Item 8.01 Other Events.

Medicis Pharmaceutical Corporation (the Company) reported that the United States Patent and Trademark Office (USPTO) granted a Request for Ex Parte Reexamination of the Company's U.S. Patent No. 5,908,838 (the 838 patent) related to SOLODYN®. During the reexamination process, the USPTO will review the patent and could determine that the patent claims, as written, were properly allowed. This determination would assist the Company in defending challenges to the validity of the 838 patent. Alternatively, the USPTO could narrow or reject certain or all of the claims of the 838 patent. Depending upon the specifics of what narrowing amendments are required and the claims rejected, these determinations of the USPTO could have a material adverse impact on the Company's results of operations. The timing of the USPTO's completion of the reexamination is uncertain. The Company believes that the USPTO should reconfirm the validity of the 838 patent. However, there can be no guarantee as to the outcome.

The disclosures set forth in this Item 8.01 speak only as of the date of this Current Report on Form 8-K, and the Company disclaims any intention or obligation to update or revise any such statements to reflect new information, future events or developments or otherwise, except as required by law.
