amounts in prior periods. The Company has elected to use the simplified method of calculating the expected term of the stock options and historical volatility to compute fair value under the Black-Scholes option-pricing model. The risk free rate for periods within the contractual life of the option is based on the U.S. zero coupon Treasury yield in effect at the time of grant. Forfeitures have been estimated to be zero.

There were no options granted for the year ending December 31, 2006. The fair values for the stock options granted in 2005 and 2004 were estimated at the date of grant using the Black-Scholes option-pricing model with the following weighted average assumptions:

**Table of Contents**

	2005	2004
Risk-free interest rate	4.1%	3.5%
Dividend yield	3.4%	4.6%
Expected life	9 years	10 years
Expected volatility	38.8%	38.9%

Activity in the Company's stock option plan for the year ended December 31, 2006 was as follows:

	Number of Shares	Weighted Average Exercise Price per Share	Weighted Average Remaining Contractual Term (Years)	Aggregate Intrinsic Value
Outstanding at January 1, 2006	140,742	\$ 22.82	7.0	
Granted				
Exercised	(9,931)	\$ 14.88		\$ 223
Forfeited or expired				
Outstanding (vested and expected to vest) at December 31, 2006	130,811	\$ 23.43	6.2	\$1,649
Exercisable at December 31, 2006	102,811	\$ 20.72	5.6	\$1,545

The weighted average grant-date fair value of options granted during 2005 and 2004 was \$1 2.19 and \$5.88, respectively. The total intrinsic value of stock options exercised during the years ended December 31, 2006, 2005 and 2004 was \$.2 million, \$.9 million, and less than \$.1 million, respectively. The total fair value of stock options vested during the years ended December 31, 2006, 2005 and 2004 was \$.3 million, \$.1 million, and \$.1 million, respectively.

For the year ended December 31, 2006 the Company recorded compensation expense related to the stock options currently vesting, reducing income before taxes and net income by \$.2 million. The impact on earnings per share was a reduction of \$.04 per share, basic and diluted. The total compensation cost related to nonvested awards not yet recognized is expected to be a combined total of \$.2 million over a weighted-average period of 1.5 years.

Activity for nonvested stock options for the year ended December 31, 2006 was as follows:

	Number of Shares	Weighted- Average Grant Date Fair Value per Share
Nonvested at January 1, 2006	62,500	\$ 9.77
Granted		
Vested	(34,500)	\$ 9.08
Forfeited		
Nonvested at December 31, 2006	28,000	\$ 10.61

**Table of Contents****Note H Computation of Earnings Per Share**

<i>In thousands, except per share data</i>	Year ended December 31		
	2006	2005	2004
Numerator			
Net income	\$ 12,060	\$ 11,986	\$ 13,037
Denominator			
Determination of shares			
Weighted average common shares outstanding	5,611	5,725	5,732
Dilutive effect employee stock options	49	58	57
Diluted weighted average common shares outstanding	5,660	5,783	5,789
Earnings per common share			
Basic	\$ 2.15	\$ 2.09	\$ 2.27
Diluted	\$ 2.13	\$ 2.07	\$ 2.25

For the years ended December 31, 2006 and 2005, 18,000 stock options were excluded from the calculation of earnings per share due to the average market price being lower than the exercise price, and the result would have been anti-dilutive. For the year ended December 31, 2004, no stock options were excluded from the calculation of earnings per share due to the average market price being greater than the exercise price.

**Note I Goodwill and Other Intangibles**

	December 31	
	2006	2005
Goodwill	\$ 2,726	\$ 2,578
Intangible assets	5,026	5,026
	7,752	7,604
Less accumulated amortization	3,040	2,715
	\$ 4,712	\$ 4,889

The Company performed its annual impairment test for goodwill pursuant to SFAS No. 142, Goodwill and Other Intangible Assets as of January 1, 2006, 2005, and 2004, and had determined that no adjustment to the carrying value of goodwill was required. The Company's only intangible asset with an indefinite life is goodwill, which is included within the foreign segment. The aggregate amortization expense for other intangibles with finite lives, ranging from 10 to 17 years, was \$.3 million for the year ended December 31, 2006, and \$.4 million for the years ended December 31, 2005 and 2004. Amortization expense is estimated to be \$.3 million for 2007, 2008, 2009, 2010 and 2011.

The following table sets forth the carrying value and accumulated amortization of intangibles, including the effect of foreign currency translation, by segment at December 31, 2006 and 2005:

	As of December 31, 2006			As of December 31, 2005		
	Domestic	Foreign	Total	Domestic	Foreign	Total
Amortized intangible assets						

Edgar Filing: PREFORMED LINE PRODUCTS CO - Form 10-K

Gross carrying amount patents and other intangibles	\$ 4,947	\$ 79	\$ 5,026	\$ 4,947	\$ 79	\$ 5,026
Accumulated amortization patents and other intangibles	(2,423)	(57)	(2,480)	(2,108)	(47)	(2,155)
Total	\$ 2,524	\$ 22	\$ 2,546	\$ 2,839	\$ 32	\$ 2,871

47

---

**Table of Contents**

The changes in the carrying amount of goodwill for the years ended December 31, 2006 and 2005, is as follows:

Balance at January 1, 2005	\$ 2,130
Currency translation	(112)
Balance at December 31, 2005	2,018
Currency translation	148
Balance at December 31, 2006	\$ 2,166

**Note J Business Segments**

The Company designs, manufactures and sells hardware employed in the construction and maintenance of telecommunication, energy and other utility networks. Principal products include cable anchoring and control hardware, splice enclosures and devices which are sold primarily to customers in North and South America, Europe, South Africa and Asia Pacific.

The Company's segments are based on the way management makes operating decisions and assesses performance. The Company's operating segments are domestic and foreign operations. The accounting policies of the operating segments are the same as those described in Note A in the Notes To Consolidated Financial Statements. For the year ending December 31, 2006, the Company's Brazilian operation accounted for 11%, and its Australian operation accounted for 12% of the Company's consolidated net sales and assets. For the year ending December 31, 2005, its Australian operation accounted for 11% of the Company's consolidated net sales and assets. No individual foreign operation accounted for 10% or more of the Company's consolidated net sales or assets for the year ended December 31, 2004. It is not practical to present revenues by product line by segments.

Operating segment results are as follows for the year ended December 31:

**Table of Contents**

	2006	2005	2004

**Table of Contents****Note K Related Party Transactions**

The Company, upon the approval of the Audit Committee of the Board of Directors, purchased from the estate of Jon R. Ruhlman Lot 61 at the Champions Golf and Country Club in Rogers, Arkansas, at a price of \$275,000. The price was determined based on the appraisal of Lot 61 and the fair market price in which the Company had sold a comparable lot. The Company owned four other lots in this development and considered Lot 61 more attractive than any of the lots owned by the Company, which are listed for resale. Jon R. Ruhlman was the previous Chairman of the Company's Board of Directors and the late husband of Barbara P. Ruhlman and late father of Robert G. Ruhlman and Randall M. Ruhlman, all of whom are members of the Board of Directors. The purchase was consummated pursuant to an Agreement of Purchase and Sale between the Company and Estate of Jon R. Ruhlman and Mrs. Ruhlman, Executrix, dated January 30, 2006.

On September 8, 2006, the Company, upon the approval of the Audit Committee of the Board of Directors and the Board of Directors, purchased 365,311 Common Shares of the Company from Barbara P. Ruhlman at a price per share of \$31.48. The Audit Committee, which is comprised solely of independent directors, acted as a special committee of the Board of Directors in connection with the review of the transaction with Mrs. Ruhlman. In connection with its review, the Audit Committee engaged an investment banking firm to serve as its financial advisor. Barbara P. Ruhlman is a member of the Company's Board of Directors and the mother of Robert G. Ruhlman and Randall M. Ruhlman, both of whom are also members of the Board of Directors. The purchase was consummated pursuant to a Shares Purchase Agreement between the Company and Mrs. Ruhlman, as trustee, under trust agreement dated February 16, 1985, dated September 9, 2006.

The Company is a sponsor of Ruhlman Motorsports. Ruhlman Motorsports is owned by Randall M. Ruhlman, a director of the Company, and by his wife. In 2006, 2005 and 2004 the Company paid sponsorship fees of \$950,000, \$658,000, and \$658,000, respectively, to Ruhlman Motorsports. In addition, in 2005 and 2004 the Company's Canadian subsidiary, Preformed Line Products (Canada) Ltd., paid \$101,000, and \$106,000, respectively, to Ruhlman Motorsports in sponsorship fees.

**Note L Investment in Foreign Joint Venture**

During the third quarter of 2004 the Company sold its 49% ownership minority interest in its joint venture, Japan PLP Co. Ltd., which had been accounted for by the equity method. Proceeds of the sale were approximately \$1.9 million, and the transaction resulted in a pretax gain of \$2.3 million, which included the reversal of \$1.7 million in cumulative translation adjustment related to the equity investment. The entire amount of the proceeds was taxable resulting in a tax of \$.6 million and therefore reduced the gain to \$1.7 million after-tax. Dividends received from this joint venture totaled \$2.1 million in 2004.

Summarized financial information for the Company's equity-basis investment in Japan PLP Co. Ltd. was as follows for the year ended March 31, 2004:

## Income statement information:

Revenues	\$ 11,448
Gross profit	4,042
Operating income	1,245
Net income	693

## Financial position information:

Current assets	7,253
Noncurrent assets	4,355
Current liabilities	3,118
Noncurrent liabilities	1,719
Net worth	6,771

**Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure**

None

**Item 9A. Controls and Procedures**

An evaluation was performed under the supervision and with the participation of the Company's management, including the Chief Executive Officer and Vice President of Finance and Treasurer, of the effectiveness of the Company's disclosure controls and procedures (as defined in Securities and Exchange Act Rules 13a-15(e) and 15d-15(e)) as of December 31, 2006. Based on the evaluation, the Company's management, including the Chief Executive Officer and Vice President of Finance and Treasurer, concluded that the Company's disclosure controls and procedures were effective as of December 31, 2006.

Management's report on internal control over financial reporting and the attestation report of the independent registered public accounting firm regarding our internal control over financial reporting is provided in Item 8 of this report.

There were no changes in the Company's internal control over financial reporting during the quarter ended December 31, 2006 that materially affected or are reasonably likely to materially affect the Company's internal control over financial reporting.

**Item 9B. Other Information**

None

**Part III****Item 10. Directors and Executive Officers of the Registrant**
